RADIUS OF CURVATURE:

The radius of curvature is the radius of the circle which touches the curve at a point and has the same tangent and curvature at that point.

IN DIFFERENTIAL GEOMETRY:

In differential geometry, the radius of curvature R , is the reciprocal of the curvature. For a curve, it is equal to the radius of the circular arc which best approximates the curve at that point. For surfaces, the radius of curvature is the radius of a circle that best fits a normal section.

Consider a plane curve defined by the equation $y=f(x)$. Suppose that the tangent
