

FIELD TRIP

DEPARTMENT OF BOTANY

Field study is an essential part of Botany .The natural environment i.e the surroundings where we all interact the plants in their Natural Habitat is one of the most interesting things that is needed to be studied by the students of Life Science. Studying of plants in the natural habitat enhances our knowledge that is learn from the classroom discussions and laboratory experiments.

Objectives of the field trip

1. To observe the and collect the plant species from field work
2. To study natural habitats and characters of the plants found in the area
3. To collect some plants pieces for a bearing preparation submission for examination
4. The collected plants may be kept and used for reference studies.
