Gulla Gurigi / Financial Assistance 30/08/2016

on 30th August 2016 our Head of the institution creating awareness about Gulla Gurigi objectives and importance of this practice are given below.

1. Title of Learning: Gulla Gurigi [Financial Assistance to Eligible students by college.]
2. Objectives of learning:

Profile of students enrolled in various courses at SUM Government Degree College has been obtained that most of the students are coming from tribal areas with low financial background. Their parents are unable to provide them with sustainable financial assistance as migrant agriculture is not a definite source of income. So, great goals of learning.

- Providing financial assistance to poor students, especially tribals, to save them from dropping out of college due to poverty.
- Provide financial support to all deserving poor students, regardless of caste, creed or gender.
 - promoting 'equality' among students.
 - To inculcate the values of 'generosity & sense of social responsibility' in students.

Content:

Noble Goal faced challenging issues with its teeth in its design and implementation.

- Providing the necessary resources is a very difficult task. After several awareness meetings with relevant people,
- Individuals set up a Gulla Gurigi on the college campus for voluntary donations.
- After comprehensive discussions with students and teachers, it was decided to extend this benefit to all poor students regardless of caste, creed or gender.
- Confirming the financial backwardness of optimists is

SUM. G.D.C. KONDANAGULA.

8

is another challenge.

④ Practice:

In and around the college, there is a long history of colonial agriculture, which devastated tribal life and plunged people into abject poverty, illiteracy & ill health.

→ In such abject poverty, the limited resources available are mainly used to meet both needs. Therefore, it is almost impossible for poor parents in tribal areas to send their children to town for higher education. Sometimes, even if they venture to enroll their children in colleges in the town, they will not be able to provide sustainable financial assistance in the amount of education as agriculture is not a source of definite income. Therefore, it is clear that without financial assistance from outside sources, rural youth cannot expect to successfully complete their higher education.

Innovation and Best Practices SUM GDC

This unique organization, true to the legacy of a poor student positive outlook from its inception, has taken a firm resolve to provide deserving students with all possible financial assistance & help them realize their dreams of pursuing higher education.

Financial assistance is provided to all deserving poor students irrespective of caste, creed or gender. Students who have parents who do not have a stable reasonable source of income & do not receive any other financial assistance in the form of social welfare or endowment scholarships are eligible for assistance.

Aside from the monetary aspect, endowment scholarships are a testament to academic success & therefore fostering a competitive spirit for students to receive endowment scholarships, another source of assistance to our faculty members.

Best Practices II

3

① Title of the Practice: Podu-Vedus (Against Shift cultivation) in Nallamala Agency Area, Telangana.

② Objectives of the Practices:

Shifting cultivation continues to be a predominant agricultural practice in Nallamala forest in Telangana by Chenchu tribe, despite state discouragement and multipronged efforts to wean indigenous communities away from it. Their land due to remoteness, poor access to markets and undulating terrain, leaves them with few alternatives. Being this college has present in Nallamala forest, resolved to take up it as the best practice to the cause to stop podu cultivation Nallamala chenchu tribes. This practice is carried out with the objectives

* Mentoring Chenchu tribe on their specific issues with one Chenchu student as mentor for every 20 Chenchu people.

* Creating an environment through awareness programmes to enable the Chenchu to realize their full potential for realizing and solving their problems independently.

* Arranging special sessions with the political leaders and social activists to enable the Chenchu farmers to be aware of several types of 'evil designs' by non-tribals exploitation taking the advantage of their innocence and gullibility.

* Dealing amicably with the Chenchu victims of exploitation all sorts maintaining utmost confidentiality of the private life to protect their land.

* Involving social activists and Government officials to enlighten the Chenchu on human rights and fundamental freedom for equal rights and opportunities.

- Organizing debates and discussions on shift cultivation to enable the chenche to realize tribal sensitization, thus leading to more equality and harmony in the Society.
- Conducting seminars and special sessions on land fertility, etc and protection of tigers to expose the ill effects of the evils.
- Development of new agricultural and technical skills among the chenche tribes by providing special training to enable them to become independent earners of their living.
- Extending financial assistance to the deserving chenche if disadvantaged sections to help acquire their lands.
- Organizing the exclusive health camps for chenche by expert doctors for free treatment of health problems and conducting awareness programmes on the importance of sanitation, Personal hygiene and prevention of seasonal diseases.
- Tackling the social, development, health consequences from a tribal perspective.

3. The Context:

- The chenche families in the beginning were not enthusiastic to participate in the deliberations.
- Some Farmers and Family members opined that the awareness sensitization programmes defeated the purpose of scarify their lands for Tiger Conservation Project.
- The coordinator and the members of the unit had to visit certain families and persuade the parents that all the programmes

were meant for the betterment and empowerment of their agriculture.

• As the stopping Migrate/Shift cultivation (SC) programmes designed revealed several disparities and inequalities that we might not have noticed earlier, people especially that other caste, argued discussing government and officials role would damage traditional practices.

• Similarly, the various legal protective provisions for Chenchu tribes were misunderstood as undue favours meant to be little their traditions.

• Even some activities supporting the argument often opined that the change was difficult to be accepted as the ideas emanated from these seminars/workshops/debates on agriculture inequalities appeared new and startling.

• Some Chenchu even found fault with the government that their acts were detained in the SC beyond living places for unconnected and counter productive programmes.

• Under these circumstances, the college has thought it appropriate to forge ahead with the objective implementation which an exclusive practice is created.
