

**SR & BGNR GOVT. ARTS & SCIENCE COLLEGE(A),KHAMMAM**  
**DEPARTMENT OF MICROBIOLOGY**

**Swatch Microbiology**

As a part of Swatch Bharath Swatch Microbiology is conducted beginning of the every academic year. The students of our department actively participate in cleaning and reorganising the instruments, glassware & Chemicals in our Microbiology Laboratory. All the chemicals will be sorted according to their alphabetical order.

**Objectives:**

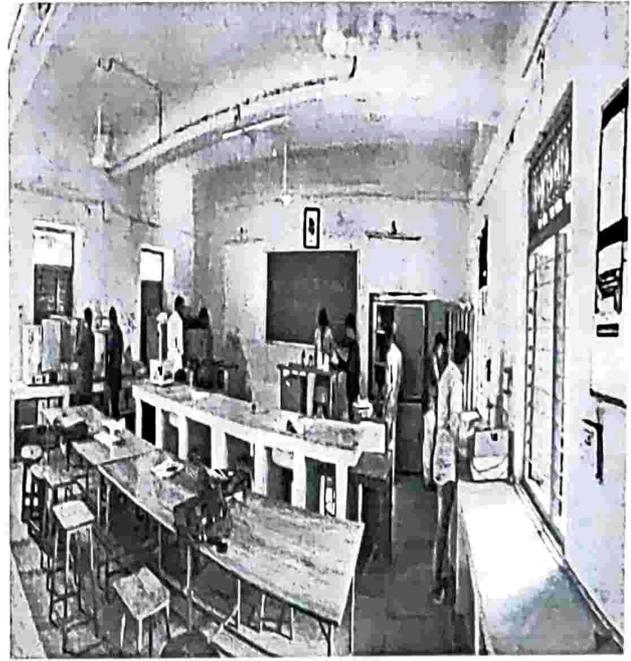

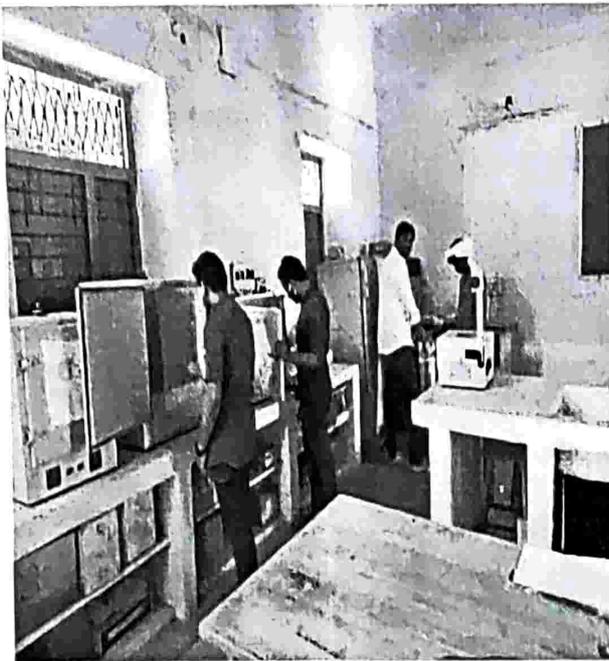

- To promote cleanliness and hygiene
- To make the students familiarise with the laboratory equipment.
- To know the different cleaning procedures for different articles we use in Laboratory
- To know the standard protocols for the cleaning of instruments
- To inculcate the value of group working among students.
- Totally it is a fun way of knowing and learning your laboratory

12.	NUKALA NAGESH	"	N. Nagesh
13.	PALTHYA CHANDANA	"	P. Chandana.
14.	SANNAILA SUNIL	"	S. Sunil
15.	SINGARAPU UGANDER	"	S. Ugander
16.	SREERAM KIRAN TEJA	"	S. Kiranteja.

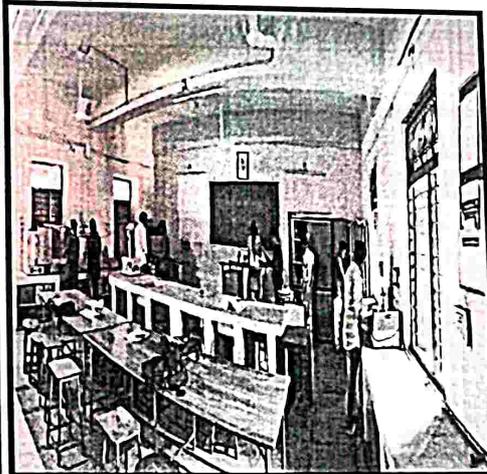

# Swatch Microbiology

# BEST PRACTICES

S.No	Name of the Best Practice
1.	Swatch Microbiology
2.	Know a pathogen per week

**1. Swatch Microbiology is conducted beginning of the every academic year. The students of our department actively participate in cleaning and reorganizing the instruments, glassware & Chemicals in our Microbiology Laboratory. All the chemicals will be sorted according to their alphabetical order.**

2. To make the students familiar with the pathogenic microorganisms, to know the diseases caused by pathogens & to enable the students to learn and memorize the names of important pathogenic microbes we displayed the details of pathogenic microbes every week on the notice board.

**List of the pathogens displayed**

- Escherichia Coli
- Clostridium Botulinum
- Bacillus subtilis
- Bacillus anthracis
- Enterococcus faecalis
- Leuconostocmesenteteroides
- Clostridium tetani
- Corynebacterium diphtheriae
- Haemophilus influenzae
- Klebsiella pneumoniae
- Mycobacterium tuberculosis
- Neisseria gonorrhoeae
- Pseudomonas aeruginosa
- Salmonella typhimurium
- Shigella dysenteriae
- Streptococcus pneumoniae
- Staphylococcus aureus
- Staphylococcus epidermidis
- Streptococcus faecalis
- Treponema pallidum
- Vibrio cholerae
- Pseudomonas Aeruginosa

① Tuberculosis  
 Family: Mycobacteriaceae  
 Genus: Mycobacterium  
 Species: Mycobacterium tuberculosis  
 Tuberculosis is caused by a bacterium called Mycobacterium tuberculosis. The bacteria usually pass through the lungs, but the bacteria can enter any part of the body such as the kidney, spine and brain. It is a very common infection with the bacteria forming a latent infection.

② Staphylococcus aureus  
 Family: Staphylococcaceae  
 Genus: Staphylococcus  
 Species: Staphylococcus aureus  
 Staphylococcus aureus is a species of Gram positive bacteria. It is usually staphylococci. It is a common pathogen that causes a wide range of medical infections. It is found on the skin, in the nose and in the vagina. It is also a common cause of food poisoning.

③ Cholera  
 Family: Vibrionaceae  
 Genus: Vibrio  
 Species: Vibrio cholerae  
 Cholera is a very acute diarrhoeal illness caused by infection of the intestine with the toxigenic bacterium Vibrio cholerae. It is a very common disease in developing areas. It is caused by the bacterium Vibrio cholerae, which is a Gram negative, comma-shaped bacterium.

④ Typhoid  
 Family: Enterobacteriaceae  
 Genus: Salmonella  
 Species: Salmonella typhi  
 Typhoid is a systemic illness caused by infection of the bloodstream with the bacterium Salmonella typhi. It is a very common disease in developing areas. It is caused by the bacterium Salmonella typhi, which is a Gram negative, rod-shaped bacterium.
