# A One day Workshop on Problem solving using Algorithms

## About the College

S.R & B.G.N.R Government Arts and Science College, Khammam has introduced the Computer Course in the year 1997 with B.Sc Mathematics, Physics and Computer Science combination. In the immediately successive year, i.e.(1998-1999) computer course with B.A and B.Com classes also was introduced. Since then there has been a steady and evident development of the department . Currently the Courses are B.Sc (Phy. Sci.) as MPCS, MCCS, MSCS, MECS, B.Com (CA), B.A(CA) and B.Sc (Life Sci. with CA) & with new course B.Sc Data Science.

## About the Workshop

“Problem Solving Using Algorithm ” Workshop will be held at SR & BGNR GOVT. ARTS & SCIENCE COLLEGE(Autonomous), Khammam, Telangana India, on 7<sup>th</sup>, February 2018. The aim of the workshop Problem Solving Using Algorithm is to provide the skills mechanism to the students for learning the process in which how to read and analyse the problem statement carefully in order to list the principal components of the problem and decide the core functionalities that a solution should have. The workshop is to meet new challenges, collect new ideas and exhibit it as a practice during the session. We invite all the students of Computer Science & Applications in the domain of interest.

**Department of Computer Science & Applications is organizing the following event.**

**Name of the Event: Workshop**

**Date: 07-02-18**

**Venue: Computer Lab**

**Topic: Problem Solving using Algorithms**

### **Content Covered**

When problems are straightforward and easy, we can easily find the solution. But a complex problem requires a methodical approach to find the right solution. In other words, we have to apply problem solving techniques. Problem solving begins with the precise identification of the problem and ends with a complete working solution in terms of a program or software.

### **Analysing the problem**

It is important to clearly understand a problem before we begin to find the solution for it. If we are not clear as to what is to be solved, we may end up developing a program which may not solve our purpose. Thus, we need to read and analyse the problem statement carefully in order to list the principal components of the problem and decide the core functionalities that our solution should have. By analysing a problem, we would be able to figure out what are the inputs that our program should accept and the outputs that it should produce.

### **Developing an Algorithm**

It is essential to devise a solution before writing a program code for a given problem. The solution is represented in natural language and is called an algorithm. We can imagine an algorithm like a very well-written recipe for a dish, with clearly defined steps that, if followed, one will end up preparing the dish. We start with a tentative solution plan and keep on refining the algorithm until the algorithm is able to capture all the aspects of the desired solution. For a given problem, more than one algorithm is possible and we have to select the most suitable solution.

### **Why do we need an Algorithm?**

A programmer writes a program to instruct the computer to do certain tasks as desired. The computer then follows the steps written in the program code. Therefore, the programmer first prepares a roadmap of the program to be written, before actually writing the code. Without a roadmap, the programmer may not be able to clearly visualise the instructions to be written and may end up

developing a program which may not work as expected. Such a roadmap is nothing but the algorithm which is the building block of a computer program.

For example, searching using a search engine, sending a message, finding a word in a document, booking a taxi through an app, performing online banking, playing computer games, all are based on algorithms.

Writing an algorithm is mostly considered as a first step to programming. Once we have an algorithm to solve a problem, we can write the computer program for giving instructions to the computer in high level language. If the algorithm is correct, computer will run the program correctly, every time. So, the purpose of using an algorithm is to increase the reliability, accuracy and efficiency of obtaining solutions.

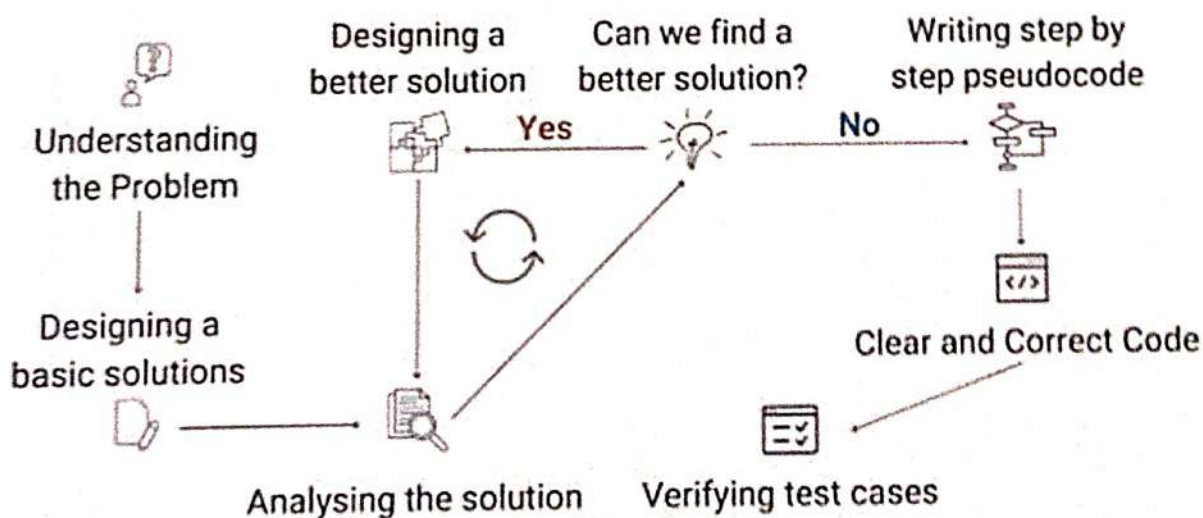

#### (A) Characteristics of a good algorithm

- Precision — the steps are precisely stated or defined.
- Uniqueness — results of each step are uniquely defined and only depend on the input and the result of the preceding steps.
- Finiteness — the algorithm always stops after a finite number of steps.
- Input — the algorithm receives some input.
- Output — the algorithm produces some output.

#### (B) While writing an algorithm, it is required to clearly identify the following:

- The input to be taken from the user
- Processing or computation to be performed to get the desired result
- The output desired by the user

# A One day Workshop on Computer Networks

### About the College

SR & B.G.N.R Government Arts and Science College was established in 1956 to cater the Educational needs of the Rural and Backward areas in and around Khammam town. Since Khammam is semi-urban area and is located aimed a commercially and industrially potential area, the college felt the need for introducing novel and Job Oriented Restructured courses to attend the demand of the day and the society.

### About the Department

SR & B.G.N.R Government Arts and Science College, Khammam has introduced the Computer Course in the year 1997 with B.Sc Mathematics, Physics and Computer Science combination. In the immediately successive year, i.e,(1998-1999) computer course with B.A and B.Com classes also was introduced. Since then there has been a steady and evident development of the department . Currently the Courses are B.Sc (Fry. Sci.) as MPCS, MCCS, MSCS, MECS, B.Com (CA), B.A(CA).

### About the Workshop

"Computer Networks " Workshop will be held at SR & BGNR GOVT. ARTS & SCIENCE COLLEGE(Autonomous), Khammam, Telangana India, on 25<sup>th</sup>, October 2018. The aim of the workshop Computer Networks is to provide the skills mechanism to the students for learning the process in which the system connects numerous independent computers in order to share information, resources, various kinds of nodes, servers and networking hardware. The workshop is to meet new challenges, collect new ideas and exhibit it as a practice during the session.

**Name of the Event: Workshop**

**Date: 25-10-18**

**Venue: Computer Lab**

**Topic: Workshop on Computer Networks**

### **Content Covered**

A group of computers which are connected to each other and follow similar usage protocols for the purpose of sharing information and having communications provided by the networking nodes is called a Computer Network.

A network may be small where it may include just one system or maybe as large as what one may want. The nodes may further be classified into various types. These include:

- Personal Computers
- Servers
- Networking Hardware
- General Hosts
- 

Networking can be classified into three types:

1. Types of Computer Networks
2. Topology
3. Interpreters

### **Types of Computer Networks**

There are five main types of Computer Networks:

#### **1. LAN (Local Area Network) –**

- Systems connected in a small network like in a building or a small office
- It is inexpensive
- It uses Ethernet or Token-ring technology
- Two or more personal computers can be connected through wires or cables acting as nodes
- Transfer of data is fast and is highly secure

#### **PAN (Personal Area Network) –**

- The smallest computer network
- Devices may be connected through Bluetooth or other infra-red enabled devices
- It has a connectivity range of upto 10 metres

- It covers an area of upto 30 feet
- Personal devices belonging to a single person can be connected to each other using PAN

#### **MAN (Metropolitan Area Network) –**

- A network that can be connected within a city, for example, cable TV Connection
- It can be in the form of Ethernet, ATM, Token-ring and FDDI
- It has a higher range
- This type of network can be used to connect citizens with the various Organizations

#### **WAN (Wide Area Network) –**

- A network which covers over a country or a larger range of people
- Telephonic lines are also connected through WAN
- Internet is the biggest WAN in the world
- Mostly used by Government Organisations to manage data and information

#### **VPN (Virtual Private Network): –**

- A network which is constructed by using public wires to connect to a private network
- There are a number of systems which enable you to create networks using the Internet as a medium for transporting data
- These systems use encryptions and other security mechanisms to ensure only authorised users can access

#### **Network Devices**

- **Network Repeater** – Used to generate incoming electrical, wireless or optical signals
- **Network Hub** – It is a small network device. It joins multiple computers together to form a single network segment. On this segment, all computers can interact with each other
- **Network Switch** – It is a small hardware device which joins multiple computers together with a single LAN
- **Network Router** – This device interfaces in multiple networks whose task is to copy packages from one network to another. It provides connectivity inside enterprises, between Enterprises and the Internet and within an ISP
- **Network Bridge** – It reads the outermost section of the data packet to tell where the message is going. It reduces the traffic on other network segments.
- **Modem** – This device converts digital signals into analog signals. It is always placed between a telephone and a computer system

#### **Conclusion:**

Resourse person had concluded to choose a job role. There are many jobs in the networking field to choose from, including:

- Network specialist
- Network technician
- Network administrator
- Network analyst
- Network manager
- Network engineer
- Network solutions architect

Finally suggested to get prepared with Networking Certifications and Training.

### About the College

S.R. & B.G.N.R. Government Arts and Science College was established in 1956 to cater the Educational needs of the Rural and Backward areas in and around Khammam town. Since Khammam is semi-urban area and is located amidst a commercially and industrially potential area, the college felt the need for introducing novel and Job Oriented Restructured courses to attend the demand of the day and the society.

### About the Department

S.R. & B.G.N.R. Government Arts and Science College, Khammam has introduced the Computer Course in the year 1997 with B.Sc Mathematics, Physics and Computer Science combination. In the immediately successive year, i.e.(1998-1999) computer course with B.A and B.Com classes also was introduced. Since then there has been a steady and evident development of the department. Currently the Courses are B.Sc (Phy. Sci.) as MPCS, MCOCS, MSCS, MBOS, B.Com (CA), B.A(CA) and B.Sc (Life Sci. with CA) & with new course B.Sc Data Science.

### About the Workshop

"Recent trends in Computer Technology" Workshop will be held at SR & BGNR GOVT. ARTS & SCIENCE COLLEGE(Autonomous), Khammam, Telangana India, on 23<sup>rd</sup> February, 2022. The aim of the workshop Recent trends in Computer Technology is the delivery of different services through the Internet. These resources include tools and applications like The latest computer science trends include artificial intelligence, edge computing, and quantum computing. The workshop is to meet new challenges, collect new ideas and exhibit it as a practice during the session.

Department of Computer Science & Applications is  
organizing the following event.

**Name of the Event: Workshop**

**Date: 02-03-19**

**Venue: Computer Lab**

**Topic: Recent trends in Computer Technology**

### Content Covered

The recent stats show that students graduating in computer science have the chance to start their career with the highest paying salaries as compared to other domains. They are high in demand, and they can afford to be picky about their industry to start with. Technology has been growing exponentially over the past decades, and industries are looking for fresh graduates in new technologies in computer science who can join their team and help them to transform their ideas in a better manner.

Here are the five latest technologies in computer science which are storming the industry they are

1. Clouding Computing
2. Artificial Intelligence
3. Mobile Computing
4. Cyber Security
5. Virtual Reality

### Clouding Computing

Cloud computing is a generalized term for computing technology and techniques that involves delivering hosted services, often by accessing data centers, etc over a wide area network like the Internet. The cloud is not a physical entity, but it is a vast network of remote servers located around the globe which are able to provide services on demand, often via subscription, etc.

### Artificial Intelligence

Artificial intelligence (AI) is a wide-ranging branch of computer science concerned with building smart machines capable of performing tasks that typically require human intelligence.

### Mobile Computing

Mobile Computing is a technology that provides an environment that enables users to transmit data from one device to another device without the use of any physical link or cables. IN other words, mobile computing allows transmission of data, voice and video via a computer or any other wireless-enabled device without being connected to a fixed physical link. In this technology, data transmission is done wirelessly with the help of wireless devices such as mobiles, laptops etc.

### Cyber Security

Cyber security is the practice of defending computers, servers, mobile devices, electronic systems, networks, and data from malicious attacks. It's also known as information technology security or electronic information security.

### Virtual Reality

Virtual reality(VR) is special kind of graphical user interface which presents a computer-generated immersive, three-dimensional, interactive environment that is accessed and manipulated using, for instance, stereo headphones, head-mounted stereo television goggles, and data-gloves.

### Conclusion

Progress in many of the basic computing and information technologies has been rapid in recent years, While some technologies are reaching maturity now, many important technologies have enormous future potential. As more of the world's information is digitized and more people and things are networked,

# కవి దృక్పథంతోనే సమాజ వికాసం

● వివేకానికి బలం కల్పించే దేవుడు కవిత్వం...  
 ● ప్రజాస్వామ్యం కోసం కవిత్వం వేరే భావోద్వేగం కలిగి ఉండాలి.  
 ● వివేకం మాత్రమే ప్రజలను మార్చేస్తుంది.

కవిత్వం కేవలం అందమైన పదాల సమగమనం కాదు. అది ప్రజలను ప్రేమించే భావోద్వేగం. ప్రజలను ప్రేమించే భావోద్వేగం లేకుండా కవిత్వం అంటే అర్థంలేదు. కవిత్వం ప్రజలను ప్రేమించే భావోద్వేగం కలిగి ఉండాలి. ప్రజలను ప్రేమించే భావోద్వేగం లేకుండా కవిత్వం అంటే అర్థంలేదు. కవిత్వం ప్రజలను ప్రేమించే భావోద్వేగం కలిగి ఉండాలి. ప్రజలను ప్రేమించే భావోద్వేగం లేకుండా కవిత్వం అంటే అర్థంలేదు.

#### About the Workshop

"PC Assembly and Maintenance" Workshop will be held at SR & B.G.N.R GOVT. ARTS & SCIENCE COLLEGE(Autonomous), Khammam, Telangana India, on 4<sup>th</sup>, November 2019. The aim of the workshop PC Assembly and Maintenance is to provide the skills mechanism to the students for learning the process in which all the internal components required for the for the computer system, understand and follow the basic safety precautions while handling tools & equipment during the installation process. The workshop is to meet new challenges, collect new ideas and exhibit it as a practice during the session.

### Memory Modules

Insert the memory modules on the motherboard by aligning the RAM to its socket on the motherboard and press it downward. Make sure the side tabs are fixed into the RAM notch. If not, press a bit.

### Internal Cards

Insert the cards into its socket and attach the cables or power cable to it. The selection of right cables should be as per the type of socket.

After inserting it and pressing towards front side and screw it.

### External Devices and Power

Connect external devices with CPU at its appropriate socket. It includes mouse and keyboard at PS2 ports, monitor at the video output socket. Connect the power cable to the back of tower in order to connect the power cable to the electric board.

Check for spyware and malware and make sure the computer hard drive is operating properly. Recognize these facts and install security programs like Norton, McAfee, or Symantec.

Install a good security program on your computer, it is necessary to do other things if you want your computer to run efficiently with no unexpected "crashes" or long boot-up times. Install a program that would take care of essential computer maintenance.

One such program is Advanced System Care 15 which can be downloaded for free. This program repairs errors for 12 essential items for daily computer maintenance. The 12 items include spyware threats; registry errors; privacy issues; junk files; disk errors; disc optimization issues; registry fragments; performance issues; and security holes.

Department of Computer Science & Applications is  
organizing the following event.

**Name of the Event: Workshop**

**Date: 04-11-19**

**Venue: Computer Lab**

**Topic: Workshop on PC Assembly and maintenance**

### **How to Assemble a Computer**

The assembling of the computer system is exactly the opposite of disassembling operation. Before starting assembling the computer system, make sure you have the screws and a screwdriver for those.

#### **Step 1: Mount the Processor**

The first step for assembling the computer system starts with mounting the processor on the processor socket of the motherboard. To mount the process, you don't need to apply any force. The special ZIF (zero insertion force) sockets are usually used to prevent any damage to the processor pins. Once the processor is mounted, the heat sink will be attached on top of the processor. The CPU fan is also attached on top of the heat sink.

#### **Step 2: Fix the Motherboard in the Tower Case**

Now the motherboard is to be fixed vertically in the tower case and the screws are fixed from behind of the motherboard.

#### **Step 3: Connect the Power Supply**

Now line up the power supply at the top back end of the cabinet and screw it. The power connectors for motherboard power supply and CPU fan power supply are to be connected. If the cabinet cooling FAN is required then it is to be screwed at the back end grill of the cabinet and its power connector is to be connected from SMPS.

#### **Step 4: Install the Drives**

Install the CD/DVD drives at the top front end of the cabinet and screw it. Install the Hard disk drive and floppy disk drive below CD/DVD drive and screw it. Make sure once screwed there is no vibration in either of the CD/DVD, hard disk or floppy disk drives.

#### **Step 5: Connect Cables**

Now select the appropriate data cable and connect one end of the cable to its drive socket and another end at its appropriate connector on the motherboard. For SATA hard disk drive or CD/DVD drives use SATA cable and its power cable, else use IDE data cable. Do the proper jumper settings as per the usage requirement.

### Step 6: Mount the Memory Modules

It is time now to mount the memory modules on the motherboard by aligning the RAM to its socket on the motherboard and press it downward. Make sure the side tabs are fixed into the RAM notch. If not, you may still have to press a bit.

### Step 7: Install the Internal Cards

Install the internal cards to its socket and attach the cables or power cable to it. The selection of right socket or slot is required as per the type of socket.

### Step 8: Cover the Tower

Cover the tower by placing it and pressing towards front side and screw it.

### Step 9: Connect the External Devices and Power

Connect the external devices with CPU at its appropriate socket. It includes mouse and keyboard at PS2 or USB connectors. Monitor at the video output socket. Connect the power cable to the back of tower in SMPS. Plug in the power cable to the electric board.

### Computer Maintenance

- It is necessary to check for spyware and malware and make sure the computer hard drive is operating efficiently. Most people recognize these facts and install security programs like Norton, McAfee, or Kaspersky on their computers.
- In addition to installing a good security program on your computer, it is necessary to do other things if you want your PC to run efficiently with no unexpected "crashes" or long boot-up times. Install a program on PC which would take care of essential computer maintenance.
- The name of the program is Advanced System Care 15 which can be downloaded for free. This program scans for and repairs errors for 12 essential items for daily computer maintenance. The 12 items addressed in the program include spyware threats; registry errors; privacy issues; junk files; internet problems; shortcut errors; disc errors; disc optimization issues; registry fragments; performance issues; browser security issues; and security holes.

## A One day Workshop on Data science

### About the College

S.R & B.G.N.R Government Arts and Science College was established in 1956 to cater the Educational needs of the Rural and Backward areas in and around Khammam town. Since Khammam is semi-urban area and is located aimed a commercially and industrially potential area, the college felt the need for introducing novel and Job Oriented Restructured courses to attend the demand of the day and the society.

### About the Department:

S.R & B.G.N.R Government Arts and Science College, Khammam has introduced the Computer Course in the year 1997 with B.Sc Mathematics, Physics and Computer Science combination. In the immediately successive year, i.e.(1998-1999) computer course with B.A and B.Com classes also was introduced. Since then there has been a steady and evident development of the department . Currently the Courses are B.Sc (Phy. Sci.) as MPCS, MCCS, MSCS, MECS, B.Com (CA), B.A(CA) and B.Sc (Life Sci. with CA).

### About the Workshop

" Data Science " Workshop will be held at SR & BGNR GOVT. ARTS & SCIENCE COLLEGE(Autonomos), Khammam, Telangana India, on 25, February 2020. The aim of the workshop Data Science is to provide the skills mechanism to the students for learning deep study of the massive amount of data, which involves extracting meaningful insights from raw, structured and unstructured data that is processed during the scientific method, different technologies and algorithms. The workshop is to meet new challenges, collect new ideas and exhibit it as a practice during the session.

Department of Computer Science & Applications is organizing the following event.

**Name of the Event: Workshop**

**Date: 21-02-20**

**Venue: Computer Lab**

**Topic: Workshop on Data science**

### Content Covered:

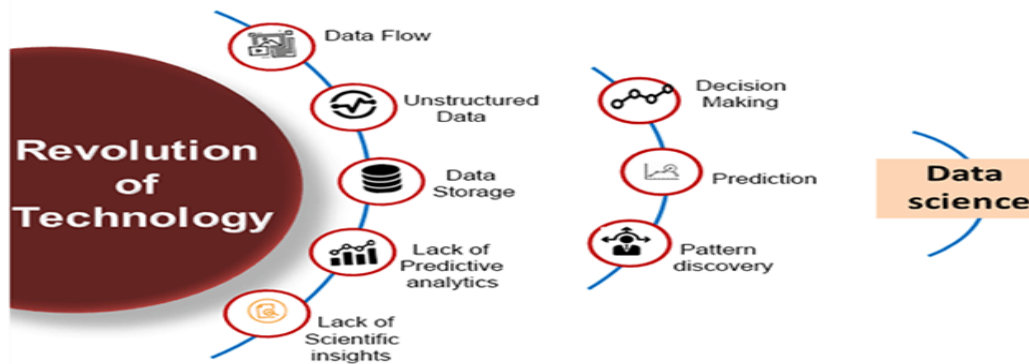

The term “data science” was coined in 2001, attempting to describe a new field. a famous blog post by Drew Conway in 2013, called [The Data Science Venn Diagram](#), in which he drew the following diagram to indicate the various fields that come together to form what we call “data science.”

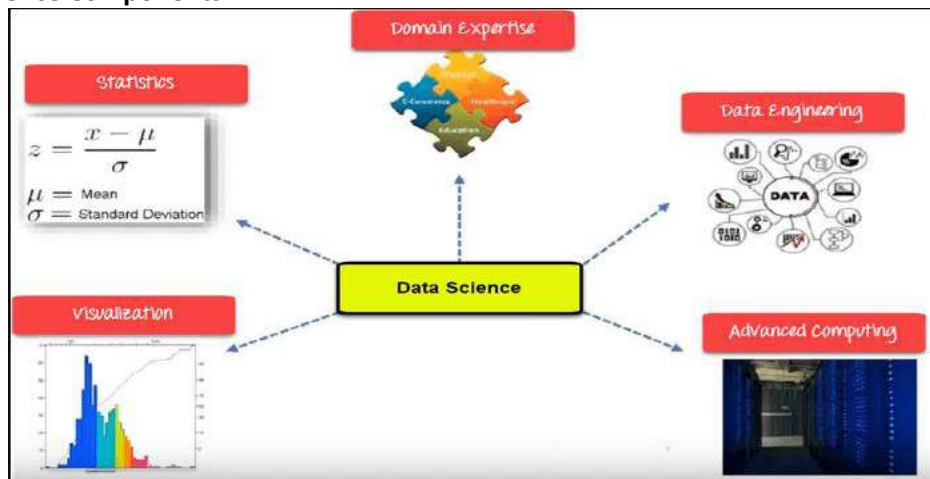

Regardless of whether data science is just a part of statistics, and regardless of the domain to which we’re applying data science, the goal is the same: **to turn data into actionable value**. The professional society INFORMS defines the related field of analytics as “the scientific process of transforming data into insight for making better decisions.”

Data science is a deep study of the massive amount of data, which involves extracting meaningful insights from raw, structured, and unstructured data that is processed using the scientific method, different technologies, and algorithms.

It is a multidisciplinary field that uses tools and techniques to manipulate the data so that you can find something new and meaningful.

### Data Science Components

- Statistics:**  
 Statistics is the most critical unit of Data Science basics, and it is the method or science of collecting and analyzing numerical data in large quantities to get useful insights.
- Visualization:**  
 Visualization technique helps you access huge amounts of data in easy to understand and digestible visuals.
- Machine Learning:**  
Machine Learning explores the building and study of algorithms that learn to make predictions about unforeseen/future data.
- Deep Learning:**  
Deep Learning method is new machine learning research where the algorithm selects the analysis model to follow.

### Data Science Jobs Roles

Most prominent Data Scientist job titles are:

- Data Scientist
- Data Engineer
- Data Analyst

- Statistician
- Data Architect
- Data Admin
- Business Analyst
- Data/Analytics Manager

#### **Data Scientist:**

- **Role:** A Data Scientist is a professional who manages enormous amounts of data to come up with compelling business visions by using various tools, techniques, methodologies, algorithms, etc.
- **Languages:** R, SAS, Python, SQL, Hive, Matlab, Pig, Spark

#### **Data Engineer:**

- **Role:** The role of a data engineer is of working with large amounts of data. He develops, constructs, tests, and maintains architectures like large scale processing systems and databases.
- **Languages:** SQL, Hive, R, SAS, Matlab, Python, Java, Ruby, C + +, and Perl

#### **Data Analyst:**

- **Role:** A data analyst is responsible for mining vast amounts of data. They will look for relationships, patterns, trends in data. Later he or she will deliver compelling reporting and visualization for analyzing the data to take the most viable business decisions.
- **Languages:** R, Python, HTML, JS, C, C+ + , SQL

#### **Statistician:**

- **Role:** The statistician collects, analyses, and understands qualitative and quantitative data using statistical theories and methods.
- **Languages:** SQL, R, Matlab, Tableau, Python, Perl, Spark, and Hive

#### **Data Administrator:**

- **Role:** Data admin should ensure that the database is accessible to all relevant users. He also ensures that it is performing correctly and keeps it safe from hacking.
- **Languages:** Ruby on Rails, SQL, Java, C#, and Python

#### **Business Analyst:**

- **Role:** This professional needs to improve business processes. He/she is an intermediary between the business executive team and the IT department.
- **Languages:** SQL, Tableau, Power BI and, Python

**Conclusion:** Data science is valuable to any company in any industry so it is important to every student to have good knowledge about Data Science job roles who aspire to be in good position in their job.

- In addition there are 88 Conservation Reserves: Area – 4356.49 sq km or 0.13%127 Community Reserves: Area – 525.22 sq km or 0.02%

## Community Conserved Areas (CCAs)

- Protected areas across the globe, managed and sustained by ordinary people: in fact indigenous, mobile, and local communities have played a critical role in conserving a variety of natural environments and species for millennia, for various economic, cultural, spiritual and aesthetic purposes.
- Community Conserved Areas (CCAs) can be defined as *natural and modified ecosystems (with minimal to substantial human influence) – providing significant biodiversity, ecological services and cultural values – voluntarily conserved by indigenous peoples and other local communities through customary laws or other effective means.*
- These efforts range from the continued traditional protection of sacred sites, to a revived interest and engagement of communities in protecting their natural resources to community attempts at saving natural habitats from the penetration of destructive commercial and industrial forces.
- Many CCAs are much older than government-managed protected areas.

# "ఆచార్య కొలకలూరి ఇనాక్ గారి కథానాయకులు" తెలుగు జాతీయ వెబినార్ - పత్ర సమర్పణ కొరకు నమోదు పత్రం

SR & BGNR Government Arts & Science College (Autonomous), Khammam - Telangana  
State 507002, Department of Hindi is going to conduct Two Day National Webinar on  
14th & 15th. of November 2020.

గౌరవనీయులైన రచయితలకు, విమర్శకులకు, సామజిక, సాంస్కృతిక, రాజకీయ, ఆర్థిక, సాహితీ, ఉద్యమకారులకు, న్యాయ వైయ విశ్లేషకులకు, ఆచార్యులకు మరియు ముఖ్యంగా పరిశోధక విద్యార్థులకు పత్ర సమర్పణ కొరకు ఇదే మా ఆహ్వానం. "ఆచార్య కొలకలూరి ఇనాక్ గారి కథానాయకులు" అనే ప్రధాన శీర్షికలో నిర్వహించబోయే రెండు రోజుల తెలుగు జాతీయ (సదస్సు) వెబినార్ కి (గూగుల్ మీట్ - అంతర్జాల వేదిక) స్వాగతం సుస్వాగతం.

ఆచార్య కొలకలూరి ఇనాక్ గారు తెలుగు సాహితీ పంచలో ఎందరో శిష్యులను పెంచి పెద్ద చేసారు. వీరి నీడలో ఎందరో విద్యార్థులు, పరిశోధక మిత్రులు సేదదీరుతున్నారు. బోధలో పటవ్యజ్ఞానికి ఎంతటి ప్రభు ఉందో, హిందూ ధర్మంలో కల్పవృక్షం మరియు కామధేనువు ఎంతటి అనన్య సమాన్యమైనవో, తెలుగు దళిత సాహిత్యానికి ఆచార్య కొలకలూరి ఇనాక్ వారు అంతకు మించి ... అని భావించటం సముచితం, సహేతుకం కూడా.

పత్ర సమర్పణ కొరకు నమోదు ప్రక్రియ మొదలు తేదీ: 25-10-2020 - చివరి తేదీ: 08-11-2020

సదస్సు ముఖ్య శీర్షిక : "ఆచార్య కొలకలూరి ఇనాక్ గారి కథానాయకులు" (ఆచార్య కొలకలూరి ఇనాక్ గారి నాయకత్వం నాయకులు) ఉద్ఘాటన మరియు ప్రయోగ సౌలభ్యం కోసం రెండు పాత్రలకు కలిపి "కథానాయకులు" అనే పదాన్ని ఉపయోగించినట్లు భావించగలరు.

వెబినార్ ప్రారంభ సమావేశంలో ఆచార్య కొలకలూరి మధు జ్యోతి, తెలుగు విభాగం, శ్రీ పద్మావతి మహిళా విశ్వవిద్యాలయం - తిరుపతి వారు కీలకోపన్యాసం చేస్తారు.

# "ఆచార్య కొలకలూరి ఇనాక్ గారి కథానాయకులు" తెలుగు జాతీయ వెబినార్ - పత్ర సమర్పణ కొరకు నమోదు పత్రం

SR & BGNR Government Arts & Science College (Autonomous), Khammam - Telangana  
State 507002, Department of Hindi is going to conduct Two Day National Webinar on  
14th & 15th. of November 2020.

గౌరవనీయులైన రచయితలకు, విమర్శకులకు, సామజిక, సాంస్కృతిక, రాజకీయ, ఆర్థిక, సాహితీ, ఉద్యమకారులకు, న్యాయ వైయ విశ్లేషకులకు, ఆచార్యులకు మరియు ముఖ్యంగా పరిశోధక విద్యార్థులకు పత్ర సమర్పణ కొరకు ఇదే మా ఆహ్వానం. "ఆచార్య కొలకలూరి ఇనాక్ గారి కథానాయకులు" అనే ప్రధాన శీర్షికలో నిర్వహించబోయే రెండు రోజుల తెలుగు జాతీయ (సదస్సు) వెబినార్ కి (గూగుల్ మీట్ - అంతర్జాల వేదిక) స్వాగతం సుస్వాగతం.

ఆచార్య కొలకలూరి ఇనాక్ గారు తెలుగు సాహితీ పంచలో ఎందరో శిష్యులను పెంచి పెద్ద చేసారు. వీరి నీడలో ఎందరో విద్యార్థులు, పరిశోధక మిత్రులు సేదదీరుతున్నారు. బోధలో పటవ్యజ్ఞానికి ఎంతటి ప్రభు ఉందో, హిందూ ధర్మంలో కల్పవృక్షం మరియు కామధేనువు ఎంతటి అనన్య సమాన్యమైనవో, తెలుగు దళిత సాహిత్యానికి ఆచార్య కొలకలూరి ఇనాక్ వారు అంతకు మించి ... అని భావించటం సముచితం, సహేతుకం కూడా.

పత్ర సమర్పణ కొరకు నమోదు ప్రక్రియ మొదలు తేదీ: 25-10-2020 - చివరి తేదీ: 08-11-2020

సదస్సు ముఖ్య శీర్షిక : "ఆచార్య కొలకలూరి ఇనాక్ గారి కథానాయకులు" (ఆచార్య కొలకలూరి ఇనాక్ గారి నాయకత్వం నాయకులు) ఉద్ఘాటన మరియు ప్రయోగ సౌలభ్యం కోసం రెండు పాత్రలకు కలిపి "కథానాయకులు" అనే పదాన్ని ఉపయోగించినట్లు భావించగలరు.

వెబినార్ ప్రారంభ సమావేశంలో ఆచార్య కొలకలూరి మధు జ్యోతి, తెలుగు విభాగం, శ్రీ పద్మావతి మహిళా విశ్వవిద్యాలయం - తిరుపతి వారు కీలకోపన్యాసం చేస్తారు.

He was worked as Research Scholar at Indian Institute of Oil Palm Research Centre, Indian Council of Agriculture Research. He cleared **National Eligibility Test ICAR-ASRB-2014**. He has illustrated (fine line diagrams) few new plant species and published as co author. He had training on **Remote Sensing and Geographic information system** from **National Remote Sensing Centre-ISRO**, Hyderabad as well **Forest Research Institute, Dehradun**; for plant species mapping and Remote sensing data analysis. He is the life member of Indian Society of Remote Sensing, Dehradun; and also he had training on **Botanical Illustrations** at **Shillong**. Presently he is working at **Botanical Survey of India, Deccan Regional Centre, Hyderabad** and redeployed from **Central Botanical Laboratory, Botanical Survey of India, Howrah**,

**Previously he was associated with 03 projects:-**

1. Ethnobotany of Ganjam, Jajpur Districts of Odisha
2. Flora of Seshachalam Biosphere Reserve,
3. Flora of Nagarjuna Sagarsrisailam Tiger Reserve and
4. Sacred Groves of Andhra Pradesh

**On Going Project: Grasses of Telangana State, India.**

His research interest: Floristic studies: **Poaceae**

He has co- author >21 publications (including 06 new species to science + 01 Book Chapter)

- *Lecturer in Department of Botany V.R.College, & VRIPS, Nellore. 1990 to 2002.*
- *Lecturer and Head of the Dept of Biotechnology and Microbiology, Sri Krishna Chaitanya Degree & PG College, Nellore. From 2002 to 09.*

### **REAEARCH HONOURS**

- JRF- DST, NewDelhi 1984- 85
- JRF USDA 1985-1989
- Young Scientist (above 30 years) in International conference and 8th Annual convention of ABAP at Indore
- Bestresearch paper award- National and International from University.
- Excellent Research Achievement award To PGPR and Endophytic bioformulations for sustainable agriculture in August 2019 at Tashkent..

### **ABROAD VISITS:**

- Visited **Nepal** Presented Research Paper in *4<sup>th</sup> Asian plant Sciences conference* in Beharagora ,Nepal. 2014
- Visited **Vietnam** and presented research paper in *4<sup>th</sup> Asian PGPR conference , Vietnam* May 2015
- Visited **Japan** Under *Sakura science programme* to study Higher education quality and Front line research in Toyama University, Japan, December 2018
- Visited **Tashkent**, Uzbekistan as Invited speaker to analyse national and global

## **CONFERENCES, SEMINARS AND WORK SHOPS:**

**Conducted: 02**

1. Two Day National seminar on "Plant- microbe interaction , Environmental conservation –challenges and strategies PMECS 2017)", 17-18th March 2017 sponsored by UGC,APSCHE &DST . Bring out proceeding as special issue in International Journal as special editor
2. Three Day national conference on %th Asian PGPR Conference on sustainable and organic agriculture on 23-25<sup>th</sup> February 2019.Sponsored by ICAR,UGC &DST .

**Attended and papers presented : 114**

## **AWARDS**

- Corn Plastics – Second Place in paper presentation in National conference on The Role of Biotechnology in Rural and Industrial Development at Tirupati, from 4-5th July 2008.
- DNA micro array – Third prize in paper presentation in IV national Level Technical Symposium, BRAVURA '08 at ASCET, Gudur on 25th Oct. 2008.
- The need of the hour-biofuels – Best poster presentation in 2nd A.P. SCIENCE CONGRESS- 2009,Sri Venkateswara University,Tirupati-517502 page 49.
- Bioformulation for enhancement of Biomass in Abelmoschus esculentus -2nd Prize in inNational seminar on Sustainable Development in Biotechnology Kavali 24- 10 -2010
- Associate Fellow 2012 Andhra Pradesh Akademi of Science
- Second Prize in Acharya Nagarjuna university Academic Exhibition 2013-2014
- Best paper(1st prize)National Seminar on Conservation of Animal Biodiversity and Environmental Monitoring organized by Vikrama Simhapuri University post-graduate centre ,kavali during 12-13 March,2014.- 15.
- Best paper(2nd prize)at National Seminar organized by Krishna University Nuzivid during 5-6 February 2014.
- Young Scientist (above 30 years) in International conference and 8th Annual convention of ABAP at Indore
- First prize in International paper Abroad in Foundation Day 2016 for best paer presentation in 4th Asian PGPR at Vietnam

## **TRAINING PROGRAMMES:**

- Molecular training in Molecular Biology (2 weeks), Plant pathology division IIHR Bangalore
- Winter school 2013, Plant pathology division IIHR, Bangalore (3 weeks)

**REVISIONS TO THE PLAN:**

- 1. Revised the Financial Committee to be composed of three members to be elected by the members of the Association.
- 2. Revised the Committee to be composed of three members to be elected by the members of the Association.

Using Chain rule find the derivative of the function  $(\cos x + e^x)^{12}$

Solution.

The given function is  $h(x) = (\cos x + e^x)^{12} \forall x \in \mathbb{R}$

Define two functions  $f$  and  $g$  as

$$f(x) = \cos x + e^x; g(x) = x^{12} \forall x \in \mathbb{R}$$

Consider

$$\begin{aligned} g \circ f(x) &= g[f(x)] \forall x \in \mathbb{R} \\ &= g[\cos x + e^x] = (\cos x + e^x)^{12} \\ &= h(x) \forall x \in \mathbb{R} \end{aligned}$$

$$\therefore h(x) = (g \circ f)(x) \forall x \in \mathbb{R}$$

Here as  $f$  and  $g$  are polynomial functions they are always differentiable and so is  $g \circ f$ .

$$\text{Here } f'(x) = -\sin x; g'(x) = 12x^{11}$$

By Chain rule,

$$h'(x) = (g \circ f)'(x) = g'(f(x)) \cdot f'(x)$$

$$= g'(\cos x + e^x) \cdot (-\sin x)$$

$$h'(x) = 12(\cos x + e^x)^{11} \cdot (-\sin x)$$

### Note book is NOT A BOOK.

- The "notebook" is not a book, but consists of loose and unordered sheets of paper — "more than one hundred pages written on 138 sides in Ramanujan's distinctive handwriting."
- The sheets contained over six hundred mathematical formulas listed consecutively without proofs."
- After Ramanujan passed away his wife

I myself to you is a clerk  
 in the Accounts Department of the Port  
 office at Madras on a salary of only  
 100 per annum. I am now about 23 years  
 of age. After leaving school I have  
 been employing the spare time at  
 my disposal to work at Mathematics.

 my first consideration. Any  
 sympathetic letter from  
 you will be helpful to me  
 here to get a scholarship.

### Artificial Intelligence

- Artificial Intelligence (AI) is the simulation of human intelligence processes by machines, especially computer systems.
- AI is used in many areas, including:
  - Manufacturing and robotics: I already get a food in hand
  - Healthcare: A British Engineer, that was used in 1950s as a workmate of a human, and the machine is the only person that can work in a factory.
  - Finance: Used in many industries for many different purposes, such as: banking and artificial intelligence. And used more and more for many different purposes, such as: banking and artificial intelligence.

# Dr Palla Rajeshwar Reddy – A Profile

March 16, 2015 2:08 pm

Dr.Palla Rajeshwar Reddy, a leading higher educationist and public warrior activist from Telangana was born in a highly respected landed family in the eventful decade of 1960 in a village called Sodeshapally, not far from the historical town of Warangal, which was the seat of the great Kakatiya dynasty in Telangana region.

Why this ad? ⓘ

Dr. Rajeshwar Reddy's migration to Hyderabad for higher studies at the Osmania University set a new course for his chequered future. The Osmania campus, a melting pot of student politics, not only opened new windows to the world but also provided him with opportunities to hammer and shape the steel on the simmering coal fires of conflicting political ideologies. Soon he found himself walking along with the progressive section of the students, the Students Federation of India. Even as his interest in politics was evolving, Raju, as he was

## A One day Workshop on Digital Marketing

### About the College

S.R & B.G.N.R Government Arts and Science College was established in 1956 to cater the Educational needs of the Rural and Backward areas in and around Khammam town. Since Khammam is semi-urban area and is located aimed a commercially and industrially potential area, the college felt the need for introducing novel and Job Oriented Restructured courses to attend the demand of the day and the society.

### About the Departments

S.R & B.G.N.R Government Arts and Science College, Khammam has introduced the Computer Course in the year 1997 with B.Sc Mathematics, Physics and Computer Science combination. In the immediately successive year, i.e.(1998-1999) computer course with B.A and B.Com classes also was introduced. Since then there has been a steady and evident development of the department . Currently the Courses are B.Sc (Phy. Sci.) as MPCS, MCCS, MSCS, MECS, B.Com (CA), B.A(CA) and B.Sc (Life Sci. with CA) & with new course B.Sc Data Science.

### About the Workshop

Department of Computer Science & Applications is organizing the following event.

**Name of the Event: Workshop**

**Date 25-02-21**

**Venue: Computer Lab**

**Topic: Workshop on Digital Marketing**

### Content Covered:

#### *Digital Marketing*

*Digital marketing is defined as a marketing approach that primarily relies on the internet to connect with the target audience through various digital media channels and platforms. Its development during the 1990s and 2000s changed the way brands and businesses use technology for marketing. As digital platforms became increasingly incorporated into marketing plans and everyday life,<sup>[4]</sup> and as people increasingly use digital devices instead of visiting physical shops.*

Apart from traditional marketing channels, such as television, newspapers, billboards, and so on, marketers use these digital channels to guide prospects through their purchase journey and keep in touch with their existing customers.

#### **Types of Digital Marketing Channels**

The most important types of digital marketing channels:

1. Website
2. Content Marketing
3. Social Media Marketing
4. Pay Per Click(PPC) and Search Engine Marketing(SEM)
5. Email Marketing

6. Marketing Automation
7. Inbound Marketing
8. Affiliate Marketing

### **1. Website**

The website is often the home to your digital marketing efforts. Brands and organizations use websites to host content while using other mediums to distribute it. Most of your digital marketing activities will link back to your website, where an action is expected to take place, and the conversions are tracked.

### **2. Content Marketing**

Content creation is the spine of your entire digital marketing strategy. Some of the most common formats of content include text (blog posts), videos, images, info graphics, podcasts, slide decks, and ebooks.

### **3. Social Media Marketing**

Social media marketing ensure you are present on the platforms your users are spending the most time on. These include Facebook, Twitter, LinkedIn, Snapchat, and Instagram, where you can distribute content through both – organic and paid channels. Social media has also played a vital role in propagating video marketing and the ephemeral content wave.

### **4. Pay Per Click(PPC) and Search Engine Marketing(SEM)**

Digital advertising is an umbrella term for various online advertising strategies. The typical pricing/bidding strategies for digital advertising are Pay-Per-Click (PPC) and cost-per-mille (CPM), i.e., per thousand impressions. Common formats of digital advertising are search engine marketing (SEM), display advertising, native advertising, social media advertising, and programmatic advertising.

### **5. Email Marketing**

Email marketing is the process of maintaining a database of cold and warm contacts and sending them email alerts about your brand, products and services. Email marketing is useful to build your subscriber base, onboard new customers, retain existing ones, promote discounts and offers, and distribute content.

## **6. Marketing Automation**

Marketing automation uses software to automate monotonous marketing work. Marketing departments can automate repetitive tasks such as email marketing, social media posting, and even ad campaigns - not just for the sake of efficiency, but also to provide a more personalized experience for their customers.

## **7. Inbound Marketing**

Inbound marketing is a methodology based on attracting your target customers by accompanying them during the entire process from the time they first come into contact with your brand until they become loyal customers.

## **8. Affiliate Marketing**

The concept of affiliate marketing is similar to commission-based sales. Organizations provide custom links to their affiliates. Affiliates earn a specific cut/commission every time someone buys through their custom link. Influence marketing could be considered a modern and evolved spin-off of affiliate marketing.

Few more types in Digital Marketing

### **Mobile Marketing**

The number of smart phone users across the world is expected to grow to 3.5 billion in 2020. To bank on this opportunity, brands connect with their users on their smart phones through mobile apps, emails, mobile-friendly websites, and social media. By connecting with users on the go, brands have been able to optimize their marketing strategies and send timely messages.

### **Web Analytics**

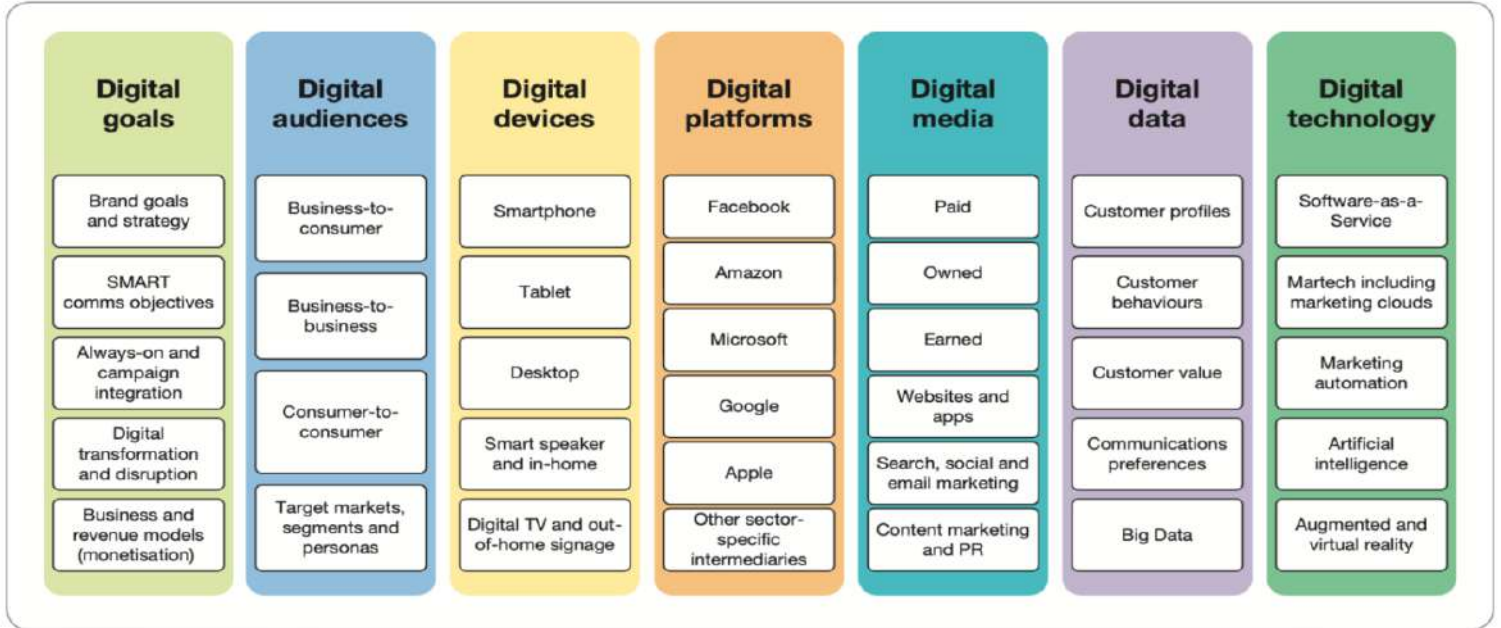

Web analytics is the practice of collecting, measuring, analyzing, and reporting data. This is commonly tracked through Google Analytics, but websites could also build their analytical tools. Web analytics helps marketers understand the sources of traffic, what's working and what's not, the return on investments (ROI), and how they can enhance their digital marketing efforts.

### **Search Engine Optimization (SEO)**

SEO acts as a jetpack for your content marketing efforts. SEO consists of on-page and off-page activities to boost your website's visibility in search engine result pages (SERPs) for your preferred keywords. Earlier, SEO was primarily text-based, but in recent years

voice search has gained prominence as well, which is why your SEO activities need to have a conversational approach.

## A One day Workshop on Creation of Google Forms

### About the College

S.R & B.G.N.R Government Arts and Science College was established in 1956 to cater the Educational needs of the Rural and Backward areas in and around Khammam town. Since Khammam is semi-urban area and is located aimed a commercially and industrially potential area, the college felt the need for introducing novel and Job Oriented Restructured courses to attend the demand of the day and the society.

### About the Departments

S.R & B.G.N.R Government Arts and Science College, Khammam has introduced the Computer Course in the year 1997 with B.Sc Mathematics, Physics and Computer Science combination. In the immediately successive year, i.e.(1998-1999) computer course with B.A and B.Com classes also was introduced. Since then there has been a steady and evident development of the department . Currently the Courses are B.Sc (Phy. Sci.) as MPCS, MCCA, MSCS, MECS, B.Com (CA), B.A(CA) and B.Sc (Life Sci. with CA) & with new course B.Sc Data Science.

### About the Workshop

“Artificial Intelligence” Workshop will be held at SR & BGNR GOVT. ARTS & SCIENCE COLLEGE(Autonomous), Khammam, Telangana, India, on 06, March 2021. The aim of the workshop Creation of Google forms is generally associated with creating Google forms, it is a free online tool from Google which allows users to create forms, surveys, and quizzes as well as to collaboratively edit and share the forms with other people. Our ability to combine knowledge from all these fields will ultimately benefit the progress in the quest of creating google forms.

Department of Computer Science & Applications is organizing the following event.

**Name of the Event: Workshop**

**Date: 01-03-21**

**Venue: Computer Lab**

**Topic: Workshop on Creation of Google Forms**

# Google Forms

Google Forms is a free online tool from Google which allows users to create forms, surveys, and quizzes as well as to collaboratively edit and share the forms with other people. Educators can use Google forms to assess their students at the beginning of the class and gauge pre-existing knowledge. Furthermore, Google forms can be used to give feedback to and receive feedback from students and parents. Similarly, students can use Google forms to assess their own learning and set the learning goals as well as to collect data for their research projects.

### **Opening Google Forms**

**Step 1.** Open Google Chrome.

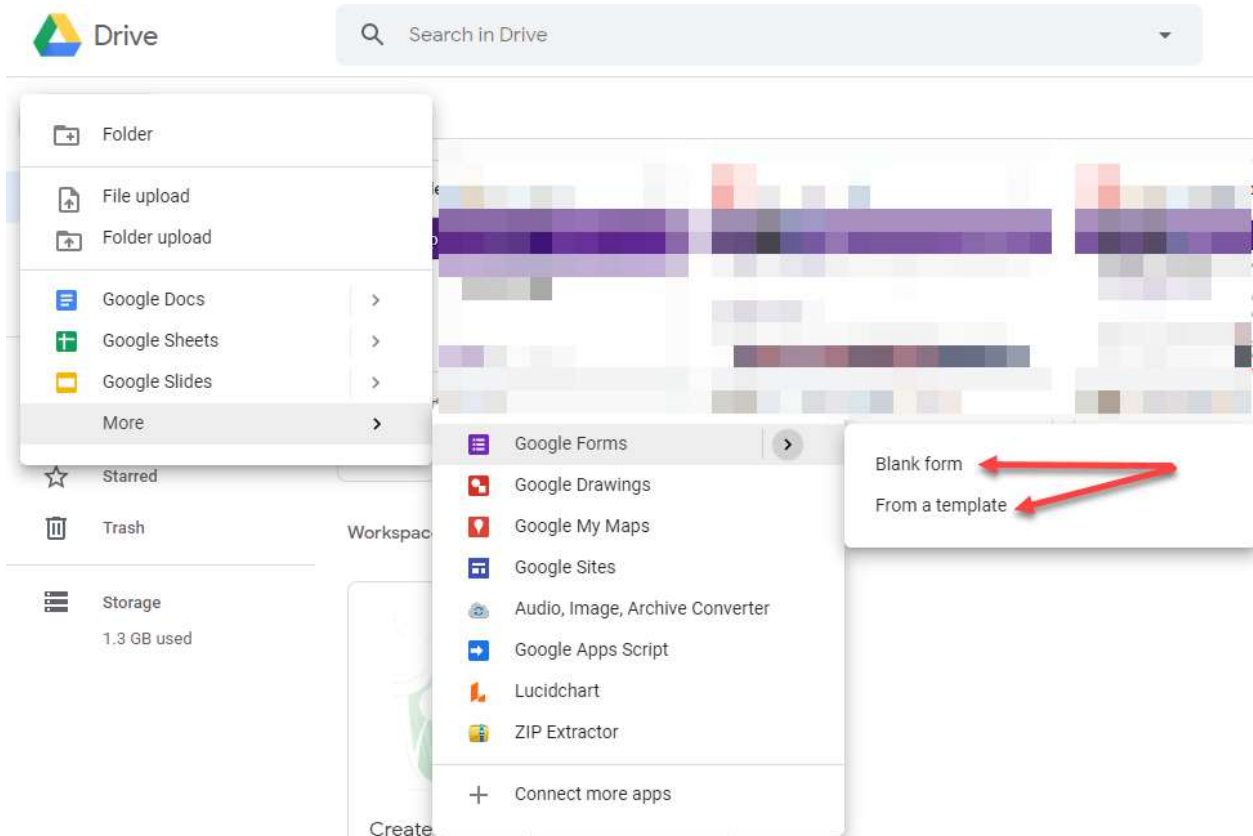

**Step 2.** Go to <http://drive.google.com>

**Step 3.** Enter your full Email address, then click **next**.

**Step 4.** Enter your Password, then click **Sign in**.

**You will now be signed into Google Drive.**

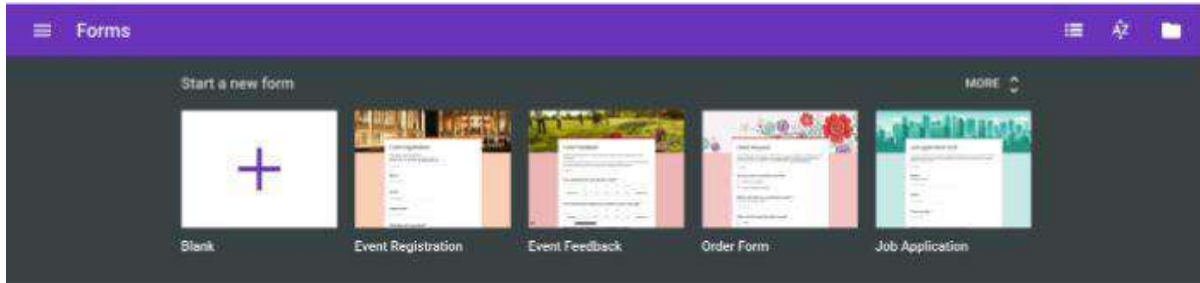

**Step 5.** Select **New > More > Google Forms** from the available menu. Choose either a **Blank form** or **From a template**.

## Editing Google Forms

### Creating a New Form from Template or by using a Blank form

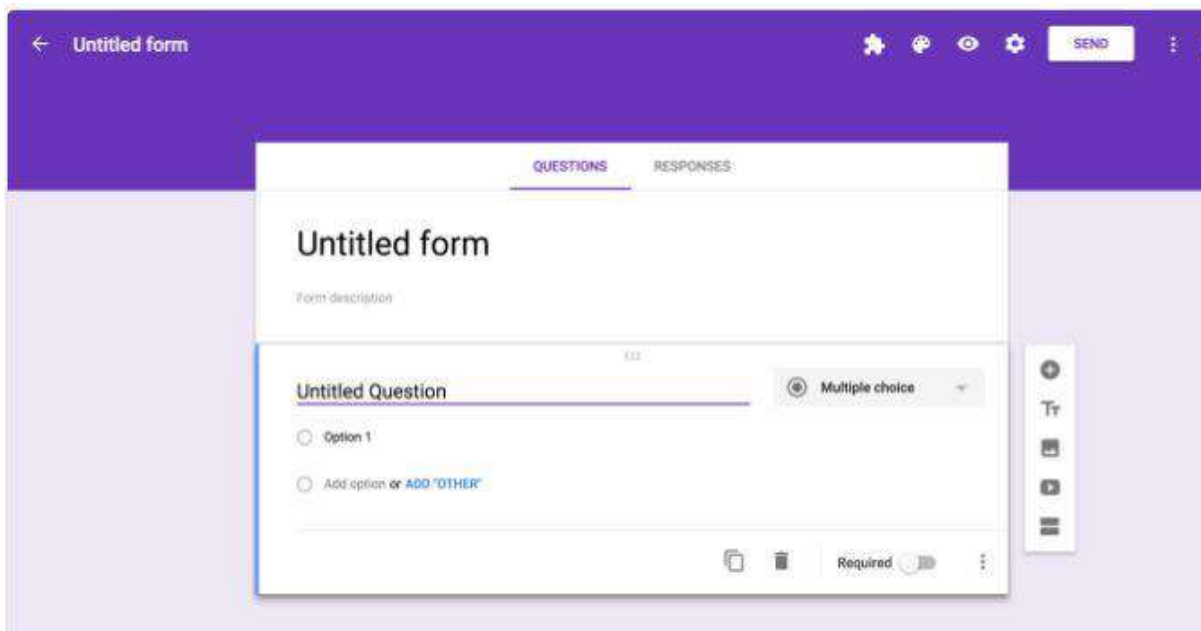

The Template gallery General tab offers a number of form templates. Or, simply click on Blank form to start from scratch.

## Steps involved in Creation of Google Form after selecting Blank form

### 1. Editing your form

Name the Form. Click the “Untitled Form” name in the top left corner of the screen, then enter the form’s name. Hit the “Enter” key to submit your changes. If using a template, click on the template title to change to a unique name of your choosing.

2. Edit Questions
3. Add Questions
4. Copy/Duplicate Question
5. Required Questions
6. Preview Form
7. Advanced Form Settings

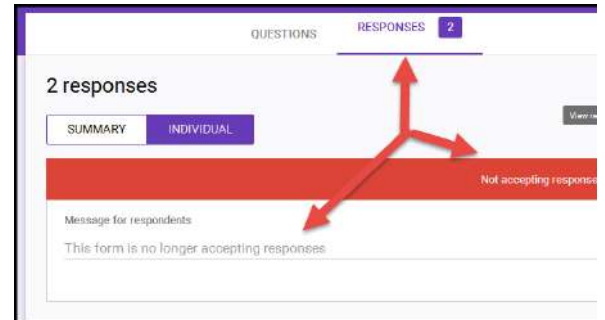

8. Send Form

9. View Form and Form Responses is Google Drive

10. Close Form

We can close the form for submission by selecting the **Responses** tab, then clicking the **Accepting Responses** toggle. You can modify the message respondents will see if they try to access your form while it is closed. Click the toggle again to reopen your form.

## Conclusion

If we wish to be notified of any new form submissions, select **Tools > Notification Rules** from the Google Sheet menu. Select your notification preference, then click **Save** to save your changes.

Do not modify the sheetsheet data until after you have collected all responses. Modifying the form could result in incorrect data placement.

## A One day Workshop on How to win virtual Interview

### About the College

S.R & B.G.N.R Government Arts and Science College was established in 1956 to cater the Educational needs of the Rural and Backward areas in and around Khammam town. Since Khammam is semi-urban area and is located aimed a commercially and industrially potential area, the college felt the need for introducing novel and Job Oriented Restructured courses to attend the demand of the day and the society.

### About the Departments

S.R & B.G.N.R Government Arts and Science College, Khammam has introduced the Computer Course in the year 1997 with B.Sc Mathematics, Physics and Computer Science combination. In the immediately successive year, i.e,(1998-1999) computer course with B.A and B.Com classes also was introduced. Since then there has been a steady and evident development of the department . Currently the Courses are B.Sc (Phy. Sci.) as MPCS, MCCS, MSCS, MECS, B.Com (CA), B.A(CA) and B.Sc (Life Sci. with CA) & with new course B.Sc Data Science.

### About the Workshop

"How to Win Virtual Interview" Workshop will be held at SR & B.G.N.R GOVT. ARTS & SCIENCE COLLEGE(Autonomous), Khammam, Telangana India, on 15, March 2021. The aim of the workshop How to Win Virtual Interview is to provide the skills mechanism to the students for facing the interview in online mode as in the current scenario due to the Covid-19 pandemic and social distancing measures, many industries are hiring and conducting interviews in virtual (online) mode. The workshop is to meet new challenges, collect new ideas and exhibit it as a practice during the session.

**Department of Computer Science & Applications is organizing the following event.**

**Name of the Event: Workshop**

**Date: 15-03-21**

**Venue: Computer Lab**

**Topic: Workshop on How to Win Virtual Interview**

Department of Computer Science and Applications organized a workshop on “How to Win Virtual Interview on 06-03-2021. The resource person is J.V.S. Arundathi and a well-known person in the field of Computer Science. The speaker began the workshop by giving information about current scenario to how to succeed in virtual interview , due to the global COVID-19 pandemic and social distancing measures, many industries are hiring online. According to research by Handshake, 89% of employers are conducting their job interviews online. However, pitching yourself as a candidate via video conference can be just as daunting as interviewing face to face.

They were also given brief introduction about the various tips used to make a good impression in a Virtual Job Interview

The speaker also gave valuable insights on interview questions both technical and aptitude. Overall the workshop was very informative and useful where the students gained a brief introduction to kick start their journey.

### **Content covered**

A virtual interview, or video interview, is a digital method that enables remote assessment and screening of candidates. They are often used as a first stage screening method, although their use accelerated as more firms went remote during 2020.

Sometimes they are conducted by telephone but they mostly take place using video conferencing software. Common platforms for remote interviews include Zoom, Microsoft Teams and Hinterview.

Often, virtual interviewing will be conducted like a traditional interview. However, interviewing by video requires more thought about body language, facial expressions and non-verbal communication. These are harder to convey and interpret than during a face-to-face interview.

## **How to prepare for a virtual interview**

### **1. Test Your Technology**

The minute you agree to a virtual interview, test your technology to ensure you're set up for success. Check your internet connectivity, and confirm your camera and microphone are working. If the picture is grainy or you're experiencing an echo. On the day of, test your equipment and internet connection again.

### **2. Set the Scene and Minimize Distractions**

While testing your technology, determine where to take the interview. Find a room with optimal lighting, preferably near a window, or a blank wall to guarantee you're the focal point of the conversation. Whether you sit on your living room couch or in your home office, tidy up your surroundings. It's hard to convince employers you're detail-oriented and organized when there's laundry visibly piling up in the corner. Once settled, eliminate all distractions. Turn off the TV, silence your cell phone, and close any nearby windows to muffle neighborhood traffic.

### **3. Sit Down Prepared**

Just because you're on a computer doesn't mean you can search the web for answers mid-interview, so avoid clicking around. You want to appear focused and ready to answer any questions without the help of the internet. Research the company ahead of time and jot down notes for easy reference. Also print out a copy of your resume, so that you don't forget key talking points.

#### **4. Practice, Don't Memorize**

It's important to keep things simple. Don't feel like you have to give a long-winded answer if the question doesn't warrant it. Being clear and concise is one of the most important things in a job interview.

#### **5. Monitor Your Body Language**

The main way to communicate confidence is to sit up straight, smile, and keep the camera at eye level. Research shows that employers are more likely to remember what you said if you maintain eye contact, so keep your focus on the camera when talking, not on the image of the hiring manager.

#### **6. Dress the Part**

Professional clothing will show you're serious about the position, but there are personal benefits, as well: Studies show that people feel "most authoritative, trustworthy, and competent when wearing formal business attire."

#### **7. Make a Connection**

It's not easy to connect with everyone, but it's a crucial part of a virtual interview. You want the interviewer to be able to remember a personal story you told or a common interest you share. This is the best way to prevent yourself from blending in with the other applicants.

#### **8. Be Yourself**

Some people will be able to tell if you're "vibe" fits their company right off the bat. Give them a reason to push you through to the second round of interviews by shining a light on how you can help the organization.

#### **9. Immediately Follow Up**

If there was something specific you bonded over, mention that in the email so you stay top of mind. Or if an interviewer brought up a particular business challenge, use the follow-up as a way to propose potential solutions. Just keep the email concise; you want your note to leave a lasting impression, not immediately end up in the trash.

## 5 TOP ONLINE INTERVIEW TIPS

Make an Impression from a Distance

- 1 Look directly into the camera and not at the screen or monitor to make good eye contact
- 2 Don't be afraid to ask for a question to be repeated if you have not heard it properly. It is better to clarify
- 3 The sound system can be less than perfect so speak clearly and avoid mumbling or rushing your words
- 4 Be aware of your facial expressions and posture - they are a large part of your message online
- 5 Pause before answering a question to be sure the interviewer has finished speaking

Best Job Interview

### **Concluding**

Ultimately, the key to acing a virtual interview is proper preparation. From ensuring your technology is working to conducting research before the meeting, sitting down at your computer poised and ready for any and all questions will help set you apart from other applicants.

## A One day Workshop on Artificial Intelligence

### About the College

S.R & B.G.N.R Government Arts and Science College was established in 1956 to cater the Educational needs of the Rural and Backward areas in and around Khammam town. Since Khammam is semi-urban area and is located aimed a commercially and industrially potential area, the college felt the need for introducing novel and Job Oriented Restructured courses to attend the demand of the day and the society.

### About the Departments

S.R & B.G.N.R Government Arts and Science College, Khammam has introduced the Computer Course in the year 1997 with B.Sc Mathematics, Physics and Computer Science combination. In the immediately successive year, i.e.(1998-1999) computer course with B.A and B.Com classes also was introduced. Since then there has been a steady and evident development of the department . Currently the Courses are B.Sc (Phy. Sci.) as MPCS, MCCS, MSCS, MECS, B.Com (CA), B.A(CA) and B.Sc (Life Sci. with CA) & with new course B.Sc Data Science.

### About the Workshop

"Artificiaial Intelligence" Workshop will be held at SR & BGNR GOVT. ARTS & SCIENCE COLLEGE(Autonomuos), Khammam, Telangana, India, on 06, March 2021. The aim of the workshop Artificial Intelligence is generally associated with Computer Science, but it has many important links with other fields such as Maths, Biology and Philosophy, among many others. Our ability to combine knowledge from all these fields will ultimately benefit the progress in the quest of creating an intelligent artificial being.

Department of Computer Science & Applications is  
organizing the following event.

**Name of the Event: Workshop**

**Date: 06-03-21**

**Venue: Computer Lab**

**Topic: Workshop on Artificial Intelligence**

### Content Covered:

- Artificial Intelligence (AI) is a branch of *Science* which deals with helping machines finding solutions to complex problems in a more human-like fashion.
- This generally involves borrowing characteristics from human intelligence, and applying them as algorithms in a computer friendly way. A more or less flexible or efficient approach can be taken depending on the requirements established, which influences how artificial the intelligent behaviour appears.
- AI is generally associated with *Computer Science*, but it has many important links with other fields such as *Maths*, *Psychology*, *Cognition*, *Biology* and *Philosophy*, among many others. Our ability to combine knowledge from all these fields will ultimately benefit our progress in the quest of creating an intelligent artificial being.

### Types of Artificial Intelligence

- Reactive Machines
- Limited Memory
- Theory of Mind
- Self-Awareness

# Types of AI

The emergence of artificial superintelligence will change humanity, but it's not happening soon. Here are the types of AI leading up that new reality.

Reactive AI	Limited memory	Theory of mind	Self-aware
<ul style="list-style-type: none"><li>Good for simple classification and pattern recognition tasks</li><li>Great for scenarios where all parameters are known; can beat humans because it can make calculations much faster</li><li>Incapable of dealing with scenarios including imperfect information or requiring historical understanding</li></ul>	<ul style="list-style-type: none"><li>Can handle complex classification tasks</li><li>Able to use historical data to make predictions</li><li>Capable of complex tasks such as self-driving cars, but still vulnerable to outliers or adversarial examples</li><li>This is the current state of AI, and some say we have hit a wall</li></ul>	<ul style="list-style-type: none"><li>Able to understand human motives and reasoning. Can deliver personal experience to everyone based on their motives and needs.</li><li>Able to learn with fewer examples because it understands motive and intent</li><li>Considered the next milestone for AI's evolution</li></ul>	<ul style="list-style-type: none"><li>Human-level intelligence that can bypass our intelligence, too</li></ul>
			

## Examples Of Artificial Intelligence

- Siri, Alexa and other smart assistants
- Self-driving cars
- Robo-advisors
- Conversational bots
- Email spam filters
- Netflix's recommendations

## Pros

- Good at detail-oriented jobs;
- Reduced time for data-heavy tasks;
- Delivers consistent results; and
- AI-powered virtual agents are always available.

## Cons

- Expensive;
- Requires deep technical expertise;
- Limited supply of qualified workers to build AI tools;
- Only knows what it's been shown; and

- Lack of ability to generalize from one task to another.

## A One day Workshop on DBMS in Industries

On  
**"DBMS in Industries"**  
On  
**4<sup>th</sup> December, 2021**

**DEPARTMENT OF COMPUTER SCIENCE & APPLICATIONS**

**AUTONOMOUS  
KHAMMAM**

**STUDENT DEVELOPMENT PROGRAM**

(To cultivate Student Learning and development by supporting Students in their Academic, Personal and Social Growth)

### About the College

SR & B.G.N.R Government Arts and Science College was established in 1956 to cater the Educational needs of the Rural and Backward areas in and around Khammam town. Since Khammam is semi-urban area and is located aimed a commercially and industrially potential area, the college felt the need for introducing novel and Job Oriented Restructured courses to attend the demand of the day and the society.

### About the Department

SR & B.G.N.R Government Arts and Science College, Khammam has introduced the Computer Course in the year 1997 with B.Sc Mathematics, Physics and Computer Science combination. In the immediately successive year, i.e.(1998-1999) computer course with B.A and B.Com classes also was introduced. Since then there has been a steady and evident development of the department. Currently the Courses are B.Sc (Phy. Sci.) as MPCS, MCCS, MSCS, MECS, B.Com (CA), B.A(CA) and B.Sc (Life Sci with CA).

### About the Workshop

"DBMS in Industries" Workshop will be held at SR & BGNR GOVT. ARTS & SCIENCE COLLEGE(Autonomous), Khammam, Telangana India, on 4<sup>th</sup> December, 2021. The aim of the workshop DBMS in Industries makes it possible for end users to create, protect, read, update and delete data in a database. The most prevalent type of data management platform, the DBMS essentially serves as an interface between databases and users or application programs, ensuring that data is consistently organized and remains easily accessible. The workshop is to meet new challenges, collect new ideas and exhibit it as a practice during the session.

Department of Computer Science & Applications is  
organizing the following event.

**Name of the Event:** Workshop

**Date:** 04-12-21

**Venue:** Computer Lab

**Topic:** Database in Industries

- Databases are widely used by businesses to store reference data and track transactions. Websites need databases and **Enterprise Resource Planning (ERP)** systems need them.
- The **Database Management System (DBMS)** is the software that formats data for storage in databases and gives access to it through data retrieval methods. It is difficult to get an **overview of your data** through command line SQL. A graphical user interface gives you a much better way of checking the status of your database and managing it properly with better visibility.
- If you are starting to look around for software to meet your business needs, you are going to encounter a lot of options that have a database system as their base. Sophisticated interfaces to new database tools make it easier for anyone in the business to create and run a database – you no longer need a specialist database technician or Database Administrator.

**List of the best database management software:**

1. **Microsoft SQL Server Management Studio** A free tool from Microsoft that makes the administration of SQL Server database easier.
2. **TeamDesk** and online database creator and is aimed at small enterprises that probably don't have a DBA on staff.
3. **SQL Server Monitoring** A monitoring system for networks, servers, applications, and websites that includes database monitoring. This is a cloud-based service.

**DBMS Tools:**

Here we will look at different database front ends that will help you manage your data effectively. The list here contains a range of SQL management tools that are suitable for individuals up to large organizations with dedicated DBAs.

- An easy-to-use interface

- Full control through to the underlying DBMS
- Query optimization features
- Performance tracking with alerts
- Examination of underlying resource usage by the DBMS
- Secure interface, preferably with multiple user accounts with adjustable permission levels for technician access
- Free assessment period either through a demo, a money-back guarantee, or a free trial period
- Valuable tools at a fair price

#### **Site24x7 SQL Server Monitoring:**

Site24x7 is a cloud-based monitoring platform that offers a number of packages to businesses. Site24x7 Infrastructure is a system that supervises networks, servers, and applications and it includes a database monitoring service.

#### **Key Features:**

- Database transaction monitoring
- System resource monitoring
- Encrypted connection for data uploads
- Application stack mapping

This monitoring system is able to track the performance of It SQL Server, MySQL, Oracle, Site24x7 Infrastructure also searches running processes to identify connections between applications. This enables it to draw up an application stack, which maps the interdependencies of applications, including databases. The application stack is then a key resource if interfaces or applications show performance issues. It supports root cause traces to check whether the real problem is really with another part of the system. It also identifies the resources of the supporting host that are used by the database and watches their capacity.

The database monitor records total temporary tables, space used by temporary tables, temporary tables on disk, and temporary table removal. It logs read and write activities, slow queries, aborted clients, threads, and open files. The system also tracks database connection usage, aborted connections, and the maximum number of used connections.

Site24x7 Infrastructure database monitoring includes an alerting mechanism that is based on performance and resource availability thresholds. This generates an alert whenever a problem arises. The alerts can be forwarded to technicians by SMS, email, voice call, or instant messaging post.

Organised by  
The Department of Telugu  
**SR & BGNR GOVERNMENT ARTS & SCIENCE COLLEGE (A)**  
Khammam, Telangana - 507 002.

**ABOUT THE SEMINAR**

Literary writings in the Language of Telugu have enriched the culture and life of the Telugu speaking people all over the globe, particularly during the last hundred years. The genre of poetry in spite of far reaching advancements in technology is still impacting the cultural ethos of the Telugu people.

Kundurti Anjaneyulu, who is known as the father of the free-verse in Telugu Literature, had immensely contributed for four decades for consolidating the genre with a missionary zeal.

With the intense efforts of Kundurti, the free-verse remained as a popular genre that explained various isms, movements, trends and ideological horizons which enriched the socio-cultural arenas of Telugu.

Kundurti Anjaneyulu was born on 16-12-1922 at Kotapalem village, Narsaraopet taluka of Guntur district, A.P. The department of Telugu SR&BGNR, Khammam is proposing to organize a two day national seminar on Kundurti's free-verse to commemorate the birth centenary of the multifaceted genius of all times whose contribution to Telugu literature must be exposed to the present day generation of scholars, researchers, thinkers, teachers and writers of creative spirit.

The two day National seminar broadly focuses on:

1<sup>st</sup> day- Paper presentation on Kundurti writings, genre of free-verse, its role in Telugu Literature.

2<sup>nd</sup> day- Free-verse, its impact on the writers, assessment, construction of poetry with free-verse paper presentations, discussions.

**EXPECTED OUTCOME:**

The proposed seminar aims at exploring the genre of free-verse, its influence on Telugu Literature and how it has intensely stimulated all the creative writers, intellectuals and critics in the field of Modern Telugu Literature.

The seminar aims at assessing the outcomes from the Free-Verses, how it has influenced and helped in creating a new trend in writing a variegated poetry. The seminar explores new kind of interpretations.

**AIM**

The two day National Seminar aims at providing a discussion platform on free-verse and the contribution of Kundurti Anjaneyulu.

**OBJECTIVES**

1. To help the interested in gaining critical appreciation of free-verse Movement initiated by Kundurti.
2. To gain insights into achievements resulted in through free-verse movement.
3. To study the impact of free-verse movement in modern Telugu Poetry.
4. To analyse the different trends and movements that have come as either offshoots or responses to Kundurti Poetry.

#### ABOUT THE SEMINAR

Despite serious developmental efforts of the state and the civil society, the Dalits still remain excluded from economic, cultural, social and political benefits that accrued to a large number of other communities. They cannot, even in the technologically advanced world, escape from the vicious fangs of the age-old social institution of 'caste'.

In spite of implementing several schemes and plans for dalit empowerment for the last seventy five years of independent India, the socio-economic and political status still sets them apart from the other upper castes and backward classes. Government reservations have increased their number in schools, colleges and government institutions but they do not alone materialise the much awaited goal of social inclusion. For, still can be seen the discrimination, oppression and the silent suffering of the dalits in various forms and magnitude across the country.

The strong hegemonic sentiment is adversely affecting the incessant efforts of the government to benefit this most marginalised group in India and made them remain an underclass in the debris of institutionalised discrimination and marginalisation. Therefore, the Dalits must raise their voice against the organised negligence, question the entire methodology for not producing effective outcomes and strive for equality, full participation, greater autonomy, respect and honour for their ceaseless and untiring contribution for the welfare of the society.

#### AIM

The two day National Seminar aims at providing a discussion platform for the issues and challenges concerning the holistic development of the dalits.

#### OBJECTIVES

**MESSAGE**

Greetings...

It gives me a sense of academic fulfilment that our Department of Economics and Department of English jointly organized a RUSA sponsored Two-Day National Conference on 'the Holistic Development of the Dalits' successfully which took place on 28<sup>th</sup> & 29<sup>th</sup> of December, 2021. I am happy that the Conference gave way to bringing out the International Journal Special Issue at [www.langlit.org](http://www.langlit.org) accommodating a brilliant collection of bonafide research papers presented in the conference.

Our Hon'ble Commissioner & RUSA, State Project Director Sri Navin Mittal, IAS and Dr Soundarya Joseph, RUSA, State Project Officer have extended their kind support and cooperation in organizing the Conference and publishing the Conference Journal known for its fangs of index and impact factor replete with research ethics and UGC approved prospective accordingly. Our institution is ever thankful to the Academic Cell and the good offices of the Hon'ble Commissionerate of Collegiate Education, Telangana, Hyderabad.

I congratulate the In-charges, Faculty and students of the college and those of Departments of Economics and English in specific on this occasion. I am pleased to acknowledge the contribution of the conference conveners, organizers, and members on different committees, resource persons and guests, presenters, participants, parents, students and well-wishers of the college on this occasion

**Dear Readers,**

Welcome to the Langlit Journal Publication under the Special Issue in the light of the One Day National Conference held with ISSN of an International Peer Review Open Access Journal, given out on behalf of the Production Editor with the Editorial Board concerned as the December 2021 Issue.

On behalf of the Departments of Economics and English of the much sought after institution SR&BGNR Government Arts and Science, Khammam, we are pleased to present the UGC Approved "Conference Journal" bearing the ISSN wherein "Complete Papers" thus presented are accommodated @ [www.langlit.org](http://www.langlit.org), which facilitates the contributors in turn toward the RUSA sponsored Two Day National Conference on 'The Holistic Development of the Dalits' which took place on the 28th and 29th of December, 2021. One of the goals of the Publication of this Journal under Special Edition is to encourage publication from a variety of research streams to expand the conversation on the conference's theme among the intelligentsia in the cross-section of the researchers' cult. Readers will see progress in this direction through the Conference Journal, which is the ISSN embedded in the Full Papers.

While we gratefully acknowledge *Langlit: An International Peer-Reviewed and Open Access Journal* with an Impact Factor of 5.61 for publishing the Conference Journal with an ISSN, we do recognise the stakeholders whose contributions to this modest volume of research brainwaves delved into various prospects for the Dalits' holistic development and bounty are extremely important. By the way, the "Langlit" is already indexed in the Directory of Open Access Journals and in ICI, Google Scholar, Research Gate, Academia.edu, IBI, IIFC, DRJI, and the Cite Factor, to name a few! Concisely, *Langlit* is a publication dedicated to breakthroughs in language and humanities. It publishes work that speaks to the discipline, including thoughts on current research and the literature's significance in the world outside of academia. All of these are possible indicators of professional competence and achievements.

To return to the topic at hand, the Indian government's most significant problem in reducing the social impacts of the caste system, which remain ingrained in Indian culture, has been securing Dalit access to education. Over the past one hundred and fifty years, there have been numerous initiatives to improve the quality of life for India's Dalits through development centred on lifestyles and jobs. There have been multiple proposals, both traditional and modern, on addressing the challenges in Dalit holistic development. There is Dalit Literature available at this time. Dalit literature encapsulates the Dalit community's collective consciousness of centuries of social, political, economic, and racial persecution. Dalit writing is a phenomenon that emerged after independence. The advent of Dalit writing is a watershed moment in history. Dalits have long been on the periphery of Indian society. In an aesthetic sense, Dalit literature refers to works of literature depicting the Dalits' anguish - family breakdown, poverty, humiliation, makeshift living conditions, etc. The untouchables, through their portrayal, speak loudly across a caste-ridden society, destroying the upper-vaunted class's purity. The liberation of Dalits is the primary goal of Dalit literature. The anger and resentment of Dalits against the social inequality come out in the grab of Dalit Literature. Keeping this in view, contributors have carried out genuine research papers bonafide enough for paper presentations at the conference and publication of the *Conference Proceedings on the day of the conference* and *Conference Journal* now as Special Issue. Of course, the Langlit deserves all credit for spreading it beyond frontiers accordingly.

# हिंदी भाषा को सार्वभौमिक बनाने की जरूरत : प्रो. करन सिंह

हैदराबाद, 10 जनवरी (स्वतंत्र वार्ता)। विश्व हिंदी दिवस के अवसर पर खम्मम के एसआर एंड वीजीएनआर गवर्नमेंट आर्ट्स एंड साइंस स्वायत्त प्राप्ति कॉलेज और स्थानीय शासकीय महिला महाविद्यालय, पल्लोचा के शासकीय महाविद्यालय, कोत्तगुडम एस. आर. शासकीय महाविद्यालय, सत्तुपल्ली जलगम वंगल राव शासकीय महाविद्यालय ने संयुक्त रूप से राष्ट्रीय वेबिनार गूगल मीट-ऑनलाइन का आयोजन किया। ऑनलाइन व्याख्यान में मौलाना आजाद राष्ट्रीय उर्दू विश्वविद्यालय, हिंदी विभाग के अध्यक्ष एवं प्रो. करन सिंह ऊटवाल मुख्य वक्ता के रूप में भाग लिए थे। उन्होंने छात्रों और विद्वानों से बात

करते हुए आशा व्यक्त की कि जल्द ही हिंदी भाषा सार्वभौमिक हो जाएगी। संयुक्त राज्य अमेरिका में अंतर्राष्ट्रीय हिंदी संस्थान, नेपाल में हिंदी साहित्य समिति, सिंगापुर में हिंदी समाज, मॉरीशस में हिंदी प्रचार सभा और हिंदी संगठन, दक्षिण अफ्रीका और कनाडा के टोरंटो में दुनिया भर के लगभग 200 संस्थाओं हिंदी को विश्वव्याप्त बनाने में अपनी महत्वपूर्ण भूमिका निभा रही हैं। हिंदी दुनिया की बहुत सरल और सुबोध आधुनिक भाषा है। जापान के साथ-साथ बहुत सारे देशों में रोमन लिपि में हिंदी का अध्ययन और अध्यापन कर रहे हैं। उन्होंने कहा कि पारंपरिक साहित्य के साथ-साथ सोशल मीडिया और

हिंदी फिल्मों हिंदी भाषा के सार्वभौमिकरण में बहुत योगदान दे रही हैं। इस आयोजन के लिए एस. आर एंड वी. जीएन. आर गवर्नमेंट आर्ट्स एंड साइंस कॉलेज के प्राचार्य डॉ. मोहम्मद ब्राकीरुल्ला ने अध्यक्षता की।

उन्होंने कहा कि हिंदी का विश्व जवान बने। प्रेमचंद जैसे अनेक महान लेखकों ने विश्व कोटी में गिने जानेवाली रचनाएँ की, जबकि स्थानीय महिला कॉलेज की प्राचार्य पद्मावती ने कहा कि हिंदी भारत को सामाजिक और सांस्कृतिक रूप से एक सूत्र में बांध सकती है। पल्लोचा शासकीय महाविद्यालय के प्राचार्य डॉ. वाई. चिन्नाप्पाय्या ने कहा कि इस प्रकार संयुक्त रूप से आयोजित वेबिनार व व्यख्यान के माध्यम से यह महसूस हो रहा है कि विश्व को वसुधैव कुटुम्बकम् बनाने की शक्ति हिंदी में है। इस वेबिनार में शामिल करके उन्हें उचित स्थान देने के प्रति कोत्तगुडम एस. आर शासकीय महाविद्यालय के प्राचार्य डॉ. जे. माधवी और सत्तुपल्ली जे. वी. आर महाविद्यालय के प्राचार्य पी रामचंद्र राव ने आभार प्रकट किये थे। कार्यक्रम में हिंदी के सहायक आचार्य ए. सांबशिव राव, डॉ. टी. अरुण कुमारी, डॉ. के. पद्मानी, के. मधु के साथ शोधार्थी और उत्सुक विद्यार्थी श्रद्धा के साथ जुड़े।

# A One day Workshop on Machine Learning

## About the College

S.R & B.G.N.R Government Arts and Science College was established in 1956 to cater the Educational needs of the Rural and Backward areas in and around Khammam town. Since Khammam is semi-urban area and is located aimed a commercially and industrially potential area, the college felt the need for introducing novel and Job Oriented Restructured courses to attend the demand of the day and the society.

## About the Departments

S.R & B.G.N.R Government Arts and Science College, Khammam has introduced the Computer Course in the year 1997 with B.Sc Mathematics, Physics and Computer Science combination. In the immediately successive year, i.e.(1998-1999) computer course with B.A and B.Com classes also was introduced. Since then there has been a steady and evident development of the department . Currently the Courses are B.Sc (Phy. Sci.) as MPCS, MCCS, MSCS, MECS, B.Com (CA), B.A(CA) and B.Sc (Life Sci. with CA) & with new course B.Sc Data Science.

## About the Workshop

"Machine learning" Workshop will be held at SR & BGNR GOVT. ARTS & SCIENCE COLLEGE(Autonomous), Khammam, Telangana, India, on 12<sup>th</sup>, February 2022. The aim of the workshop Machine learning is an application of AI that enables systems to learn and improve from experience without being explicitly programmed. Machine learning focuses on developing computer programs that can access data and use it to learn for themselves.

**Topic: Workshop on Machine Learning**

Machine learning is a growing technology which enables computers to learn automatically from past data. Machine learning uses various algorithms for building mathematical models and making predictions using historical data or information. Currently, it is being used for various tasks such as image recognition, speech recognition, email filtering, Facebook auto-tagging, recommender system, and many more.

Machine learning is important because it gives enterprises a view of trends in customer behavior and business operational patterns, as well as supports the development of new products. Many of today's leading companies, such as Facebook, Google and Uber, make machine learning a central part of their operations.

Machine Learning is said as a subset of artificial intelligence that is mainly concerned with the development of algorithms which allow a computer to learn from the data and past experiences on their own. The term machine learning was first introduced by Arthur Samuel in 1959.

Machine learning enables a machine to automatically learn from data, improve performance from experiences, and predict things without being explicitly programmed.

### **Features of Machine Learning:**

- Machine learning uses data to detect various patterns in a given dataset.
- It can learn from past data and improve automatically.
- It is a data-driven technology.

- Machine learning is much similar to data mining as it also deals with the huge amount of the data.

### **Need for Machine Learning**

The need for machine learning is increasing day by day. The reason behind the need for machine learning is that it is capable of doing tasks that are too complex for a person to implement directly. As a human, we have some limitations as we cannot access the huge amount of data manually, so for this, we need some computer systems and here comes the machine learning to make things easy for us.

The importance of machine learning can be easily understood by its uses cases, Currently, machine learning is used in self-driving cars, cyber fraud detection, face recognition, and friend suggestion by Facebook, etc. Various top companies such as Netflix and Amazon have build machine learning models that are using a vast amount of data to analyze the user interest and recommend product accordingly.

### **Conclusion:**

Machine Learning is directly or indirectly involved in our daily routine. We have seen various machine learning applications that are very useful for surviving in this technical world. Although machine learning is in the developing phase, it is continuously evolving rapidly. The best thing about machine learning is its High-value predictions that can guide better decisions and smart actions in real-time without human intervention. Hence, at the end of this article, we can say that the machine learning field is very vast, and its importance is not limited to a specific industry or sector; it is applicable everywhere for analyzing or predicting future events.

## About the College

S.R & B.G.N.R Government Arts and Science College was established in 1956 to cater the Educational needs of the Rural and Backward areas in and around Khammam town. Since Khammam is semi-urban area and is located aimed a commercially and industrially potential area, the college felt the need for introducing novel and Job Oriented Restructured courses to attend the demand of the day and the society.

## About the Departments

S.R & B.G.N.R Government Arts and Science College, Khammam has introduced the Computer Course in the year 1997 with B.Sc Mathematics, Physics and Computer Science combination. In the immediately successive year, i.e.(1998-1999) computer course with B.A and B.Com classes also was introduced. Since then there has been a steady and evident development of the department . Currently the Courses are B.Sc (Phy. Sci.) as MPCS, MCCS, MSCS, MECS, B.Com (CA), B.A(CA) and B.Sc (Life Sci. with CA) & with new course B.Sc Data Science.

## About the Workshop

"Recent trends in Cloud Computing" Workshop will be held at SR & BGNR GOVT. ARTS & SCIENCE COLLEGE(Autonomous), Khammam, Telangana India, on 23<sup>rd</sup> February, 2022. The aim of the workshop Recent trends in Cloud computing is the delivery of different services through the Internet. These resources include tools and applications like data storage, servers, databases, networking, and software. The workshop is to meet new challenges, collect new ideas and exhibit it as a practice during the session.

**Department of Computer Science & Applications is  
organizing the following event.**

**Name of the Event: Workshop**

**Date: 23-02-22**

**Venue: Computer Lab**

**Topic: Workshop on Cloud Computing**

Cloud computing refers to the delivery of on-demand computing services including IT infrastructure, storage, network systems, and applications over the internet. Services are provided by a third-party vendor who handles the management and maintenance of the physical data centers where the cloud services live.

Cloud computing has already reshaped the way companies do business, but the transformative effects of the cloud are far from over. Trends in 2022 display a continuation of rapid adoption and growth as companies continue to use the cloud to modernize operations and expand IT capabilities.

### **Cloud Computing Trends**

The cloud continues to be a crucial resource across various sectors as companies increasingly rely on on-demand IT.

- Deploying to the Edge
- The Continued Rise of Serverless Computing
- Even More AI and ML Adoptions
- Kubernetes and Blockchain
- More Emphasis on Cloud Security
- Developments in Cloud Gaming, AR, and VR

## Cloud Computing Trends to Keep an Eye on in 2022

The cloud became one of the biggest technological winners in the last two years. It became both a trend that facilitates innovation and a standard that enables flexibility and cost savings. And with a continued importance of cloud services in almost all business operations, there is no doubt that the cloud is the future. So, in this tremendous digital landscape of varied and dynamic architecture, it's obvious that new cloud-native trends will continue to emerge.

### Conclusion

The topics being discussed include: Edge Computing, Edge Server, Data center, benefits of Cloud, Serverless Computing, Kubernetes, Kubernetes Clusters multi-cloud etc.,.

### MESSAGE

I am happy to note that the Department of Chemistry, SR & BGNR Govt. Arts & Science College (Autonomous), Khammam is organizing a RUSA sponsored Two Day National Seminar, entitled “**Emerging Trends in Chemical and Materials Science Research**”, on 25<sup>th</sup> & 26<sup>th</sup> February, 2022

The marvels of Chemistry are endless and have been instrumental in the development of increasing the life expectancy of mankind. There is a dire need to deliberate on significant aspects like developing smarter chemical targets in pharmaceutical industry to prevent, cure and control infectious diseases (e.g., COVID-19 Vaccine), new approaches in treating diseases, improving regenerative medicine and biological therapeutics.

Materials science is supplying the smart materials for the development of the simple electronic devices, artificial organs of human body to replace the damaged parts and so on. Nanomaterials are paving the way for the targeted release of the drug in the human body, without distributing the drug throughout the body. **Marvelous indeed are the achievements of modern chemistry and Materials.**

I hope the seminar provides an excellent opportunity for the teaching faculty, academicians, scientists, researchers and students to review on the technological developments in the key areas of chemistry and materials science.

I congratulate the Principal Dr. Mohammad Zakirullah, and the convener, Co-convener, Organizing secretary, teaching faculty and students for conducting this event. I wish the seminar a grand success.

### MESSAGE

I am extremely glad to know that the Department of Chemistry, SR&BGNR, Government Arts & Science College (Autonomous), Khammam, is organizing a RUSA, TSCHE & TSCOST Sponsored Two-day National Seminar on “**Emerging Trends in Chemical and Materials Science Research**” (ETCMSR-2022) on **25 & 26<sup>th</sup> February, 2022**.

Chemistry plays a wide role in Human life. Mankind relies heavily on chemistry for Health, medical preparations like antibiotics, vaccines and drugs to control and cure diseases and in the enhancement of life expectancy of humans. From simple sterilization to vaccines, the marvels of chemistry are endless and a chemist is a magician. From the pharmaceuticals revolution to the nanotechnology, controlling the pathogenic infections to viral out breaks; all the medicinal and material ingredients are developed with the chemical and pharmaceutical industry.

I congratulate the Principal, Convener and Organizing Secretary and Faculty, Department of Chemistry, and all other concerned, for their efforts for the propagation of Chemistry, with their innovative idea and bringing out souvenir to mark the event. I compliment and wish the National Seminar a Great Success to achieve the set goals, to impart knowledge and innovation to the young minds.

### MESSAGE

I am glad to convey my best wishes to the organisers of two-day National Seminar on “Emerging Trends in Chemistry and Materials Science Research (ETCMSR – 2022)” being organised by Department of Chemistry, SR & BGNR Government Degree College, Khammam during 25th & 26th February, 2022. I am pleased to know that the Department is bringing out a Souvenir on this occasion.

At the outset, I wish to appreciate the entire teaching community for their academic contribution made during the Covid crisis despite the fact that many teachers suffered due to this pandemic in various ways. I am happy to mention that the teachers have quickly responded to this crisis and adapted to new methods of teaching- learning process.

I am delighted that the department of Chemistry, SR&BGNR Government Degree College, Khammam, had chosen a contemporary topic for the two day seminar. I hope that the deliberations and discussions that are going to take place in this seminar will keep us in tune with emerging and ever changing scenario in this field. I am confident that this seminar with its constructive deliberations will certainly generate and disseminate relevant knowledge for the betterment of society. The higher educational institutions should always strive and aim their research to meet the local, national and global needs. Materials play very important role in science and technology. Many functional materials like compound semiconductors, alloys, multiferroics are extensively used in the development of latest technology. Materials science is one of the most important and fascinating subjects.

I congratulate the teaching staff, scholars and students of SR & BGNR college on the occasion of organising this two-day National Seminar. I wish that the interactions and deliberations will be fruitful and the seminar a great success.

I am glad to learn that the Department of Chemistry, SR&BGNR, Government Arts & Science College (Autonomous), Khammam, is organizing a Two-day National Seminar on "Emerging Trends in Chemical and Materials Science Research" (ETCMSR-2022) on 25 & 26'th February, 2022. I congratulate the Principal and Faculty, Department of Chemistry, and all others concerned, for their efforts for the propagation of Chemistry, an important branch of Science and bringing out souvenirs to mark the Event.

I strongly believe that this National Seminar on "Emerging Trends in Chemical and Materials Science Research" will indeed be a step in that direction and is precisely justified in the current context. The present seminar will focus on various aspects of the present-day "Chemical Research" activities that can motivate the budding scientists of the future. I wish the ETCMSR-2022 a great success

### MESSAGE

I am happy to note that the Department of Chemistry, SR&BGNR, Government Arts & Science College (Autonomous), Khammam, is organizing a RUSA, TSCHE & TSCOST Sponsored Two-day National Seminar on “**Emerging Trends in Chemical and Materials Science Research**” (ETCMSR-2022) on 25 & 26 th February, 2022. Chemical science is instrumental in the development of modern medicine, from diagnosis to life saving drugs, antibiotics and vaccines, thus increasing the life expectancy of the mankind.

I extend warm greetings to the convener, co-convener, organizing secretary and the faculty of the department of chemistry for their untiring efforts in organizing a Two-day National Seminar on important area of today’s science which focuses and seek to answer the challenges like AIDS, Hepatitis-B to COVID-19 viral out breaks, constantly pose a great threat to humanity, in spite of the fact that science has marvelously controlled non-communicable diseases, with minimizing the side effects on one hand and environmental pollution on the other hand.

I hope the seminar provides an excellent platform of opportunity for the teaching faculty, academicians, scientists, researchers and students to review and discuss on the technological developments in the key areas of Chemistry and Material Sciences, for the continuous education on human health and environment.

I am thankful to the RUSA & TSCHE for providing financial assistance to conduct the Two-day National Seminar. I am grateful to the Telangana State Council of Science & Technology (TSCOST) for extending financial support to organize the programme on the occasion of ‘**National Science Day Celebrations-2022**’.

Finally, I congratulate the Convener, Co-convener, Organizing Secretary and Faculty, Department of Chemistry for conducting this event. I wish the Seminar a grand success.

### **About the Institution**

**Sri Rama and Bhaktha Gentela Narayana Rao Govt. Arts & Science College, Khammam** was established in the year 1956 under private management initially. The then Honorable Chief Minister Sri Boorgula Rama Krishna Rao and the then District Collector of Khammam Sri G.V. Butt, took the initiative for its establishment along with a committee formed with the elite of the town. The primary objective was to provide higher education to the students of the marginalized rural sections and Tribal community of Khammam District. The College was named after the Chief Donor, **Sri Rama and Bhaktha Gentela Narayana Rao**. The College was taken over by the state government on 1-09-1959 and it acquired permanent affiliation to the Osmania University in 1972. Eventually the affiliation is transferred to the Kakatiya University, Warangal.

### **About the Department**

**Department of Chemistry** is one of the oldest departments in this college. It was started along with establishment of SR&BGNR. Govt. Arts & Science college (A) in 1956. The department offering two years M.Sc., Chemistry (Post Graduation) and three years B.Sc., Physical Sciences and Life Sciences (Under Graduation) courses to the student community. It consists of four big well equipped laboratories, one Research Laboratory and eight eminent faculty members. The Under Graduate and Post Graduate curriculum contains Drug chemistry, Spectroscopy, Green chemistry, polymer chemistry, Separation techniques( i.e., Solvent extraction, chromatography), Heterocyclic chemistry, Natural products chemistry, stereochemistry, surface chemistry, Organometallic compounds, Analytical chemistry, Bioinorganic chemistry, photochemistry, Nanomaterials, in such a way to compete in academic and industrial areas at national and international scenario. We are conducting extension lectures to the students on different topics by inviting eminent professors from various universities, scientists from various research institutions (OU, KU, NIT, IICT, NIPER, etc) and industrial personnel from various industries.

Conducting various activities like field trips, study projects, (**like State Level Jignasa Projects Student Study Projects**), visiting industries, research institutes like IICT, NIT, NIPER etc, to impart knowledge and exposure on industrial knowledge among the students. We are encouraging the students to participate in workshops, seminars, conferences, symposiums, conducted by various institutions and organizations. The department faculty is engaged in various innovative projects funded by UGC. Conducting this seminar will help the student community and the society to interact with the leading academics, scientists, researchers, industry personnel to exchange and share their knowledge and research results about all aspects of health and Environmental protection through lectures and presentations. During this seminar, it is expected that challenges encountered and the solutions to be adopted in sustainable development and Human health and environmental protection would be discussed.

## **Theme of the Seminar**

Chemistry has provided the backbone in understanding the structure, organization and functions of living matter. The ability of plants to derive energy from sunlight and animals and humans to derive energy begins with chemistry and the principles of thermodynamics and basic of food itself are made of chemical and biological structures-Amino acids, sugars, lipids, Nucleotides, Vitamins, minerals and hormones.

Chemists and the chemical sciences have been integral to the development of modern medicine from diagnostics to drugs and the creation of the Pharmaceutical industry. The result has been a steady improvement in our health as life expectancy over the past century. Numerous challenges to human health still remain. Deadly infectious diseases including Malaria, Cholera and Tuberculosis may have been largely conquered in high income regions of the world but remain a major threat in poorer regions such as Africa. Even in richer nations infectious diseases remain a constant threat, the swine flu pandemic in 2009, Novel COVID-19 outbreak in 2020 and the dramatic increase of antibiotic resistance has made clear.

Modern health systems are struggling to cope with the demand for novel and more effective vaccines, antibiotics, as pathogens develop resistance to existing treatments. There is an urgent need for new drugs to fight multi-resistant infectious agents as our present vaccines, antibiotics become ineffective due to global misuse in medicine and the food industry.

**Corona virus disease (COVID-19)** is an infectious disease caused by the SARS-CoV-2 virus. Most people infected with the virus will experience mild to moderate respiratory illness and recover without requiring special treatment. However, some will become seriously ill and require medical attention. Older people and those with underlying medical conditions like cardiovascular disease, diabetes, chronic respiratory disease, or cancer are more likely to develop serious illness. Anyone can get sick with COVID-19 and become seriously ill or die at any age.

The best way to prevent and slow down transmission is to be well informed about the disease and how the virus spreads. Protect yourself and others from infection by staying at least 1 metre apart from others, wearing a properly fitted mask, and washing your hands or using an alcohol-based rub frequently. Get vaccinated when it's your turn and follow local guidance. In the treatment of COVID-19 various drugs like Azithromycin, Doxycycline, Favifirvir, Remdesivir, Bavesuzumab, Tocilizumab plays vital role. Invention of Covaxin, Covishield, Sputnik, Pfizer covid-19 vaccines are controlling the spread of corona virus in the entire world.

Non-infectious diseases such as cardiovascular disease, cancer, diabetes and Alzheimer’s disease are becoming more prevalent. Millions of people are dying worldwide every year, which are major causes for death. Non-infectious diseases are caused by combined genetic and environmental factors, and cannot be cured, only controlled by current drugs. It has been predicted that, by 2030, non-infectious diseases will account for 69% of all deaths worldwide. This represents a significant challenge for modern science. In this connection it is the time to invent more efficient drugs to prevent, cure and control the non-infectious diseases. Developing innovative modes of drug delivery and new approaches to treat diseases, including personalized medicines, regenerative medicine and improved biological therapeutics are the need of the hour.

There is a growing need for public awareness about the environmental issues and for effective implementation of environmental regulations. Further, the pace of development of environmental science programs is not adequate. This has resulted in a gap in knowledge and environmental regulations between developed and developing countries. There is thus, a need for continuous education about human health and environment which needs a forum for exchange of ideas and knowledge. It is important that the student community need to participate in such forums.

Finally, it’s not only a question of what we can synthesize, but also how we do it. Since human growth and economic pressures are now forcing the chemical community to search for more efficient way to perform chemical transformations. Developing new route for Eco-friendly reactions i.e., **GREEN CHEMISTRY or GREEN SYNTHESIS** and their use in the chemicals, drugs, medicines etc, synthesis is keenly noticeable in all industrial countries since it reduces the reaction steps, selective towards target compounds with cheaper price. Hence **“Better Chemistry-Better Human health-Better Environment”**.

Therefore, the proposed National seminar on **“Emerging Trends in Chemical and Materials Science Research”-(ETCMSR-2022)** aims to bring together leading academics, scientists, researchers and students along with industry personnel to exchange and share their knowledge and research results about all aspects of health and Environmental protection through lectures and presentations. During this seminar, it is expected that challenges encountered and the solutions to be adopted in sustainable development and Human health and environmental protection would be discussed.

### **Expected outcome**

Conducting this seminar will helps the student community and the society of this rural area to interact with the leading academics, scientists, researchers, industry personnel to exchange and share their knowledge and research results about all aspects of health and Environmental protection through lectures and presentations. During this seminar, it is expected that challenges encountered and the solutions to be adopted in sustainable development and Human health and environmental protection would be discussed.

### Abstract

Concurrent with human civilization, plants have been their true companions as source of food and medicine. These plants have contributed significantly in discovery, design and development of several modern medicines. Recent move of society towards nature for the treatment of various diseases where there is no satisfactory cure in modern medicine has diverted the attention of natural/medicinal chemists and biologists to unravel their chemical characteristics and biological activities together in order to define their therapeutic potential in the light of modern pathobiological understandings. This move has led collectively to rediscover, design and refine the therapeutic application of medicinal plants.

During last eight years, we have studied several medicinal plants guided by *in vitro* based bioassays to delineate the chemistry of medicinal plants responsible for biological activities. This effort has led to identify several potent multiple active medicinal plants, their active fractions and synergistic molecular compositions. We have identified particularly, several free radical scavengers, cytotoxic and  $\alpha$ -glucosidase inhibitory principles present in substantial yield in Indian Medicinal Plants. Presence of multiple active phytochemicals in rich concentrations in some of the medicinal plants therefore offers exciting opportunity for development of novel therapeutics and also provides scientific justification for their use in traditional medicines. In addition, some of the compounds isolated from these plants also displayed potent insecticidal activities. Therefore, biologically activity based chemical characterization of these medicinal plants may provide scientific explanation for their use in traditional medicines and also redesign and develop preparations for novel therapeutic applications. The opportunities in the development of this therapeutics from natural products are divided into four topics. Each topic will be exemplified with suitable examples.

Nanotechnology is an interdisciplinary research field developed with an amalgamation of chemistry, engineering, biology, and medicine, and has various useful applications in NDDS, and development of novel treatments.

Nanoparticles are the end products of a wide variety of physical, chemical and biological processes some of which are novel and radically different, others of which are quite common place. Nanoparticles may be defined as submicron ( $<1\mu\text{m}$ ) colloidal systems, generally, but not necessarily, made of polymers (biodegradable or not). Herbal drug in the nano carriers will increase its potential for treatment of different chronic diseases and health benefits. Treatment of chronic diseases like cancer using the targeted drug delivery nanoparticles is the latest achievement in the pharmaceutical drug delivery field. For instance, PLGA nanoparticles loaded with camptothecin (a cytotoxic alkaloid isolated from *Camptotheca acuminata*) and conjugated with antibodies against colorectal tumour cells. It was observed that the uptake of antibody-nanoparticles was increased in the cell compared to the nanoparticles without the antibody and increased cytotoxicity of camptothecin.

The combination of nanotechnology with traditional herbal medicine may provide a useful tool in designing future herbal medicine with improved bioavailability profile and less toxicity. Now a day's nanotechnology is rapidly expanding in the herbal industries include potentially field of medicines and cosmetics. Traditional Medicine will contribute to human health care in the 21st century. Still, there are many challenges to the safety and effective use of traditional medicine. But there is huge scope for nanotechnology based traditional medicines. It is long way to go.....

**Keywords:** Biological activities, traditional medicine, nanotechnology, targeted drug delivery.

### Abstract

Methodologies to synthesize molecules of commercial value and their derivatives of biological importance is the attractive area of research, thereby creating library of known and unknown molecules having potential applications. Synthetic methods that allow rapid access to large number of diverse structural arrays is growing constantly, which served as a new driving force for the new innovations. In order to synthesize large number of molecules with high level of diversity and complexity, In addition to developing new synthetic techniques and reagents, organic chemists are exploring new methods to design and to evolve new molecules, strategies for new molecules leading to new source of diversity and improving the quality of compound libraries of natural product origin. This diverse new methodologies that will create structurally diverse compounds efficiently in high yields and with excellent purity and with wide range of functional groups as handles to expand them further. One of the richest sources of diversity in drug discovery is development of synthetic routes for the natural products and their derivatives.

Natural products isolated from marine and terrestrial origins, in addition to exhibiting biological activity, also serve as rapid scaffolds for further display of broad range of functionalities. For several years, we have been engaged in design and development of new efficient methodologies for a wide variety of heterocycles, displaying a range of skeletal and functional group diversity. The biological properties of heterocycles in general make them one of the prime interests of the pharmaceutical industry, storage device platforms for opto-electronic industry.

We have synthesized various heterocyclic skeletons initially and utilized them for making other heterocycles. All the synthetic methodologies reported by us are simple efficient and does not involve hitherto costlier chemicals, circuitous reaction pathways, drastic reaction conditions and corrosive molecules. We have exploited [4+2] cycloaddition reactions, [3+3]Cycloaddition reactions, indolo[2,3]quinodimethanes and dienolates, anion assisted aromatic annulations, heteroaromatic annulations and doubly handled reactions. Our aromatic and heteroaromatic annulation strategies are highly efficient, simple and results in variety of molecules with quantitative yields.

## Development of new Methodologies using Bismuth (III) and Iron (III) salts as green catalysts

E-mail: [eeshwarb@cug.ac.in](mailto:eeshwarb@cug.ac.in), [eshwarncl@gmail.com](mailto:eshwarncl@gmail.com)

Our research is widely focused on Bismuth (III), Iron (III) salts catalyzed green reactions. A Lewis acid catalyzed regioselective C–C bond is constructed through  $\beta$ -addition of deconjugated butenolides with p-quinone methides in a 1,6-conjugate addition manner. Interestingly, Bismuth triflate Lewis acid catalyzed vinylogous Mukaiyama–Michael reaction of silyloxyfurans with p-QMs proceeds selectively through  $\alpha$  or  $\gamma$  position exclusively. The reaction is mild with broad substrate scope, thus allowing easy access to a wide range of bis-arylated  $\alpha$ -/ $\beta$ -/ $\gamma$ -substituted butenolides.

The synthesis of nitrogen containing heterocycles is of particular interest in the pharmaceutical industry due to the range of biological activities exhibited by such compounds. Their synthesis using multicomponent reactions saves steps, and minimizes waste generation. The bismuth(III) chloride multicomponent synthesis of a series of hexahydroimidazo[1, 2-*a*]pyridines is a green protocol. Bismuth (III) compounds are especially attractive from a green chemistry perspective because they are remarkably nontoxic, non-corrosive and relatively inexpensive. The method avoids chromatography and an aqueous waste stream.

Cancer is a growing lead cause of mortality and accounts for the major morbidity worldwide. In the recent years, several approaches are being investigated to develop an effective cure, to curb the alarming increase in the number of cancer cases across the globe. The complex biological networks and heterogeneous nature of cancer displays a high degree of challenge at the tissue and cellular levels. Due to the proliferative nature of cancer cell and multi-drug resistance in cancer,<sup>1</sup> DNA becomes one of the most promising biological targets for developing anticancer agents. Hence, there is a need towards the exploration of nature inspired heterocycles and their derivatives to identify novel leads for cancer therapy. In cancer drug discovery, structural modifications and the fusion of pharmacophoric sub-units on these scaffolds aid the development of highly potent and selective hybrid molecules *via* molecular hybridization approach (**Figure 1**)<sup>2</sup>. It is a new concept in the drug design and development based on the combination of two different pharmacophoric moieties to produce a novel hybrid scaffold with improved affinity and efficacy, when compared to the parent drugs.

In continuation of our efforts in the design and synthesis of new chemical entities (NCEs) of anticancer agents, herein we combined the structural artifacts of several different bioactive heterocyclic scaffolds assembled as a new single hybrid. In this way, our research group have successfully generated a library of new compounds based on molecular hybridization approach by employing different heterocyclics such as isatin, 3-alkenyl oxindoles,  $\beta$ -carboline, benzimidazoles, 1,2,3-triazoles/tetrazoles, podophyllotoxins, chalcones, pyrrolobenzodiazepines, thiazolidinediones, phenathrenes, etc., and tested their cytotoxicity on different human cancer cell lines by utilizing different *in vitro* assays. Some of the representative molecules have shown significant anticancer activity at nanomolar range in selected human cancer cell lines.

### Abstract

The change in lifestyle and work of the people has led to the emergence of new diseases and deficiencies over the world. One of the major deficiencies would be the vitamin D deficiency that may not sound too threatening, but has very great impact on the health and lives of people. The deficiency in turn causes many severe diseases and deficiencies such as rickets in children and osteomalacia, hypertension, myocardial infarction, Stroke, Diabetes, Atherosclerosis and cancer in adults. Moreover, the recent studies have greatly researched on the harmful impact of vitamin D deficiency is with the COVID -19 pandemic, where it has increased possibility of increasing the risk of lives in COVID patients. In Telangana especially in Hyderabad there are about 60-65 % of vitamin D deficit cases shooting up at orthopedics' clinic and moreover in rural areas the awareness over the requirement of Vitamin D is negligent along with ignoring mind set and cost issues for testing. More concerns over the children, senior citizens and women of Telangana is considered as the vitamin D deficiency can cause decreased calcium and phosphate absorption in turn causing bone related problems.

On viewing these problems, there comes the requirement of developing cost effective, sensitive and rapid testing methods for evaluating vitamin D concentrations for common people to afford without hesitation and can keep their health on-check. Hence the present study involves the gas chromatography coupled mass spectrometry with trimethylsilyl derivatization (TMS-GC-MS-MS) is the most suitable protocol for quantitative analyses of Vit-D3. Performance of method was evaluated and compared with LC-MS/MS and conventional immuno assay method. Method validation has been carried out with various blood samples. The limit of quantitation of TMS-GC-MS/MS method is 1.5 ng/ml with good linear correlation. Furthermore, the dietary intake and nutritional status of vegetarian and non-vegetarians were assessed by our validated method. As a result, this vitamin D nutrition survey demonstrates that most people have insufficient vitamin D. Our results can be used to develop dietary suggestions and monitor risk to improve health.

### Abstract

The essential need for the potent anticancer and antitubercular agents with high selectivity and safety profile prompted us to synthesize a new series of spiroheterocyclics, spiro pyrrolizidines. These compounds were synthesized by one-pot multicomponent [3+2] cycloaddition reaction under reflux/ultrasonication. Further, *invitro* anticancer and antitubercular activities were evaluated against human lung carcinoma (A549) and human cervical (HeLa S3) cancer cell lines and *Mycobacterium tuberculosis* H37Rv respectively.

Porous coordination polymers (PCPs), which also known as metal-organic frameworks (MOFs) are emerged as potential materials of the decade, particularly for gas storage, separation, catalysts and sensors etc. However, PCPs existing in the literature were mostly instability with respect to moisture and bulk water. Besides these traditional PCPs, we have been designed and synthesized an organic rich low density, BTMBH<sub>3</sub>=1,3,5-benzenetris(*m*-benzoic acid)) ligand. Using this novel ligand we achieved first time a series<sup>1-3</sup> of six new superhydrophobic porous coordination polymers (SPCPs), with molecular formulae,  $Zn_4(\mu_3-OH)_2(BTMB)_2 \supset Guest$  (1),  $Zn_2M_2(\mu_3-OH)_2(BTMB)_2 \supset Guest$  [M = Co (2) and Ni (3)],  $Pb(H-BTMB) \supset Guest$  (4) and  $M_4(OH)_2[(BTMB)_2(4,4'-Bipy)_3] \supset Guest$  [M = Zn (5) and Cd (6)]. These interesting SPCPs, possesses an aromatic terminating low density surface that is highly corrugated over the nano-scale causes the superhydrophobic (self-cleaning) nature with contact angles >150°. <sup>4,6</sup> Moreover, this superhydrophobic nature is stable even at high temperature, whose stability depends on structure, metal coordination and guest species *etc.*

All these SPCPs exhibit very interesting gas separation and, oil and organic solvent spills cleanup applications. In this presentation, we discuss, synthesis, structures, characterizations, properties and applications these novel SPCPs. However, compound, **6**, converted from hydrophobic at RT to hydrophilic at 70°C. <sup>6</sup> This study can provide a roadmap for design and synthesis of novel superhydrophobic porous materials for the applications in the energy and securing the environment.

Nanomedicine has been considered a possibility since Richard Feynman originally described the concept of nanotechnology in his renowned Caltech address, "There's Plenty of Room at the Bottom," in 1959. Various types of environmentally sensitive polymeric nano carriers for cancer chemotherapy have been discovered in recent years. However, after systemic administration of the drug, the efficiency of drug release in the tumour microenvironment is reduced, owing to the early release of the drug prior to reaching the tumour cell.

An intracellular acid cleavable Schiff's base polymeric drug micelle for systemic and local administration of doxorubicin, an anti-cancer medication, has been developed. The polymer nanomedicine is composed of hydrophilic PEG chains of varying molecular weight that are covalently bonded to Doxorubicin via imine linkage. Such formulations prepared from nanoparticles of pH-sensitive PEG–drug conjugates may also be envisioned to be extended to formulate other hydrophobic drugs for local delivery with propellant-based inhalers to other pulmonary disorders, thus broadening the impact of the proposed strategy.

Heterocyclic chemistry constitutes an essential branch of organic chemistry. Heterocycles are widely known to display a range of bioactive properties which are widely utilized in the pharmaceutical and agricultural sectors. Heterocyclic compounds, especially nitrogen heterocycles, are the most important class of compounds in the pharmaceutical and agrochemical industries, with comprising around 60% of all drug substances.

The nitrogen containing heterocycles form a diverse class of organic molecules and were found to possess many types of biologically interesting activities including anti-bacterial, anti-viral, anti-fungal, anti-cancer, anti-tumor, anti-inflammatory, anti-hypertensive, anti-convulsant and anti-diabetic properties.

This study covers the synthesis characterization and anti-bacterial, anti-inflammatory anti-oxidant and cytotoxicity evaluation of some new heterocyclic molecules containing benzimidazole, piperazine, triazole nuclei.

Chemists have two major goals, one is to unravel the secrets of nature-advancing horizons of knowledge and the other is to make human life as comfortable as possible. Industrial chemists synthesize pharmaceuticals, polymers (plastics) pesticides, dyestuffs, food colorings, perfumes, detergents and disinfectants. While research chemists synthesize natural products whose structure is uncertain, compounds for mechanistic investigations, possible intermediates in chemical and biological processes and even compounds which might themselves be useful for organic syntheses.

Before and during these syntheses chemist has to plan the work and how about to undertake. One has to draw possible routes to achieve success. The important analytical approach in organic synthesis is disconnection or synthon approach. We start with the molecule we want to make (the target molecule) and break it down by a series of disconnections into possible starting materials. At last we shall devise a route using different easily available starting materials.

### Abstract

The synthesis and characterization of a series of novel hetero polycyclic aromatic hydrocarbons (HPAHs) as a potential lead molecule in organic semiconductor devices with tetra-imidazolo or tetra-pyrazolo benzo-fused coronene as the main framework are reported. Incorporation of hetero atoms into polycyclic aromatic hydrocarbons (PAHs) by Corey-Fuchs reaction followed by photochemical cyclisation using iodine has been described for carrier mobility and hole transport properties. The synthesized coronenes, Tetraimidazocoronene (TIC), Tetraimidazobenzocoronene (TIBC), Tetraimidazodibenzocoronene (TIDBC), Tetrapyrazolocoronene (TPC), Tetrapyrazolobenzocoronene (TPBC), and Tetrapyrazolodibenzocoronene (TPDBC), have good physicochemical properties and are supported with DFT/TDDFT studies. On an ODTS-SiO<sub>2</sub> substrate at room temperature, the reported compounds were utilized to fabricate organic thin-film transistors (OTFTs) and shown hole mobilities in the range of 0.21-0.71 cm<sup>2</sup>/Vs and with an on/off ratio of 10<sup>4</sup>.

**Abstract**

In recent years, indole-indazolyl hydrazide-hydrazone derivatives with strong cell growth inhibition and apoptosis induction characteristics are being strongly screened for their cancer chemopreventive potential. In the present study, N-methyl and N,N-dimethyl bis(indolyl)hydrazide-hydrazone analog derivatives were designed, synthesized and allowed to evaluate for their anti-proliferative and apoptosis induction potential against cervical (HeLa), breast (MCF-7 and MDA-MB-231) and lung (A549) cancer cell lines relative to normal HEK293 cells. The MTT assay in conjunction with mitochondrial potential assays and the trypan blue dye exclusion were employed to ascertain the effects of the derivatives on the cancer cells. Further, mechanistic studies were conducted on compound **5-bromo-1-methyl-N'-[(E)-(1-methyl-1H-indol-3-yl) methylidene]-1H-indole-3-carbohydrazide** to understand the biochemical mechanisms and functional interactions with various signaling pathways triggered in HeLa and MCF-7 cells. The above compound induced apoptosis via caspase independent pathway through the participation of mitogen-activated protein kinases (MAPK) such as extracellular signal related kinase (ERK) and p38 as well as p53 pathways. It originates the activation of pro-apoptotic proteins such as Bak and Mcl-1s and also strongly induced the generation of reactive oxygen species.

In downstream signaling pathway, activated p53 protein interacted with MAPK pathways, including SAPK/c-Jun N-terminal protein kinase (JNK), p38 and ERK kinases resulting in apoptotic cell death. The involvement of MAPK cascades such as p38, ERK and p38 on the above compound induced apoptotic cell death was evidenced by the fact that the inclusion of specific inhibitors of p38, ERK1/2 and JNK MAPK (SB2035809, PD98059 and SP600125) prevented the above compound towards induced apoptosis. The results clearly showed that MAP kinase cascades were crucial for apoptotic response in the above compound induced cellular killing and were dependent on p53 activity. Based on the results, compound was identified as a promising candidate for cancer therapeutics and these findings furnish a basis for further *in vivo* experiments on anti-proliferative activity.

Exploring novel organic compounds those exhibit physical properties of interest by investigating the intermolecular interactions is one among the main objectives of solid state chemistry and crystal engineering due to their potential applications in non-linear optics (NLO). An extensive research has been carried in the present scenario in NLO field due to their requirement in the field of technology in day to day life. Hence the search for novel NLO compounds has grabbed the attention of material chemists.

Compared to inorganic materials, organic non-linear optical materials were explored more since they have several orders of higher magnitude and fast response time as they are made up of conjugated molecules where  $\pi$ -electrons move freely between donor and acceptor groups inducing charge transfer. Generally Proton transfer complexes possess high molecular polarizabilities, due to  $\pi$ -delocalized electronic systems, which show enhanced nonlinearities, hyper polarizabilities and appropriate physicochemical behaviour. The probability of hydrogen-bond formation between azoles and carboxylic acids provides a broad scope for the study of interactions. Carboxylic acids with amines forming molecular salts with non-covalent interactions in their crystal structure which can be explored for various applications via Density-functional theory (DFT) studies.

### Abstract

In recent years, multi-fold improvement is viewed in the field of Artificial Intelligence hence playing a significant role in image classification especially the classification of medical images. In specific Convolutional Neural Networks (CNN) belonging to Artificial Intelligence performs well in the detection of several diseases such as heart disease, Dental diseases, Malaria, and Parkinson’s disease. CNN has a significant vision in the detection of lung disease utilizing the medical images of the patient such as X-rays. Lung disease is the basic symptom of the global pandemic disease COVID-19. This invention proposes a CNN model for the detection of lung disease where the model involves four layers namely input layers, convolutional layers, fully connected layers, and output layers.

The three-layered two-dimensional convolutional layers involve the ReLU activation function along with Max pooling making the detection process easier by training the model using the dataset. The proposed CNN model provides 97.4% of accuracy and 94.5% of precision. F1 score of the model is achieved as 97.60 and the curve area of Receiver Operating Characteristic (ROC) is obtained as 0.975.

### Abstract

Limonoids are highly oxygenated, modified terpenoids with a prototypical structure either containing or derived from a precursor with a 4,4,8-trimethyl-17-furanylsteroid skeleton and these limonoids found to be chemotaxonomic markers from the plants of the Meliaceae and Rutaceae families. Limonoids of Meliaceae plants vary due to seasonal and geographical conditions and therefore, rapid identification of these constituents is desired.

The present study, based on positive ion mode electrospray quadrupole time-of-flight mass spectrometry (ESI-Q-TOF-MS/MS), which reveals the structure–fragmentation relationship of limonoids belonging to various sub-chemical classes such as mexicanolides, methyl angolensate, Trijugin, nimbolinin etc type class. Collision induced dissociation mass spectrometric analysis of these protonated molecules yielded key fragments due to the loss of neutral components like H<sub>2</sub>O, CO<sub>2</sub>, methanol, as well as McLafferty rearrangement and Retro-ene reaction. The fragmentation pattern of selected mass, coupled with high resolution analysis and database were utilized for the rapid identification of limonoids in Meliaceae species, namely *Cipadessa baccifea* and *Melia dubia*. Furthermore MS/MS spectra revealed different fragmentation pathways for different classes of limonoids which further aided dereplication.

### Abstract

An efficient and environmental friendly synthetic protocol has been presented to synthesize  $\alpha$ -aminonitriles via one pot three component reaction of aldehydes, amines and TMSCN in the presence of Iron tosylate hexahydrate ( $\text{Fe}(\text{OTs})_3 \cdot 6\text{H}_2\text{O}$ ) as a catalyst in aqueous media. Iron tosylate hexahydrate ( $\text{Fe}(\text{OTs})_3 \cdot 6\text{H}_2\text{O}$ ), is a promising catalyst, introduced first time for the synthesis of  $\alpha$ -aminonitriles in aqueous media as it is commercially available, inexpensive, non-toxic, operational simplicity and short reaction time with excellent yields.

### Abstract

National Cancer Act - strategically, the “war on cancer” was signed in 1971 to eradicate cancer by finding effective targeted drug therapies.<sup>1</sup> Following in time, continuous efforts are placed on developing promising anticancer agents as cancer remains public health concern worldwide.<sup>2-4</sup> In the same quest, a series of 25 compounds based on  $\beta$ -carboline tethered indole-3-glyoxylamide, conjoining salient pharmacophoric properties directing prominent cytotoxic agents were synthesized. The *in vitro* cytotoxic ability of the compounds was established, and many of the compounds exhibited remarkable cytotoxicity ( $IC_{50} < 10 \mu M$ ) on human cancer cell lines like HCT116, A549, SK-MEL and MCF7. Precisely, compound **12x** expressed the best cytotoxic potential against melanoma cancer cell line (SK-MEL) with an  $IC_{50}$  value of  $4.37 \mu M$ . In addition, cytotoxicity evaluation against normal kidney cell line (NRK52E) entrenched the cytospecificity and selectivity index of **12x**. Wound healing assay inferred the inhibition of *in vitro* cell migration (metastasis) by compound **12x** in SK-MEL cells. The traditional apoptosis assays advised morphological and nuclear alterations such as apoptotic body formation, condensed/horseshoe-shaped/fragmented nuclei, and generation of ROS. Moreover, molecular modeling studies affirm the excellent DNA intercalation potential and stabilized interactions of **12x** with DNA base pairs. *In silico* prediction of physicochemical parameters revealed the promising drug-like properties of the synthesized derivatives.

### Abstract

The diversity in the application of iron nanoparticles (IONPs) is quite remarkable that draws attention among researchers. The basis for their diversity lies in their exceptional properties apart from the typical nano properties that eventually create space for upcoming and most required fields. Therefore, the present paper discusses about the significant role of IONPs in disciplines like forensic, food and environmental. IONPs aids in detecting the presence of the toxic compounds during food manufacturing, identifying the harmful adulterants in food items and deleterious pathogens. IONPs can also assist in solving crimes by identifying the sample types accurately such as n detection of illegal drugs and cells (sperm and epithelial cells) that are difficult to differentiate, also aid in making latent fingerprints visible. Among the new technologies IONPs also have great part in reviving the polluted environment by remediating heavy metals from soil, water, treating waste water, removing oils from sea waters and so on. Hence, in upcoming days it could be anticipated that IONPs can contribute to real-time applications in various disciplines.

### Abstract

A transition metal- and azide- free approach is explored to synthesize 1,4,5-trisubstituted-1,2,3-triazoles under sunlight. The reaction proceeds *via* C–N and N–N bond formations. These regioselective 1,2,3-triazoles are obtained from isatin Schiff bases, benzaldehydes and tosylhydrazine in the presence of base. This protocol offers the structurally diverse 1,2,3-triazole derivatives with 75-90% yields.

### Abstract

We have attempted to identify Sacubitril derivatives<sup>1</sup> as lead compounds for different biologically active compounds. A total of Twenty-two compounds belongs to these libraries of the Sacubitril derivatives were synthesized. All the newly synthesized compounds structures were determined by NMR, Mass, FTIR and CHN analysis. Few compounds structures were confirmed by single crystal X-ray diffraction.

The newly synthesized compounds were screened for Anti-cancer activity with A549 cells in vitro by MTT Assay, all these compounds were evaluated against the bacterial strains they are E.coli (MTCC 9721), P. aeruginosa (MTCC 9800), S. aureus (MTCC 11949), B. subtilis (MTCC 9800) & antifungal activity by *Candida Albicans* (ATCC 10231). Among these Series few compounds exhibited potent anti-TB activity (6.25 µg/mL) compared to the standard drug ethambutol (1.56 µg/mL). Further, the anti-TB activity of the compounds was evaluated against *M. tuberculosis* in the nutrient starvation model. To determine the toxicity nature, the potent anti-TB active compounds were evaluated against RAW 264.7 cells.

### Abstract

A simple, efficient, and eco-friendly protocol for the N-Boc protection of the amine moiety in a variety of compounds with di-*tert*-butyl dicarbonate under Picric acid catalyst and solvent free conditions at room temperature is described. The corresponding monocarbamate is obtained in excellent yields on short reaction times (up to 50 minutes). This method represents a reasonable alternative to the previous reported protection procedures. Aromatic amines and aliphatic amines (up to 25 examples) also protected in good yields (up to 95%) under this reaction conditions.

Lichens are nutritionally specialized fungi living in symbiotic association between fungi and algae. Several lichen species have been used in traditional medicine for centuries and are gaining considerable interest as an alternative medicine for the treatment of various ailments in different parts of the world. Several *Usnia* species are available in the North-east region of India and most of them became part of folklore medicine in the tribal areas. LC-MS guided isolation is an effective method, both in finding new natural products and characterizing trace components in a complex mixture of natural products.

As part of continuing studies in the identification on novel bio-active constituents from medicinal flora, we conducted phytochemical analysis of *Usnea longissima* using HPLC–MS system, which indicated the presence of several peaks with their corresponding molecular weights. Further guided by the MS/MS spectra, we have isolated three compounds (1-3), of which one compound is a new secondary metabolite. The individual compounds were identified using exact molecular masses from their MS/MS spectra. Moreover, all the isolates were screened for their anti-cancer activity against a panel of cancer cell lines.

### Abstract

Chrysin is a widely distributed flavone, mainly isolated from an Indian medicinal plant ‘*Oroxylum indicum*’. Chrysin (5,7-dihydroxyflavone) has been reported to exhibit many biological activities which includes antibacterial, antiinflammatory, antiallergic, antioxidant and anticancer activities<sup>1-2</sup>.

As part of our investigations on the structural modifications of chrysin, Pyrano[2,3H]chrysin derivatives, 2-Hydroxy-3-Chrysin Dithiocarbamate Derivatives and Novel C (7) Modified Analogues of Chrysin have been synthesized and studied for their antimicrobial earlier<sup>3-5</sup>. In continuation of our work on synthetic modifications of chrysin, herein we report the synthesis of a series of novel pyrano chrysin analogues in which chrysin ring system is fused with pyran ring, with a view to enhance their biological activity. The antimicrobial assay and molecular docking studies are in progress.

### ABSTRACT

The kinetic and mechanistic aspects of oxidation of 5-oxo acids by N-Bromophthalimide (NBP) in acid medium have been studied. The reaction exhibits first order each in [NBP] and [acid] & [oxo acid]. The reaction is failed to induce polymerization of acrylic monomers and no induction is observed over a wide concentration range of reagents. Variation in ionic strength has no effect on the reaction rate, while reaction rates are enhanced on lowering dielectric constant of the medium. Electron-releasing substituents in the phenyl ring of the substrate greatly accelerate the rate, whereas the rate retardation by electron-withdrawing substituents is observed, which is further supported by the electronic properties obtained by performing semi-empirical calculations on the substrates (5-oxoacids) with different substituents in the phenyl moiety.

The linear free energy relationship is verified by linearity in Hammett plots. The reaction constant ( $\rho$ ) is negative and decreases with increase in temperature. From the intersection lines in the Arrhenius and Hammett plots, the isokinetic relationship is evaluated. Based on the experimental evidences, a plausible mechanism is proposed and rate law explaining all the kinetic results has been derived and verified.

### Abstract

Cascade reactions have emerged as efficient methods for the synthesis of complex structural compounds from simple precursors over the last ten years. This methodology involves two or more bond forming synthetic transformations (i.e., C-C, C-O, C-N, etc.) under the same reaction conditions without isolation of intermediate. These reactions are viewed as environmentally benign and economically beneficial. On the other hand, Morita-Baylis-Hillman (MBH) reaction has been considered as the atom economy reaction for making C-C bond formation. Due to the versatility of MBH adducts, they have been widely using as synthons in several synthetic transformations and developing new molecules. In the recent year's *trans*- $\beta$ -nitro styrene derived MBH adducts have become interesting precursors in synthetic organic chemistry.

In continuation of our research interest towards spiropyran using primary nitro allylic alcohol and fused heterocyclic skeletons, we envisioned that the synthesis of multisubstituted spirocyclic pyrans having four stereocenters *via* Oxa-Michael/Michael through formal [4+2] cycloaddition reaction can be accomplished using ambiphilic substrates (1C, 2C) 2-arylidene-1,3-indanedione and (1C, 4O) secondary nitroallylic alcohol.

### Abstract

Thioamides have an important role in the field of biochemistry and medicinal chemistry due to their highly pharmaceutical and biological activity. Recently, we reported the synthesis of Thioamides by direct installation of sulphur and amine in aldehyde at room temperature in aqueous medium. The present methodology demonstrate the substrate scope with different type of aliphatic, aromatic, heteroaromatic aldehyde with the use of different array amines with the scaled-up method. The use of no catalyst, oxidants or additives makes this method unique. Biologically active molecules such as thionicotinamide, thioisonicotinamide which exhibit anticancer activity can be synthesized by our protocol.

### Abstract

Comparative Phytochemical analysis of five lichen species [*P. tinctorum* (Delise ex Nyl.) Hale, *P. andinum* (Mull. Arg.) Hale, *P. praesorediosum* (Nyl.) Hale, *P. grayanum* (Hue) Hale, *P. austrosinense* (Zahlbr.) Hale] of *Parmotrema* genus were performed using two complementary UPLC–MS systems. The first system consists of high resolution UPLC-QToF-MS/MS spectrometer and the second system consisted of UPLC-MS/MS in Multiple Reaction Monitoring (MRM) mode for quantitative analysis of major constituents in the selected lichen species.

The individual compounds (47 compounds) were identified using Q-ToF-MS/MS, via comparison of the exact molecular masses from their MS/MS spectra, the comparison of literature data and retention times to those of standard compounds which were isolated from crude extract of abundant lichen, *P. tinctorum*. The analysis also allowed us to identify unknown peaks/compounds, which were further characterized by their mass fragmentation studies. Moreover, the determination of antioxidant, AGE Inhibition, and antimicrobial activities were carried out for the crude extracts. To the best of our knowledge, this is the first report of comparative metabolite profilings on *Parmotrema* genus with these informative techniques to analyze secondary metabolites in lichens. Further, we believe that profiling patterns and these methods will be useful for chemotaxonomic classification, de-replication of secondary metabolites in the rare lichens.

The synthesized compounds were characterized by elemental analyses, FT-IR,  $^1\text{H}$  &  $^{13}\text{C}$ -NMR and mass spectroscopic techniques. The entire target compounds were investigated for their in vitro cytotoxic activity by the MTT-based assay against four human cancer cell lines. Compared with the standard drug cisplatin, the compounds **4b** and **4e** displayed good cytotoxic activity against the growth of the tested cancer cell lines. Molecular docking studies were conducted against the EGFR protein receptor to illustrate the binding abilities of the synthesized compounds to the active site of the protein. The compounds **4b** and **4e** with  $-11.71$  Kcal/mol, and  $-11.32$  Kcal/mol, exhibited the lowest binding energies which correlate with cytotoxic activity results.

Recently ionic liquids have emerged as very potential green alternatives to the volatile and hazardous organic solvents and have been used as efficient reaction media for organic synthesis due to their special properties such as good solvating capability, wide liquid range, negligible vapour pressure, easy recycling, and high thermal stability and rate enhancing ability. Schiff bases and their biologically active complexes have been often used as chelating ligands in the coordination chemistry of transition metals, radiopharmaceuticals for cancer targeting, agrochemicals, model systems for biological macromolecules, catalysts and as dioxygen carriers.

In continuation of our research work on the synthesis of Schiff's Bases using ionic liquids, herein, we have reported an efficient synthesis of novel tetradentate Schiff base ligands from the condensation of phthalaldehyde and 2-amino benzyl alcohol, 2-amino-2-methyl-1-propanol and 2-amino benzohydrazine respectively in the presence of ionic liquid [Bmim]BF<sub>4</sub> at RT in excellent yields with short reaction times. These ligands were reacted with PdCl<sub>2</sub> in methanol to form corresponding Pd metal complexes like [Pd(BDMAB)], [Pd(BDMAT)] and [Pd(BDMAZ)]Cl<sub>2</sub>. The synthesized ligands and complexes are characterized by elemental analysis, IR, <sup>1</sup>H-NMR and mass spectral studies.

### Abstract

Anticancer agents that target tubulin when used alone or in combination with other drugs have proved to be one of the most effective treatments for cancer patients significantly increasing the survival rates. Combretastatin A-4 is a potent cytotoxic *cis*-stilbene derivative currently under phase III clinical trial, showing potent tubulin inhibitory action against broad spectrum of cancer cells. Next, thiazolidinedione, a privileged scaffold has been reported for its anticancer activity, which acts on PPAR $\gamma$  and non-PPAR $\gamma$  dependent signal cascade that controls the cell growth and apoptosis. With this background, we designed a series of stilbene-thiazolidinedione conjugates. Primarily, these conjugates were evaluated using *in-silico* studies such as glide docking studies, and binding energy. The glide score revealed that conjugates interact and bind efficiently in the colchicine binding site of tubulin. With this insight, we synthesized a series of stilbene-thiazolidinedione conjugates and evaluated their *in-vitro* cytotoxicity against different cancer cell lines. Delightfully, one of the representative molecule **3b** showed potent cytotoxicity against BT-474 cancer cell lines with  $IC_{50} = 2.14 \pm 0.38 \mu\text{M}$ . Further, cell morphology staining studies were also conducted.

### Abstract

A convenient and metal free Et<sub>3</sub>N catalyzed domino reaction of isatin schiff bases and hydroximoyl chlorides has been developed to achieve [3+2] cycloaddition of imines into aryl nitrile oxides at room temperature. In this transformation, spiro-1,2,4-oxadiazole skeleton was efficiently formed. The reaction proceeds through C-O and C-N bond formations under mild reaction conditions. A range of spirooxadiazoles were obtained in good to excellent yields from readily available starting materials.

Mild reactions conditions, operational simplicity and simple purification method make this protocol become environmentally benign and can be considered to be as green protocol. The structures of all the target compounds were in agreement with their spectroscopic (FT-IR, <sup>1</sup>H NMR, <sup>13</sup>C NMR) and mass spectral data. This protocol offers significant advantages for accessing biologically active spirooxadiazole derivatives.

**Abstract**

Limonoids, a group of highly oxygenated and modified tetra nortriterpenoids are characteristic components of the plants of the Meliaceae and Rutaceae families. The diversified structures and wide range of biological activities of these limonoids have attracted much attention to both phytochemists and agrochemists. *Trichilia connaroides* (Wight et Arn.) is one of the important member in maleaceae plant family and traditionally used for the treatment of cholera, arthritis, pharyngitis, tonsillitis and various other ailments. As part of our ongoing investigations on the maleaceae plants, we conducted a LC-MS analysis of methanol extract from seeds of *T.connaroides* and analysis indicated the presencea various limonoids.

The aim of present study is to discover novel limonoids from *Trichilia connaroides* by using LC-MS powerful dereplication tool to facilitate compound identification. The present dereplication analysis is based on comparison of the molecular weight, MS/MS fragmentation and characteristic <sup>1</sup>H NMR signals with previously reported data in databases such as Reaxys, SciFinder Scholar, and also chemotaxonomic considerations that identify structurally similar compounds present in the same species, genus, or even family of the plant. From these results we identified three novel limonoids from *Trichilia connaroides*. The high sensitivity and selectivity of MS detection method effectively reduced the time of analysis and consequently enabled fast isolation of target constituents. All the isolated constituents were subjected to insecticidal activity against *spodoptera litura*

### Abstract

Conversion of glycerol, a by-product in the biodiesel production to valuable chemicals can make it a sustainable process and at the same time glycerol can be exploited as a renewable chemical feedstock as well. Solketal is one such valuable product from acetalization of glycerol that is used as a fuel additive to reduce carbon emissions and enhance octane number. Further, solketal has several other applications in solvents, inks, paints and pharmaceuticals. Acetalization of glycerol involves carbocation production by the activation of ketone carbonyl group through a protonation step or polarization by the Lewis or Brønsted acid sites. The present work is a report of highly efficient sulphated Al-MCM 41 catalyst for the selective synthesis of Solketal by acetalization of glycerol at room temperature. Al-MCM41 was prepared by templating method followed by sulphonation with H<sub>2</sub>SO<sub>4</sub> (1N) to obtain sulphated Al-MCM 41.

The catalyst was characterized by low angle XRD, BET-SA and Pore size measurements, SEM-EDAX and py-adsorbed FT-IR studies. The XRD patterns clearly show the mesoporous structure of MCM 41 from the low angle peak and BET-SA obtained was ~ 600 m<sup>2</sup>g<sup>-1</sup> with a typical adsorption isotherm of type-IV, a characteristic feature of mesoporous materials. The py-adsorbed FT-IR patterns of the Al-MCM 41 and sulphated Al-MCM 41 clearly indicate the generation of enhanced Brønsted acidity on the surface of the catalyst which explains the higher activity of the sulphated catalyst over the non-sulphated one. The catalyst activity was compared with simple Al MCM41 and also sulphated zirconia and results have shown sulphated Al MCM 41 to be superior to the other two catalysts tested. This clearly indicates the role of mesoporous structure that gives a stable and enhanced surface.

### Abstract

The development of an atom-economical approach for the efficient construction of diversely functionalized molecules from easily accessible starting materials is continuously a special attention for synthetic organic chemists. Especially, Dithiolanes are well-known intermediates for some fundamental reactions in organic chemistry and in natural product synthesis.<sup>1-3</sup> 1,3-dithiolane derivatives with extended  $\pi$ -conjugation between the dithiolane rings have attributed an attraction in organic material synthesis as they have shown attention towards charge-transfer materials and some of them are electronic conductors.<sup>4-7</sup> There are various methods reported in the literature for the synthesis of 1,3-dithiolane. However these methods provide highly expensive and harsh reaction conditions. Therefore, it is still of great importance to develop alternative methods for the preparation of 1,3-dithiolane. In this context, we report inexpensive and environmentally benign, AlCl<sub>3</sub> catalyzed synthesis of various 1,3-dithiolane and 1,3-dithianes.

### Abstract

A new one-pot three-component reaction for the synthesis of indolyl-4H-chromene derivatives has been developed. The synthesis was achieved by reacting salicylaldehydes, (E)-N-methyl-1-(methylsulfonyl)-2-nitroethenamine, and indoles in the absence of solvent using triethylamine as a catalyst. The final products were isolated by precipitation after the addition of ethanol to the reaction mixture. This transformation involves the formation of indole-substituted chromene ring by creation of two C–C bonds and one C–O bond in a single synthetic operation. This rapid one-pot reaction does not require chromatographic purification and provides the indolyl-4H-chromene derivatives in good yields.

### Abstract

Olefin functionalization presents us with a dynamic approach for the structuring of highly functionalized scaffolds. One such functionalization known as oxidative selenocyclization results in formation of a selenated heterocyclic scaffold, oxazoline, aided by an electrophilic selenium species. A simple *tert*-butyl hydroperoxide (TBHP)-mediated method has been developed for the construction of selenated oxazolines/thiazolines under microwave irradiation. The selenocyclization of *N*-allylbenzamides/benzthioamides could be achieved owing to the addition of an active electrophilic selenium species, generated *in situ* from diphenyl diselenide on reacting with TBHP, at their olefinic site. For the first time, the reaction mechanism was confirmed by intercepting and characterizing all the proposed intermediates by ESI-QTOF-MS and NMR study. This method offers several advantages which include simpler reaction conditions, short reaction time, catalyst-free, thus, rendering a competent alternative to the synthesis of selenated oxazolines/thiazolines in moderate to good yields (20-95%).

### ABSTRACT

Analytical method development and validation for Dolutegravir and Lamivudine in bulk and combine dosage form by RP-HPLC, new method was established for simultaneous estimation of Dolutegravir and Lamivudine by RP-HPLC method. The chromatographic conditions were successfully developed for the separation of Dolutegravir and Lamivudine by using Symmetry C18 5 $\mu$ m (4.6 x 150mm), flow rate was 1.0 ml/min, mobile phase ratio was Phosphate buffer (0.02M) pH-3.8: Methanol: Acetonitrile (60:20:20% v/v), detection wavelength was 260nm.

The retention times of Dolutegravir and Lamivudine were found to be 2.324mins and 4.314mins respectively. The % purity of Dolutegravir and Lamivudine was found to be 99.865% and 99.658% respectively. The analytical method was validated according to ICH guidelines (ICH, Q2 (R1)). The linearity study of Dolutegravir and Lamivudine was found in concentration range of 0 $\mu$ g-36 $\mu$ g and 0 $\mu$ g-39 $\mu$ g and correlation coefficient (r<sup>2</sup>) was found to be 0.9995 and 0.9998, % recovery was found to be 100.280, %RSD for repeatability was 0.174 and 0.709, % RSD for intermediate precision was 0.093 and 0.937 respectively. The precision study was precise, robust, and repeatable. LOD value was 1.377 and 1.079, and LOQ value was 4.174 and 3.272 respectively. Hence the suggested RP-HPLC method can be used for routine analysis of Dolutegravir and Lamivudine in API and Pharmaceutical dosage form.

### Abstract

Synthetic oligomers with well-defined conformational features (‘foldamers’) have attained considerable interest in recent years. They show interesting features such as structural tunability and predictability and find vast applications in various interdisciplinary areas such as molecular recognition, catalysis and drug therapeutics.<sup>1</sup> They can act as structural /functional mimics of the biomolecules and are presented as promising candidates for biological applications. In addition, they show well defined self-assembly in different types of nanoarchitectures including wires, rods, sheets, spheres, fibres<sup>2</sup>.

In this direction, the work describes the synthesis, characterization and conformational analysis and functional assessment of set oligomers with repeating units of natural and unnatural amino acid and study the effect of *O*-alkylation on the folding propensity of these oligomers and, their applications in self-assembled nanoarchitectures as drug loading agent.

## Vilsmeier-Haack Formylation and Acetylation Reactions with Anilines and Acetanilides under Solvent-free Conditions

Dr. Redamala Roopa

E-mail: [roopamgu@gmail.com](mailto:roopamgu@gmail.com)

### ABSTRACT

The Vilsmeier-Haack reaction with anilines and acetanilides has been carried out under solvent free conditions. The reactants are taken in a mortar and grounded with a pestle for about 20 to 30 min at room temperature. The reactions afforded formyl derivatives in fairly good yields when a mixture of dimethyl formamide (DMF) and  $\text{POCl}_3$  is used as VH reagent. However acetyl derivatives were obtained when DMF was replaced by DMA in the composition of VH reagent. Results of solvent free reactions are more superior over solution phase reactions with very good yields and far lesser reaction times.

The present finding is more advantageous over solution phase reaction. It is conducted with economically cheap and readily available reagents. The reaction occurs under mild and under environmentally safe conditions with a simple work up at room temperature. Far less reaction times (about 12 times less than thermal reactions) coupled with enhanced reaction yields substantiate that the present work is a major breakthrough in the area of Vilsmeier-Haack synthesis.

### Abstract

A library of 4-(5-(5-(3H-imidazo[4,5-b]pyridin-2-yl)pyrimidin-2-yl)-1,2,4-thiadiazol-3-yl)benzene thiourea (**9a-j**) derivatives were designed and synthesized. The structures of the synthesized compounds were characterized by <sup>1</sup>H NMR, <sup>13</sup>C NMR and mass spectroscopy techniques. Further, all these compounds investigated against a panel of human cancer cell lines comprised MCF-7, MDA MB-231 (breast cancer), A549 (lung cancer) and DU-145 (prostate cancer) by employing MTT assay, Etoposide used as positive control. Most of the newly prepared compounds exhibited more potent anticancer activities on four cancer cell lines with IC<sub>50</sub> values ranging from 0.16±0.039 μM to 12.56±4.58 μM and positive control showed with 1.91 ± 0.84 μM to 3.08 ± 0.135 μM. Among them, compounds **9a**, **9b**, **9c**, **9d**, **9h** and **9i** were found to be more promising anticancer activity than positive control.

**Keywords:** Imatinib, pyrimidine, tenovin-1, thiourea and anticancer activity.

## Synthesis of Tamarind gum-based pH responsive Hydrogel For Anticancer Drug delivery and antimicrobial Applications

### Abstract

This paper describes the development of pH-responsive hydrogel from tamarind gum and pH sensitive AGA monomers by a simple free radical polymerization method in presence of bis[2-(methacryloyloxy)ethyl] phosphate as a cross linker and potassium per sulphate as an initiator. In addition, these hydrogels have been used as templates for green synthesis of silver nanoparticles by using aqueous leaf extract as reducing agent. The synthesized and silver composites hydrogels were successfully characterized by the FTIR, UV-Vis, XRD, SEM and TEM, to know the chemical structure, crystalline behavior and surface morphology studies. The pH-sensitive swelling behavior of hydrogels were investigated in different pH solutions, and swelling kinetics.

These hydrogels anticancer drugs successfully encapsulated into hydrogel network. *in vitro* release studies in pH physiological and gastric environment at 37 °C. The drug release behavior is examined with kinetic models such as zero order, first order, Higuchi, Hixson-Crowell, Korsmeyer-Peppas. These release data was the best fitted with the Korsmeyer-Peppas transport mechanism. The Antimicrobial activity of Ag nanocomposites hydrogels is studied against to *Staphylococcus aureus* and *Klebsiella pneumonia*.

### Abstract

Sodium 2-mercapto ethanesulfonate is in a class of drugs known as chemoprotectants. Mesna is used for the prevention of urothelial toxicity in patients being treated with the antineoplastics ifosfamide or cyclophosphamide. In this study, a new method for synthesis of mesna from 2-mercaptoethanol using bromo intermediate was continuously developed by the scale of 50g per batch. The synthesis was carried out in 2 steps: Firstly, 2-bromoethanethiol was prepared from 2-mercaptoethanol by bromination. Secondly, sodium 2-chloroethanesulfonate was reacted with sodium sulfite, with the standard equivalent of sodium sulfite without any pH adjustment. Finally, mesna was obtained by HPLC in reaction mass ~97% compared with standard sample (~98% HPLC), which was cost and yield effective for industrial synthesis.

### Abstract

The *cis* restricted stilbenes are of great importance in the field of medicinal chemistry and are found to possess potential anticancer activity by inhibiting tubulin polymerisation or selective estrogen receptor modulation. 1,2,3-Triazole is also considered as an attractive scaffold due to its ease of synthesis, act as a bridging unit and possess diverse biological activities. Therefore, in continuation of our earlier efforts in the development of new anticancer agents in the drug discovery program, herein, a series of novel *cis*-stilbene-1,2,3-triazole conjugates were designed and synthesised by reacting propargyl ester of substituted (*E*)-2,3-diphenylacrylic acid with phenacyl/benzyl azides using ‘click’ reaction and obtained in good to excellent yields.

The final conjugates were characterised by <sup>1</sup>HNMR, <sup>13</sup>C NMR, HRMS, and FT-IR spectroscopic techniques. Moreover, docking studies were also performed to interpret the interactions between synthesised conjugates and the target protein (PDB ID: 4O2B). Among all the conjugates, the compounds **9h**, **9j** and **10e** exhibited good docking scores (-8.406, -9.031 and -9.167 respectively). Conjugate **9j** also demonstrated a significant IC<sub>50</sub> value (3.25 ± 1.04 μM) against the HCT-116 (human colon cancer cell line) cell line with the potential of tubulin polymerisation inhibition.

### ABSTRACT

A Novel Analytical simple, reproducible and efficient RP-HPLC method was developed for simultaneous estimation of Empagliflozin and Linagliptin in pure form and marketed combined pharmaceutical dosage forms. A column having Develosil ODS HG-5 RP C18, 15cmx4.6mm, i.d. Column in isocratic mode with mobile phase containing Methanol: Acetonitrile in the ratio of 85:15% v/v was used. The flow rate was 1.0 ml/min and effluent was monitored at 258nm. The retention times and linearity range for Empagliflozin and Linagliptin was found to be (2.217, 5861min) and (0-14, 0-28), respectively.

The method has been validated for linearity, accuracy and precision, robustness and limit of detection and limit of quantitation. The limit of detection (LOD) and limit of quantification (LOQ) were found to be 0.08µg/ml and 0.24µg/ml for Empagliflozin and 0.1µg/ml 0.3µg/ml for Linagliptin respectively. The proposed method was found to be accurate, precise and selective for simultaneous estimation of Empagliflozin and Linagliptin in pure form and marketed combined pharmaceutical dosage forms.

### Abstract

We successfully demonstrated two different reaction pathways for the synthesis of  $\beta$ - aryl- $\gamma$ -lactam and 2-oxo-1,2-dihydroquinoline derivatives using  $\beta$ -nitrostyrenes. The reaction strategy involves the Michael addition followed by reduction and cyclization reactions. Michael adducts containing two different nitro group such as one on aryl ring and another on side chain, selectively takes the path to involve nitro group on aryl to form  $\beta$ -aryl- $\gamma$ -lactam derivatives as cyclized product. Michael adducts with nitro group on side chain alone forms 2-oxo-1,2-dihydroquinoline derivatives as cyclized product. This methodology is appealing with reliability and scalability with gram scale products can be synthesized. These heterocyclic compounds can be exploited for their biological activity.

### Abstract

1-formyl-3-thiosemicarbazide (FTSC) was synthesized and characterized by LC-MS, IR, UV, <sup>1</sup>H- and <sup>13</sup>C-NMR spectroscopy. NMR studies revealed the existence of tautomeric forms. Computational studies were carried out using Gaussian-16W program package. Six possible keto-enol and thione-thiol forms of FTSC were constructed and geometry optimized in closed-shell three-parameter functional Becke-Lee-Yang-Parr hybrid exchange-correlation (B3LYP) in combination with 6-311G(d,p) basis set to derive the complete geometry. Thermodynamic parameters of all the forms were evaluated. The surfaces of HOMO, LUMO and Molecular electrostatic potential mappings have been generated. The quantum chemical descriptors like ionization potential (I), electron affinity (A),  $\Delta E_{\text{gap}}$ , electronegativity ( $\chi$ ), chemical potential ( $\mu$ ), global hardness ( $\eta$ ), global softness (S) and global electrophilicity index ( $\omega$ ) have been calculated from  $E_{\text{HOMO}}$  and  $E_{\text{LUMO}}$  of the respective tautomers.

Equilibrium studies of FTSC with Cd(II) ion carried out by potentiometric Irving Rossetti titration technique in 70% v/v DMF-water medium at 303 K temperature and 0.1 M (KNO<sub>3</sub>) ionic strength revealed the formation of 1:1 and 1:2 Cd(II)-FTSC complexes in the solution. The solid complexes of Cd(II) and Hg(II) with FTSC were synthesized and characterized by elemental analysis, TGA, LC-MS, IR, UV-visible and <sup>1</sup>H-NMR studies. Molar conductance measurements revealed their non-electrolytic nature. The formation of mononuclear five membered chelates with ML<sub>2</sub>(H<sub>2</sub>O)<sub>2</sub> composition and octahedral geometry have been predicted for both the complexes. The antimicrobial studies showed that the chelates have good activity than the ligand against gram negative bacteria.

### Abstract

In this study, we obtained new unsaturated piperazine compounds by the reactions of piperazine and piperazine derivatives with acylation reactive groups. Acyl chlorides were prepared from the reaction of thionyl chloride with carboxylic acids obtained as a result of the reaction. In addition, from the reaction of nitro substituted compound and acyl chlorides, unsaturated piperazines were synthesized in good yields (63%–84%). Further, all these newly synthesized compounds structures were determined by NMR, Mass, FTIR and CHN analysis. These compounds were also screened for different biological studies.

Green synthesis of nanoparticles has gained notable significance in the recent time because of the use of cost-effective and eco –friendly procedure. In the present study, one such simple cost-effective and eco-friendly biosynthesis of silver nanoparticles {AgNPs} was developed. The synthesis of AgNPs from aqueous leaf extract of *Alternanthera sessilis* was assessed by varying different reaction parameters like concentration of plant extract, the ratio of reactants, temperature and reaction time. Characterization using UV-Visible Spectrophotometry revealed a Surface Plasmon Resonance [SPR] peak at 429nm confirming the formation of AgNPs. Further, characterization of the AgNPs was carried out using X-ray Diffractometer{XRD}, it reveals the presence of face-centered cubic structure of AgNPs and confirms its crystalline nature and The crystallite size of the synthesized particle was 22.29 nm which was calculated using peak broadening profile of [111] peak at 37.72°. Nanoparticle analyzer helps in determining the size of the particle and size distribution. The SEM image of AgNPs synthesized from aqueous leaf extract of *Alternanthera sessilis*, the particles are predominantly spherical in shape and the TEM results revealed well dispersed and mostly spherical AgNPs. Maximum particles were in the size range of 10-20 nm and few particles were found above the range of 30 nm. The Fourier Transform Infrared Spectroscopy {FTIR} study explained that Bimolecules in *Alternanthera sessilis* leaf extract have acted as the reducing and stabilizing agents during the synthesis.

The *in-vitro* antimicrobial activity of the AgNPs was investigated against *Bacillus subtilis*, *Escherichia coli*, *Klebsiella pneumonia* and *Staphylococcus aureus*. In the present study, AgNPs showed greater antimicrobial activity in comparison with the standard antibiotic Ampicillin. The activity exhibited by AgNPs was found to be dose-dependent. With increase in concentration of the AgNPs, there was also a simultaneous increase in the zone of inhibition showing an increase in the Antibacterial activity exhibited by the green synthesized AgNPs.

The catalytic activity of the AgNPs thus synthesized was investigated by studying the degradation of methylene blue dye by sodium borohydride. The present study revealed significant catalytic activity of AgNPs in presence of sodium borohydride against methylene blue dye, and found that, dye completely degraded with in 25min. AgNPs synthesized from aqueous leaf extract of *Alternanthera sessilis* showed effective antimicrobial and catalytic properties. The developed method can be used as substitute for the physical and chemical methods used for synthesis of AgNPs.

### Abstract

Porous coordination polymers (PCPs), or metal-organic frameworks (MOFs) are emerging as potential materials of the decade, particularly for gas storage, separation, catalysts, and sensors, etc. However, PCPs existing in the literature were mostly surface oriented porosity without any open metal sites (OMSs). Some of the PCPs are formed by the coordinated solvent in the pristine form are unstable after removal of the solvent leads collapse of the structure.

To overcome these problems, synthesized new MOFs using new 3,3',3''-(Benzene-1,3,5-triyltris ethyne-2,1-diyl) tribezoic acid (H<sub>3</sub>BETB). Later in these MOFs Metal Nano particles were incorporated for the splitting of water in hydrogen and Oxygen. In this study we present our latest results on MOFs for Metal Organic Framework (MOFs) for electro- catalysts for water splitting applications

### Abstract

Mixed alkali borosilicate glasses doped with transition metal ions Cu<sup>2+</sup>, V<sup>4+</sup>, Ti<sup>4+</sup>, Mo<sup>4+</sup> are prepared by melt quenching technique and their physical properties are studied. From the observed values of density of all the samples it is clear that Cu<sup>2+</sup> doped borosilicate glasses have maximum value of density and for Mo<sup>4+</sup> doped glasses have the minimum of density. There is a variation in inter ionic radius of transition metal ions in studied glasses.

The separation between Cu<sup>2+</sup> ions is less and Molybdenum ions are more in studied glasses. Molar Polarizability has larger value for Cu<sup>2+</sup> doped glasses and has smaller value for Molybdenum doped glasses. From the calculated values of Molar refraction per unit volume it is evident Cu<sup>2+</sup> doped glasses have the more ionic nature and Molybdenum doped glasses have the less.

### ABSTRACT

A simple, rapid, precise, accurate and sensitive reverse phase liquid chromatographic method has been developed for the simultaneous determination of Trifluridine and Tipiracil in bulk and pharmaceutical dosage form dosage form. The chromatographic method was standardized using Waters ODS (C18) RP Column, 250 mm x 4.6 mm. 5 $\mu$ m i.d. column with UV detection at 251 nm and Phosphate Buffer (pH- 6.5): Acetonitrile with 65: 35% v/v ratios at a flow rate of 1.0 ml/ min. The Retention time of Trifluridine and Tipiracil in Optimized condition is 2.179 and 3.610. The proposed method was successfully applied to the simultaneous determination of Trifluridine and Tipiracil in bulk and pharmaceutical dosage form. The method was linear over the range of 0-60 $\mu$ g/ml for Trifluridine and 0-40 $\mu$ g/ml for Tipiracil. The recovery was in the range of 98% to 102%. The LOD was found to be 0.06  $\mu$ g/ml and 0.08  $\mu$ g/ml for Trifluridine and Tipiracil respectively. The LOQ was found to be 0.18  $\mu$ g/ml and 0.24  $\mu$ g/ml for Trifluridine and Tipiracil.

The results of the forced degradation studies indicated the specificity of the developed method that has been developed. Trifluridine and Tipiracil were stable only in acidic, basic and thermal stress conditions and photolytic stress conditions. Different analytical performance parameters such as precision, accuracy, limit of detection, limit of quantification and robustness were determined according to International Conference on Harmonization (ICH) guidelines.

### Abstract

A series of novel oxadiazole tagged pyrazolo[3,4-*b*]pyridine derivatives **6a-n** were prepared. All the final products **6a-n** were screened for anticancer activity against four cancer cell lines such as HeLa-Cervical cancer (CCL-2); COLO 205-Colon cancer (CCL-222); HepG2-Liver cancer (HB-8065); MCF7-Breast cancer (HTB-22); Compounds **6i**, **6m** and **6n** are found to have promising anticancer activity at micro molar concentration.

### Abstract

Microbial infection is one of the major areas of concern in healthcare and community environments. As per the recent report of UN Ad hoc interagency coordinating Group on Antimicrobial resistances an estimated of 10millions deaths each year by 2050 due to drug resistance microbial diseases and could force up to 24 million people into extreme poverty by 2030. Effective antimicrobial drugs are prerequisites for both preventive and curative measures, protecting patients from potentially fatal diseases and ensuring that complex procedures, such as surgery and chemotherapy, can be provided at low risk. Of particular concern are severe infections caused Gram positive bacteria Staphylococcus aureus, Bacillus subtilis and Gram-negative bacteria Escherichia coli. At the same time reactive oxygen species (ROS) which is the product of normal cellular metabolism, can cause damage to the biomolecules at higher concentration which can lead to oxidative stress-related diseases like cancer, aging, atherosclerosis, and diabetes mellitus. Antioxidants supplements via diet or medicines are required to gain the equilibrium between ROS generation and defensive mechanism of humans, in order to protect against oxidative stress related diseases.

1,3,4-oxadiazoles, an important class of nitrogen and oxygen containing heterocyclic exhibiting a wide range of biological activities such as antibiotic(I), anticancer(II), anti-hypertensive(III) and antiretroviral(IV). On the other hand 1,2,3-triazoles which is continuously attracting the attention of medicinal chemists due to its simple synthetic protocol, and wide variety of pharmacological properties on combining with other heterocyclic moieties. Keeping the importance of 1,3,4-oxadiazole scaffold in view, as part of an ongoing project, in search of finding useful novel bioactive molecules here in, we report the design and an efficient synthesis of some 1,3,4-oxadiazoles. Below figure shows the general structure of the synthesized compounds. All the synthesized compounds are analyzed spectroscopically and submitted for biological evaluation.

### ABSTRACT

An efficient tetra-n-butyl ammonium peroxydisulphate (TBA)<sub>2</sub>S<sub>2</sub>O<sub>8</sub> catalyzed, direct one-pot synthesis of fully substituted pyrazoles in excellent yields with high regioselectivity has been described via a three-component cyclocondensation of aldehydes, aryl hydrazines with β-diketones or β-keto esters under solvent-free conditions. The structure of the target compound 4 m was confirmed by X-ray diffraction.

### Abstract

An organic compound with at least one hetero atom are known as heterocyclic compounds, which were found to be structural moieties in many synthetic, medicinal chemistry, agrochemicals, also in biomolecules such as vitamins, enzymes and natural products. The widespread of heterocyclic compounds generally fused with nitrogen, oxygen and sulfur atoms. Heterocyclic compounds either naturally produced or synthetically derived often exhibit significant biological and industrial applications. According WHO studies, cancer is one of the major causes of deaths worldwide [1] due to its uncontrolled growth of cells, which exerts physical, mental and financial strain to individuals and of course rapid deadly disease in poor developed nations [2]. Apart from the cancer disease, microbial infections, mainly caused by bacteria, fungi and virus have been creating serious attention from the centuries [3].

A series of novel 2-arylquinoline-3-fused thiazolo[2,3c]1,2,4-triazole heterocycles **9a-t** were efficiently synthesized using simple conventional methods in good yields. The structure of newly synthesized molecules was characterized on the basis of their IR, <sup>1</sup>H NMR, <sup>13</sup>C NMR and mass spectral data. Among **9a-t**, compounds **9h**, **9n**, **9b** and **9d** exhibited highly significant antiproliferative activity against two cancer cell lines C6 (nerve cells) and MCF-7 (human breast adenocarcinoma cells) when compared with standard reference *Doxorubicin*. *In vitro* antimicrobial activities of target compounds **9h**, **9b**, **9d**, **9m** and **9n** were effectuated on Gram-positive *Staphylococcus aureus* (ATCC 25923), *Bacillus subtilis* (ATCC 6633) and Gram-negative strains *Klebsiella Pneumonia* (ATCC 31488) and *Escherichia coli* (ATCC 25966) strains and found to exhibit promising activity against standard *Ciprofloxacin* drug. Further, *in vitro* antifungal activity was conducted on *Aspergillus Flavus*, *Aspergillus Niger* strains among all the compounds **9h**, **9b**, **9d** and **9n** shown best activity against standard *Fluconazole* drug moiety.

### Abstract

A sensitive & selective stability-indicating RP-HPLC method has been developed & validated for the analysis of lamivudine and abacavir tablets. In the case of RP-HPLC various columns are available, but here THERMOSIL C18, 150m x 4.6mm x 5µm, or equivalent column was preferred because using this column peak shape, resolution and absorbance were good. Mobile phase & diluent for preparation of various samples were finalized after studying the solubility of API in different solvents of our disposal (acetonitrile, chloroform, methanol, water, etc). The drug was found to be highly soluble in acetonitrile & water. Thus, using acetonitrile, water and phosphate buffer PH 2.5 solvents with appropriate composition newer method can be developed and validated. The chromatograms for lamivudine and abacavir were found to be satisfactory on THERMOSIL C18 150m x 4.6mm x 5µm, or equivalent column using Water: acetonitrile: buffer 2.5 (45:15:40) as mobile phase with flow rate 1.0ml/minute. Wavelength detection was selected after performing UV-spectroscopy of the standard solution of the drug at 232nm.

The calibration curve for Lamivudine & Abacavir was obtained by plotting peak area versus concentration over the range of 300-700 ppm & 600-1400ppm respectively. The regression equation so obtained for the calibration curve was  $y = 6156x + 44283$ ,  $r^2 = 0.998$  &  $y = 30832x - 8E + 06$ ,  $r^2 = 0.999$  respectively for Lamivudine and Abacavir. Further, the proposed RP-HPLC method has excellent results for all the validation parameters such as Precision, Accuracy, Linearity, Ruggedness, and Specificity. The results shows that the developed method is yet another suitable method for assay and validation parameter studies that can help in the analysis of lamivudine and abacavir in different formulations. A recovery of 101.1% for lamivudine and 99.9% abacavir was found in the assay from tablet formulation. It can be concluded that the proposed RP-HPLC method is sensitive and reproducible for the analysis of Lamivudine and Abacavir in pharmaceutical dosage forms within a short analysis of time.

### Abstract

In this study polyvinyl alcohol (PVA) and polyvinylidene fluoride (PVDF) have been used as the host polymers and the polymer blend is doped with different concentrations of ZnO nanoparticles. Composite polymer blends are prepared by the solution casting technique. The formation of blend, polymer-polymer interactions, interaction between polymer and nanoparticles and role of the nanoparticles on the interactions among PVA/PVDF blend nanocomposites were studied by FTIR spectroscopy.

The crystallinity of the prepared nanocomposites was studied by the XRD characterisation technique and it is observed that there is an increase in amorphous nature, which is due to the addition of nanoparticles into the base matrix. The vibrational morphology and dielectric properties have been studied using UV-Visible, SEM and Impedance spectroscopy. Direct and indirect band gap was found from UV-visible spectrum. The conductivity of PVA/PVDF/ZnO composite is found to be increased with concentration of ZnO nanoparticles. Maximum conductivity was observed for the combination PVA/PVDF/0.5 % ZnO.

**Keywords:** Polymer blend, PVA, PVDF, PVA/PVDF, ZnO Nanoparticles, nanocomposites, electric and dielectric properties, impedance spectroscopy of the polymers, UV analysis and electrical conductivity of the polymer.

### Abstract

Regioselective synthesis of some novel 7-bromo-2H-benzo[b][1,4]oxazin-3(4H)-one linked isoxazole hybrids (**5a-5n**) via copper(I) catalyzed one-pot reaction of various aromatic aldehydes with 7-bromo-4-(prop-2-yn-1-yl)-2H-benzo[b][1,4]oxazin-3(4H)-one is developed. The structures of the compounds that are synthesized are confirmed by <sup>1</sup>H-NMR, <sup>13</sup>C-NMR, Mass spectra. All the hybrids have been tested for their *in vitro* anticancer activity against four human cancer cell lines including HeLa, MCF-7, A549 and PC3. Among all the compounds **5g** (Ar=4-CNC<sub>6</sub>H<sub>4</sub>), **5h** (Ar=4-NO<sub>2</sub>C<sub>6</sub>H<sub>4</sub>) and **5i** (Ar=3,5-di-Cl-C<sub>6</sub>H<sub>4</sub>) exhibited remarkable anticancer activity compared to standard drug Etoposide. Molecular docking studies with EGFR (PDB ID- 4HJO) also strengthened the *in vitro* anticancer activity.

### ABSTRACT

Mefenamic acid (MFA), a derivative of anthranilic acid is a non-steroidal anti-inflammatory medication (NSAID), belonging to the group of fenemates and exhibits anti-inflammatory, anti-pyretic and to treat many pathological conditions. The kinetics and mechanism of the oxidation of such anti-inflammatory drug mefenamic acid by acid bromate (unmixed with Br<sub>2</sub>) in aqueous acetic acid medium was studied.

The reaction exhibited first order each in [bromate] and [mefenamic acid] and second order in [acid]. Variation of ionic strength had no effect on the reaction rate. The reaction rate has enhanced by lowering the dielectric constant of the reaction medium. The reaction has been carried out at six different temperatures and the activation and thermodynamic parameters were calculated. The mechanism proposed involves the decomposition of mefenamic acid-bromate complex leading to 2-((2,3-dimethylphenyl)hydroxyamine)benzoic acid.

### Abstract

Quinazolines are important scaffolds in medicinal chemistry, on account of a wide range of their anti-viral, anti-HIV, anti-malaria, anti-inflammatory, antifungal, anti-bacterial, anti-spasmodic, anti-cytotoxin, anti-virus, anti-analgesic, **anticancer**, anti-oxidation, anti-hypertensive, anti-depressant, anti-psychotic, anti-diabetes, anti-tuberculosis activities, and also their inhibitory effects on tyrosine kinase, poly-(ADP-ribose) polymerase (PARP) and thymidylate synthase. There are several approved drugs with quinazoline structure in the market. Afatinib, Gefitinib, Vandetanib, Erlotinib, Lepadatinib etc are the commercially available anticancer drugs which contain quinazoline motif.

A series of novel Schiff base ligands were synthesized by the condensation of substituted amino quinazolines and various aldehydes. The Schiff bases and their metal complexes were characterized by elemental analysis and various spectroscopic methods like I.R, UV-Vis etc. Further the ligands and their metal complexes were screened for anti cancer activity.

### Abstract

A novel series of quinoxaline containing 1,2,4-thiadiazole amide derivatives were synthesized and evaluated for their ability to function as anti-proliferative agents on four different human cancer cell lines including breast cancer HeLa, A549, MCF-7 and HEK-293 and Etoposide as a standard drug. The results showed that **5d**, **5e** and **5g** of the synthesized compounds showed promising anticancer activities against four cell lines. Predominantly, the compound **5e** was displayed greater activity on HeLa, A549, MCF-7, and HEK-293 with  $IC_{50}$  values of  $1.25 \pm 0.02$ ,  $3.00 \pm 0.01$ ,  $4.30 \pm 0.60$  and  $3.40 \pm 0.05 \mu M$  than the standard drug Etoposide. Furthermore, the compounds **5d** and **5e** displayed promising inhibitory activity over tyrosine kinase EGFR when compared with the standard Erlotinib.

**Abstract**

The charge transfer (CT) interaction of donor 2, 3-diamino-5-bromo pyridine (5-BPY) and  $\pi$ -acceptor 2, 3-dichloro-5,6-dicyano-p-benzoquinon (DDQ) in acetonitrile (ACN) and methanol (MeOH) solvents at room temperature was studied spectrophotometrically. The stoichiometry proportion of the CT complex was determined by using Jobs and photometric titration methods and found to be 1:1. The association constant ( $K_{CT}$ ), molar absorptivity ( $\epsilon$ ) and spectroscopic physical parameters were used to determine the stability of the charge transfer complex. The formation constant recorded higher values and the molar extinction coefficient recorded lower values in methanol compared with acetonitrile, confirming the strong interaction between the molecular orbitals of donor and acceptor in the ground state in a less polar solvent. The prepared complex was characterized by FT-IR, NMR, powder XRD, and SEM EDX analysis. The nature of the DNA binding ability of the complex was probed by using UV-visible spectroscopy, and the binding mode of the CT complex is intercalative. The intrinsic binding constant ( $K_b$ ) value is  $5.2 \times 10^6 \text{ M}^{-1}$ .

The CT complex may be used as a pharmaceutical drug in the future due to its high binding affinity. Anticancer activity was screened against breast cancer MDA-MB-231 and MCF-7 cell lines, the complex shows significant activity when compared to corresponding donor and acceptor. Moreover, density functional theory (DFT) studies are discussed for the charge transfer complex 5-BPY-DDQ, using the CAM-B3LYP with a 6-31 G (d, p) basis set. The bond lengths, bond angles, Mulliken and natural atomic charges, reactivity parameters, and FMO surfaces were also evaluated. The theoretical UV-visible spectrum of the compound and the electronic properties, such as HOMO and LUMO energies, were performed using the time-dependent (TD-DFT) approach with CAM-B3LYP, employing the 6-31 G (d, p) basis set, and good agreement with the theoretical and experimental UV-visible data was found.

### ABSTRACT

Schiff base (**HL**) was synthesized by refluxing of 2-hydroxy- 3-methoxybenzaldehyde with *p*-aminophenol in 1:1 molar ratio. The coordination behaviour of a series of transition metal ions with the synthesized HL ligand, [Cr(HL)<sub>2</sub>] (**1**), [Fe(HL)<sub>2</sub>] (**2**), [Co(HL)<sub>2</sub>] (**3**) and [Cu(HL)<sub>2</sub>] (**4**) is reported. The stereochemistry and the bonding behaviour of the complexes was deduced by sophisticated spectral techniques. These studies revealed that the metal centres were found to be octahedral for **1**, **2** and **3** complexes and complex **4** with square planar geometry. Kinetic parameters of the complexes were estimated by Coats-Redfern method and the complexes were found to be thermally stable.

DNA binding affinity of these metal complexes was explored by means of fluorescence, UV-visible and viscosity studies and the studies suggested intercalative mode. The  $K_b$  values from the absorption studies are  $2.98 \times 10^3$ ,  $2.16 \times 10^3$ ,  $4.66 \times 10^3$  and  $5.46 \times 10^3 \text{M}^{-1}$  and  $K_{sv}$  values from fluorescence studies are  $3.79 \times 10^4$ ,  $2.14 \times 10^4$ ,  $4.92 \times 10^4$  and  $6.47 \times 10^4 \text{M}^{-1}$  for **1**, **2**, **3** and **4** complexes respectively. Nuclease studies in the presence of H<sub>2</sub>O<sub>2</sub> were performed using *pUC19* supercoiled DNA. Docking studies were done using *human* DNA topoisomerase -I (DNA topoi) receptor protein. *In vitro* antimicrobial studies revealed higher activity for complexes than the ligand and *in vitro* anti-tumour studies showed that complexes **3** and **4** possess potential inhibitory efficiency with an IC<sub>50</sub> of  $49.13 \pm 1.2 \mu\text{g/mL}$  and  $33.85 \pm 2.2 \mu\text{g/mL}$  correspondingly.

### Abstract

In the present work, a green synthetic method was employed for a synthesis of Nickel/ Nickel Oxide (Ni/NiO) nanoparticles using Polyphenolic rich *Terminalia Chebula* fruit aqueous extract. The UV-Vis data revealed the formation and monodispersed nature of Nanoparticles. FTIR & EDX confirmed that polyphenolic and alkaloids were utilized in the formation of Nanoparticles. The XRD established formation of Ni & NiO nanoparticles of FCC. SEM indicated the agglomeration of nanoparticles and TEM established the spherical shape with an average size about 15.6 nm.

This study evaluated the antioxidant and catalytic activity of green synthesized Ni/NiO NPs against DPPH and Congo Red (CR) Dye respectively. Degradation of the Congo red dye found to be first order kinetics, the catalytic degradation of carcinogenic Congo red dye completed within 30 mints and assay of DPPH found maximum at 100 µg/ml and EC 50 as 65.01.

### Abstract

The most common pharmaceutical analysis is the quantitative measurement of the active ingredient and related compounds in the pharmaceutical product. These determinations require the highest accuracy, precision and reliability because of the intended use of the data, manufacturing control, stability evaluation. Pharmaceutical analysis is an important subject for the quality control of raw materials, drugs, food stuffs and pharmaceuticals. This is due to the fact that drug, pharmaceutical and foodstuffs of maximum purity are essential for the safeguard of the health of human beings. The purity and stability of the drugs are checked with the help of various physical, chemical and instrumental technologies.

FT-IR spectroscopy is a rapid technique, requires minimal sample and provides comparable accuracy to other established methods. The IR spectra of peak area, peak height or peak ratio which are most suitable for quantitative determination.

Aceclofenac is a class of non-steroidal anti-inflammatory drug. Aceclofenac concentration range (2-20 mg/mL), the calibration curves were constructed absorbances at  $1149.53\text{cm}^{-1}$ ,  $1280.73\text{cm}^{-1}$ ,  $1417.68\text{cm}^{-1}$  and  $1506.41\text{cm}^{-1}$ . The limits of Beer's law, slope, intercept, correlation coefficient (0.994), sandell's sensitivity (0.033), LOD(2.167), LOQ(6.566) and regression equation for aceclofenac were calculated. Pharmaceutical formulation of aceclofenac was analysed with same concentration. The values like % RSD, % error, t- and F- tests values were determined.

Alfuzosin HCl is a selective  $\alpha_1$  adreno receptor antagonist used in the treatment of benign prostatic hyperplasia. Alfuzosin concentration range (1-10 mg/mL). The calibration curves were constructed absorbances at  $1280.73\text{cm}^{-1}$ ,  $1492.90\text{cm}^{-1}$ ,  $1529.55\text{cm}^{-1}$  and  $1664.57\text{cm}^{-1}$ . The limits of Beer's law, slope, intercept, correlation coefficient (0.998), sandell's sensitivity (0.011), LOD(0.157), LOQ(0.357) and regression equation for alfuzosin were calculated. The values like % RSD, % error, t- and F- tests values were determined.

### Abstract

A one-pot, four-component catalyst free synthesis of 5-(2,4-diphenyl-1H-imidazol-1-yl)-1-isopropyl-1H-1,2,4-triazole derivatives (**4a-h**) is described. Heating a mixture of a 2-bromoacetophenone, an aldehyde, a triazole amine, and ammonium acetate under solvent-free conditions affords functionalized triazole substituted imidazoles in good to excellent yields. The structures of all the synthetic derivatives were confirmed by <sup>1</sup>HNMR, <sup>13</sup>CNMR, and mass spectral data. Further, these compounds were tested for their anti-inflammatory activity.

### ABSTRACT

A new analytical simple, rapid, precise, accurate and sensitive reverse phase liquid chromatographic method has been developed for the simultaneous determination of Etoricoxib and Thiocolchicoside in bulk and pharmaceutical dosage form dosage form. The chromatographic method was standardized using Develosil ODS HG-5 RP C<sub>18</sub>, 5µm, 15cmx4.6mm i.d. i.d. column with UV detection at 255nm and Methanol: Phosphate buffer (0.02M) with 55:45 (pH-2.6) ratios at a flow rate of 1.0 ml/ min. Different analytical performance parameters such as precision, accuracy, limit of detection, limit of quantification and robustness were determined according to International Conference on Harmonization (ICH) guidelines. The method was linear over the range of 0-14µg/ml for Etoricoxib and 0-28µg/ml for Thiocolchicoside. The recovery was in the range of 98% to 102%. The LOD was found to be 0.06 µg/ml and 0.09 µg/ml for Etoricoxib and Thiocolchicoside respectively. The LOQ was found to be 0.18 µg/ml and 0.27 µg/ml for Etoricoxib and Thiocolchicoside. The proposed method was successfully applied to the simultaneous determination of Etoricoxib and Thiocolchicoside in bulk and pharmaceutical dosage form.

**Abstract**

Series of transition metal complexes were derived from Schiff base ligand (**HL**) obtained by condensation of o-hydroxy acetophenone with 2-fluoroaniline in 1:1 ratio. Structural and bonding parameters of the ligand and metal complexes [Fe (HL)<sub>2</sub>Cl(H<sub>2</sub>O)](**1**), [Co (HL)<sub>2</sub>](**2**), [Ni(HL)<sub>2</sub>](**3**) and [Cu(HL)<sub>2</sub>](**4**) have been deduced by analytical and spectral studies which revealed octahedral geometry for complex **1** and square planar geometry for complexes (**2**), (**3**) and (**4**). Coats-Redfern calculations for deriving thermodynamic properties, suggest that all the complexes are non-spontaneous and thermally stable.

DNA binding studies revealed intercalation binding mode, while intrinsic binding constant ( $K_b$ ), Stern-Volmer quenching constant ( $K_{sq}$ ) support high binding abilities. The nuclease activity of the metal complexes was carried out by gel electrophoresis using CT-DNA. Docking studies were done using Accelry's Discovery Studio 2.1 program to understand binding affinities. *In vivo* carrageenan induced inflammation studies in paw volume were carried out in rats and results show a higher rate of edema inhibition for complex **4**. *In vitro* cytotoxicity and antimicrobial assay reveal that complex **4** exhibited much cytotoxic and microbial activity over other complexes and the ligand.

**Key words:** DNA binding, *in-vivo*, carrageenan, *in- vitro* cytotoxicity, docking studies.

### Abstract

The essential need for the anti-cancer agents with high selectivity towards the cancer cell lines has prompted us to synthesize a novel series of triazine-triazolo spirooxindoles. The title compounds were synthesized by using one-pot multicomponent reaction of 1,3,5 triazine-1,2,3- triazolo chalcones, oxindoles and *L*-proline in methanol at room temperature delivers triazine-triazolo spirooxindoles in good to excellent yields via 1,3-dipolar cycloaddition reaction. The azomethine ylide generated *in situ* from isatins and secondary aminoacids (*L*-proline) reacted with 1,3,5 triazine-1,2,3-triazole chalcones to produce spirooxindole derivatives. The structures of all the generated compounds were characterised by using FT-IR, <sup>1</sup>H NMR, <sup>13</sup>C NMR and Mass spectral data.

### Abstract

The 5-fluorouracil loaded sodium alginate hydrogel beads coated with graphene oxide to increase the drug loading capacity by simple ionotropic gelation technique with different crosslinking agents for targeted drug delivery. The obtained beads were characterized by FTIR, SEM, XRD, DSC, TGA. Drug release studies were performed at 1.2, 5.4 and 6.8 pH at 37° C. The outcomes of the analysis showed that increases the magnesium cross linker enhanced the swelling and drug release rate. Antitumor activity of drug loaded hydrogel beads were studied by using MTT assay. Finally concluded that the drug loaded hydrogel beads potential for cancer applications.

### ABSTRACT

The chemistry of a new charge and proton transfer hydrogen bonded complex (PT CT) between the donor 6-Aminoindole (6 AMI) and the  $\pi$ -acceptor Chloranilic acid (CLA) has been explored in acetonitrile (ACN), methanol (MeOH), and 50% acetonitrile + 50% methanol (ACN-MeOH) at 25 °C by using electronic absorption spectroscopy. By exploiting Job's and the photometric titration methods, the molar proportion of the PT CT complex was confirmed as 1:1. The modified Benesi-Hildebrand principle was used to evaluate the association constant ( $K_{CT}$ ) and molar absorptivity ( $\epsilon_{CT}$ ) of the PT CT complex, and these values indicate that produced PT CT complex is more stable. In three different solvents, the effect of solvent polarity on charge transfer spectra was also observed. Different spectroscopic physical parameters were assessed in different polar solvents, including energy ( $E_{CT}$ ), ionization potential ( $I_D$ ), resonance energy ( $R_N$ ), oscillator strength ( $f$ ), dissociation energy ( $W$ ), standard Gibbs free energy ( $\Delta G^\circ$ ), transition dipole movement ( $\mu_{EN}$ ), and these were also within the accepted values, confirming the stability of the formed PT CT complex.

The produced solid PT CT complex was analyzed by using FT-IR, NMR, TGA-DTA, and SEM-EDX spectra. Powder XRD analysis was used to determine the PT CT complex nature and crystalline size. The biological activity of the current PT CT complex has been screened in antimicrobial and DNA binding studies. The synthesized PT CT complex was shown to have excellent antimicrobial activity and DNA binding affinity. Therefore, in the future, it may be used as a pharmaceutical drug for bacterial and fungal infections. The computational studies were carried out by using DFT analysis, and the functions were used to B3LYP and CAM B3LYP in the gas phase, with the basis set being 6-31G + (d, p). The bond lengths, bond angles, Mulliken atomic charges, MEP maps, reactivity parameters, and FMO surfaces were also calculated. The computational analysis is additionally supported by the experimental studies of the PT CT complex.

### Abstract

Porous coordination polymers (PCPs), or metal-organic frameworks (MOFs) are emerging as potential materials of the decade, particularly for gas storage, separation, catalysts, and sensors, etc. However, PCPs existing in the literature were mostly surface oriented porosity without any open metal sites (OMSs). Some of the PCPs are formed by the coordinated solvent in the pristine form are unstable after removal of the solvent leads collapse of the structure.

To overcome these problems, we focused on flexible MOFs using ligands obtained by reacting aromatic nitro compounds with the corresponding symmetrically substituted azo compounds. Later, these flexible MOFs were employed various applications including heterogeneous catalysts.

### Abstract

A Schiff base derived from the condensation of 2-chloro-4-hydrazinylpyrimidine with 2-hydroxy benzaldehyde and its complexes with VO(IV), Cr(III), Mn(II), Fe(III), Co(II), Ni(II), Cu(II), Zn(II), Pd(II), Cd(II) and Hg(II) have been synthesized and characterized by elemental analysis, magnetic, thermal and infrared, UV-visible and ESR spectral data. The ligand acts as a mono negative, bidentate one towards VO(IV), Zn(II), Pd(II), Cd(II) and Hg(II) coordinating through nitrogen of free C=N and phenolic oxygen and as tridentate one coordinating additionally through nitrogen of pyrimidine ring C=N towards Cr(III), Mn(II), Fe(III), Co(II), Ni(II) and Cu(II).

The VO(IV), Cr(III), Mn(II), Fe(III), Co(II), Ni(II) and Cu(II) complexes are paramagnetic while the Zn(II), Pd(II), Cd(II) and Hg(II) complexes are diamagnetic. The Cr(III), Mn(II), Fe(III), Co(II) and Ni(II) complexes are octahedral, Cu(II) complex tetragonal, VO(IV) complex square pyramidal, Pd(II) complex square planar and the Zn(II), Cd(II) and Hg(II) complexes tetrahedral in geometry. Ligand field parameters in the case of Co(II) and Ni(II) complexes and the in-plane and out-of-plane bonding parameters in the case of Cu(II) complex have been evaluated and relevant conclusions drawn therefrom.

### Abstract

We, herein, described the synthesis of some new quinoxaline-1, 2, 4-oxadiazole derivatives (**3a–n**) and their *in vitro* anti-cancer activity against four human cancer cell lines like MCF-7 (human breast), HeLa (human cervical), HCT116 (human colon carcinoma) HepG2 (liver hepato cellular carcinoma). The results revealed that the compounds **3d**, **3e**, **3i** and **3k** have shown promising activity as compared to etoposide. Predominantly, the compound **3d** was displayed greater activity on MCF-7, HeLa, HCT116 and HepG2 with IC<sub>50</sub> values of 1.20±0.12, 2.20 ± 0.31, 2.34±0.32 and 2.67± 0.45 than the standard drug etoposide. Moreover, molecular docking studies of derivatives (**3a–n**) on EGFR receptor suggested that the most potent compound **3d** strongly binds to protein EGFR (pdbid: 4HJO). Furthermore, the compounds **3d** and **3k** displayed promising inhibitory activity over tyrosine kinase EGFR when compared with the standard erlotinib.

**Abstract**

The study reports the fabrication of montmorillonite (MMT)-based sodium alginate (SA)/silver nanoparticles (AgNPs) microbeads as potential drug vehicle for controlled release of levofloxacin (LVX). The microbeads were prepared using in situ ion-exchange followed by simple ionotropic gelation technique. The developed beads were characterized by fourier transform infrared spectroscopy (FTIR), differential scanning calorimetry (DSC), thermogravimetric analysis (TGA), X-ray diffraction (XRD) and scanning electron microscopy (SEM). Swelling studies and in vitro release studies were investigated in pH 1.2, 5.0 and 7.4 at 37°C.

Results suggested that both the swelling and in-vitro release studies were influenced by the pH of test media, which might be suitable for intestinal drug delivery. The release mechanism was analyzed by fitting the release data into Korsmeyer-Peppas equation. Antibacterial activity of the synthesized microbeads was studied against gram-negative bacteria, namely *Escherichia coli* and gram-positive bacteria, namely *Bacillus cereus* by agar disc diffusion method. The results suggested that the developed dual drug-loaded 2-hydroxyethyl starch MPs could significantly inhibit bacteria development.

### Abstract

Binary chelates of 1-(4'-chlorobenzoyl)-4-methyl-3-thiosemicarbazide with Co(II) and Ni(II) ions have been synthesized and characterized by elemental analyses, TGA, conductivity and magnetic susceptibility measurements, LC-MS, IR, UV-Visible spectroscopy. Co(II) ion formed 1:1 polynuclear and Ni(II) ion formed mononuclear 1:2 chelates with  $[ML(H_2O)_2]_n$  and  $ML_2(H_2O)_2$  compositions respectively. Equilibrium studies of 1-(4'-chlorobenzoyl)-4-methyl-3-thiosemicarbazide with Co(II) and Ni(II) ions have been carried out by Irving Rossetti pH titration technique in 70% v/v DMF-Water medium, 0.1M (KNO<sub>3</sub>) ionic strength at 303K, which revealed the formation of 1:1 and 1:2 metal complexes in solution.

Interaction of the solid metal chelates with calf thymus DNA has been evaluated using absorption spectroscopy, spectro-fluorimetry and viscosity measurements. Both the complexes exhibited hypochromism and intercalation mode of binding. The cleavage studies of metal complexes with supercoiled pBR33 DNA using gel electrophoresis method showed hydrolytic cleavage of plasmid DNA. The synthesized complexes displayed antibacterial activity against Gram +ve and Gram -ve bacteria.

### Abstract

The synthesis of some new isoxazole-piperidine-1,2,3-triazoles (4a-4j) was achieved using Sharpless Cu(I) catalyzed [3+2] cycloaddition as a key approach. The *in vitro* anticancer screening of all the compounds against four human cancer cell lines including MCF-7, HeLa, A549 and IMR32 revealed that the compounds **4c** and **4f** exhibited promising activity against all the cell lines as compared to etoposide. Rests of the compounds were shown good to zero activity against specific cell lines when compared with the positive control. Predominantly, the compound **4c** was shown superior activity against IMR32 which posses IC<sub>50</sub> value 3.2±0.3 μM.

### Abstract

Herein, we described the synthesis of some new indole-1,2,4-oxadiazole hybrids (**3a–3n**) using from the reaction between 3-(1H-indol-1-yl)propane nitrile and several readily available aromatic carboxylic acids. All the synthesized hybrids were further investigated for their *in vitro* anticancer activity against two human cancer cell lines like MCF7 (breast) and A549 (lung) using MTT assay and the results revealed that three compounds like **3e** and **3m** showed superior inhibitory activities against two cell lines than the standard etoposide. Predominantly, the compound **3m** showed outstanding activity in MCF-7 cell line possessing IC<sub>50</sub> values 0.83 μM. Remaining compounds showed moderate to low activity against selected cell lines.

### Abstract

A series (2, 4, 6, 8, 10 wt %) of CaO supported on activated carbon were prepared by impregnation method and tested for the Carbon dioxide capture. All the catalysts were characterized by PXRD, FT-IR, N<sub>2</sub> adsorption-desorption isotherms and elemental analysis. CO<sub>2</sub> capture was conducted by fixed bed method at different temperature and atmospheric pressure. 6 wt% CaO supported on activated carbon has shown high adsorption capacity of 105 μ mol/g at 303 K and good recyclability up to 10 cycles without loss of adsorption capacity.

### CO<sub>2</sub> adsorption study

CO<sub>2</sub> capture study was conducted on fixed bed reactor by loading 0.2 g of adsorbent in between the two quartz plugs in stainless steel reactor having 8 mm I.D and 400 mm of length. Temperatures were controlled by PID controllers and gas flows maintained by Sevenstar MFC. Prior to adsorption of CO<sub>2</sub>, the adsorbent was treated with helium gas flow 30 ml/min at 150 °C for 1 h to remove physisorbed gases and moisture then cooled to desired temperature and pass 10% CO<sub>2</sub> balanced helium with flow rate of 20 ml/min until the adsorbent is saturated. Effluent and influent gases were analyzed by gas chromatography Agilent technologies 7820A GC System having thermal conductivity detector with Porapak Q column 3 m length and 3 mm I.D. CO<sub>2</sub> capture capacity was calculated from break through curves.

### Abstract

Isoxazole derivatives have attracted considerable attention from organic and medicinal chemists due to their considerable biological activities. Ibotenic acid derived from the mushroom *Amanita muscaria* is a potent neurotoxin [1]. Muscimol, produced naturally in the *Amanita muscaria*, is an agonist of  $\gamma$ -aminobutyric acid A receptor (GABAAR) which plays a role in regulating neuronal excitability in the central nervous system [2]. Isoxazole forms the basis for several drugs such as leflunomide (antirheumatic), valdecoxib (COX-2 inhibitor) and zonisamide (anticonvulsant). On the other hand, 1,2,3-triazoles are an important class of heterocyclic compounds that received considerable attention for the past few years since the wide range of their applications in biochemical, pharmaceutical, and material sciences [3] [4] [5]. Hence, these moieties can be shaped into powerful pharmacophores that can play an important role in bio-conjugation. Encouraged by the biological activities of isoxazoles and 1,2,3-triazoles we synthesized novel isoxazole-1,2,3-triazole hybrids. The purpose of this study was to investigate the antimicrobial activity of 1,2,3-triazole-isoxazole hybrids, with the ultimate aim of development of novel potent antimicrobial agents.

**Key words:** 1,2,3-triazoles, isoxazole, hybrid heterocyclic, antimicrobial activity

### Abstract

A series of novel Schiff bases were synthesized by the reaction of 2-amino-4(3-coumainyl) thiazole with different carbonyl compounds in presence of a base. 2-Amino-4(3-coumainyl) thiazole reacting with cyclopropanone in presence of base, stirring for two hours gives 3-(2-(cyclopropylidene amino)thiazol-4-yl)-2H-chromen-2-one. Changing the substitutions on coumarin ring gives various Schiff bases, which are precursors for many heterocyclic compounds.

### Abstract

Polyaniline–CuAgFe<sub>2</sub>O<sub>4</sub> nanocomposites (PANI–CuAgFe<sub>2</sub>O<sub>4</sub>) with different contents of CuAgFe<sub>2</sub>O<sub>4</sub> (2.5, 5, 7.5, 10 and 50 wt%) were prepared via in situ chemical oxidation polymerization, while the nanoparticles copper Silver ferrite were synthesized by sol–gel method. The prepared samples were characterized by using some techniques such as Fourier transforms infrared (FTIR), X-ray diffraction (XRD), scanning electron microscopy (SEM) and transmission electron microscopy (TEM). Moreover, the electrical conductivity and optical properties and Photocatalytic activity of the nano composites were investigated. Pure (PANI) and the composites containing 2.5 and 5 wt% CuAgFe<sub>2</sub>O<sub>4</sub> showed amorphous structures. UV studies also confirm the interactions of metals with polyaniline backbone chains. SEM studies have shown that the average size of the CuAgFe<sub>2</sub>O<sub>4</sub> nano particles was of approximately 75±13. FTIR spectra evident the interactions between the polymer and poly nano particles.

The electrical conductivity of PANI–CuAgFe<sub>2</sub>O<sub>4</sub> nano composite was found to increase with the rise in CuAgFe<sub>2</sub>O<sub>4</sub> nano particle content. The ferromagnetic order in samples annealed at 700-900 °C, suggest the decomposition of the phase. The particle size of CuAgFe<sub>2</sub>O<sub>4</sub> annealed at 400 °C was quite small [a nm]. The crystalline size of nano composites increased with increasing spinel ferrite contents in the PANI matrix due to amorphous structure of PANI.

### Abstract

Condensation of Ortho-phthalaldehyde, 4-Amino antipyrine and diamines form a macrocyclic ligand which on further reaction with respective metal salts results in macrocyclic metal complexes. The newly formed Schiff base ligands and their Cu (II) complexes were characterized by thermal analysis, elemental analysis, mass, I.R, UV-Vis, and ESR spectral studies. Biological studies revealed that the Cu (II) complex of Schiff base ligands has increased activity than corresponding Schiff bases.

Molecular docking is the primary method for simulation of molecular interaction and is able to give insights into the interaction at the atomic level, offering the opportunity to fully characterize the binding site of each molecule. Molecular docking studies were performed for the new ligands and all of them have showed good results.

### Abstract

The ring-opening polymerization (ROP) of cyclic esters like  $\epsilon$ -Caprolactone & 1,4-Dioxacycloheptadecane-5,17-dione (ethylenebrassylate) by discrete organic/inorganic initiators has been intensively investigated over the past 10 to 15 years<sup>1</sup>. Over the past five years, Ga (III) has attracted a growing interest towards ROP of cyclic esters, like  $\epsilon$ -Caprolactone. Motivated by these results we successfully established highly potential Gallium metal complexes [(L1)<sub>2</sub>Ga-N(SiMe<sub>3</sub>)<sub>2</sub>](1) & [(L1)<sub>2</sub>Ga(TBD)](2) (where L1=[Ph<sub>3</sub>CN=CH-C<sub>4</sub>H<sub>3</sub>NH]) via one-pot salt metathesis route & ligand group exchange reactions under inert atmospheric conditions at ambient temperature.

All these complexes were initially characterized by using spectroscopic and analytical techniques. The crystal structure of Gallium complex (1) was further confirmed by single crystal X-ray diffraction analysis. The ring-opening polymerization of  $\epsilon$ -Caprolactone and ethylenebrassylate were studied under various conditions and obtained polymers were characterized by using NMR analysis.

Fatty acid alkyl esters (biodiesel) are widely accepted as alternative diesel fuels because of its non-toxic, biodegradable and renewable nature.<sup>1</sup> Complete burning property of biodiesel reduces emissions of SO<sub>x</sub>, CO and unburnt hydrocarbons and thus resulting non-polluted environment.<sup>2</sup> Trans-esterification of triglycerides with short chain alcohols (mainly methanol) is a preferred approach for biodiesel production.<sup>3</sup> Generally, industrial processes are carried out by using homogeneous base catalysts such as NaOH (or) KOH due to their superior activity than acid (or) enzyme catalysts. But these catalysts are not

reusable and create huge environmental impact and thus promoted an interest to look for heterogeneous base catalysts. Layered double hydroxides (LDHs; also referred as hydrotalcite-like [HT-like] materials) belongs the category of anionic clays, wherein both as-synthesized and modified forms are explored as heterogeneous base catalysts.<sup>4</sup> Because of their favorable physicochemical properties and tunable basicity; they are potential candidates in biodiesel production.

CSIR-CSMCRI have been explored the mixed oxides derived from CaAl<sub>2</sub>-LDH as effective heterogeneous catalysts for fatty acid methyl esters (FAMEs) production from edible, non-edible and used cooking oils with methanol.<sup>5,6</sup> This catalyst showed highest activity with > 90% yield of FAME using low methanol:oil molar ratio (< 6:1) at

65 °C in 5 h. The activity of the catalyst was attributed to its optimum basicity as supported by Hammett and CO<sub>2</sub>-TPD studies. The catalyst was successfully reused for up to four cycles and scaled up successfully with improved efficiency. Some of the fuel properties such as density, viscosity, neutralization number and glycerol contents of the obtained biodiesel matched well with the standard DIN values. They conclude, a scalable and environmentally friendly heterogeneously catalysed trans-esterification process for conversion of edible, non-edible and used cooking oils to biodiesel is demonstrated.

### Abstract

Levulinic acid (LA), a biomass derived keto carboxylic acid, serves as an important building block for the synthesis of valuable fuels and chemicals via several catalytic transformations. LA is easily obtained from abundant waste/surplus carbohydrate (C<sub>6</sub>-Glucose/C<sub>5</sub>-Xylose) biomass [1, 2]. Owing to multiple functionalities possessed by LA, it participates in facile manner in several organic transformations. Sreedhar et al. used the LA functionality (carbonyl and carboxylic) to obtain various important products by reacting with aromatics using H- $\beta$  zeolite as an efficient C-C and C-O bond forming solid acid catalyst.

Scheme: Industrial applications of LA

One-pot synthesis of arylated  $\gamma$ -valerolactones has been demonstrated by Sreedhar et al. from biomass derived levulinic acid (LA) using H- $\beta$  zeolite as a catalyst. The conversion is specific for aromatic rings bearing heteroatom comprising oxygen or sulphur and is highly chemo- and regioselective. These arylated  $\gamma$ -valerolactones are stable in air for several months. The  $\beta$ -catalyst gets deactivated due to deposition of organic carbon during the reaction, and however, could be reactivated by calcination.

**ABSTRACT**

A simple, rapid, specific and accurate reverse phase high performance liquid chromatographic method has been developed for the validation of Apalutamide in bulk as well as in marketed pharmaceutical dosage form. This separation was performed on a Symmetry ODS C18 (4.6×250mm, 5µm) column with Methanol: Phosphate Buffer (35:65) V/V as mobile phase at a flow rate of 1.0 mL min<sup>-1</sup> with UV detection at 235 nm; the constant column temperature was Ambient. The run time under these chromatographic conditions was less than 8 min. The retention time of Apalutamide was found to be 2.252.

The calibration plot was linear over the concentration range of 6–14 µg mL<sup>-1</sup> with limits of detection and quantification values of 1.2 and 3.6 ng mL<sup>-1</sup> respectively. The mean % assay of marketed formulation was found to be 99.86%, and % recovery was observed in the range of 98-100%. Relative standard deviation for the precision study was found <2%. The developed method is simple, precise, specific, accurate and rapid, making it suitable for estimation of Apalutamide in bulk and marketed pharmaceutical dosage form dosage form.

**Abstract**

ZnO Nanoparticles were synthesised by Chemical Reduction synthesis method of Zinc Sulphate with NaBH<sub>4</sub> as reducing agent and DMF as Solvent. The ZnO Nanoparticles of average size range from 30 to 40 nm have been synthesized by Chemical reduction method. The prepared ZnO Nanoparticles is Characterized by SEM, TEM, XRD and FTIR. The powdered ZnO Nanoparticles are Spherical in nature and are Agglomerates as Nanoparticles. The XRD shows hexagonal wurtzite ZnO Nanoparticle, SEM can be used for recognize the Size and Shape of the ZnO Nanoparticle, TEM provides the Morphological, Compositional and Crystallographic information of the sample and FTIR enables the in-situ analysis of functional groups present in Nanoparticles.

### ABSTRACT

A new, simple, robust, accurate, rapid and precise RP-HPLC method has been developed and validated for determination of Encorafenib in bulk and its pharmaceutical dosage forms. The developed method is isocratic method which gives retention time of Encorafenib as 2.497min. The separation was carried out on Symmetry ODS C18 (4.6mm×250mm, 5µm) column using Acetonitrile: Methanol as a mobile phase in the ratio of 35:65v/v. The flow rate was 1.0mL/min and wavelength used was 285nm.

The method has been validated according to ICH guidelines for specificity, linearity, accuracy, precision, robustness, ruggedness, LOD and LOQ. The method was validated as per ICH guideline and found to be linear between the ranges of 55-95µg/mL for Encorafenib. The limits of detection (LOD) and quantification (LOQ) values were 1.2 and 3.4 ng/mL respectively. The method was found to be specific, accurate and precise, robust, rugged and sensitive. The developed method was good linearity, novel, rapid for the estimation of Encorafenib in bulk and its pharmaceutical dosage forms. Thus it can be employed for the routine analysis.

**ABSTRACT**

A new simple, selective, rapid, precise RP- HPLC method is described for the determination of Dacomitinib in bulk and marketed pharmaceutical dosage form. Chromatography was carried on a Symmetry C18 (4.6×150mm) 5µm column using a mixture of Methanol: Phosphate Buffer (pH-4.6) (25:75) V/V as the mobile phase at a flow rate of 1.0mL/min with detection at 260 nm. The retention time of the drug was 2.379min. The detector response was linear in the concentration of 10-50mcg/mL the limit of detection and limit of quantification was 2.13 and 6.31mcg/mL respectively. The % recovery was observed in the range of 98-100%. Relative standard deviation for the precision study was found <2%. The percentage assay of Dacomitinib was 99.86%. The proposed method was validated by determining its sensitivity, accuracy and precision. The proposed method is simple, fast, accurate and precise and hence can be applied for routine quality control of Dacomitinib in bulk and marketed pharmaceutical dosage form.

**ABSTRACT**

A new simple, accurate, economic, rapid and precise reverse phase high performance liquid chromatographic method has been developed for the validated of Baricitinib in bulk and its marketed tablet form. Chromatography was carried out on Zodiac C18 (4.6mm×250mm) 5µm particle size column using a mixture of Acetonitrile: TEA Buffer pH-4.6 (35:65) as the mobile phase at a flow rate of 1.0ml/min, the detection was carried out at 258nm. The retention time of Baricitinib was found to be 3.213±0.02min.

The method was validated according to ICH guidelines for linearity, sensitivity, accuracy, precision, specificity and robustness. The response was found to be linear in the drug concentration range of 20-60 mcg/mL for Baricitinib. The correlation coefficient was found to be 0.999. The LOD and LOQ for Baricitinib were found to be 0.9µg/mL and 2.7µg/mL respectively. The proposed method was found to be good percentage recovery for Baricitinib, which indicates that the proposed method is highly accurate. The method precision for the determination of assay was below 2.0% RSD. The method is useful in the quality control of bulk and marketed pharmaceutical formulations.

### ABSTRACT

A new, economical, simple, rapid, precise, accurate and reproducible RP-HPLC method was developed for the determination of Duvelisib in bulk form and marketed pharmaceutical formulation. Separation of Duvelisib was successfully achieved on a Develosil C18 (4.6mm × 250mm) 5µm column in an isocratic mode of separation utilizing Methanol: Acetonitrile in the ratio of 40:60% v/v at a flow rate of 1.0mL/min and the detection was carried out at 258nm. The method was validated according to ICH guidelines for linearity, sensitivity, accuracy, precision, specificity and robustness. The response was found to be linear in the drug concentration range of 15-35mcg/mL for Duvelisib. The correlation coefficient was found to be 0.999 for Duvelisib. The LOD and LOQ for Duvelisib were found to be 2.1µg/mL and 3.6µg/mL respectively.

The proposed method was found to be good with good percentage of recovery for Duvelisib, which indicates that the proposed method is highly accurate. The specificity of the method shows good correlation between retention times of standard solution with the sample solution. Therefore, the proposed method specifically determines the analyte in the sample without interference from excipients of pharmaceutical dosage forms.

### ABSTRACT

In the present study, we report herewith synthesis of novel series Quinazolin-Aminothiazole analogues (**5a-j**). The synthesized compounds were characterized by elemental analyses, FT-IR, <sup>1</sup>H & <sup>13</sup>C NMR and mass spectroscopic techniques. The compounds were screened for their anti-oxidant activity by DPPH radical scavenging assay. Out of all the tested compounds, **5c**, **5d**, **5f** and **5i** showed portent anti-oxidant activity. These synthesized compounds were also screened for their anti-bacterial activity. The compounds of **5b**, **5e** and **5h** found to be the most potent activity and reaming compounds exhibited are moderate to poor activity against all the tested strains.

### Abstract

A series of phenoxazine sulphonamides were synthesised and evaluated for their in-vitro and in-vivo anti-inflammatory activities. The results revealed that all the eleven compounds under investigation showed excellent percentage (above 70%) of inhibition in comparison with the standard drug ibuprofen. Among them six compounds showed above 80% inhibition. Sulphonamide with pyridine-2-yl group showed highest (84.7%) inhibition in-vitro. In-vivo experimental data revealed that compound with 4-chlorobenzene-1-yl group inhibited the carrageenan induced edema to the extent of 93.5% whereas compound with pyridine-2-yl showed only 90.7% inhibition.

Sulfonamides were also analyzed for their molecular docking studies against Ram Prostaglandin H<sub>2</sub> synthase-1 (*cyclooxygenase-1*, COX-1). Four compounds (PDB: 1EQG) strongly interacted with the active sites of protein H-bonds in close distances. The most active compound with 4-chlorobenzene-1-yl group (PDB: 1EQG) strongly interacted with the active sites of protein Gln289, Asn382, Tyr385 and Thr212 through four H-bonds in the close distances (1.89–3.42 Å°).

### **ABSTRACT**

*P. juliflora* charcoal considered to be as an important fuel resource in India. The wood biomass conversion into charcoal reduces the weight and increases the energy and economic value of the product. It can be converted into charcoal by pyrolysis. This conversion reduces the weight of biomass there by enhances the energy and economic value of the product. *P. juliflora* biomass is considered to be environmentally viable due to the low sulphur content when compare to other conventional sources such as coal [1]. Availability of abundant biomass of *P. juliflora* at cheap price makes this plant is ideal for biosorption studies. Lead removal from aqueous solution using *P. juliflora* is known in literature [2]. Hence objectives of this study aimed at potential of *P. juliflora* wood charcoal for removal of heavy metals form aqueous solution.

*P. juliflora* considered to be an exotic weed in India. Effective management of these plants needs to be attention for potential usage of this plant. Hence PJWC (*Prosopis juliflora* Wood Charcol) was selected for studying Pb(II) removal from aqueous solution. The following conclusion can be drawn from present study. The adsorption process is pH dependent and the experimental kinetic data was best described by pseudo-second-order kinetic model.

### Abstract

We report the synthesis of co-doped calcium tungstate (CaWO<sub>4</sub>) nanocrystals with Samarium (Sm) and Gadolinium (Gd) rare earth ions using hydrothermal synthesis method for the first time. The synthesised nanocrystals were characterized by X-ray diffraction (XRD) with energy dispersive X-ray analysis (EDAX) and field-emission scanning electron microscopy (FESEM). The phase of the nanocrystals under study was identified by X-ray diffraction (XRD). The field-emission scanning electron microscope (FESEM) image shows that the synthesized nanocrystals are in the size range of 55nm – 85nm. The presence of Sm and Gd rare earth ions in the Sm-Gd co-doped CaWO<sub>4</sub> nanocrystals was confirmed by the energy dispersive analysis of the X-rays (EDAX). The rare-earth co-doped calcium tungstate nanocrystals are highly significant for developing luminescent materials of tungstate systems.

### Abstract

Green chemistry is a design, advancement, use of chemical products and systems that minimize or remove the utilisation and formation of destructive and toxic materials. It is a universal method that is feasible to all areas of science. Synthetic process involves the use of various substances. Unfortunately majority of the chemical reagents and substances are applied in industrial and chemical laboratories which are hazardous toxic compounds led to environmental pollution. Perimidine derivatives are very important and valuable compounds in the fields of medicine, biology and pharma.

A series of 2-phenyl-1*H*-perimidine derivatives were synthesised using heterogeneous catalyst and green chemistry approach. This study reveals effects and benefits of various green synthetic strategies to develop diversity-oriented perimidine nucleus through solid heterogeneous catalyst without solvent medium in MWI reducing negative impact on the environment and lively hood. All the synthesised compounds have been purified and characterized by IR, <sup>1</sup>H & <sup>13</sup>C NMR, Mass spectral data and elemental analysis.

The nucleophilic substitution reaction of phenacyl bromide with benzimidazole has been studied conductometrically in methanol medium in the temperature range 303-318K. The reaction is observed to be first order with respect to both [benzimidazole] and [phenacyl bromide]. The reaction is overall second order.

Substituent effect on rate of the reaction suggests that electron withdrawing groups (*p*-NO<sub>2</sub>, *p*-Cl, *m*-NO<sub>2</sub>) enhance the rate of the reaction compared to the unsubstituted compound, while the electron donating group (*p*-OCH<sub>3</sub>) decrease the rate of the reaction compared to unsubstituted compound. For the substituted (*p*-OCH<sub>3</sub>, *p*-NO<sub>2</sub> and *p*-Cl) and the unsubstituted compound form a linear free energy relationship, from the intersection of lines in the Hammett and Arrhenius plots, the isokinetic temperature is discussed.

A point of great interest in kinetic and mechanistic studies is the influence of substituent present on the substrate on rate of reaction. To assess this effect the present system was studied using *p*-OCH<sub>3</sub>, *p*-NO<sub>2</sub>, *p*-Cl and *m*-NO<sub>2</sub> substituents on phenacyl bromide in methanol medium and second order rate constants *k* in the temperature range 303-318K have been evaluated. These values (Table-2) indicate that electron withdrawing groups (*p*-NO<sub>2</sub>, *p*-Cl, *m*-NO<sub>2</sub>) enhance the rate of the reaction compared to the unsubstituted compound, while the electron donating group (*p*-OCH<sub>3</sub>) retards the rate of the reaction compared to unsubstituted compound. The order of the reactivity is *p*-NO<sub>2</sub> > *m*-NO<sub>2</sub> > *p*-Cl > -H > *p*-OCH<sub>3</sub>. Correlation of log *k* with Hammett's substituent constant  $\sigma^{10}$  gives a linear plot with a positive slope. With exception to *m*-NO<sub>2</sub> the remaining three substituents fall on a straight line with a positive slope. To verify the applicability of Hammett's linear free energy relationship (LFER), log *k*<sub>II</sub> is correlated with Hammett's substituent constant  $\sigma^{12}$  in the temperature range 303-318K.

**ABSTRACT**

Rapid ramification of industrial activity and massive urbanization results in release of large amounts of heavy metal containing effluent into the nature. Several industrial activities such as storage batteries, varnishes, paints, antiknock compounds in gasoline, solder, alloys, ammunition, zinc ores, fertilizers, metal plating, battery production, fertilizers industry, stabilizers, pigments and textile and mining contributing for the disposing of large quantities of heavy metals containing effluent into water streams. The metals with a density of 5.0 g/cm<sup>3</sup> or greater are called heavy metals. Heavy metals are toxic and persist in nature without any degradation [1]. These characteristics of heavy metals make them detrimental to human health and shows huge impact on environment. Hence it is necessary to clean up the metal contaminated sites in an effective manner. Conventional methods for removing metals from aqueous solutions include chemical precipitation, ion exchange, filtration, reverse osmosis, oxidation or reduction, membrane technologies and evaporation recovery are cost intensive, biosorption emerged as an important cost effective eco friendly alternative.

In biosorption there is no secondary pollutant production, as we see in the conventional methods in forms of toxic chemical sludge and again it needs disposal/treatment which is a costly process. Satisfying all the economic and environmental aspects biological materials have emerged as an effective substrates for sequestering heavy metals from water streams. The bio-sorbents of different origin shows a great affinity towards the heavy metals. So the metal-sorption by various types of biomaterials can find enormous applications for removing metals from solution and their recovery.

### Abstract

A simple synthetic methodology has been devised for the preparation of numerous divergent and advanced 2-(1,2-dihydro-9-methoxy-4-methylbenzo[f] isoquinolin-3(4*H*)-yl)-*N*-phenylacetamides, 1-(4-(3-trifluoromethyl)phenyl) piperazin-1-yl)-2-(1,2-dihydro-9-methoxy-4-methylbenzo [f] isoquinolin-3-(4*H*)-yl) ethanones and 1-(2-(1,2-Dihydro-9-methoxy-4-methylbenzo[f]isoquinolin-3-(4*H*)-yl)acetyl) indoline-5-carbonitriles. The required essential intermediate 1,2,3,4-tetrahydro-9-methoxy-4-methylbenzo[f]isoquinoline was prepared from 2-(2-Methoxynaphthalen-8-yl)-ethanamine and acetyl chloride.

The synthesized compounds have been purified and characterized by IR, <sup>1</sup>H & <sup>13</sup>C NMR, Mass spectral data and elemental analysis. Additionally, the final compounds have been examined for their preliminary anticancer activity. The compounds under investigation exhibited moderate to good activity.

### ABSTRACT

Pyrimidine and its derivatives play a wide role in drug discovery processes and have considerable chemical significance and biological activities. Pyrimidines are the building blocks of many natural compounds such as vitamins, liposaccharides, and antibiotics. Pyrimidine is used as parent substance for the synthesis of a wide variety of heterocyclic compounds and raw material for drug synthesis and is also crucial in the theoretical development of heterocyclic chemistry and in organic synthesis.

Contemplating the importance of nitrogen containing heterocycles as an important class of compounds in medicinal chemistry, we have synthesized a series of novel pyrimidine analogues (1) and planned to study their biological assay like anti-microbial and anti-bacterial activities.

### ABSTRACT

N-alkyl or N-aryl 3-hydroxyl oxindole derivatives (Morita-Baylis-Hilman adduct) has been synthesized effectively with DIBAL-H as partial reducing agent to methyl and ethyl propiolate at lower temperature (-78 °C), which on nucleophilic addition to N-substituted isatins produces MBH carbonates (Oxindolyl derivatives) in excellent yield with in short time through  $\alpha$ -functionalisation, stable tetrahedral intermediate compound. These oxyindolyl compounds are biologically active and good intermediates in the construction of functionalized hetero cycle compounds.

**Keywords:** Morita-Baylis-Hilman adduct, Oxindolyl derivatives, functionalized hetero cycles.

### Abstract

Heterocyclic compounds containing the five-membered oxadiazole nucleus possess a diversity of useful biological effects. 1,3,4-Oxadiazole and 3-arylpropionic acid moieties are important because of their versatile biological actions. In particular, compounds bearing the 1,3,4-oxadiazole nucleus are known to have unique anti-edema and anti-inflammatory activities (1). Differently substituted oxadiazole moieties have also been found to have other interesting activities such as analgesic (2), antimicrobial (3), antitubercular, anticonvulsant and anti-hepatitis B viral activities (4), some of them are commercially available; however, they are associated with gastrointestinal side effects. Studies suggest that direct tissue contact of these agents plays an important role in the production of side effects and the reported literature confirms that gastrointestinal side effects of arylpropionic acids are due to the presence of a free carboxylic group in the parent drug.

Thus, developing new agents with minimum or without side effects is an extensive research area at present. Therefore, it was considered worthwhile to synthesize some new 3-(4-bromobenzoyl)propionic acid derivatives by incorporating the oxadiazolyl moiety, hoping to get better anti-inflammatory molecules. In view of the reported activities of 1,3,4-oxadiazoles, we have synthesized pyrrolidine linked oxadiazole derivatives and also tested for their analgesic and antibacterial activities.

**Keywords:** Heterocyclics, Oxadiazoles, biological activity.

Insects of many varieties have developed various modes of chemical and behavioral defensive mechanisms. When disturbed, many hemipterans release a pungent and volatile fluid with an offensive odour. These secretions may be used by the *Coridius janus* as defensive substances. *C. janus* possesses abdominal scent glands in larvae and metathoracic scent glands in adults. The extraction of scent secretion from larvae and adults of *C. janus* was collected with the help of micro capillaries and subjected to analysis by Gas chromatographic and Mass spectra (GC-MS) and compared with authentic samples.

Seven chemical compounds were identified in the analysis of the metathoracic scent secretions of adults, 4,5-Dimethyl diazole, (E)-2-Hexenyl acetate, O-iso butenyl phenol, Undecane, Undecylamine, 1,12-Dodecane-diol and N-methyl dodec-6,10 diene amine. Five chemical compounds were identified in the analysis of the abdominal scent secretions of nymph, 5-iso-propenyl pentyl amine, 1-dodecane, Indole-3-acetic acid ethyl ester, N-methyl-dodec-6,10-diene-amine and 6,10-dodec-dienyl acetate. The function of the scent is defensive against predators.

Ion-exchange chromatography is a technique for the separation and purification of various biomolecules that express both hydrophobic and ionic moieties because the column matrix can strongly interact with the biomolecules through long-distance electrostatic force. Thus, effective separation of biomolecular substances is achieved by introducing the opposite ionic moiety

A cellulose based ion exchange resin was synthesized by copolymerizing cellulose with electropositive metal alkyl sulfonate and styrene. The matrix was physicochemically and thermally stable and resistant to acids, bases, and enzymes. In static adsorption tests, the CIR had decolorization ratios .for mixed dyestuffs in wastewater of up to 87.79%, which was higher than the decolorization ratios for a synthetic ion exchange resin .In dynamic adsorption tests, the CIR bed had a decolorization ratios of 92.59% and a wastewater handling capacity 15 times the column volume. the adaptability of the CIR to continuous column adsorption, make the CIR suitable for removing dyestuffs from industrial wastewater and a potential substitute for traditional sorbents such as synthetic resins.

### Abstract

A Simple, sensitive selective and Precise method is developed for the UV-Visible Spectrophotometric methods have been developed for the estimation of five drugs VIZ., 1). Aripiprazole 2). Astemizole 3). Carvedilol 4). Escitalopram oxalate and 5). Ketoconazole. In the present study area under curve (AUC) has been considered for the purpose of quantification of drugs as AUC is more accurate and precise than selecting one wavelength because AUC combines optical densities at the all the wave length. The AUC was calculated using Excel programme. This is taken between 400 to 700 nm as this area is minimally interfered by *p*-CA absorption.

After recording optical densities and calculating AUC for four replicates a commonly used analytical parameter called “relative response” (O.D / Conc. ( $\mu\text{g mL}^{-1}$ ) and AUC / Conc. ( $\mu\text{g mL}^{-1}$ ) have been calculated. This method has been applied for the estimation of drugs in their pure form as well as in tablet formulation. The results of analysis have been validated statistically for linearity, accuracy, precision, LOD and LOQ.

**Key Words:** UV-Visible Spectrophotometry, Drugs, *p*-CA, Quantification, Validation.

## DNA Binding of Ruthenium (II) Polypyridyl Complexes containing Novel Ligand 4-(1H-imidazo[4,5-f][1,10]phenanthroline-2-yl)-N,N-dimethylnaphthalen-1-amine

### Abstract

A new novel ligand dmnip (dmnip = {4-(1H-imidazo[4,5-f][1,10]phenanthroline-2-yl)-N,N-dimethylnaphthalen-1-amine}) and its mononuclear Ru(II) polypyridyl complexes of [Ru(phen)<sub>2</sub>dmnip]<sup>2+</sup> (1) (phen= 1,10-Phenanthroline), [Ru(bpy)<sub>2</sub>dmnip]<sup>2+</sup> (2) (bpy=2,2' bipyridyl), [Ru(dmb)<sub>2</sub>dmnip]<sup>2+</sup> (3) (dmb=4, 4'-dimethyl 2, 2'-bipyridine), have been synthesized successfully and characterized thoroughly by elemental analysis, UV-vis, IR, <sup>1</sup>H, <sup>13</sup>C-NMR, and ESI-MS.

The interaction of these complexes with CT-DNA was studied using absorption, emission spectroscopy, viscosity measurements and molecular docking studies. The docking study infers the binding ability of complexes with stability constants, similar to absorption, emission techniques. These studies reveal that the three Ru(II) polypyridyl complexes bind to CT-DNA through intercalation. The binding ability of these complexes in presence of different ions and solvents are also reported.

## DFT & Thermo-Physical Studies of Binary Mixtures of Ethyl Salicylate (Es) with 1-Alkanols at Various Temperatures

### Abstract

The physical properties of a binary mixture such as density ( $\rho$ ), viscosity ( $\eta$ ) and speed of sound ( $u$ ) are important from practical and theoretical points of view, to understand liquid theory. These properties are very useful for design of many types of transport and process equipment in chemical industries. These parameters afford valuable information regarding behavior of binary liquid systems, due to intra molecular and inter molecular associations, dipolar interactions, complex formation and related structural changes effect the compressibility of the system.

Experimental results of density and speed of sound at 293.15, 298.15, and 303.15K are presented for the binary mixture of Ethyl Salicylate (ES) with 1-propanol, 1-butanol, 1-pentanol and 1-hexanol over the whole composition. From these data, excess molar volume ( $V^E$ ), deviation in viscosity ( $\Delta\eta$ ) deviation in speed of sound ( $\Delta u$ ) and isentropic compressibility ( $\Delta k_s$ ) have been calculated. These results are fitted to a Redlich-Kister type of polynomial equation. These results further discussions in terms of the different types of molecular interactions between the unlike molecules. The bond characteristics, geometries, interaction energies and natural bonding orbital (NBO) analysis for the hydrogen bonded complex have been calculated using the density functional theory (DFT) method.

**Key words:** Density ( $\rho$ ), viscosity ( $\eta$ ), Speed of Sound ( $u$ ), Binary liquid mixtures, molecular interactions, Redlich-Kister type of polynomial equation, DFT.

## 'భావం అర్థమయ్యేలా భాషను ఉపయోగించాలి'

ఖమ్మం ఎడ్యుకేషన్, జూలై 16: అనువాద సాహిత్యంలో మూలంలోని భావం అర్థమయ్యేలా అనువాదకులు భాషను ఉపయోగించాలని కేంద్ర సాహిత్య అకాడమీ అవార్డు గ్రహీత సజయ అన్నారు. శనివారం నగరంలోని ఎస్ఆర్ అండ్ బీజీఎన్ఆర్ ప్రభుత్వ డిగ్రీ కళాశాలలో ఇంగ్లీష్-తెలుగు విభాగాల సంయుక్త ఆధ్వర్యంలో 'అనువాద ప్రక్రియ'పై నిర్వహించిన వెబినార్లో ఆమె మాట్లాడారు. ఔత్సాహికులు వార్తా పత్రికల్లో వచ్చే చిన్న వార్తలను తీసుకుని అనువాదం చేసి మెళకువలు తెలుసుకోవచ్చన్నారు. వెబినార్లో ప్రిన్సిపాల్ జాకీరుల్లా పాల్గొన్నారు.

## అనువాదానికి

## భాష, భావం ముఖ్యం

ఖమ్మం సహకారసగర్ : అనువాదానికి భాష, భావం ముఖ్యమని అనువాదకురాలు, కేంద్ర సాహిత్య అకాడమీ అవార్డు గ్రహీత కాకర్ల సజయ అన్నారు. నగరంలోని ఎస్ఆర్ అండ్ బీజీఎన్ఆర్ డిగ్రీ కళాశాల ఇంగ్లీష్ - తెలుగు విభాగాల సంయుక్త ఆధ్వర్యంలో గూగుల్ మీట్ ద్వారా ఇంగ్లీష్ నుంచి తెలుగు అనువాదం అంశంపై శనివారం సదస్సు నిర్వహించారు. ఈ సందర్భంగా ఆమె మాట్లాడుతూ సాంకేతికత పెరిగిన ప్రస్తుత తరుణంలో పారిభాషికవదాలను నునాయసంగా విద్యార్థులు తెలుసుకోవచ్చన్నారు. ఈ కార్యక్రమంలో ప్రిన్సిపాల్ మహ్మద్ జకీరుల్లా, వివిధ విభాగాల అధ్యాపకులు పాల్గొన్నారు.
