Rs. 1950/-

The book covers number of issues. It included estimation of enrolment rate in higher education at all India level and at State and district levels with alternative sources of data. It also includes the estimation of enrolment rate at disaggregate level by various groups (such as scheduled caste, scheduled tribe, other backward castes and higher castes, women, religious groups and economic groups like self-employed and wage labour, groups based on income level and poor – non-poor). Some papers deal with the issue of quality and excellence in higher education. The issues related to the teachers formed the main component of the studies on the quality of higher education. The other issues, the studies addressed, relate to academic reform, privatization of higher education and financing of higher education. The results of these studies have helped in developing the Approach and Strategy of the 12th Plan for higher education. Since these studies are based on the serious research and examination of official data, the findings in many ways are new and insightful. These studies, not only bring about the progress which has been made so far but also point towards the emerging

Indian Higher Education System: Challenges and Suggestions

Dr.Kandi Kamala, Asst Professor
Dept. of Political Science, Government Degree College for
Women (Autonomous) Begumpet

Dr.Gedamkamalakar
Dept of Political Science Osmania University Hyderabad TelanganaIndia

Abstract

Over the past 20 years, universities have been faced with sustained change, driven by external factors. This has led to the evolution of the teaching and research mission and the creation and rise of the third mission. Such mission extension has led to the emergence of entrepreneurial universities which has seen a move from traditional research and teaching business models to business models which incorporate a much wider range of activities, to meet stakeholder

and each of the lessons that he claims the world community is supposed to have learned are neatly and argumentatively woven in ten different chapters.

Pandemic Induced Imperatives for New Dimensions in Higher Education
Dr. Kandi Kamala

World over Education was the worst affected sector of polity amidst COVID-19 driven Pandemic. Right from elementary system of education to different centres of learning in Higher education were shut down as these were presumably the most vulnerable places for spread of the Corona Virus at geometrical scale.

NEP An Uncertain Future for Indian Higher Education

Kandi Kamala*

ABSTRACT

Education Policy lays particular emphasis on the development of the creative potential of each individual. It is based on the principle that education must develop not only cognitive capacities - both the 'foundational capacities' of literacy and numeracy and 'higher-order' cognitive capacities, such as critical thinking and problem solving - but also social, ethical, and emotional capacities and dispositions. The new education policy must provide to all students, irrespective of their place of residence, a quality education system, with particular focus on historically marginalized, disadvantaged, and underrepresented groups. Education is a great leveler and is the best tool for achieving economic and social mobility, inclusion, and equality. Initiatives must be in place to ensure that all students from such groups, despite inherent obstacles, are provided various targeted opportunities to enter and excel in the educational system. These elements must be incorporated taking into account the local and global needs of the country and with a respect for and deference to its rich diversity and culture. Instilling knowledge of India and its varied social, cultural, and technological needs, its inimitable artistic, language,

The screenshot shows a Microsoft Word document titled "Education - Rural Progression". The document content is as follows:

Education - Rural Progression

The future of any country depends on **education sector and medical sector**. Mental health improves with education and physical health improves with medicine. If these two spheres, which determine the future of the people, are ever new and adaptable to the needs of the people, then our country India stands out in the entire world.

Since we are a primarily agricultural country, 'our education' and 'our medicine' must be in line with our provenance. Only then will we preserve our existence. Our development will remain in our grip until we forget our roots. Otherwise, it will just slip away.

New avenues are being opened today for education which is the mainstay of the country's upliftment. Inspired by our former Prime Minister **Sri P.V. Narasimha Rao**, who opened new doors to education, we cannot find a better way if we take steps forward.

**INTEGRATION OF RESEARCH AND INNOVATION IN HIGHER EDUCATION:
A CONTEMPORARY APPROACH FOR QUALITY OF EDUCATION**

Dr.N.Vijaya Raghavi, Assistant Professor of Economics, GDCWomen (A), Begumpet, Hyderabad.
raghavi.nag@gmail.com

Research is an integral part of the higher education system. The students are being exposed to project method of learning in Professional as well as graduation courses. Universities are imparting the Research and Innovation to ensure the Quality research. Research ethics has become forefront to avoid plagiarism in higher education institutions. The fruits of research are being carried to the Industries through collaboration. In higher education institutions abroad they will sponsor the Research projects fully or partially. The idea behind these Research projects is to carry the outcomes to the Industry.

Research appeals for the solving the challenging tasks in various sectors ranging from Science and Technology to Industry. Research and innovation will address societal challenges and be associated with the values, needs and expectations of the society in general. This paper studies the objectives, methods to integrate the Research and Innovation in higher education. Besides it studies the importance of Research in Contemporary world to enhance the quality of education.

Key words: Research, Innovation, Student Projects, Learning, Higher Education, Knowledge Economy

**A GENERAL PERSPECTIVE OF INDIAN WOMEN
NOVELISTS**

¹ Dr. M. NIRMALA · ² Dr. M. SANDRA CARMEL SOPHIA

¹ Assistant Professor, ² Professor

¹ Dept. Of English

¹ Govt. Degree College for Women, Begumpet, Hyderabad, India.

ABSTRACT

India is a museum of languages and literature and Indian writing deals with projection of its social, political, religious, ethnic and linguistic aspects. The beginning of contemporary Indian writing in English gained momentum with the post-colonial literature. The post-colonial discourse has become the chief concern in English studies in countries like India. It studies the issues connected with the subaltern women. During the last two decades, Indian English Literature has genuinely come of age and there has been a marvellous improvement in the quality and quantity of creative works produced by Indian Women writers in India and abroad. Indian English fiction holds the centre-stage as fiction is the most powerful, prominent and characteristic genre of literary expression. The noteworthy aspect of these writers is that their writings match the male counter parts and hence have won laurels in India and abroad. These writers can be hailed as 'feminists' in the true sense of the term. Thus Indian English Women's writing today enjoys a unique and distinct reputation, prestige and respectability in the world of canonized English studies.

OBSERVATIONS ON THE MORPHOLOGY OF ANCYLOSTOMA CEYLANICUM

RAJANI P. S.¹, VANITA M² & JYOTHIRMAI G. S³

¹Assistant Professor, Department of Zoology, Government Degree College for Women, Begumpet, Hyderabad, India
²Assistant Professor, Department of Education, Indira Mahindra College of Education, Mahindra University, Hyderabad, India
³Assistant Professor, Department of Zoology, Government Degree College for Women, Begumpet, Hyderabad, India

ABSTRACT

Ancylostoma ceylanicum is a round worm of the genus *Ancylostoma* causing ancylostomiasis in humans and other mammals. It is also called as hook worm on account of hook like appearance of *Ancylostoma*. The larval *A. ceylanicum* infests the intestine of human beings. The adult of this larval nematode, the *A. ceylanicum* is a common parasite of human beings in the tropical and sub-tropical regions causing severe anemia and general weakness. The increasing importance of the morphological examination of this parasite, had evoked the present research study. An in-depth study of the morphology of *A. ceylanicum* have been investigated in the present study. The morphological characteristic of male *A. ceylanicum* shows a characteristic funnel shaped buccal capsule and a short club-shaped oesophagus, which opens through paired valves into the long tubular intestine. A pair of long cervical glands, each with a distinct nucleus, lies just posterior to the oesophagus. The copulatory bursa is present in the males. A sharp terminal spine is present in the posterior region of the female *A. ceylanicum*. Studies of *A. ceylanicum* also reveal its formation of the morphological

ABSTRACT

Ancylostoma ceylanicum is a round worm of the genus *Ancylostoma* causing ancylostomiasis in humans and other mammals. It is also called as hook worm on account of hook like appearance of *Ancylostoma*. The larval *A. ceylanicum* infests the intestine of human beings. The adult of this larval nematode, the *A. ceylanicum* is a common parasite of human beings in the tropical and sub-tropical regions causing severe anemia and general weakness. The increasing importance of the morphological examination of this parasite, had evoked the present research study. An in-depth study of the morphology of *A. ceylanicum* have been investigated in the present study. The morphological characteristic of male *A. ceylanicum* shows a characteristic funnel shaped buccal capsule and a short club-shaped oesophagus, which opens through paired valves into the long tubular intestine. A pair of long cervical glands, each with a distinct nucleus, lies just posterior to the oesophagus. The copulatory bursa is present in the males. A sharp terminal spine is present in the posterior region of the female *A. ceylanicum*. Studies of *A. ceylanicum* give crucial information of the morphological aspects of the round worm.

KEYWORDS: *Ancylostoma Ceylanicum*, Hookworm, Nematode, Anemia & Subtropical Regions
