Sanitizer preparation. DT: 04/01/22

Covid-19 pandemic has hit the various sectors of the society in a vast way. So many people have lost their lives due to the pandemic. Precautionary measures and awareness programmes could have saved few more lives.

Hand sanitizers are being used extensively as a precautionary measure for Covid-19. Since most hand sanitizers available in the market are not of good quality, so we have thought of showing sanitizer preparation to the students according to WHO guidelines.

Key ingredients for sanitizer preparation.

- 1) Isopropyl alcohol 70%
- 2) H_2O_2 5%
- 3) Glycerine 5%
- 4) water 20%
