## **ONE DAY SEMINAR ON GENETIC DISORDERS**

**22.09.2016**

The Department of Zoology organized a Seminar on “*Genetic Disorders*” on 22.09.2016 in the Seminar Hall. The Chief Guest and Key note speaker Dr. Esthari, Assistant Professor of Zoology from Kakatiya University, explained the reasons for genetic disorders. He also explained that Mutations (also known as pathogenic variants) or improper genetic material can cause genetic disorders. The diseases “*Down syndrome, Sickle Cell anemia and Thalassemia and Cystic fibrosis*” etc are some of the examples which arise due to genetic disorders.

The in charge of the department Dr. Ch. Chandra Mallaiah explained that the chances of genetic disorders are high in *endogamy* or marrying close relatives. He also explained that genetic counseling and testing is needed to detect the genetic disorders. The Principal Dr. V. Vijayalakshmi, Dr. Mallaiah, faculty members and students participated in the seminar and gained knowledge.

Dr. V. Vijayalakshmi, Principal addressing the students in the inaugural session of the Seminar on *Genetic disorders* on 22.09.2016

## **WORKSHOP ON REAL LIFE APPLICATIONS OF DIFFERENTIAL EQUATIONS**

**22.08.2016**

The Workshop on *Real life applications of Differential Equations* was conducted by Department of Mathematics, Kakatiya Government College, Hanamkonda on 22-8-2016. K. Satyanarayana, the in charge Principal, welcomed the Resource person Sri B. Prabhakar, Assistant Professor of mathematics, Govt. Degree College, Peddapalli. In this workshop 35 students and 3 faculty members participated.

Resource Person: B.Prabhakar, GDC Peddapalli, Assistant Professor of Mathematics explaining the topic: *Real Life Application of Differential equations* on 22.08.2016

The following topics were discussed in the workshop

### ***Applications of Differential Equations in Real Life***

The differential equations consist of dependent and independent variables and with one or more derivatives of a function. The differential equations are used in the field of Physics, Mathematics, Medicine and Economics etc.

**Economics:** The Malthusian Law of Population Growth is one of the examples of a differential equation. The equation  $dp/dt = rp$  illustrates the evolution of the population ( $p$ ) with respect to time. By using differential equations, the topics of

Malthusian law of population and Population explosion can easily be illustrated to the students. The growth rates demand analysis, monopoly power etc are analysed with the help of differential equations.

**Physics:** Physicists frequently use differential equations to find quick solutions to issues that arise during the analysis of electronic circuits. The differential equations are extensively used in the branches of Electronics, Mechanics and Modern and Nuclear Physics.

**In Medicine:** Graphical representation of the development of bacteria, virus and diseases etc

**Outcome:** After attending the workshop the students were equipped with the various tools to solve various types' differential equations that arise in several branches of science.
