

Community service

Awareness on seasonal diseases in sammaiah nagar and nearby waddepally area.

Objective:

To Conduct outreach programme on awareness on seasonal diseases like Typhoid, malaria, and dengue in summer, hepatitis A, diarrhea in monsoon, and flu and bronchitis in winter are some of the seasonal diseases in sammaiah nagar and nearby waddepally area.

Health club in collaboration with zoology department as part of social responsibility organized an awareness programme on seasonal diseases. The department of zoology HOD Dr. G. Suhasini and B. Kalpana health club convener and life science students created awareness on seasonal diseases in Sammaiah nagar and to the local community people nearby waddepally village, the students explained about the seasonal diseases, precautions and the preventive measures to be taken and also explained the difference between seasonal diseases and COVID 19 symptoms on **26/10/2021**.

The precautions explained by the students to reduce the risk of contracting these diseases:

- **Make sure that there are no pools of stagnant water. Keep water containers clean and ensure that flower containers and plates do not hold stagnant water.**
- **Use insect repellents to avoid being bitten by mosquitoes.**
- **Wash hands before eating**
- **Avoid eating in unhygienic places**
- **Drink boiled water**
- **Avoid exposure to people infected with viral diseases**

OUT COME:

The programme was helpful for nearly 30 to 40 families and some of the families were not aware of the seasonal diseases this programme they were enlightened, benefited and thanked the health club convener and HOD zoology department and the students and request to visit and guide them frequently.

Awareness on COVID Vaccination Drive

Objective:

As a part of Social responsibility the health club and department of zoology to create awareness to the local people on the COVID vaccination drive so that the people of local area get benefitted

Health club convener B.Kalpana with zoology department of HOD Dr. G. Suhasini and the students of life sciences went to each and every houses around the waddepally and created **Awareness on COVID Vaccination Drive** which would be conducted in our college campus on **21/09/2021**.

Outcome:

The programme was helpful for all the community people and nearly total 1753 people vaccinated and the students also got vaccinated with the collaboration of primary health center, waddepally, Hanumakonda.
