

Students exhibiting their posters and explaining several important mosquito transmitted diseases, symptoms, and their preventive measures Staff members from different departments visited and encouraged our students.

Natural home remedies useful as repellants, anti-allergins, and even used as medicines such as papaya for Dengue fever (increases platelets).

Students –move to each and every classroom and explain the importance of cleanliness in classroom, college premises to avoid diseases transmitted by mosquitoes and responsibility of students to maintain the same.

Our students brought an awareness regarding the spread of various mosquito diseases in our college premises and in different schools by distributing the pamphlets, how to keep mosquitoes at bay by using natural home remedies, to protect themselves from mosquito bites by using insect repellent, wearing protective clothing and other preventive measures to protect themselves from mosquito bites. Our Principal Madam appreciated staff and students and encouraged our students to spread this awareness in and around our surroundings. Other staff members and students visited and gave their feedback and made this event a grand success

Mosquito Awareness rally – Extension Activity

The rally was inaugurated by Principal, Head of Biotechnology Mrs.V.Rohini, and Staff members participated.

World Mosquito Day was first established in 1897, but Mosquito Awareness Day (MAD) annually it was observed on 20 August, in

Commemoration of British doctor Sir Ronald Ross 1939 discovery that female mosquitoes transmit malaria disease in human beings. Keeping in view the present scenario where several cases of mosquito transmitted diseases such as Dengue, yellow fever and malaria were recorded, we the Department of Zoology and Biotechnology took an initiative to organize an awareness programme , Mosquito Awareness Day

- A quiz programme was conducted in the college
- An Extension lecture was conducted at Government High School, Begumpet.

Awareness Rally by Staff and students of zoology and Biotechnology

At Government High School, Begumpet the students were given demonstrative lectures to create awareness about diseases caused by Mosquitoes and importance of cleanliness

Distribution of Herbal Mosquito repellents to the students of Government High School, Begumpet.
