			CO7: The goal is to develop student's analytical and consulting skills in the area of Banking. The course is targeted to those students whose major is in Banking administration, business –bank relations, or management in the service industry
21	506	DSC 4E AUDITING	CO1: This course enables the students to be well versed in the fundamental concepts of Vouching, Verification, Rights, duties and liabilities of Auditors. CO2: the students understand the definition, evolution objectives and importance of Audit and Audit procedure. CO3: students discuss about procedure of appointment, qualifications, disqualifications, qualities, remuneration, rights, duties and criminal liabilities of Auditors. CO4: the students will get knowledge about objectives and types of vouchers and procedure of vouching of transactions. CO5: students understand of verification and valuation of assets. CO6: This course gives the knowledge of examining the principles and practices of internal and external auditing.
22	507	DSE 1A COMPUTERISE D ACCOUNTING	CO1: This paper makes the students to acquire the knowledge of computer software in maintaining the accounting books. CO2: the students understand as how to maintain the accounts in ERP package with respect to Tally package. CO3: students get an idea as how maintain inventory masters for stocks along with godowns in Tally package. CO4: students understand the procedure for recording the day-to-day transactions in ERP – Tally package. CO5: students acquire knowledge to prepare accounts receivable and payable in Tally ERP package. CO6: students learn the procedure for generating the MIS reports in Tally ERP package.

23	508	DSE 2A ACCOUNTING STANDARDS	CO1: this paper makes the students acquire the knowledge of provisions and application of Indian accounting Standards. CO2: students get an idea about objectives, benefits, limitations and process of formulation of accounting standards in India. CO3: students understand the disclosure of accounting policies, valuation of inventories, cash flow statement, contingencies and events occurring after balance sheet date. CO4: student will understand the various standards like AS 10, AS11, AS12, AS 13 and AS 14. CO5: students will acquire knowledge about the introduction of Ind AS and its significance.
24	601	SEC-4 REGULATION OF INSURANCE BUSINESS	CO1: to equip the student with the knowledge regarding insurance business regulations. CO2: to acquaint the students with knowledge of life and Non – life insurance legislations, KYC, IRDA, ULIPS, health insurance regulations. CO3: students will acquire knowledge related to assignment, nominations and transfer provisions. CO4: students learn the procedure of grievance redressal, claim settlement and present trends in insurance regulations at international level.
25	602	GE-2 SECTORS OF INDIAN ECONOMY	CO1: to equip the students with knowledge regarding basics of Indian economy CO2: students get practical awareness about green revolution, Food security, Legislation schemes, Public Distribution system and Agricultural marketing. CO3: students gain knowledge in Rural credit schemes and working of RRBS, NABARD. CO4: students learn Role and pattern of industrialisation, Trade Union Movement, Balance of payments, SEZs, role of Public finance in industrial finance.

		I =	
26	603	DSC THEORY AND PRACTICE OF GST	CO1: to equip the students with knowledge of theory and practice of GST CO2: students learn the basic concepts registration for GST, supply of goods, tax invoice, input tax, CENVAT, input VAT, GST returns and payment of tax. CO3: students are enabled to understand interstate, intra state transfer of goods and maintaining GST returns. CO4: students understand practical knowledge of recording advanced entries, adjustment entries and return filing of GST. CO5: students are enabled to understand interstate, intra state supply of services and maintaining GST returns. CO6: students get insight into recording advanced entries in GST and migration to ERP
27	603	DSC 1F MANAGERIAL ACCOUNTING	CO1: This paper makes the students to acquire knowledge in managerial accounting decision making techniques and reporting. CO2: students get an understanding about managerial accounting features, objective, scope, functions and advantages and disadvantages. CO3: the students get knowledge about the marginal costing and absorption costing and application marginal costing with CVP analysis. CO4: the students understand the decision-making techniques for products like sell or process, operate or shut-down and special-order pricing. CO5: the students learn the cost budget preparation and essentials of budgetary control systems in detail. CO6: the students understand the standard costing, historical costing and variance analysis.
28	BC 604	DSC 2F COMPANY LAW	CO1: Students understand legal provisions applicable for establishment, management and winding up of companies in India as companies act 2013. CO2: students understand the legal procedure of incorporation, promotion and registration of a joint stock company.

		T	000 4 1 4 1 1 1 1 1 1 1 1
			CO3: student learns about qualification, position, appointment, removal, duties
			and liabilities of a director.
			CO4: students get practical insight about
			the appointment, duties and liabilities of
			company secretary.
			CO5: students learn the concepts and
			procedure for holding the company
			meetings like share holders' meetings,
			statutory meeting, annual general body
			meeting, extraordinary general body
			meeting and Board meetings.
			CO6: students learn the concepts and
			procedure of winding up of a company.
29	605	DSC 3F	CO1: Students get familiarise with various
		FINANCIAL	financial institutions and markets.
		INSTITUTIONS	CO2: students understand about the
		AND MARKETS	components, functions of Indian financial
			system and its weaknesses.
			CO2: students get awareness about various financial institutions like
			commercial banks, Merchant bankers,
			venture capital institutions, hire purchase
			institutions, leasing and non-banking
			finance companies.
			CO3: students gain knowledge about the
			functioning of Indian money market and
			role of RBI in money market.
			CO4: students get insight into the
			Evolution, instruments, and players in
			Debt market. Further, get understanding
			of Bonds, types of bonds and Bond rating
			concept.
			CO5: students understanding about the
			development of Equity culture in India
			Further they understand of Secondary
			Market Stock exchanges in India and
			recent developments in Stock markets.
			Also, they get awareness about SEBI
20	606	DSC 4F	objectives and functions. CO1: Students become familiar with

CO6: the students will learn new emerging issues such as TQM, technology management, talent and knowledge management, organisational change and corporate social responsibility.
2	102	DSC BASICS OF MARKETING	co1: this course provides a broad overview of the theories and concepts and principles marketing co2: this course enables student to understand evolution, meaning, scope, and importance of marketing and an understanding of Marketing environment at micro and macro level. co3: student get practical insight about target market, product positioning and market segmentation. co4: the students get in-depth understanding of concept of new product, its need and limitations and stages in the new product development.

		T	<u> </u>
			CO5: students understand the concept of product, product life cycle, marketing strategies of product, pricing methods and strategies. CO6: the students learn the concepts of promotion mix, promotional tools and marketing channels.
3	103	DSC BUSINESS ECONOMICS	co1: this course enables students to apply micro economic concepts and tools for business problems and making accurate decision pertaining to business firms. co2: the students can understand the concepts related to nature definition, scope and characteristics of business economics. co3: students get knowledge about law of demand and exceptions to the law along with elasticity of demand and law of supply. co4: students learn various production and cost concepts like theory of production, production function and input and output combinations in short run. co5: students get understanding of cost concepts, cost classification and cost curves in long and short run. co6: students get acquaintance with various market structures and price determination in different markets.
4	201	DSC ORGANISATIONAL BEHAVIOUR	CO1: This course objective is to explain the students about the fundamentals of managing business and to understand individual and group behaviour at work place so as to improve the effectiveness of an organisation. CO2: this course enables the students to understand meaning, evolution and factors influencing the organisational behaviour. CO3: the students are provided with insight into meaning, importance and theories of motivation and leadership styles.

			CO4: the students learn the concept group dynamics, types of groups, group cohesiveness, and types of teams, transactional analysis and Johari window. CO5: students will learn about meaning, importance, factors contributing to organisational change and concept of organisational development. CO6: students get concept of organisational culture, organisational effectiveness and types of conflicts
5	202	DSC BUSINESS STATISTICS	co1: This paper inculcates analytical and computational ability among students. co2: students will understand the concepts of statistics and its nature, scope, limitations. Further, students will gain insight into the various steps and procedure in planning of statistical investigation and methods of data collection. They also learn the skills to present statistical data in diagrammatic and graphic form. co-3: students learn measures of central tendency namely mean median, mode, harmonic mean and geometric mean with their practical uses and limitations. Further, they will understand the concept of Dispersionmeasures of Dispersion, Skewnessmeasures of skewness. co-4: the students will learn the concepts of index numbers and methods constructing index numbers. cos: the students will learn the concepts of probability and approaches, theorems of probability, sampling and methods of sampling. co-6: students get acquainted with the concept, types and methods of calculating co-relation. Further, they learn the concepts of regression, lines of regression and practical usage of regression lines and components of Time series with uses and limitations of time series.

6		DSC FINANCIAL ACCOUNTING	CO1: this course intends to familiarise the students with preparation of financial statements their analysis and
			interpretation.
			CO2: Students are enabled to prepare
			financial statements in accordance with
			appropriated standards and interpret the business implications of financial
			statements
			CO3: students will acquire knowledge in accounting principles, conventions GAAP
			and accounting standards.
			CO4: students will be acquainted with
			procedure to prepare the various
			subsidiary books of accounting and trail
			balance.
			CO5: students get knowledge about the
			procedure of preparation financial
			statement of joint stock company as per
			company's act 2013.
			CO 6: students learn the methods of
			financial statement analysis using
			techniques like Horizontal, Vertical
			analysis and ratio analysis.
			CO 8: students get an understanding of
			concept, procedure for issuing Ind AS
			and framework of IFRS
7	SEC- 1	SEC -1	CO1: this course is to provide a proper
		PERSONALITY	perspective towards one's personality
		DEVELOPMENT	development.
			CO2: students get the concept of
			personality and theories of personality,
			motivation and types of attitudes.
			CO3: student enabled to explain the
			concept of communication, disasters of non-communication, communication gap
			and forms of communication.
8	SEC-2	SEC-2	CO1: to acquaint the students with
J		BUSINESS POLICY	understanding the business environment
		AND STRATEGY	and design strategies to meet challenge.
			CO2: students get understanding of
			strategy, strategic management process,
			crafting business policy and corporate
			planning
			CO3: students are equipped with
			abilities to analyse the company's
			internal and external environmental

			factors and to formulate business
			strategy under different conditions.
			CO4: students get acquaintance with
			alternative strategy development and
			strategy implementation and corporate
			ethics.
9	301	DSC	CO1: the aim of this course is to
		HUMAN	introduce to student the basic concept
		RESOURCE	related human resource management
		MANAGEMENT	which can form foundation to
			understanding advanced concepts in
			managing human resources in an
			organisation
			CO2: students learn concept of Human
			Resource management and personnel
			management and role of globalisation in
			HR policy and practice.
			CO3: students understand the concept
			of HR planning, job analysis, job
			description, job specification, job
			evaluation, job rotation, and recruitment
			and selection process.
			CO4: students get knowledge in
			providing training and development to
			employees. Further, they assess the
			training needs and design training
			programmes, significance of career
			planning.
			CO5: students learn about labour
			management concepts like industrial
			relations industrial disputes, collective
			bargaining and employee safety and
			health measures.
			CO6: students learn about performance
			appraisal methods, organisational
			climate, culture, quality of work life and
10	200	DOC	its determinants.
10	302	DSC	CO1: students get practical knowledge
		INFORMATION	about IT concepts – input output
		TECHNOLOGY	devices, software and hardware,
		FOR BUSINESS	networks-LAN, WAN.
			CO2: Students get acquaintance with the
			concept of Data, IS, MIS, DSS, EIS,
			DBMS and ethical and social issues IS.
			CO3: students learn about the
			multimedia concepts and application of
			multimedia in business.
			CO4 : students get practical knowledge
			about internet and security issues.

			CO5: students lean office management concepts like intranet, extranet, VPN, Wi-fi, RFID, spread sheet applications.
11	303	DSC FINANCIAL MANAGEMENT	CO1: students get acquaintance with the techniques of financial management and their applications for business decision making. CO2: students get in-depth knowledge about the nature, scope, objectives and approaches of financial management. CO3: the students learn the concept of time value of money consisting of discounting, compounding, present and future value of money. Further, they learn about capital budgeting technique and its application. CO4: student get insight of various sources of long term and short-term finances. Further, they learn capital structure, its determinants, cost of capital concept. CO5: students learn about working capital concept, its determinants and preparation of cash budgets. CO6: students learn the receivables management, inventory management and stock levels.
12	SEC-3	PERSONALITY DEVELOPMENT-II	CO1: students enabled with understanding the importance of goal setting, time management and trusty worthiness. CO2: student will learn concept of goal setting, types of goal setting, activity in goal setting and techniques of time management. CO3: student leans concepts related to trust, trusting, trust worthy and building interpersonal relations.
13	SEC-4	STARTUP MANAGEMENT	CO1: students to acquaint themselves with the special challenges of starting new venture and introducing the new product and service ideas CO2: students understand about concept of entrepreneurship including role, functions and qualities of entrepreneurs.

14	401	DSC BUSINESS LAW AND ETHICS	CO3: students get knowledge in EDPs Phases of EDPs, evaluation of EDPs and role of financial institution and small enterprises in economic development. CO1: students understand about importance of contracts, companies act and ethics. CO2: students lean the legal concepts like contracts, agreement, types of contracts, essential elements of valid contracts and performance of contract. CO3: students learn various laws relating to special contracts such as heilment and pladge, contract of Agency
			bailment and pledge, contract of Agency, indemnity Guarantee and sale of goods act CO4: students learn the company legal provisions relating to formation, classification, documents required for incorporation and types of meeting to be conducted. CO5: the students get acquaintance with consumer protection law in India and Pollution control law.
			co6: students get awareness about ethical and value-based considerations, social responsibility of business, integrity and ethical considerations in business operations.
15	402	DSC MARKET RESEARCH	CO1: this course provides exposure to the students pertaining to nature and scope of marketing research and helps them in understanding basic techniques and tools of marketing research. CO2: students learn about nature, scope, role and steps in marketing research process and designing the research proposal. CO3: students learn various methods of data collection along with steps in designing a questionnaire. CO4: students gain knowledge in various data collection methods their respective advantages and disadvantages CO5: students learn the concept of measurement and scaling and its reliability and validity.

16	402	DSC	CO6: students learn the practical knowledge about sampling techniques like Z-test, t-test, paired t-test, chisquare test and ANOVA.
16	403	DSC MANAGEMENT SCIENCE	co1: this course enables the student with adequate knowledge regarding manufacturing facilities and how service activities have attained significance and need managerial skills to address the problems. co2: students learn about meaning, definition and functions of production planning and control. co3: students get awareness regarding plant management and work study techniques. co4: students lean the methods of stores management like ABC, VED, FNSD, and XYZ. co5: students lean the concept of operation research – nature and its application in decision making. co6: students get acquaintance with transportation, assignment and queuing
17	GE-1	GE-1 MOBILE COMMERCE	co1: Students get acquaintance with mobile commerce concepts, environment and customer value. co2: students learn definition, scope, benefits and limitations of M-commerce, framework and models of M-commerce co3: students learn the concept of mobile commerce technology devices and respective device limitations. co4: students get acquaintance with wireless communications technology with reference to WWAN, Cellular systems 2G, 2.5G, 3G, 4G, 5G and WLAN, and WMAN technology. co5: students learn M-COMMERCE applications in various areas like advertising, payment, ticketing, product location, entertainment and shopping.
18	501	DSE FINANCIAL MARKETS AND SERVICES	CO1: This course explains the structure of Indian financial system with reference to leasing. Hire purchase and mutual funds.

	-	<u> </u>	
19	502	DSE ANALYSIS OF INVESTMENT IN FINANCIAL ASSETS	CO2: students get understanding of structure, functions of financial system, financial markets and regulatory institutions. CO3: students get acquaintance with primary and secondary market operations, issue management, stock exchanges organisation and its working. CO4: students understand concept and classification, advantages and limitations of leasing, hire purchase mechanism and venture capital financing. CO5: students get knowledge about nonfund based financial services like credit rating, factoring, forfeiting and merchant banking. CO6: students learn concept, classification, advantages, limitations and mechanics of mutual fund operations. CO1: This course is to provide the students with a basic view of valuation and investment in financial assets. CO2: students learn the concept of investment, financial assets, speculation, hedging arbitraging, book value, market value and intrinsic value of financial assets. Further learns concept of risk, returns from securities and security analysis. CO3: students learn the valuation of fixed income securities like bonds using bond yield measures. CO4: students learn about features and approaches for valuing the common stock. CO5: students learn portfolio theories, risk, returns models. CO6: students gain insight into the evaluation of portfolio for measuring risk
20	503	DSE	and reward. CO1: Student understands the concept
		INSURACE SERVICES	of definition, nature, role, importance and functions of insurance. CO2: students learn concepts and life insurance and its products

	1		
			CO3: students get acquaintance with general insurance and its various types policies. CO4: students learn how to apply and process for life insurance policy. Further, they learn about assignment, nomination and surrender of policies. CO5: students learn about various types of policy claims and IRDA regulation for claim payments.
21	GE-2	GE-2 BUSINESS ANALYTICS	CO1: students learn about definition, types of business analytics and its application. CO2: students understand the types of data, sources of data and measures of central tendency. CO3: students learn about measures of variability and co-relation analysis. CO4: students learn about trend analysis, regression analysis, data mining, methods and applications of data mining. CO5: this course provides understanding of practical approach using MS-excel and simple programming concept.
22	601	DSE BANKING	CO1: Students learn concept of bank, types of banks, evolution, functions and role of banks in economic development. CO2: students learn about RBI- objectives, functions, and various types of banks in economy. CO3: students understand the various types of negotiable instruments. CO4: students get acquaintance with banker and customer relationship in general and particular circumstances. CO5: students understand the regulatory mechanism and innovations in banking system with advancement of technology.
23	602	DSE RISK ANALYSIS AND MANAGEMENT	CO1: this course enables the students to understand the risk associated with financial institutions and help to manage risk effectively. CO2: students learn the concept of risk, uncertainty, types of risk, risk management tools and techniques.

			000, 242, 4224, 222-1,1,-1,4,-
			CO3: students enabled to measure and
			manage financial risk using various
			methods of risk management.
			CO4: students learn concept of
			derivatives, types and players in
			Derivative market related to Forwards
			and Futures contracts.
			CO5: students learn concept of SWAP
			and process of managing risk using risk.
			Further they learn about options, types
			of options, uses and limitations of
			options.
			CO6: Students learn about financial
			engineering and tools required for new
			product development.
24	603	DSE	CO1: this course provides inputs relating
_ ·		INTERNATIONAL	to globalisation and exchange risk
		FINANCE	management
		TIMINOL	CO2: students understand the concept
			_
			of globalisation, MNCs, nature and scope of international finance.
			CO3: students get insight about the risk,
			foreign exchange risk management and
			measurement.
			CO4: students learn about BOP
			components and get insight into the
			theories of exchange rate applicable in
			derivatives market.
			CO5: students learn how to mobilise
			finance internationally with help of EXIM
			bank and IMF.
			CO6: students get knowledge about
			GATT, WTO, and BASEL norms and role
			of international financial institutions in
			funding and global regulations.
25	604	DSE	CO1: this course enables the students to
45	004		
		PROJECT	opt a particular area research and
		REPORT AND	undergo project and submit the project
		VIVA- VOCE	report.
			CO2: this project provides the students
			with practical knowledge about the topic
			under the study and gets exposure to
			real business environment.
			CO3: project is evaluated and grading
			will be awarded based on the quality of
			project report.
