

FLIPPED CLASSROOMS

A **flipped classroom** is an instructional strategy and a type of blended learning, which aims to increase student engagement and learning by having pupils complete readings at home and work on live problem-solving during class time. This pedagogical style moves activities, including those that may have traditionally been considered homework, into the classroom. With a flipped classroom, students watch online lectures, collaborate in online discussions, or carry out research at home, while actively engaging concepts in the classroom, with a mentor's guidance.

A True Education Is An Ornament In Times Of Prosperity And It Is A Refuge In Times Adversity
