**Proceedings of the Commissioner Collegiate Education,
Telangana :: Hyderabad.**

Present: Sri.Navin Mittal, IAS

Sub Collegiate Education- Jignasa Student Study Projects-2021- List of Selected Student Study Projects for State Level Presentation- Instructions- Issued- Reg.

Ref: File No. CCE-AC/JIGN/1/2021-ACADEMIC CELL Dated:15.09.2021

Commissionerate of Collegiate Education gives prominence to provide the opportunity to the students of all Government Degree Colleges to explore problems and challenges which have real world applications through project based learning. Learning through projects also increases the possibility of long-term retention of what students have learnt and establishes the linkage between theory and practice.

In view of the above, the Department has received a total of 855 Study Projects from all the Government Degree Colleges in 15 subjects. The projects were evaluated by a committee consisting of subject experts who have an aptitude for research and innovation. Out of 855 Projects, 285 projects have been selected in 15 subjects for state level presentation.

The subject wise selected list of Jignasa Study Projects for State Level Presentations is placed in the Annexure - I

In this regard, all the Principals of GDCs as per the Annexure-I are directed to ensure that the Mentor/Supervising faculty shall guide the students and prepare them thoroughly for state level presentations. Further, the Principals also instructed to send the soft copies of full length Study Projects which are selected for State Level Presentations by 18th April, 2022 to jignasa-ce@telangana.gov.in and instruct the faculty supervisors to submit the hard bound copies at the time of presentations. **Dates and Venue for state level presentations shall be communicated shortly.**

The Principals also directed to instruct the faculty who have supervised the projects and got transferred in local cadre allotments to guide the faculty and students of the previous college.

Annexure-I

JIGNASA 2021 -Student Study Projects – Selected list for State Level Presentations

S.No	District	Name of the GDC	Subject	Name of the Project	Name of the Supervisor

Signature of the Head Master

Computer Fundamentals and application – Awareness: A presentation of Computer Fundamentals Module to the Students of ZPHS Sublaid

To provide complete awareness about the hardware and basic electronic components of different types of computers like desk top, lap top, iPad and smart phones.

To provide complete awareness about the different types of operating systems commonly used in different types of computers and the popularly used application software for day to day applications like word processing, spreadsheets and presentation with hands on practical session.

To provide complete awareness about the usage and application of Internet Technology.

INPUT UNIT:

Input unit is defined as an input device, a piece of computer hardware apparatus used to supply a data processing system.

➤ Input Devices

Keyboard, Mouse, Light Pen, Optical/magnetic Scanner, Touch Screen, Microphone for voice as input.

OUTPUT UNIT:

It displays the result of a program. It receives information from the CPU and presents it to the user in the desired form. The processing of extracting the data from CPU through some suitable devices is called Output.

Output Devices

Monitor (Visual Display Unit), Printers, Plotter, Speakers etc.,

Fundamentals on Computer Basics for School Children: A Driving Technical Skills session in Dr. Chakri's Vidyalayam

The use of computers in education opens a new area of knowledge and offers a tool that has the potential to change some of the existing educational methods. The teacher is the key to the effective exploitation of this resource in the educational system. As computer use continues to increase in society, educators must also prepare for the use of computers within the classroom. This involves all levels of education, including elementary schools. The role of the elementary school teacher is evolving from that of a giver of information to that of a facilitator of student learning. New technologies already exist to help teachers complete that evolution.

Computer education in schools plays important role in student's career development. Computer with the internet is the most powerful device that students can use to learn new skills and more advanced version of current lessons. Schools are around the globe teaching student's basics of computers and internet.

The uses of computers and internet are growing day by day at high speed. In almost all business, companies, schools using computers for various official operations. New tech tools are coming that helping students to learn better.

Computers help students to draw the creativity on the computer such as by using windows paint program. If students are taking Hindi Classes or poem writing then they can do it by typing in Hindi on computers. If students are taking Mathematical classes they can use Microsoft Excel application to solve and understand questions.

By thinking about the importance of computers in Government and private schools , Department of Computer Science & Applications has taken a unanimous decision to impart computer knowledge to school students. In this process 4 students from Computer Applications went to Dr. Chakri's Vidyalayam, Khammam to take up the classes on **"Fundamentals on Computers"**.

Digital Payment Service

Field project for creating the awareness on the usage of Unified Payment Interface in Khammam Town.

Purpose : The Indian Banking sector is striving hard to popularize digital payments and has gained momentum after demonetization and digital India initiatives. To facilitate digital payments, "National Payment Corporation of India (NPCI)" launched the "Unified Payment Interface (UPI)", which is an amazing, revamped, and cost-effective breakthrough for enabling digital payment services for all. Proliferation of smart phones, technological innovations, and effective internet communications has signified the usage of mobile payment facility for Smartphone users, financial institutions and particularly the banks. To achieve paperless and cashless economy, Unified Payment Interface (UPI) is a potentially innovative way of transferring funds using a virtual payment address established by the National Payment Corporation of India (NPCI). Hence, it is needed to be assessed for its potential to contribute towards achievement of digital economy.

Introduction:

India has predominantly been a cash driven economy and the culturally the deep rooted trends of cash based purchases has widely been the economic culture. In wake of the government initiatives towards transformation towards digital economy, and many private companies emerging in the space of **Digital Transaction** solutions like the **E-Wallets, Mobile App solutions (UPIs) , Payment Bank** licenses issued by **RBI**, it is imperative that the market is gearing up towards more transparent and compliance based system, and of digital trends.

For successful implementation of digital transactions and digital banking system, certain key processes that are very essential are **net/mobile banking**, more of e-commerce presence in rural segments, digital transaction solutions like the **PoS** solutions usage in merchandise, usage of plastic currency etc

In the effects of demonetization, use of mobile wallets and digital transactions has increased in rural India. "Illiterate people do not know how to use digital transactions, though they know how to use a **Smartphone**. But we are trying to spread financial literacy,"

DIGITAL PAYMENTS :

Digital payments refer to "payments made using digital instruments, such as mobile payment applications, mobile wallets, and other electronic payment methods". The use of technology in performing seamless financial transactions is termed Digital Banking .

Due to the popularisation of digital payment among customers, the priorities of bank clients' have been shifted from a paper-based payment method of a monetary transaction to the electronic mode. e-payment systems in the retail business segment have made a significant contribution in promoting financial inclusion in a larger space. Ongoing progress in new technology, innovative payment products, the emergence of inhibitory market players, and regulatory interventions have aided and accelerated the growth of the digital payment ecosystem".

The primary goal of this case study is to look into the prospects of the Unified Payment Interface (UPI) and its impact. In this context, the following objectives are framed.

- (1) To understand the Unified Payment Interface (UPI) system's.
- (2) To assess UPI's position in the digital payment ecosystem.
- (3) To know the progression of UPI in retail digital payments.

UNIFIED PAYMENTS INTERFACE (UPI) :

Under the provisions of 'The Payments and Settlements System Act, 2007' The Reserve Bank of India (RBI) and the Indian Banks Association (IBA) established the umbrella corporation – 'National International Journal of Case Studies in Business, IT, and Payments Corporation of India (NPCI)' to operate retail payments and settlements systems in India's payment ecosystem. To facilitate digital payments NPCI has developed an innovative payment instrument called 'Unified Payment Interface (UPI)'. It is a digital payment framework designed to perform various banking functions and retail business payments using any mobile application of member banks. "Peer to Peer (P2P)" collection requests, which can be arranged and charged according to need and convenience.

Initially, UPI was operationalized as a pilot launch with 21 member banks. It was inaugurated on April 11, 2016, in Mumbai by then-RBI Governor Dr. Raghuram G Rajan. Unified Payment Interface (UPI) is a tech-enabled payment arrangement allowing money to be transferred from one bank account to another in only a few clicks in no time. One can use any UPI client app, and a single app can be connected to multiple Bank accounts. Various payment methods like; Virtual Payment Address, Mobile Number, Account Number & IFSC, AADHAR, and QR Code can be used to send or request money. The key drivers of UPI are SIASC - Simplicity, Innovation, Adoption, Security, and Cost .

UPI

RETAIL PAYMENT:

Retail transactions are referred to as transactions having low-value denominations and high in number. A variety of characteristics are exhibited by retail payment systems. They deal with numerous lowvalue individual payments in particular . Retail payments differ from large-value transactions. To begin with, the term retail payment refers to a type of payment processing system that handles a significant number of low-value payments for the purchase and sale of goods & services. They are used in a wider range of circumstances than interbank transactions, namely in-person payment using POS computers and payment over the internet. Next, in comparison to large-value transactions, retail payments use a wide range of payment instruments, including both paper-

based and digital methods. Third, unlike large-value payments, which rely significantly on central bank-operated NEFT and RTGS systems, retail payments are typically handled by a variety of payment service providers such as banks, post offices, FinTech companies, and so on.

Strengths: The strengths of UPI platform are as follows:

1) **Caters to Bottom of the Pyramid:** UPI allows even the petty business person to start accepting digital payments without the need for a POS machine in India, where payment infrastructure is poor for accepting digital payments. UPI has eliminated the need for transacting parties to know the complicated payment credentials, and hence, making payments convenient and transparent for all parties involved. UPI operates on a safe, stable, and robust platform that includes numerous security features that make it more secure than any other payment system currently in use. Biometric authentication in UPI will not only make payments more reliable but will also mark a significant step forward in the integration of next-generation technology with current payment systems. UPI has the potential to be a major facilitator of financial inclusion in India, enabling a large portion of the population to engage in the digital economy.

(2) **Irritation on Double verification:** Two-factor authentication like mobile and PIN verification may irritate the users.

(3) **Transaction limit:** The maximum amount that may be transferred is Rs.2,00,000. As a result, it is limited to the retail payment segment

(4) **Requirement of cooling period:** Payments done through means other than VPA, such as Account Number and IFSC, are subject to the same cooling period as NEFT/RTGS transactions.

(5) Cybercrimes: The greatest downside of using UPI is that the banks are not assisting customers with security issues. The majority of fraudsters nowadays ask for money to be transferred via UPI. Customers should be careful enough while performing transactions over UPI

Threats: The following are the obstacles that UPI must overcome:

(1) Awareness: UPI usage awareness creation among the rural and illiterate population of the country is most challenging.

(2) Cash is the King: Even though many e-commerce sites have adopted digital payment methods, consumers still prefer to pay with cash. This trend is linked to concerns about cyber security in digital transactions.

(3) Emergence of FinTech players: Strengthening of the traditional Banking system to compete with tech generation companies i.e., FinTech Players.

(4) Grievance redressal: Pathetic Grievance redressal system for transactions performed over UPI platform.

(5) Tax on UPI service: Levy of Tax/GST on UPI payment service in future days may demotivate usage of UPI platform. The regulators need to be cautious in this regard.

(6) Restoration of Merchant Discount Rate: Users may shift to cash payments in retail payments after the government reinstates the exempted MDR fee on UPI payments. Considering the opportunities and challenges according to the existing scenario, the Computer Applications students with sound commerce concepts knowledge taken an initiation to create **Awareness on Online**

Transactions by visiting remote places in Khammam Town. Arouse the activity and encouraged many illiterate people to use mobile Apps to perform online transactions for paym.

Conclusion: Digital payments has taken off in India as is showing

little to no sign of slowing down. With the Indian government demonetizing the 500 and 1000 Rupee note and government agencies companies incentivizing adoption by lowering fees and waiving taxes, Indian consumers are embracing cashlessness wholeheartedly. Nevertheless, as demand for digital payments grow, so will concerns for security. It is ultimately up to the companies promoting digital alternatives to cash to provide adequate security for their services, as well as consumers to maintain good security habits.

FIELD TRIPS

Program Code	Programme Title	No. of students enrolled
2021-2022		
FP1	Industrial visit to IT HUB , Khammam	69
2019-2020		
FP2	Industrial visit to Infosys , Hyderabad	54

Field trips are generally motivating for students, bring a vividness or reality we cannot bring with conventional lessons, and provide information for learning in a relevant real world context.

Establish the educational purposes of the trip. Writing educational goals, the activities and content examined during the field trip must be relevant and connected to outcomes and objectives in the curriculum. Field trips can certainly be entertaining, but if entertainment is the only outcome, the teacher must rethink the trip with respect to the use of time and other resources that are both limited and precious.

Take the trip before you take students there. We are to be the guide, therefore, we need to know what kids will be experiencing. A pre visit will help us understand what to expect, and what to avoid. If we can't, then study background information for the visit. We need to acquire valuable knowledge for the visit and for instructional activities after the visit.

2021-22

Industrial visit to IT HUB , Khammam

Khammam is the third-tier II town in the state to get IT tower. The IT Hub, which was established in December, 2020, has become a model for tier-2 cities across India in promoting rural employment. IT and Industry Minister K.T. Rama Rao inaugurated the facility, where 19 companies started their operations. The firms include those based in the US and Australia. With a total of 42,000 square feet space, the facility has been built at a cost of Rs 27 crore.

According to officials, it is a 430-seater operation but in two to three shifts, the capacity can go up to 1,000. Over 350 skilled Information Technology (IT) professionals have been working in reputed IT companies that have set up their branches here. Of the 350 professionals, around 223 are women and 138 men.

The firms located at IT Hub in Khammam have been operating beyond the BPO mould and working on emerging technologies like Artificial Intelligence (AI), Machine Learning (ML), Full Stack, Microsoft Technologies and cyber security.

The IT hub is expected to create more indirect jobs also and provide impetus to the local economy in Khammam.

The spacious building would house an office of the Telangana Academy for Skill and Knowledge (TASK) on the ground floor.

Skill enhancement has been one of the top priorities of the IT Hub-Khammam. Skill development programs are being conducted by TASK to enhance the capabilities of the local talent pool and empower them to handle complex projects successfully. This will allow local students to get trained in the latest technologies.

Companies inside this IT Tower also can work closely with the local colleges and fine tune the curriculum, training etc.

Department of Computer Science & Applications visited IT Hub on 28th Feb 2022. Students visited Startups, they have given suggestions, guidelines for how to do projects.

This field trip motivated students to bring a vividness and reality which cannot bring with conventional lessons, and provide information for learning in a relevant real world context.

Final Year Students of Computer Science & Applications felt happy after visiting IT Hub as they came to know about the software environment, working methods, how to develop projects. It's a great pleasure to met developers at Startups as they guided and motivated Students into IT World.

Industrial visit to Infosys , Hyderabad

We are much thankful to the Infosys Incharge for allowing the students to get the feel of latest technologies used in exploring various problems.

Infosys Limited is an Indian multinational information technology company that provides business consulting, information technology and outsourcing services. The company was founded in Pune and is headquartered in Bangalore. Infosys is the second-largest Indian IT company after Tata Consultancy Services by 2020 revenue figures and the 602nd largest public company in the world according to Forbes Global 2000 ranking.

Infosys was founded by seven engineers in Pune, Maharashtra, India with an initial capital of \$250 in 1981. It was registered as Infosys Consultants Private Limited on 2 July 1981. In 1983, it relocated its office to Bangalore, Karnataka, India.

The company changed its name to Infosys Technologies Private Limited in April 1992 and to Infosys Technologies Limited when it became a public limited company in June 1992. It was later renamed to Infosys Limited in June 2011.

Infosys provides software development, maintenance and independent validation services to companies in finance, insurance, manufacturing and other domains.

One of its known products is Finacle which is a universal banking solution with various modules for retail and corporate banking.

Its key products and services are:

- NIA – Next Generation Integrated AI Platform (formerly known as Mana)
- Infosys Consulting – a global management consulting service
- Cloud-based enterprise transformation services
- Infosys Information Platform (IIP) – Analytics platform
- EdgeVerve Systems which includes Finacle, a global banking platform
- Panaya Cloud Suite
- Skava – now rebranded as Infosys Equinox
- Engineering Services
- Digital Marketing

- Infosys has 82 sales and marketing offices and 123 development centres across the world as of 31 March 2018, with major presence in India, United States, China, Australia, Japan, Middle East and Europe.
- In 2019, 60%, 24%, and 3% of its revenues were derived from projects in North America, Europe, and India, respectively. The remaining 13% of revenues were derived from the rest of the world.

Training centre in Mysore

As the world's largest corporate university, the Infosys global education centre in the 337 acre campus has 400 instructors and 200+ classrooms, with international benchmarks at its core. Established in 2002, it had trained around 125,000 engineering graduates by June 2015. It can train 14,000 employees at a given point of time on various technologies.

The Infosys Leadership Institute (ILI), based in Mysore, has 196 rooms and trains about 4,000 trainees annually. Its purpose is to prepare and develop the senior leaders in Infosys for current and future executive leadership roles.

The Infosys Training Centre in Mysore also provides a number of extracurricular facilities like tennis, badminton, basketball, swimming pool, gym and bowling alley. It has an international level cricket ground approved by BCCI.

Department of Computer Science & Applications visited Infosys, Hyderabad on 13th January, 2020.

This field trip motivated students to bring a vividness and reality which cannot bring with conventional lessons, and provide information for learning in a relevant real world context.

Students worked on the day with the guidance of the developers and worked on a minor project, they are very enthusiastic in doing project. Finally they came to know how really a project develop.

Final Year Students of Computer Science & Applications felt happy after visiting Infosys as they came to know about the software environment, working methods, how to develop projects. It's a great pleasure to met developers, they have guided and motivated Students into IT World.

Student's hands on computers at Computer Centre, Infosys, Hyderabad

**PROCEEDINGS OF THE COMMISSIONER OF COLLEGIATE EDUCATION
GOVERNMENT OF TELANGANA, HYDERABAD
PRESENT: SRI.NAVIN MITTAL, I.A.S.**

Sub: Collegiate Education – TSKC-TASK - Industrial Trip Organised Through TASK – Infosys Campus at Pocharam, Hyderabad – Students & Staff – Permission for the Visit and On Duty for the Accompanying Staff on the dates mentioned – Orders – Regarding.

Ref: Note#57 and Note#61 of CCE-AC/TSKC/2/2019-ACADEMIC CELL, Dated: 08.01.2019

Vide reference read, the Commissioner of Collegiate Education has accorded permission to the students and accompanying staff mentioned in the list enclosed here for a industrial visit to Infosys Campus at Pocharam, Hyderabad organized through TASK on the dates mentioned across their college names in the enclosed list.

The absence of the above said faculty members and TSKC Full Time Mentors from GDCS shall be treated as **ON DUTY** for the said date. The accompanying staff are permitted to claim their TA from the college TA Budget. TSKC FTMs accompanying the students are permitted to claim their TA from any accumulated fund in the college.

(Orders of the CCE have been obtained in the note file)
