

# BEST PRACTICE

The Department of Computer Science and Application is organizing **Online Quiz Programmes** as best practice to the students . This activity helps the teachers and the students as well, to know what and how much they have understood about a subject. However teachers must be mindful to choose the appropriate types of quizzes for the students. They have to consider that the quizzes are not only to know the students' comprehension toward the topic but also to make them enjoy completing the quizzes.

As we know, young learners can easily get bored and lack focus when they study for long periods of time. In order to cope with this limitation, we designed fun quizzes for their students.

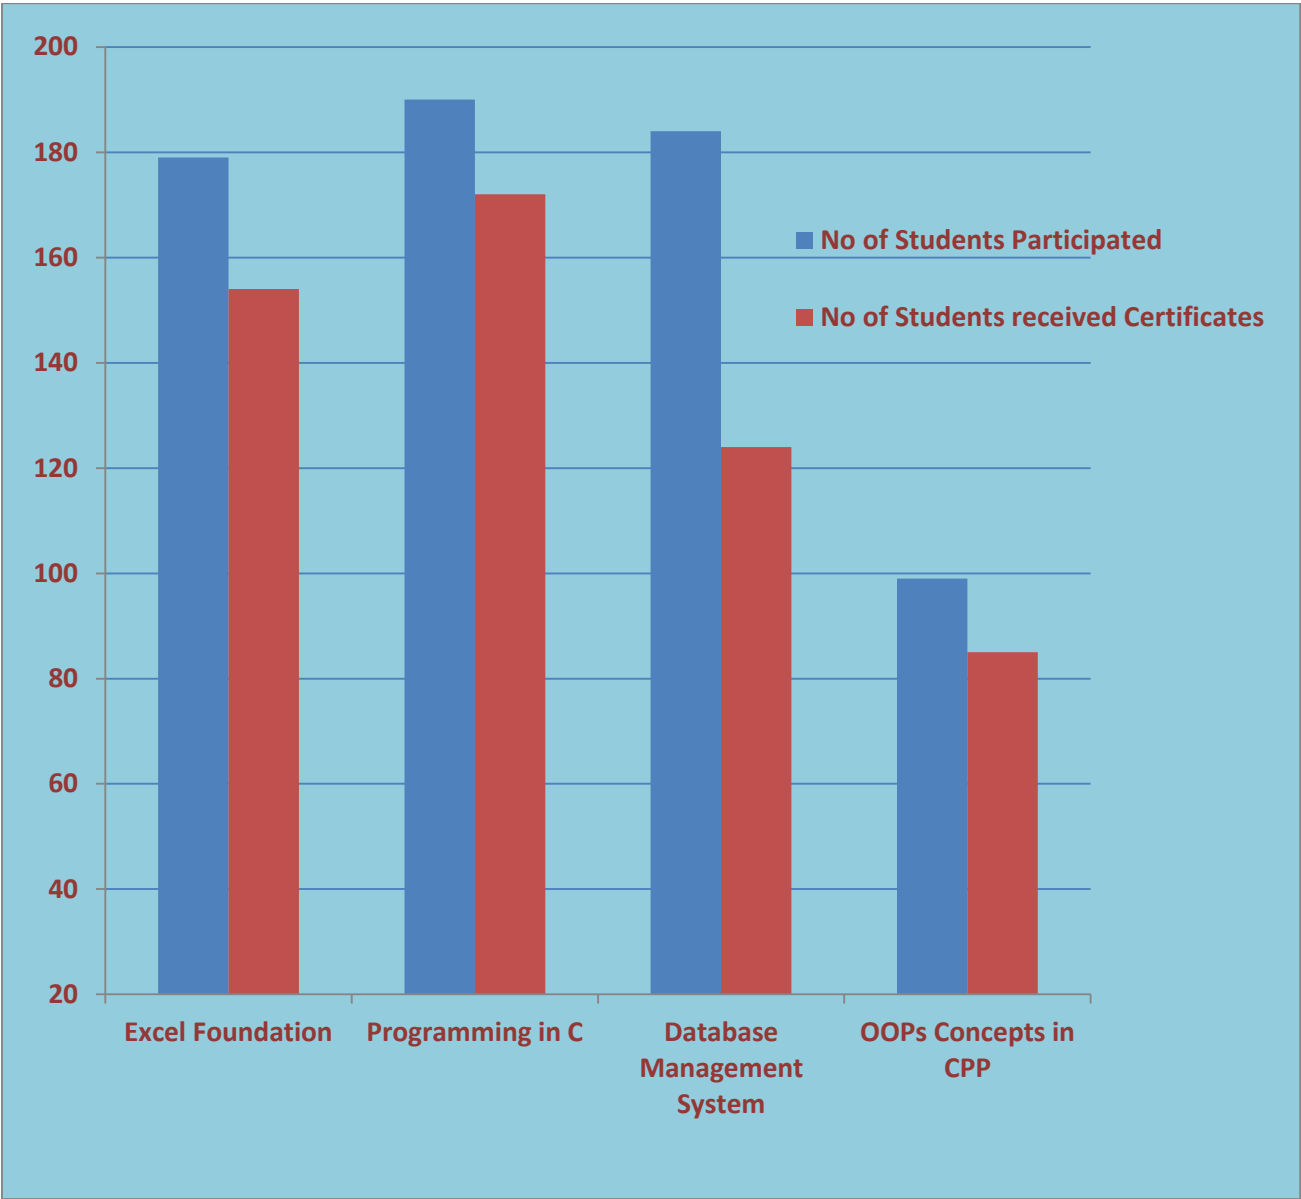

**Furthermore there are several benefits of giving online quizzes for students.**

- Students are being actively engaged in subject material
- Quizzes can increase students' motivation.
- Quizzes can help students to recall information and get better grades
- online quizzes can reduce students' stress.

The Department has taken an initiation and organized online quiz in the month of **June,2022** using Google platform and shared this link among the student groups. This link was enabled only two days , each and every student will get online certificate after completing their online Quiz exam successfully.
