CLASS ROOM GROUP DISCUSSION 2020-2021

* Interaction with Parents during Pandemic *

With the hit of the Pandemic it was a mandatory to close all the Educational Institutes and Online classes served as the best alternative yet there was a remarkable low tide regarding the number of students in attending online classes. Even the few students who had been attending were not being regular. In order to know the practical problems the students and their families were undergoing during the Pandemic and just to strengthen up and build a positive ethos, a few mutual Interaction sessions were undertaken by the Department of English with the students and their parents. These interactions gave a scope to understand the practical problems students were facing and the reasons for their irregularity and inability to attend online classes and also served as a platform to exchange moral courage and strength to face the Pandemic collectively.
