### Synopsis:

- In computing, a **visual programming language** (**visual programming system, VPL**, or, **VPS**) is any programming language that lets users create programs by manipulating program elements *graphically* rather than by specifying them *textually*.
- A VPL allows programming with visual expressions, spatial arrangements of text and graphic symbols used either as elements of syntax or secondary notation.

### Feedback:

- By using Visual Programming User can understand Application usage very easily, and perform operations in the mode of Graphical User Interface.
