OBJECTIVES OF THE PROGRAM:

- 1)Field trips are most commonly undertaken in 3 steps: planning, activities and activity follow-up. The relation between theory and its practicality is densely distorted. In addition, because of the curriculum concentrating on theoretical learning, the various challenges students face in the real world due to the mugging of textbooks have further complicated it.
- 2)The primary aim of a field visit is to gather geographical details. Reinforcing experiential and relational learning is the key goal of conducting a field trip for students. Field trips are a way of improving learning in the classroom by creating links to the real world. Field trips introduce students to diverse lifestyles, locations and eras.
