STUDENT STUDY PROJECT (JIGNASA)

Teacher centric learning has been replaced by student centric learning. Research indicates that students are more likely to retain the knowledge gained through project based learning than the traditional text-centred learning. To invigorate the learning environment in Government Degree Colleges, the Commissionerate of Collegiate Education has initiated Jignasa-Student Study Projects in all Government Degree Colleges.

The study project must include key components in the research proposal like:

☐ A description of the research problem.

☐ An argument as to why the problem is important

☐ A review of Literature relevant to the research problem

☐ A description of the proposed research methodology

☐ A description of how the research findings will be used and disseminated

A uniform format may be incorporated for the study projects as mentioned below:

☐ Title

☐ Statement of the problem or hypothesis

☐ Aims and Objectives

☐ Review of Literature

☐ Research Methodology – which deals with study settings, sampling, study methods (examination or investigation), Data Collection (obtaining primary source and secondary sources using techniques like questionnaire, survey, interview, case study etc)

☐ Analysis of Data

☐ Findings

☐ Conclusions and Suggestions
