13. Plan of action chalked out by the IQAC in the beginning of the academic year towards Quality Enhancement and outcome achieved by the end of the academic year

Plan of Action	Achivements/Outcomes
Planned to organize Orientation for First year students	Conducted orientation programs for the First years students
Planned to conducted certificate courses on Soft Skills	Conducted certificate courses on Soft Skills
Planned to organize a free health check up Medical Camp	Organized a free medical health chekup camp for all the students and Staff
Planned Training for PG Entrance/ICET/Competitive Exams	Conducted a free training program for U.G final year students for PG Entrance/ICET/Competitive Exams
View	v File
14. Whether AQAR was placed before statutory body ?	No
15. Whether NAAC/or any other accredited body(s) visited IQAC or interacted with it to assess the functioning ?	No
16. Whether institutional data submitted to AISHE:	Yes
Year of Submission	2015
Date of Submission	17-Dec-2015
17. Does the Institution have Management Information System ?	No

Part B

CRITERION I – CURRICULAR ASPECTS

1.1 – Curriculum Planning and Implementation

1.1.1 – Institution has the mechanism for well planned curriculum delivery and documentation. Explain in 500 words

? University will communicate with the institution by sending the action plan for the academic year through "calendar of events" of every year to the affiliated colleges. ? Taking this in to account principal will instruct to prepare college "calendar of events" after discussions with heads of the departments. ? The annual plan consists of commencement date and last working date, dates for conduction of the internal assessments, workshops, seminars, industrial visits, cultural, sports, etc. and others planned events. ? The faculty members of various departments develop academic plans such as

timetables, lesson plans, student database, laboratory manuals and course files, etc. for the academic year. ? Faculties are encouraged to plan in advance to impart the curriculum following OBE (Outcome Based Education) through innovative teaching methods such as presentations, assignments, expert technical lectures, discussions, workshops, seminars, quiz, industrial visits apart from regular lecture sessions and the same is taken for approval from their Head of Department and the Principal. ? Identification of below average students and motivating them towards excellence in their academic performance by taking remedial classes. ? Allocation of the subjects to the faculty is done taking into consideration, the faculty subject specialization, experience and their willingness. ? The progress of syllabus coverage is monitored periodically at various levels. ? Regular mentoring is carried out by the faculties and grievances if any, suitable remedial measures are taken as and when necessary. ? The institution conducts academic audit of attendance registers, internal exams, question papers and evaluation process. ? Periodical feedback is obtained from the students on aspects of teaching-learning process. ? The faculty is encouraged to impart the curriculum through innovative teaching methods such as presentations, assignments, discussions and also by arranging workshops, seminars, and industrial visits apart from regular/traditional teaching methods. ? The academic review meetings are held twice in a semester to review the progress of syllabus coverage and the effectiveness of the instruction delivery. ? The parent-teacher meetings are held to review the progress of syllabus coverage and discussion on performance of the student. Course files are prepared in detail by faculty which includes: ? Vision, mission of the institution ? Vision, mission of the department ? Student list ? Syllabus copy with text books and reference books ? Calendar of events ? Course Time table ? Lesson plan ? Teaching Diary ? Attendance registers ? Individual time table ? Lecture notes ? Question papers of Internal Tests with scheme and solution ? Assignments ? Previous year result analysis Field trips are arranged for the students to make them familiar with the ground realities.

2.5.2 - Reforms initiated on Continuous Internal Evaluation(CIE) system at the institutional level (250 words)

Evaluation is an important aspect in the process of studying a course. It will help the students know their status of learning and reception from the teaching. Evaluation of the students can be done in various ways. It can partially done in the classrooms at the end of the sessions or the following day. Brainstorming and elicitation are the best ways of knowing their level of understanding of the subject. Another commonly adopted practice is the conduct of examinations. They include unit tests, assignments, quarterly, and halfyearly examinations. Year end examinations are also part of the process of evaluation. CIE will help them have a clear picture of their performance levels. Evaluation is also done in the form of seminars, and their performance in the subjectoriented quiz programmes.

2.5.3 – Academic calendar prepared and adhered for conduct of Examination and other related matters (250 words)

Academic calendar is supplied by Kakatiya University to which our college is affiliated. The conduct of annual examinations takes place as per the schedule given by the University. The faculty from the Government colleges are appointed as observers in various exam centres. They monitor the conduct of the examinations as per the instructions given by the authorities. In addition to this, sitting squads and flying squads are also arranged to check any malpractice. The problematic centres are visited by university authorities also. The valuation of the answer scripts takes place under the monitoring system of the Controller of examinations. Each examiner is not allowed to value more than thirty papers a day.

2.6 – Student Performance and Learning Outcomes

2.6.1 – Program outcomes, program specific outcomes and course outcomes for all programs offered by the institution are stated and displayed in website of the institution (to provide the weblink)

6.1.2 - Does the institution have a Management Information System (MIS)?

#### No

# 6.2 – Strategy Development and Deployment

6.2.1 – Quality improvement strategies adopted by the institution for each of the following (with in 100 words each):

Strategy Type	Details
Curriculum Development	? Curriculum is an important aspect with regard to the subjects in each course. Curriculum is prepared and supplied to the college by Kakatiya University, Warangal. It is prepared by the Chairman, BOS of each Department with the involvement of members. The efficient faculty members of some colleges are also involved in the preparation of the curriculum. The same is approved by the Registrar of the University and circulated to all the affiliated colleges of the university.
Teaching and Learning	? Teaching has a pivotal role to play in the process of learning. Learning takes place only when teaching is undertaken in the right mode. With this concept in view we encourage students to participate in Group Discussions through JKC Channel. It is aimed at making the process of learning an interactive one. Student seminars are also organized to involve them in the active learning process.
Examination and Evaluation	? Examination is aimed at testing the performance of the students on what he/she has learnt across the academic year in the classrooms. Though year end examinations are part of the schedule, we conduct slip tests, unit tests, halfyearly examinations, and prefinal examinations as per the schedule set by the university. These examinations will help them prepare for the year end examinations well.
Research and Development	? Research is an advanced study of a subject.It requires an indepth study of the subject. We encourage the students to visit the industries to have a first hand knowledge of the products and their preparation. It is made available through field trips organized by various departments. The faculty are encouraged to go for research through Major and Minor Research projects(MRPs and Ph.D.in their respective subjects.
Library, ICT and Physical	? Library is a temple of learning. A

Infrastructure / Instrumentation	wellequipped library is available to the students during and beyond college hours. The students are motivated to visit library regularly to inculcate the habit of reading in them. The students are exposed to PPTs in laboratories prepared by faculty.They are encouraged to make the best use of the infrastructure facilities available in the college.
Industry Interaction / Collaboration	? We organize field trips to the near by industries with the students. They are asked to have a first hand knowledge of the manufacturing of the products. They are motivated to know the chemical process involved in them.
Admission of Students	<pre>? Admissions are an important aspect of the institution. Every year a prospectus of the college is supplied to the outgoing students of 10 2 students. Various courses and faculty, and academic activities undertaken in the college are printed in the prospectus. It will help them have a detailed knowledge about the college. The admission process takes place through different phases listing out the students as per their merit in each list. Counselling sessions are arranged by each faculty to help the students choose courses according to their</pre>

6.2.2 – Implementation of e-governance in areas of operations:

E-governace area	Details				
Planning and Development	? The college has its own academic curricular plan. Proper measures are taken for implementing this plans online. Efforts are being taken for converting				
Administration	online submission of bills pertaining to salaries of the teaching and nonteaching faculty.				
Finance and Accounts	Various accounts are maintained for different purposes like scholarships and admissions.				
Student Admission and Support	? Admission of UG Courses takes place as per the schedule given by the Kakatiya University to which it is affiliated. Egovernance in admissions is yet to be started				
Examination	? Examination schedule annual examinations is supplied by Kakatiya University. Examination are conducted under the monitoring system prepared by

Title of the practice: Integrated Teaching What is integrated teaching? "An integrated approach allows learners to explore, gather, process, refine and present information about topics they want to investigate without the constraints imposed by traditional subject barriers". An integrated approach allows students to engage in purposeful, relevant learning. Integrated learning encourages students to see the interconnectedness and interrelationships between the curriculum areas. Rather than focusing on learning in isolated curriculum areas, an integrated program is based on skill development around a particular theme that is relevant to the student in the class. Integral to the model of integrated learning is the inquiry approach. Students are active learners who search, interpret, communicate, and process learning to both others and themselves. Inquiry approaches allow for students to construct meaning using their prior knowledge on a subject, and new knowledge gained during the learning process. Integrated learning incorporates multiple subjects, which are usually taught separately, in an interdisciplinary method of teaching. The goal is to help students remain engaged and draw from multiple sets of skills, experiences and sources to aid and accelerate the learning process. Integrated Teaching Includes a. Peer Learning: Many institutions of learning now promote instructional methods Involving active learning that present opportunities for students to formulate their own questions, discuss issues, explain their viewpoints, and engage in cooperative learning by Working in teams on problems and projects. Peer learning is a form of cooperative learning that enhances the value of studentstudent interaction and results in various Advantageous learning outcomes. To realise the benefits of peer learning, teachers must provide 'intellectual scaffolding'. Thus, the teachers raise questions/issues that prompt students towards more sophisticated levels of thinking. In addition, collaborative processes are devised to get al											

students to enables them to settle quality in to the college community. Innovation and Entrepreneurship Development Centre(IEDC) is established in college to develop To provide industry and RD oriented training, and other skill sets to students to make them globally competitive and employable in multinational industries or to pursue the higher studies in engineering. The Context: The employability is one of the biggest challenges for engineering education and institutions for graduating students. The primary reason for this is the lack of skill sets as per the need of industry it may be due to complete disconnecting between industry and academic institutions. The curriculum was also not designed as per the need of industry. So there is an eminent need to provide the skill sets (both technical as well as nontechnical skills) so that

the students can meet the challenge. The Practice: The college has taken corrective measure to meet the need for improving employability of students through setting up a separate Entrepreneurship Development Programme Cell as well initiated various skill oriented programs in the campus, so that students can easily be placed or can opt of higher studies. Some of the efforts made in this direction are briefly described here. Industry Oriented Training Programs: The department has started many industry oriented training programs conducted by competent authorized organizations. These programs are conducted weekends or in vacations and train the students to be suitable for industry requirement. Personality Development Program (PDP): Communication and other soft skills are

required for all round development of students. They play major role in improving the employability of students. College started the PDP classes for the students with regular course by trained PDP trainers for 3rd year students. III. Title of the practice: Mentoring System Objectives of the practice: The Mentoring system assigns a faculty member to every student. The faculty member is called the mentor for the student. The mentor plays the role of a personal mentor for the student in all matters. For the institute, the mentor is the first point of reference for all matters concerning any specific student. The mentor guides the student at every step of their stay at the institute to be successful at whatever the student takes up. The mentor personally ensures that the student is aware of all the resources available to the student during their course of study at the institute. The mentor is available to counsel the

student in any matter of concern apart from the curriculum also. The Context: The Mentoring system is relatively new in general to a student entering the

institute. The students do take some time to familiarize and feel more comfortable with their mentors and most importantly develop confidence in them. The students meet their mentors to consult with them regarding the courses to take and to guide them through the registration process. The students then meet their mentors before every internal assessment to update them on their progress

in every course. The students also see their mentors after the internal assessments to discuss about their performance and about the scope for improvement next time and the steps to be taken to achieve the same. The students might also choose to meet their mentors more regularly for advice regarding matters which may be extra or cocurricular or otherwise. In addition, the mentor might also choose to see any student with more regularity when their academic performance concerns the mentor. The Practice: A mentor is a personal mentor and counsellor for a student during the duration of stay at the

institute. A mentor represents a parent away from home for a student and is the first point of reference for the activities of a student during the complete course of study at the institute. As soon as a student enters the A mentor is a personal mentor and counsellor for a student during the duration of stay at the institute. A mentor represents a parent away from home for a student and is the

first point of reference for the institute, a faculty member is assigned to take over the role of a mentor for the student. The mentor not only guides the student in academic matters but also any matter of concern for the student. The student seeks the advice of the mentor at every step of their course of study beginning from the registration for courses at the start of every semester. The

students meet their mentors regularly. However, depending on the need, mentor conducts more meetings with their students and their parents. The mentor educates the student about the various course requirements, such as the mandated minimum and maximum course load every semester, and how to choose electives. The mentor helps the student channel their interests and energies effectively during the complete course of study at the institute. Evidence of success: The most important evidence of success for the mentoring system is from the testimonials of the Endusers. The students and their parents have been very happy with the mentoring system. Generally, for the complete duration of the course of study of a student any one faculty member has been effective in monitoring the role of a mentor. The behaviour of the students on the campus in general has witnessed a tremendous improvement and the students are much happier and contended with their course of study at the institute after the implementation of the mentoring system. The pass percentage and the average academic performance of the students have also achieved greater heights with the mentoring system. Some students have presented themselves as quite a challenge for their mentors, but they figure out their priorities and start performing better after counselling sessions with their mentors. Problems encountered and resources required: Despite our best efforts in the effective implementation of the mentoring system, there are still a small percentage of students who discontinue their course of study at the institute. Measures are being taken to address this problem.

#### 7.3 – Institutional Distinctiveness

7.3.1 – Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust in not more than 500 words

The Vision of the Institute lays focus on essential aspects like Valuebased Education, Researchorientation, and Sustainable Development. The Institute has established its distinctive approach towards this comprehensive Vision. Participation of students in CoCurricular Activities (CCA) and Extra Curricular Activities (ECA) like workshops, Technical talks, Hands on training Programs, Industrial Visits, field trips, social welfare programmes help them enhance all rounded personality to strongly face the turbulent road of the future. Experiences and appreciations gained through these activities assist students during internships. Career guidance, Personal counselling, Training are well structured through a Mentoring Training and Placement. The Institute's determination to be transformed into a centre for major research is therefore a commitment to offer high quality teaching.

# 8. Future Plans of Actions for Next Academic Year

We want to convert the college into an ideal educational hub by providing all the necessary infrastructure facilities required for enriching the knowledge of the students. JKC (Jawahar Knowledge Centre) will be training the students for pre placement and placement and also coming up with other activities for pre and final year students. Job drives are planned for next academic year.
