

# GROUP DISCUSSION

Group discussion or GD is a form of a discussion between people forming a group. People in the group discussion are connected with one basic idea. Based on that idea, everyone in the group represents his/her perspective. The recruiters use it to hire the best talent among various candidates.

GD tests the candidate's skills, such as **leadership skills, communication skills, social skills and behaviour, politeness, teamwork, listening ability, General awareness, confidence, problem-solving skills, etc.**

Group discussion is not only a discussion to be practiced while going for an interview in an organization or a university. It is a type of discussion that can be practiced at any age. There is no topic or criteria. A group of friends can also practice such type of discussions by selecting a random topic. There are lots of advantages of these discussions at an early age. It includes **enhanced confidence, elimination of hesitation, improved communications skills, better friendship bonds, happiness, thoughts sharing, improved knowledge, improved coordination,** and many more.

Very brief discussion guidelines could include items like:

- Allow everyone a chance to speak
- Listen respectfully and actively
- Criticize ideas, not individuals
- Commit to learning, not debating
- Avoid blame, speculation, inflammatory language
- Avoid assumptions about others, especially based on their perceived social group

During this Academic Year (2020-2021) we have conducted the **group discussion** on various topics related to Computer Science Students. A separate register is maintained by the Department.
