GOVERNMENT DEGREE COLLEGE BHADRACHALAM

DEPARTMENT OF BOTANY

FILED VISIT

23-03-2021

PLACE OF VISIT :

Heavy water plant. Aswapuram

OBJECTIVES :

To observe the production process of the heavy water.

REPORT:

The Heavy Water Plant is an unit of Central Atomic Research Institute which is located at Aswapuram 40 kilometres away from our college on the bank of river Godavari. The plant is started in the year 1982 and is producing heavy water (Deuterium oxide) for the last twenty years. The Deuterium Oxide is used as a coolant in atomic power plants.

The plant is meeting the needs of atomic power plants of the country as well as some foreign countries. The major activity of plant is production of heavy water with stringent quality control. Even though the primary usage of heavy water is in atomic power plants as a moderator, it also has many other usages both scientifically and commercially.

Hence it is thought that this place is a good choice to visit and to know about the scientific process of heavy water production and its quality control. We approached the concerned authorities to get the required permission as it is a prohibited and secured place. The authorities after through check permitted our team to visit the place.

On the day of visit our team first taken to the resource centre where the officials explained about the technical process of heavy water production and also about the commercial aspect of the product.

DEPARTMENT OF BOTANY

FILED VISIT

20-2-2021

PLACE OF VISIT :

Sompalli village

OBJECTIVES :

To observe and learn about practices of nursery establishment and commercialization of nursery.

To observe and know the technical and business aspects of the agro based industry

REPORT:

An agricultural organization called the Pioneer association is working on sustainable agriculture through agro forestry method. This organization is established by young educated youth who are very much interested in agriculture and wish to make agriculture into an lucrative profession by adapting latest, environmental friendly, low cost practices which in turn make more profit to the farmers and make the agriculture as a attractive profession for youth.

In order to achieve the target the organization established a nursery at Banzara village, there they growing the saplings of economically potential plants. The organization is supplying these saplings to the farmers at nominal price. The organization is maintaining a demonstrative field of approximately ten acres at Sompalli village in Burgampahad mandal, where they are growing the commercially valuable species in a précised technical manner to reap up good yield. To obtain a continuous yield they planted annual, perennial species in a précised manner to assure the continuous yield.

The student s visited the nursery and learned about the technical procedure fallowed to grow saplings in a commercial scale and also about the practices specific to each species. The nursery is growing splings of various commercially valuable species and supplying them to farmers. The students observed the procedures and practices adapted in nursery.

The students visited the demonstration field established at Sompalli village of Burgampahad mandal, where the organization is growing the commercially voluble perennial plants along with annual good yielding vegetable crops as intercropping. With this method the organizers are demonstrating the sustainable income obtaining method to farmers.

In the exhibition field the organizers are practicing natural farming. The students observed the field and preparation of natural pesticides and fertilizers. The students observed the merits and demerits of the procedures they followed and some of them tried their hand in the field preparations.

OBSERVE AND LEARN ABOUT PRACTICES OF NURSERY ESTABLISHMENT AND COMMERCIALIZATION of nursery

FILED VISIT

20-01-2020

PLACE OF VISIT :

Morampally banzar

OBJECTIVES :

To observe the process of paper pulp based egg tray manufacturing process an agro based industry.

REPORT :

The Mahalakshmi industries is an agrobased industry involved in the manufacturing of egg trays from paper pulp. The raw material paper pulp is a industrial waste generated at ITC Bhadrachalm paper boards limited which is an public limited industry located in Bhadrachalam. The product made by the industry is in great demand in poultry industry. In poultry industry these trays are used to pack and transport the eggs.

During the visit the students observed the manufacturing process of the egg trays and enquired about the raw materials they use. The students also studied the cost of production raw material availability, difficulties in the manufacturing and marketing. They made SWAT analysis of the industry.

The students also come to know that from the waste generated in one industry an another industry can be started and generate wealth.
