

7.1.2 :

LED Bulb

- The institute is located away from the town in an environment friendly campus. The campus is full of greenery with well ventilated class rooms where natural air and sunlight directly enter the classrooms. Usage of LED bulbs is practiced to conserve the energy.
- Students are instructed to switch off fans and lights when not in use. Inverters and batteries are used for sustainable energy supply.

7.1.2 Percentage of Annual Lighting Power requirement met through LED bulbs

Year	Power Requirement met by Renewable energy sources	Total Power Requirement in KWh	Formula Annual Power Requirement met by Renewable energy sources/ Annual Power RequirementX100 Annual Power Requirement met by Renewable energy sources/ Annual Power RequirementX100
2019-2020	LED Bulbs	8387	0.0008
