STUDENT STUDY PROJECT ON
PERCEPTIONS OF TRADERS AND CONSUMERS
ON GST IMPLEMENTATION – AN ANALYSIS

Under The Supervision of

DR.D.THIRUVENGALA CHARY
Asst. Professor of Commerce

INTRODUCTION

GST (Goods and Services Tax): Goods & Services Tax is a comprehensive, multistage, destination-based tax that will be levied on every value addition.

More than 150 countries implemented GST so far.

GST will bring uniform taxation across the country

.

The Government of India introduced GST with effect from 1st July 2017.

GST is a blanket of Indirect Taxes that will subsume several indirect state and Central taxes such as Value Added Tax (VAT), Excise Duty, Custom Duty and different State Taxes, Central Surcharges, Entertainment Tax, Luxury Tax, Entry Tax and many more.

Tax Structure In India

- **Direct Tax** – These are the taxes which are paid directly by the person on whom it imposed. For example- Income Tax, Property Tax, Wealth Tax, Gift Tax etc.
- **Indirect Tax** – These are the taxes whose Burden can be transferred to others. For example- Sales Tax, Excise Duty, Service Tax etc.

Types of GST

SGST: STATE GOODS AND SERVICE TAX is the part of tax diverted to the state government which is credited to revenue department of state government. This is generally equivalent to CGST. This compensates the loss of existing VAT or Sales Tax revenue to state government. In the case of local sales, 50% quantum of tax amount under GST is diverted to SGST TAX.

CGST: CENTRAL GOODS AND SERVICE TAX is the share of GST TAX diverted to revenue department of central government and is also equivalent to SGST. This share of tax compensates the loss of existing excise duty and service tax to the central government. In the case of local sales, balance 50% quantum of GST is transferred to CGST.

IGST: INTEGRATED GOODS AND SERVICES TAX

is levied when inter-state sales and purchase is made. One part of this tax transferred to central government and another to state government to whom goods and services belong.

The IGST is charged only in case of **inter-state sales or when transactions between two states involved.**

Benefits of GST to the Economy

- Removal of bundled indirect taxes such as VAT, CST, Service tax etc
- Less tax compliance and a simplified tax policy
- Development of Common National Market
- Fewer Rates and Exemptions
- Reduction of manufacturing costs due to lower burden of taxes.

- Lower the burden on the common man
- Increased Demand and Consumption of Goods.
- Increased demand will lead to increase supply. Hence, this will ultimately lead to rise in the production of goods.
- Control of Black Money circulation.
- Boost the Indian economy in the long run.

Benefits of GST to Consumers

Simplified Tax system

Elimination of Cascading Effects i.e, Removes tax on tax.

Uniform Prices throughout the country

Transparency in Taxation system

Need of the study

This study examines the impact of GST after its implementation. It will show the gap between past indirect taxes and GST.

As most of the Consumers and Business entities are so far not aware of the exact structure and process of GST. Similarly, there is a conception that GST has resulted in increased prices of goods and services in general. Hence this is an attempt to evaluate all these factors affecting the implementation of GST

Objectives of the Study

- To Study the impact of GST after its implementation.
- To Know the perceptions of Traders and Consumers on GST implementation.
- To identify benefits and challenges of GST after implementation.
- To know the level of awareness on GST among Traders and Consumers.

Scope of the study

The study of the project will give an insight about the very understanding of the GST bill amongst traders and consumers in the sample area. The study covers very few kinds traders and limited categories of consumers. Similarly Specific impact on slab wise categorization has not been studies and their impact is not covered in this study.

The Scope of the study is limited to tri cities of Warangal only.

Research Methodology

The study covers both Primary and Secondary sources of data.

PRIMARY DATA: A structured questionnaire is used to collect the primary data.

SECONDARY DATA: Secondary data is collected by referring related books, journals and web sites.

PERIOD OF THE STUDY: The study covers a period of One month from 3rd November 2017 to 3rd December 2017.

Sample Size

For the purpose of the study, 60 traders and 150 consumers were selected from tri cities of Warangal. i.e., Hanamkonda , Warangal and Kazipet.

Only limited traders were selected like small hotels and cafeterias, Beauty parlors, Provisional and Kirana shops, Book shops, electronics shops and Automobiles show rooms etc.

Similarly, among the consumers segment house wives, salaried persons and business men were included.

Limitation of the study

- Due to time constraint, the study was restricted to Warangal tri cities only.
- The number of respondents was limited to 60 traders and 150 consumers only.
- Some of the respondents were not open in giving their opinions.
- Since sample size is very limited, the results of the study may not be generalized.

CONCLUSION

- The GST mechanism is advancement over the present tax system, the idea being that a unified GST Law will create a seamless nationwide market.
- It is also expected that Goods and Services Tax will improve the collection of taxes as well as boost the development of Indian economy by removing the indirect tax barriers between states and integrating the country through a uniform tax rate

Suggestions

1. Since the implementation of GST is in initial stages only, the Government and other officials should create more awareness among the consumers and traders on the positive effects of GST.
2. There must be dispute redressal mechanism and the same should be transparent and fair.
3. Trader must be given training and orientation on registration of their business entities under GST act.
