

Tara Government College Sangareddy (Autonomous)

An ISO 9001: 2015 certified college

Department of Botany

MEDICINAL GARDEN

The cultivation of a medicinal plants in a garden is known as medicinal garden. The garden is developed to preserve and promote the medicinal values of the plants which grow wild, in our surroundings whose properties are beneficial in maintaining a balance between the man and the nature. They are the precious source of raw materials for the medicinal remedies used in primary health care. The medicinal garden consists of all the herbs which have medicinal and aromatic properties.

We have different varieties of medicinal plants in our garden like *Elattaria cardamomum*; *Syzygium aromaticum*; *Carica papaya*; *Emblica officinalis*; *Aegle mormelose*; *Lawsonia inermis*; *Cymbopogon citratus*; *Aloe vera*; *Stevia rebaudiana*; *Carissa carindus*; *Terminalia chebula*; *Withania somnifera*; *Raulfia serpentine*; *Piper nigrum*; *Coleus*; *Chamaecostus cuspidatus* etc.

Objectives:

1. To motivate the students to develop the medicinal /Herbal garden.
2. To know and learn about the different types of medicinal plants which can be grown in our surroundings.
3. To know about the medicinal values and uses of these plants.
