"Hands on Training of Basic Chemistry Software"

**Objectives:**

This course aimed at importing skills on use of various open source chemistry tools that are essential for any student with chemistry as a major subject. At the end of the course the participants will be able to use this software for drawing chemical structures, generation of their names, calculation of physical parameters, three dimensional molecular structure calculators, chemical reaction pathway prediction, molecular function group and other parameters effectively.

**Mode of the course:** Blend of online and offline

**Course Duration:** 30 Hours

**Eligibility:** B.Sc. Students

**No of seats:** 70

  
Incharge  
Department of Chemistry

**Course Module:**

**1. Module 1:**

**ACD Chem. sketch software:** Introduction, down load and installation process, drawing various chemical structures, name generation and structures, conversion of name of molecule into its structure, Calculation of physical properties such as density, molecular weight, molecular formula, and refractive index from structural formula, bond angles, bond lengths and dihedral angle.

**2. Module .2**

**Cambridge chem. Draw ultra software:** Introduction, down load and installation process, drawing various chemical structures, nomenclature generation and structures, conversion of name of molecule into its structure, Calculation of physical properties such as density, molecular weight, molecular formula, refractive index from structural formula,  $H^1$ ,  $C^{13}$ , NMR prediction from molecular structure, drawing structure of bigger molecules such as proteins, carbohydrates and biomolecules, comparison of ACD,chem- Sketch and came bridge ultra software.
