# DIGITAL HERBARIUM

- Digital Herbarium is an online collection of **herbaria specimen images** and **record information**.
- It concerns with a collection of digital images of preserved plants or plant parts.
- It was established to improve availability of specimens to a wider audience.
- Additional information about each specimen, such as the location, name of the collector, and the botanical name are attached to every specimen.
- Digital herbaria are established in part to increase the **longevity of specimens** in digital form.
- Students collected Herbarium specimens are digitized and kept in college website for use of students and stake holder's future reference purpose. Bentham&Hooker's system of classification is followed
- Every year new specimens identified are added to the existing data base.
