E-waste

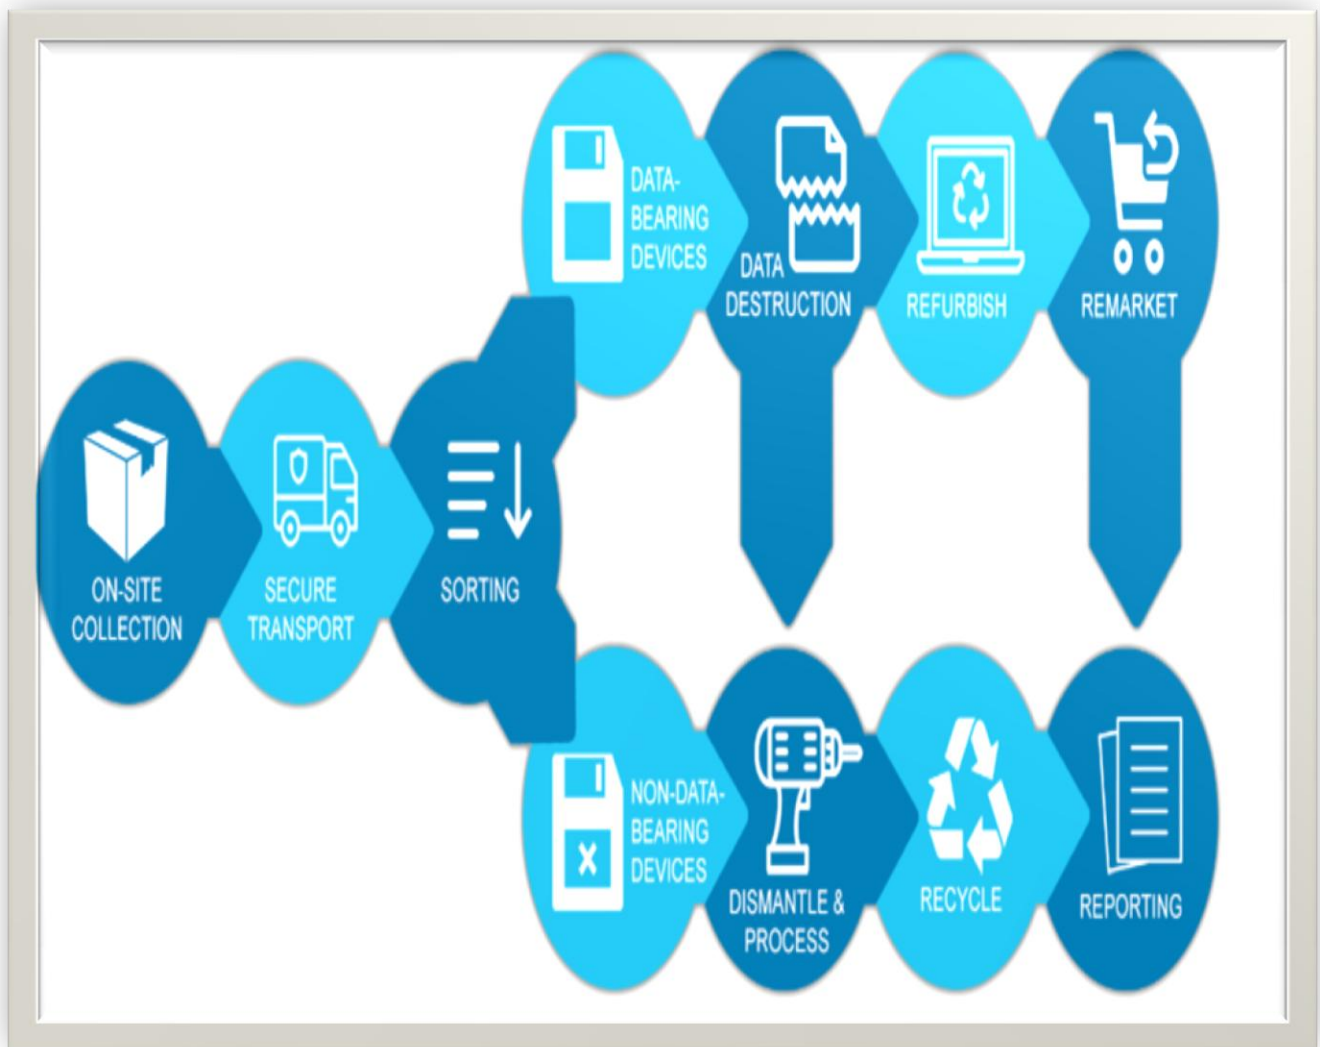

E-waste is any electrical or electronic equipment that's been discarded. This includes working and broken items that are thrown in the garbage or donated to a charity reseller like Goodwill. Often, if the item goes unsold in the store, it will be thrown away. E-waste is particularly dangerous due to toxic chemicals that naturally leach from the metals inside when buried.

E Waste Recycling:

E-waste recycling is the process of extracting valuable materials after shredding the e-waste into tiny pieces that could be reused in a new electronic appliance. But a number of current challenges is preventing the electronic recycling industry from scaling up

Dated. 21-04-2015.

& & &

Anent to the subject cited under references quoted, on behalf of the office of the
SR & BGNR Arts & Science Govt. College(A), Khammam, we are humbled to place on record
that a huge quantity of e-waste free from all kinds of data and is not in working condition
has been accumulated, ever since the purchase took place in the year 1999 in the
Department of Computer Science & Applications of this college, which, in fact, needs the
kind permission of your good offices in this regard.

We are pleased to bring to your kind notice that this year under your brilliant
outlook, the college has obtained strength of 1800 and odd students who opted Computers
in their U.G. and there is not enough accommodation to maintain the Computer Labs due to
the e-waste accumulated therein. It is time we surrendered the e-waste to facilitate the
students with computers in working condition to be sanctioned by Your Grace.

As such, we appeal before Your Grace to kindly accord permission to surrender the
entire e-waste with the record in evidence to the office of the TSTSL pertinent in this
connection to receive the same and to supply the new computers accordingly in relevance
proportion to the count of the e-waste.

Yours faithfully,
