

The facilities available in college for management of Degradable and Non – degradable waste:

Solid Waste Management

The degradable waste is collected and converted into compost pit made in the college campus and it is used for the growth of the campus plants. Students actively participate in preparing compost. Dustbins are kept in each class room for collection of waste.

Compost making

Liquid waste management: The college has underground drainage system and the waste water coming from wash rooms is emptied into drainage .

e- waste management : Damaged batteries , computers are stored in store room and they are disposed after getting permission from CCE.
