CONCLUSION:

As a part of this project, we conclude the below aspects:

Simplicity is never simple, as we have seen in this project; the process of creating a user-friendly and straightforward platform that facilitates the administrator's job is easy.

From understanding user requirements to System Design and finally system prototype and finalization, every step requires and commitment towards achieving the objectives of the project.

Although the student Profile management module is not fully integrated to the system and used on real time. The system prototype demonstrates easy navigation and data are stored in a systematic way. Overall, efficiency has improved and work processes simplified. Although all the objectives have been met, the system still has room for improvement. The system is flexible enough for future upgrade using advanced technology.
