

PUBLIC AWARENESS CAMPAIGNS ON 4 INVASIVE PLANT SPECIES ISSUES

This activity encourages students / teachers to make a difference in the area they live in and either (1) educate the public about invasive species, (2) change your lifestyle to prevent introduction of invasive species, or (3) take on a project to highlight and/or eradicate an invasive species in your area

Awareness was given to local people of Rangasaipet and around small villages about the adverse effects of invasive plant species , which are grow along with our native species .Invasive alien species have devastating impacts on native biota, causing decline or even extinctions of native species, and negatively affecting ecosystems .

Ageratum conizoides

Lantana camera

Hyptis suaveolens

Prosopis julifera
