

# GOLDEN ANGLE ( $137.5^\circ$ )

03-01-2023

The Department of mathematics faculty members are introduced innovative activities of students to enhance their skills and some contributes towards mathematics. So in this part the final year B.Sc (Impc Imp'd) students are made one article is Rectangle scale ( $137.5^\circ$ ) which is very interesting one of everything specially for plants. We are identify the angle of any two flower petals and branches of tree with  $137.5^\circ$  so which is amazing and good innovative thought of students. We are observing in our college grounds maximum of flower petals and tree branches are follows the angle  $137.5^\circ$  which is very good one inspiration to other students.
