FRESH FACTS ABOUT VEGETARIANISM.

- * The first vegetarian society was formed in England in 1847. The society's goal was to teach people that it is possible to be healthy without eating meat.
- * The average American eats approximately 222 pounds of meat per year. This does not include seafood.
- * 25 gallons of water are needed to produce 1 pound of wheat. Around 2,500 gallons of water are needed to produce 1 pound of meat.
- * Vegetarianism has roots in ancient India. In fact currently 70% of the world's vegetarians are Indians and there are more vegetarians in India than in any other country in the world.
- * A British study revealed that a child's IQ could help predict his or her chance for becoming a vegetarian. The higher the IQ, the more likely the child will become vegetarian.
- * Research reveals that if a man avoids red meats, it improves the sex appeal of his body odor.
- * Vegetarians have only slightly lower protein intake than those with a meat diet. Various studies around the world confirm that vegetarian diets provide energy protein if they include a variety of plant sources.

DINOSAURS

- * Dinosaurs walked the earth for over 165 million years.
- * Lived during a period of time known as the Mesozoic Era.
or Age of Reptiles.
- * The word dinosaur means terrifying lizard. This name was invented by Sir Richard Owen in 1842.
- * The oldest known dinosaur is Eoraptor, a meat-eater that lived 228 million years ago.
- * Most dinosaurs hatched from eggs and they could not fly or live in water.
- * Dinosaurs are classified as reptiles, based on the structure of the hip. One group has lizard-like hips and the other group has bird-like hips.
- * Most palaeontologists, scientists that study dinosaurs, believe that birds are the only surviving dinosaurs. So they aren't really extinct because their descendants are still living.
- * The biggest dinosaurs were over 100 feet long and 50 feet tall, the sauropod was the largest dinosaur, the smallest dinosaurs were the size of a chicken and were called *mussaurus*, or mouse lizard.
- * Some dinosaurs were carnivores, meat eaters, and some were herbivores, plant eaters.
