COURSE OUTCOMES

(COs)

Department of Commerce

B. Com (General &CA)

S.No.	Paper Title & Paper Code	CO	Course Outcomes
1	FINANCIAL ACCOUNTING – I DSC101	CO1	The student gains the knowledge about principles of accounting, accounting standards, and basic knowledge on journal, ledger and trial balance.
		CO2	Student acquires knowledge on types of cash book and subsidiary books.
		CO3	Student will be able to know the reasons for differences between cash book and pass book.
		CO4	Students learn how to rectify the errors and types of depreciation.
		CO5	Student gains the knowledge in preparing the final accounts of a sole trader.
2	BUSINESS ORGANIZATION AND MANAGEMENT DSC102	CO1	Acquires basic knowledge on business and forms of business.
		CO2	Student gains the knowledge on preparation of important documents of joint stock company.
		CO3	Student learns about functions and principles of management.
		CO4	Learns about planning and organizing.
		CO5	Knows the meaning of authority and responsibility, techniques of effective coordination.
3	FINANCIAL ACCOUNTING-II DSC201	CO1	Student gains the knowledge on negotiable instruments.
		CO2	Learns the accounting treatment of consignment.
		CO3	Gains knowledge on methods of keeping records for joint venture accounts.
		C04	Determines the ascertainment of profit in Single entry system.
		C05	Learns the accounting treatment of non-profit organizations.
4	BUSINESS LAWS DSC202	CO1	Understands the basic contract act, essentials of a valid contract, types of contracts.
		CO2	Gains knowledge on consumer protection act and sale of goods act.
		CO3	Learns about the types of intellectual property rights.
		CO4	Gains knowledge on duties and responsibilities of company director, meetings, minutes etc.

		C05	Learns about the modes of winding up of a company.
5	ADVANCED ACCOUNTING BC304	CO1	Learns the accounting treatment of partnership.
		CO2	Student gains knowledge on dissolution and insolvency of a partner.
		CO3	Student knows about the types of shares, issue of share capital etc.
		CO4	Student learns about the different types of companies acts.
		CO5	Student acquires knowledge about goodwill and valuation of goodwill.
6	BUSINESS STATISTICS-I BC305	CO1	Acquires knowledge about origin and development of statistics, statistical investigation, primary and secondary data, tabulation of data.
		CO2	Students will be able to do diagrammatic and graphical presentations of frequency distributions.
		CO3	Gains knowledge to solve 5 types of averages.
		CO4	Acquires knowledge on dispersion and skewness.
		CO5	Gains knowledge on karl pearson's correlation and rank correlation.
7	INCOME TAX-I BC306	CO1	Gains knowledge on cannons of taxation, basic concepts of income tax.
		CO2	Will be able to compute agricultural and non-agricultural income.
		CO3	Gains knowledge on computation of income from salary.
		CO4	Gains knowledge on computation of income from house property, deductions under section 24.
		CO5	Will be able to compute the income from business and profession.
8	ENTREPRENEURIAL DEVELOPMENT & BUSINESS ETHICS BC307	CO1	Learns about entrepreneur, women entrepreneur in India, challenges & opportunities of entrepreneurship.
		CO2	Learns the ways of entrepreneurial development, selection of right opportunity.
		CO3	Learns about budget and planning financial analysis, project financing and MSMEs.
		CO4	Learns about policies and programmes of entrepreneurial development.
		CO5	Learns about business ethics and moral values.
9	CORPORATE ACCOUNTING BC404	CO1	The student will be able to compute the liquidator's final statement of account.
		CO2	Gains basic knowledge and accounting

			treatment on amalgamation.
		CO3	Gains knowledge in preparation of final statement after reconstruction.
		CO4	Learns about the accounts of banking companies.
		CO5	Gains knowledge on accounts of insurance companies and insurance claims.
10	BUSINESS STATISTICS-II BC405	CO1	The student will be able to compute regression lines.
		CO2	Learns about different types of index numbers and tests of consistency.
		CO3	Learns about the components of time series, their uses and limitations.
		CO4	The students will be able to compute probability and theorems of probability.
		CO5	The students gain knowledge on theoretical distributions.
11	INCOME TAX-II BC406	CO1	Student gains knowledge in short term and long-term capital gains
		CO2	The student knows about general incomes, specific incomes, casual income and deductions.
		CO3	Gains knowledge on carry forward of losses, computation of gross total income, deductions from GTI u/s 80C to 80U.
		CO4	The students will be able to compute tax liability of individuals.
		CO5	Gains knowledge on assessment procedure and filing of e-returns.
12	AUDITING BC407	CO1	Will be able to understand Auditing as per AASB.
		CO2	Learns about Auditors qualifications, qualities, remuneration, rights and duties.
		CO3	Learn about internal control, internal check and internal audit.
		CO4	Will be able to do vouching of trading transactions and vouching of cash transactions.
		CO5	Learns about verification and valuation of assets.
13	COST ACCOUNTING BC503	CO1	Gains knowledge in cost concepts and cost classification.
		CO2	Acquires knowledge on inventory control techniques.
		CO3	The students will be able to compute wages payment methods, methods of allocation and apportionment of overheads.
		CO4	Will be able to compute tenders and estimated costs, job cost sheet.
		CO5	Will be able to solve contract and process accounts, compute normal and abnormal losses.

14	BANKING THEORY AND PRACTICE BC505	CO1	Acquires knowledge of working of Indian Banking system, origin and growth of banking, nationalization of commercial banks, emerging trends.
		CO2	Acquires knowledge on the role of RBI.
		CO3	Learns about the types of banks.
		CO4	Students acquire knowledge on KYC norms, opening of accounts, types of customers.
		CO5	Learns about duties and responsibilities of paying and collecting banker, precautions to be taken while advancing loans against securities.
15	FINANCIAL MANAGEMENT BC507	CO1	Student acquires knowledge on techniques of financial management, maximization of wealth management.
		CO2	Gains knowledge on financial planning.
		CO3	Understands the concepts of over capitalization and undercapitalization.
		CO4	The student will be able to analyze the differences in cost of capital, cost of debt, and cost of equity capital.
		CO5	Gains knowledge on net income approach, net operating income approach, traditional approach.
16	PRINCIPLES OF MARKETING BC508	CO1	The student acquires knowledge about marketing definition, scope, concept and online marketing opportunities and challenges.
		CO2	Learns about marketing environment, micro and macro environment.
		CO3	Learns about marketing segmentation.
		CO4	Acquires knowledge on consumer behavior, post purchase behavior, organizational buyer.
		CO5	Learns about market research process, ethics in marketing.
17	MANAGERIAL ACCOUNTING BC603	CO1	Learns about the techniques of managerial accounting.
		CO2	The students will be able to compute BEP and learn its assumptions, importance and limitations.
		CO3	Acquires the knowledge of marginal costing and decision making.
		CO4	Will be able to prepare the budgets.
		CO5	Will be able to prepare the estimations of working capital requirements.
	COMPANY LAW BC604	CO1	Learns about company promotion, memorandum of association, articles of association, prospectus, commencement of business.

18		CO2	Learns about company director duties, responsibilities, remuneration etc.
		CO3	Gains knowledge on company secretary appointment, duties, liabilities etc.
		CO4	Gains knowledge in types of company meetings.
		CO5	Learns about modes of winding up of a company.
19	FINANCIAL INSTITUTIONS AND MARKETS BC605	CO1	The student gets an overview of Indian Financial System.
		CO2	Gains the knowledge on role of financial institutions in economic development.
		CO3	Learns about state level development banks.
		CO4	Acquires knowledge on money market.
		CO5	Acquires knowledge on capital market.
20	HUMAN RESOURCE MANAGEMENT BC607	CO1	Learns about introduction of human resource management, Elton mayo's human relations theory.
		CO2	Learns about human resource planning.
		CO3	Acquires knowledge on recruitment methods and selection process.
		CO4	Learns about human resource training and development.
		CO5	Learns about performance appraisal methods.
21	TAX PLANNING AND MANAGEMENT BC608	CO1	The student knows about tax planning, tax avoidance, tax evasion.
		CO2	Students gain knowledge on basic salary, DA, gratuity, medical allowances etc.
		CO3	Understands the concept of tac planning for profit and gain of business or profession and capital gain.
		CO4	Learns about short term loans, term loans, public deposits, bonus issues.
		CO5	Learns about various types of mergers and amalgamations.

B. Com (Taxation)

S.No.	Paper Title	CO	Course Outcomes
1	Semester-I DIMENSIONS AND METHODOLOGY OF BUSINESS STUDIES	CO1	To understand business and its role in society
		CO2	To have an understanding of Business ethics and CSR
		CO3	To comprehend the business environment and various dimensions
		CO4	To familiarize Technology integration in business
		CO5	To introduce the importance and fundamentals of business research
2	FINANCIAL ACCOUNTING-1	CO1	To equip the students with the skill of preparing accounts and financial statements of various types of business units other than corporate undertakings
		CO2	To introduce single entry system of accounts.
		CO3	To enable students with the skills to prepare royalty accounts.
		CO4	To understand the system of preparing consignment accounts
		CO5	To familiar with the procedure involved in the farm accounts.
3	CORPORATE REGULATIONS AND ADMINISTRATION	CO1	To understand the provisions of Company Act 2013.
		CO2	To familiarize on capital structure and the procedure of share allotment.
		CO3	To attain knowledge on rights and duties of shareholders, members and types of meetings in the companies.
		CO4	To familiar with rules and regulations relating to appointment of directors

		CO5	To acquire the knowledge on modes and procedure of winding up of companies
4	BANKING AND INSURANCE	CO1	To familiarize the students with the basic concepts and practice of banking and the principles of Insurance
		CO2	To provide the students an understanding about recent trends and innovations in the banking sector.
		CO3	To provide basic awareness to students about the concept of risk and various types of insurance.
		CO4	Gain knowledge on various kinds of life insurance plans
		CO5	Familiarize the types of the general insurance in India.
5	Semester-II FINANCIAL ACCOUNTING – II	CO1	To gain knowledge on preparation of accounts in Hire purchase and Instalment system.
		CO2	To acquire the skill to prepare different types of branch accounts.
		CO3	To transform the accounting knowledge in preparing departmental accounting.
		CO4	To familiar with the procedure involved in the dissolution of partnership firms.
		CO5	CO5- To familiarize students with the application of important accounting standards.
6	BUSINESS REGULATORY FRAMEWORK	CO1	To understand the rules governing Indian Contract Act.
		CO2	To familiarize the rights and discharges of duties by parties in Indemnity, Guaranty, Bailment and Pledge.
		CO3	To acquire knowledge of rules governs setting up of agency and termination of agency.

8	PRINCIPLES OF BUSINESS DECISIONS	CO1	To help the students to understand Decision-making and application of economic theories in decision-making
		CO2	To acquaint students with concept of demand, demand theory demands forecasting.
		CO3	To imparting idea about production function and analysis.
		CO4	To enable the students to understand Cost analysis.
		CO5	To make the students familiar with the pricing in different markets.
9	Semester-III CORPORATE ACCOUNTING-I	CO1	To make the students familiarize with the rules relating to issues of shares and debentures.
		CO2	To make the students familiarize with the rules relating to underwriting of shares.
		CO3	To familiar with computation of the financial results of companies.
		CO4	To familiar with preparation of Investments account.
		CO5	To familiar with computation of Insurance claims
10	QUANTITATIVE TECHNIQUES FOR BUSINESS-I	CO1	To explain the features and methods of statistics.
		CO2	To apply the appropriate sampling survey method and collect data.
		CO3	To calculate an appropriate measure of central tendency.

		CO4	To interpolate and extrapolate a value from a series and use it for forecasting.
11	FINANCIAL MARKETS OPERATIONS	CO1	To introduce the operations of Indian financial system to the students.
		CO2	To create awareness regarding the operations of primary market India.
		CO3	To understand the role of secondary market in the financial market operations.
		CO4	To gain knowledge about the mutual funds, its operations, advantages and disadvantages.
		CO5	To acquire knowledge about the various derivative instruments deal in the Indian financial market.
12	MARKETING MANAGEMENT	CO1	To understand the marketing concepts and marketing environment.
		CO2	To acquire knowledge on product planning and product life cycle.
		CO3	To gain knowledge on choice of distribution channels and pricing strategies.
		CO4	To understand the various methods of promotion.
		CO5	To understand the peculiarities of marketing, marketing of agricultural products and functions of commodity market.
13	Semester-IV CARPORATE ACCOUNTING-II	CO1	To compute the final accounts for a corporate group like banking companies.
		CO2	To compute the final accounts for insurance companies.
		CO3	To give a detailed idea about internal reorganization of companies.
		CO4	To apply the knowledge gained in preparation of final accounts of amalgamated companies.
		CO5	To study the procedure followed for the liquidation of companies.
14	QUANTITATIVE TECHNIQUES FOR BUSINESS- II	CO1	To provide exposure on calculation of measures of correlation.
		CO2	To provide l exposure on calculation of Regression.

		CO3	To acquaint students with the concept of index number.
		CO4	To introduce the students about the concept of provability.
		CO5	To acquire knowledge about time series analysis.
15	ENTREPRENEURSHIP DEVELOPMENT AND PROJECT MANAGEMENT	CO1	To understand the concept, functions and growth of entrepreneurship.
		CO2	To familiarize with project identification and feasibility analysis.
		CO3	To learn to design and appraise the project and factors influencing the plant location.
		CO4	To acquire the knowledge on formalities and documentation for registration.
		CO5	To understand the government policies for the growth of SSIs.
16	Semester-V COST ACCOUNTING-I	CO1	To understand the concept of costing and related terms.
		CO2	To familiarity with the estimation and controlling of material cost.
		CO3	To understand the estimation and controlling of labor cost.
		CO4	To familiarity with the estimation of overhead cost.
		CO5	To able to prepare cost sheet.
17	ENVIRONMENT MANAGEMENT AND HUMAN RIGHTS	CO1	To give the students an understanding of natural resources and ecosystems
		CO2	To create awareness among students about the importance of biodiversity and its conservation.
		CO3	To create awareness among students about the consequences of pollution and possible solutions to avoid pollution.
		CO4	To familiarize students with human rights
		CO5	To examine the application of Human rights in the field

18	FINANCIAL MANAGEMENT	CO1	To learn the theoretical foundations of financial management and financial management decisions.
		CO2	To familiarize the theories of capital structure and the concept of cost of capital.
		CO3	To evaluate feasibility of various investment options.
		CO4	To provide basic knowledge about working capital management.
		CO5	To understand the factors determining dividend policy adopted by companies.
19	INCOME TAX-I	CO1	To collect the basic concepts and definitions of Income Tax Act 1961.
		CO2	To know the residential status of assess and incomes exempted from tax.
		CO3	To familiar with the computation of income from salary.
		CO4	To familiar with the computation of income from house property.
		CO5	To familiar with the computation of income from business and profession.
20	FUNDAMENTALS OF ACCOUNTING	CO1	To familiarize the students with the basic accounting principles and practices in business.
		CO2	To enable students to record transactions in the books of original entry.
		CO3	To enable students to post the transactions to the ledger.
		CO4	To enable students to prepare the final accounts.
21	Semester-VI COST ACCOUNTING- II	CO1	To enable the students to understand job costing, batch costing and contract costing.
		CO2	To understand the students the different operating methods to control and reduce cost of rendering services.

		CO3	To inform the students about the methods of costing and also used to ascertain the cost at each stage of manufacturing.
		CO4	To aware the students to analyze the behavior of cost in relation to changes in volume of Output.
		CO5	To understand the students about the different tools in the hands of management for effective utilization of resources.
22	ADVERTISEMENT AND SALES MANAGEMENT	CO1	By knowing about the various concepts related to advertisements, students will be able to identify misleading and false advertisements and will also get a general idea about framing advertisements.

		CO3	Conceptualize the core methods of Mathematical Operations using Matrices.
		CO4	Apply the concepts of quadratic equations and progressions in practical business decisions.
		CO5	Integrate Differentiation & Integration applications in the areas related to economics & business
5	INFORMATION TECHNOLOGY FOR BUSINESS ANALYTICS	CO1	Identify various parts of computers and their functions.
		CO2	Distinguish various operating systems and execute DOS commands.
		CO3	Make use of Ms.-word application.
		CO4	Design power point presentation.

		CO5	Apply the concepts of Internet and Multimedia.
6	FINANCIAL ACCOUNTING -II	CO1	Outline the various contemporary issues of accounting.
		CO2	'Identify the profit/loss understatement of affairs method and conversion method in single entry system.
		CO3	Prepare accounts of non-trading concerns.
		CO4	Solve problems related to types of capital accounts, admission, retirement and death of a partner of partnership firm.
		CO5	Evaluate the firms at the time of dissolution and insolvency of partnership firm.
7	BUSINESS ORGANISATION & MANAGEMENT	CO1	Classify the concepts of business -trade, industry and commerce.
		CO2	Distinguish different forms of business organisations
		CO3	Outline the features of Joint Hindu family firm and categorize different forms of companies.
		CO4	Explain the principles of management in business organisations, and develops the skills to act as manager.
		CO5	Discuss the concept organization, centralization, decentralization and delegation of authority.
8	DATA ANALYSIS WITH EXCEL	CO1	Identify the data analysis methods and tools in excel application.
		CO2	Interpret formatting, sorting, filtering.
		CO3	Analise and implement calculations using formulae and function methods
		CO4	Apply knowledge for Design Chart and graphs.
		CO5	Interpret data using validation tools Goal seek method and lookup wizard
9	BUSINESS STATISTICS-I	CO1	To familiarise the basic concepts of statistics along with methods of collection and presentation of data.
		CO2	To compute averages using different methods of central tendency.
		CO3	To examine the variation of data through different methods of dispersion.
		CO4	To identify the skewness and peaked ness in the data using the methods of skewness and kurtosis
		CO5	To determine the relation between variables using the methods of correlation.
10	FINANCIAL SYSTEM	CO1	Illustrate the role of financial system in economic development.
		CO2	Explain about the growth and operations of the Commercial banks in India
		CO3	Elucidate the role of RBI with functioning of various banks under the control of RBI

		CO4	Describe the regulations and workings of Indian Money Market.
		CO5	Evaluate the regulations and functioning of the stock exchange and differentiate the role of different Banks in Indian financial System.
11	FUNDAMENTALS OF BUSINESS ANALYTICS	CO1	Outline the business analytical role.
		CO2	Examine the business view of information technology application.
		CO3	Explain the concepts of OLTP, OLAP and BI.
		CO4	Demonstrate the data integration and data modelling concepts.
		CO5	List the concepts of Enterprise reporting and BI in real world.
12	SECURITY ANALYSIS AND PORTFOLIO MANAGEMENT	CO1	Outline the nature and scope of Investment management
		CO2	Explain the concepts of Security valuation using various techniques
		CO3	Demonstrate the fundamental analysis and its theories
		CO4	Examine the process of portfolio analysis and its relevant theories
		CO5	List the techniques of portfolio plans
13	PRINCIPLES OF FINANCIAL MANAGEMENT	CO1	Define and identify the concepts of Financial Management
		CO2	Understand Capital Structure and leverage for strategic Financial Decision Making
		CO3	Apply the concept of cost of capital and techniques of capital budgeting to enhance the investment proposal.
		CO4	Illustrate the importance and estimation of working capital in the organization
		CO5	Outline the concepts of dividend policy
14	COST AND MANAGEMENT ACCOUNTING	CO1	Recall various concepts of costing and costing methods
		CO2	Analyze the material costing with various methods
		CO3	Explain the labour wage payment system
		CO4	Outline the various concepts relating to management accounting
		CO5	Analyze financial statements using ratio analysis
15	INCOME TAX	CO1	Outline the various terminologies related to income tax
		CO2	Understand the method of calculating and levying tax
		CO3	Apply the various tax laws and available provisions in tax computations
		CO4	Evaluate the set off and carry forward of losses while calculating personal income
		CO5	Analyze self-assessment of income and tax computation.

16	BUSINESS ORGANISATION AND MODELS	CO1	Classify the basic ideas of Business.
		CO2	Indicate the Preparation method of business models.
		CO3	Outline the financial models of business.
		CO4	Illustrate the marketing and selling models to promote business.
		CO5	Explain the models of HR in business.
17	FINANCIAL MARKETS AND INSTITUTIONS	CO1	Relate the concepts of Indian financial system.
		CO2	Outline the concepts of New issue market.
		CO3	Examine the role and functions of Investment Institutions in India.
		CO4	List the types, role and performance of Mutual funds and its regulations.
		CO5	Identify the importance and kinds of derivatives.
18	CYBER LAW	CO1	Relate the concepts of Cyberspace
		CO2	Outline the technical aspects of encryption
		CO3	Analyze the law of procedures and factors influencing computer crime
		CO4	Interpret and Analyze the Legal frame work for Electronic Data Interchange
		CO5	Examine the authentication of electronic records
19	GOODS AND SERVICE TAX	CO1	Relate the concepts of Indirect Taxes.
		CO2	Understand the Levy and Collection of Cost of GST.
		CO3	Explain the concepts relating to supply of goods and services.
		CO4	Analyze the registration procedure under GST.
		CO5	Outline the scope, objectives relate to customs law.
20	LEGAL ASPECTS OF BUSINESS	CO1	Outline the essential elements of Indian Contract Act.
		CO2	Understand the sale of goods act.
		CO3	Inspects the nature and registration process in partnership act.
		CO4	Explain the importance, types and claim settlement of insurance.

Bachelor of Business Administration (BBA)

S. No.	Paper Title	CO	Course Outcomes
1	Semester – I Fundamentals Of Accounting	CO1	To give an insight to various basic aspects of accounting.
		CO2	Enables them to understand accounting concepts, tools and techniques influencing business organizations.
		CO3	To enable them understand single entry system, accounting procedure maintenance of subsidiary books and final accounts
2	Semester – I Business Organisation And Environment	CO1	Provides with the logic and working of organizations and outlines the major function of business organization.
		CO2	Enables students to acquire and exhibit knowledge skill and abilities needed to successfully manage the organization with different environmental situations.
		CO3	To give insight on Memorandum of Association, Article of Association, impact of globalization and technology on Indian Businesses
3	Semester – I Quantitative Methods For Business I	CO1	To know the basic mathematical calculations.
		CO2	To give knowledge of quantitative methods and its applications in commercial situation for decision making.

		CO2	Provides insight on time value of money and various managerial decisions such as financial, investment and dividend decisions and importance of working capital management
9	Semester – IV Cost Accounting	CO1	Acquaint students with various cost concepts and importance of controlling overall cost which is a vital aspect to achieve the objectives of modern business.
		CO2	Enables students to understand various methods of material issues, labour remuneration, allocation and apportionment of overheads and also preparation of reconciliation statements
10	Semester - IV Service Management	CO1	Provides basic knowledge about the service sector like tourism, hospitality, banking, insurance and financial institutions.
		CO2	Provides information on various job opportunities available in the service sectors.
11	Semester - IV Banking Regulations and Operations	CO1	Exposes the students to existing law and practice of banking in India.
		CO2	Provides information about the financial system prevailing in India its operations
12	Semester - V Entrepreneurship Management	CO1	Enables students master their skills and ideas to establish a strong foundation of confidence required to become an entrepreneur.
		CO2	Prepares students to face the hindrances of entrepreneurship and preparation of business plan covering aspects like finance, marketing, sales etc.
13	Semester - V Computer Applications In Business	CO1	Helps understand about information system used in business

		CO2	Provides knowledge of computers related to MSOffice, tally, DBMS required for everyday transactions of BS.
14	Semester - V Investment Management	CO1	Provides knowledge about various investment avenues available and equips student's skills in analyzing the avenues to make investments decisions.
		CO2	Creates awareness about portfolio management strategies to achieve financial objectives
15	Semester - V Management Accounting	CO1	Helps in evaluating the ideas and manage the ambiguity in managerial and organizational issues in a business organization
		CO2	Evaluation of various concepts of costs and demonstrates the need for balance between financial and non-financial information.
16	Semester - VI **International Business**	CO1	Provides knowledge on International Business and also gives an insight on strategies related to entry
		CO2	Expose students to Modes of entry into international business
17	Semester - VI **E Business**	CO1	Helps to expose the students to electronic modes of commercial operations.
		CO2	Provides insights on concepts of E-business, security for E-business, E-payment methods, technologies and Cyber Laws in e-business for marketing operations.
18	Semester - VI **Income tax**	CO1	Introduces students to the basic concepts of Income Tax like Assessment year
		CO2	Briefs on computation of income from salary
19	Semester - VI **Strategic Management**	CO1	Provides information to students on strategic planning, implementation, evaluation etc
		CO2	Helps students to understand strategic management process and implementation and preparation of project reports.

Department of History

S.No.	Paper Title	CO	Course Outcomes
1	Semester I History of India (from earliest times to 700CE)	CO1	Students will be able to understand the nature and scope of history and role of sources as construction of Indian History.
		CO2	Students will understand the features of Indian Civilization which is one of the ancient civilizations of the world.
		CO3	Students will be able to understand the features of ancient culture of India. i.e. Harappan Culture and Vedic Culture.
		CO4	Students will be known the principles of Buddhism and Jainism and their impact in our country and world.
		CO5	Students will be understanding the first and efficient administration of Mauryas.
		CO6	Students will be able to understand the factors responsible for the Golden Age of the Guptas.
2	Semester II History of India (700 CE to 1526 CE)	CO1	Students will be able to understand about the regional kingdoms of south India.
		CO2	Students will be able to understand the foundation Muslim rule i.e., Delhi Sultanate and its impact in India.
		CO3	Students will be understanding the role of Bhakthi and Sufi movements in Medieval India.
		CO4	Students will be able to understand the contribution of South India Kingdom to South Indian Culture.
		CO5	Students will be able to understand the role of Krishna Tungabhadra Doab on emergence of Vijayanagara and Bahamani kingdom.
3	Semester III History of India (1526CE-1857CE)	CO1	Students will be able to understand the about role of Mughal dynasty in Arts and Architecture and its impact on emergence of composite culture.
		CO2	Students will be able to understand the contribute regional powers during and after Mughals.
		CO3	Students will be able to understand the advent of European powers and contribution of British power.

		CO4	Students will be able to understand the different revenue settlements of Britishers responsible for changes in agrarian economy and man-made calamities.
		CO5	Students will be able to understand the responsibility of Britishers for decline of cottage Industries and suffering by all sections led to revolt of 1857CE.
4	Semester IV History of India (1858CE-1964CE)	CO1	Students will be able to understand the change of power from East India Company to between after the revolt of 1857CE.
		CO2	Students will be able to understand the various socio-religious movements in 19th century and their impact in Indian society.
		CO3	Students will be able to understand the formation of Indian National Congress at National Level to fight against Britishers in different phases.
		CO4	Students will be able to understand the different revolutionary activities against Britishers.
		CO5	Students will be able to understand the role of communal politics for partition of India and role of Sardar Vallabhai Patel in integration of Indian Union.
5	Semester V History of the Modern World (1453CE-1964CE)	CO1	Students will be able to understand the emergence of modern world with Renaissance, Reformation and Geographical discoveries.
		CO2	Students will understand the courses of different revolutions and its impact on Modern Europe.
		CO3	Students will be able to understand the process of colonization in Asia and Africa by European countries.
		CO4	Students will know the causes for the two world wars between 1914CE -1945CE and their impact.
		CO5	Students will understand the importance of UNO for keeping peace in the world.
6	Semester VI History and Culture of Telangana (From earliest times of 2014CE)	CO1	Students will understand the history of Ancient Telangana and importance of different periods.
		CO2	Students will understand the contribution of Asaf Jahis in the field of Administration and Culture in Deccan.

		CO3	Students will understand the political developments in relating to freedom movement in Hyderabad state.
		CO4	Students will understand the activities in Nizam ruling areas and merger of Telangana in Indian Union.
		CO5	Students will understand causes of the different movements in Telangana and formation of Telangana.

Department of Economics

S.No.	Paper Title	CO	Course Outcomes
1	SEM-I MICROECONOMICS	CO1	Students understand the relevance of microeconomics to the real world.
		CO2	The student should be able to build on these concepts in the future to develop deeper understanding of the Economy
		CO3	To understand the economic behaviour of individuals, firms and markets.
		CO4	It is mainly to equip the students in a rigorous and comprehensive understanding with the various aspects of consumer behaviour and demand analysis, production theory and behaviour of costs, the theory of traditional markets and equilibrium of firm.
2	SEM-II MACROECONOMICS	CO1	Macro Economics helps to analyze the National Development and overall development in the different fields like poverty, employment, inflation, income inequalities etc..
		CO2	Provides elementary theoretical foundation of key issues and policies
		CO3	The course attempts to discuss the functional relationships between aggregates.
		CO4	To understand the overall structure of the economy in theoretical and contemporary perspectives for under graduate students.
3	SEM-III ECONOMICS OF STATISTICS	CO1	To develop mathematical approach in analysis of economic problems. It mainly focuses on those mathematical techniques which are directly useful in economic analysis.
		CO2	To introduce the students to elementary concepts in develop the ability to explain core economic terms, concepts, and theories.
		CO3	To make informed decisions using data, and to

			communicate the results effectively.
		CO4	Students will work in small groups in this course; this will develop the skills required to work effectively and inclusively in groups, as in a real work environment.
4	SEM-IV CONTEMPORARY ISSUESOF THE INDIAN ECONOMY: ECONOMIC SURVEY	CO1	This course provides fundamental foundation of basic growth and development issues, approaches and models.
		CO2	It helps to understand the overall static and dynamic perspectives of the economy in a purely theoretical perspective.
		CO3	This course provides basic knowledge on national income accountings, various issues involved in agricultural, industrial, financial, trade sectors, public institutions and finally human resources development.
5	SEM-V AGRICULTURE ECONOMICS	CO1	The paper makes students aware of different theories on agricultural development to cement their skills in undertaking research in the field of agricultural economics.
		CO2	It provides details views of the process of agricultural development in the country since independence
6	SEM-V PUBLIC ECONOMICS	CO1	Considering the increasing role of Government in economy, this course aims to generate theoretical and empirical understanding of students about different aspect of Governmental activities and their rationality.
		CO2	It covers fundamental concepts of public economics, public expenditure, public revenue, and public debt with special reference of Indian economy.
7	SEM-VI INTERNATIONAL ECONOMICS	CO1	To provide strong theoretical background to the students on the subject of international trade.
		CO2	It also helps understand the empirical aspects such as trade reforms and their impact on India economy.
8	SEM-VI ECONOMICS OF DEVELOPMENT	CO1	The course makes students to understand the basic growth and development issues, approaches and models.
		CO2	Its focus is on improving the potential for the mass of population through health and education.

Department of Political Science

S.No.	Paper Title	CO	Course Outcomes
1	SEM-I UNDERSTANDING POLITICAL	CO1	It enlightens the student about the basic theories of the state, different political concepts

	THEORY		and ideologies.
		CO2	It also enlightens the students about the significance of Multiculturalism, gender justice and the structures of the government.
2	SEM-II WESTERN POLITICAL THOUGHT	CO1	It enables the students to know and understand the great ideas of great philosophers from ancient times to modern times, that is, from Plato and Aristotle to Hegel and Karl Marx.
		CO2	It brings out and broadens the intellectual potential of the students
3	SEM-III INDIAN POLITICAL THOUGHT	CO1	It enables the students to understand great ideas of Indian philosophers in general and their Political Thinking in particular.
		CO2	It enlightens the students on the great Indian ethos of diversity, plurality and tolerance.
4	SEM-IV CONSTITUTION AND POLITICS OF INDIA	CO1	The students know about the constitutional values, structure and functioning of the government.
		CO2	It enables the students to know divergent political trends during the last seven decades of the functioning of Indian constitution.
5	SEM-V INTERNATIONAL RELATIONS	CO1	It enables the students to understand the nature of the Sovereign State System and its evolution.
		CO2	It also enables the students to know nature and dynamics of international relations and the history of international relations.
6	SEM -VI GLOBAL POLITICS	CO1	It enlightens the students on the basic concepts of power, national interest and world peace.
		CO2	Students also come to know about the politics of global issues like global warming, Human Rights and Terrorism and sensitize themselves of these issues.

Department of Journalism

S.No.	Paper Title	CO	Course Outcomes
1	SEM-I INTRODUCTION TO JMC	CO1	Students know about the scope and evolution of Journalism and Mass Communication.
		CO2	They also know about Principles of Journalism, types of mass media and various communication theories.
2	SEM –II REPORTING EDITING FOR PRINT MEDIA	CO1	Students learn the techniques of reporting, reporting of special events.
		CO2	Students also learn column writing and editing which are immensely useful for better career in Journalism.
3	SEM-III DEVELOPMENT COMMUNICATION	CO1	It enables the students to have a proper perspective about the development.
		CO2	They also know about development communication, participatory development and multi- media approach to development issues.
4	SEM-IV BROADCAST JOURNALISM – NEW MEDIA	CO1	The students learn about the concept of broadcasting and its history.
		CO2	They also know about the emergence of commercial broad casting, emergence of new media and the ethical issues involved in them
5	SEM-V REPORTING & EDITING FOR ELECTRONIC MEDIA	CO1	The students learn about writing for radio, principles of news writing, writing for television.
		CO2	The students also learn reporting political news and writing for radio and television documentary.
6	SEM-V PAPER VI(B) MEDIA LAWS & ETHICS	CO1	The students are enlightened about the constitutional values in general and the freedom of the press under article 19 in particular.

		CO2	They also know about the various acts like official secrecy act, Cinematography Act, Press council of India Act etc.,
7	SEM-VI PAPER VII – PUBLIC RELATIONS & ADVERTISING	CO1	The concept of Public Relations, significance of community relations, advertising and its effects, various advertising agencies would provide good career opportunities to the students of journalism.
8	SEM-VI PAPER VIII (B): SPECIALISED REPORTING FOR ELECTRONIC MEDIA (FIELD WORK)	CO1	This field work on reporting for electronic media gives good exposure to the students to learn nuances of report writing in general and reporting for electronic media in particular.

Department of Public Administration

S.No.	Paper Title	CO	Course Outcomes
1	SEM-I INTRODUCTION TO PUBLIC ADMINISTRATION	CO1	Creates awareness among students about the evolution and growth of the discipline of public administration.
		CO2	Learning of basic principles and approaches of Public Administration.
		CO3	Theoretical clarity of basic concepts and dynamics relating to Public Organizations.
		CO4	Acquiring the knowledge of the elements, theories, and principles of public administration as a discipline
2	SEM-II INDIAN ADMINISTRATION	CO1	Knowledge about the evolution and growth of Indian Administration.
		CO2	Familiarity with the constitutional framework on which Indian administration is based.
		CO3	Understanding the in-built control mechanisms over constitutional bodies in particular and administration in general.
		CO4	Awareness about the institutions and mechanism in force for citizen-state interface.
3	SEM-III	CO1	Conceptual clarity on public personnel

	PUBLIC PERSONNEL ADMINISTRATION		administration, its issues, career systems and other covering various aspects of personnel administration.
		CO2	Detailed understanding of the public personnel system of the Indian Republic.
		CO3	Critical understanding of the issues like Employee Associations, Adjudications institutions and processes and Civil Service Reforms.
4	SEM-IV PUBLIC FINANCIAL ADMINISTRATION	CO1	Knowledge of various aspects of Public Financial Administration in general and in the Indian context in particular.
		CO2	Understanding Public budgeting, Public financial institutions and financial resource mobilization strategies in the Indian context.
		CO3	Comprehending the system and dynamics of Indian fiscal federalism.
		CO4	Deep understanding of the role of Comptroller and Auditor General in public financial administration.
5	SEM-V COMPARATIVE PUBLIC ADMINISTRATION AND DEVELOPMENT ADMINISTRATION	CO1	will be equipped with the knowledge and Conceptual quality of approaches, indices and models of comparative and development Public Administration.
		CO2	Clarity on administrative systems and their accountability mechanisms of UK, USA, USSR and FRANCE.
		CO3	Understanding of local governmental system, grievance redressal mechanisms and relevance of comparative approach in globalized perspective.
6	SEM-VI RURAL LOCAL GOVERNANCE	CO1	Acquiring the Theoretical knowledge and understanding of the evolution and growth of rural local governance with special reference to Panchayat raj institutions.
		CO2	Gaining insights about the composition, role and functions, resources of Panchayat raj institutions.
		CO3	Connecting the role and relationship of rural local democratic decentralized institutions (PRIs) with other related issues and institutions.

Department of Telugu

S.No.	Paper Title	CO	Course Outcomes
1	DHARMJUNIVAKCHATURYAM.	CO1	The students will learn about Mahabharata visheshalu.
		CO2	The students will learn about Tikkana natakeeyata.
		CO3	The students will learn about Parichina Telugu padabandalu.
		CO4	The students will learn about Parichina kavitvam.
2	GUNANIDHIKATHA	CO1	The students will learn about Sreenadhuni kavitvam.
		CO2	The students will learn about Puruni prdhanyata
		CO3	The students will learn about Vidya radhanyata
		CO4	The students will learn about Chatuvulu
3	NARASIHASATAKAM	CO1	The students will learn about Satakam viseshaalu
		CO2	The students will learn about Dhariamsalu
		CO3	The students will learn about Neeti visheshalu
		CO4	The students will learn about Bhakthi visheshalu
4	ARDHARATRI ARUNODAYA	CO1	The students will learn about Vachana kavitvam visheshalu
		CO2	The students will learn about Telagana samajikamsalu
		CO3	The students will learn about Naijam palana
		CO4	The students will learn about Rajakarla duscharyalu
5	NIVURUTOLAGINANIPPU	CO1	The students will learn about Katha sahityam visheshalu
		CO2	The students will learn about Patrowchityam

		CO3	The students will learn about Atmavisvasam, pattudala
		CO4	The students will learn about Jrutagyatabhavam
6	CHALICHEEMALU	CO1	The students will learn about Natakavisheshalu
		CO2	The students will learn about Gramarajikeeyalu
		CO3	The students will learn about Devalayam aastulu
		CO4	The students will learn about Gramasarpanch adhikara durviniyogam.

Department of Hindi

S.No.	Paper Title	CO	Course Outcomes
1	SEM-I Hindi-I	CO1	To develop Hindi Reading & Linguistic Comprehension of Students.
		CO2	To understand the types of Hindi Short Story articles.
		CO3	To understand the Biography of Writers.
		CO4	To able to understand the importance of Grammar, Translation and writing skills.
2	SEM-II Hindi-II	CO1	To develop Hindi Reading & Linguistic Comprehension of Students.
		CO2	To understand the types of Hindi Short Story articles
		CO3	To understand the Biography of Writers.
		CO4	To able to understand the importance of Grammar and letter writing.
3	SEM-III Hindi-III	CO1	To develop Hindi Reading & Linguistic Comprehension of Students
		CO2	To understand about Hindi Literature.
		CO3	To understand about Hindi Literature and about writers & their life history.

		CO4	To understand about personalities of Social, political and literature.
4	SEM-IV Hindi-IV	CO1	To acquire knowledge about the poetry of Meerabai, Rahim & Bihari.
		CO2	To understand about Hindi Literature & writers.
		CO3	To understand the history of Hindi Literature & Biography of Writers.
		CO4	To acquire the knowledge about life history of Hindi poets like Meerabai, Rahim, Bihari, Premchand, Nirala, Mahaveer prasad Dwivedi, Harivansh Rai Bachchan etc.
5	SEM-V Hindi-V	CO1	To develop Hindi Reading & Linguistic Comprehension of Students.
		CO2	To able to understand the importance of Grammar and letter writing.
		CO3	To understand the types of Hindi Short Story articles.
6	SEM-VI Hindi-VI	CO1	Students can practice and translate work from Hindi to English, English to Hindi and other languages
		CO2	Students can have good communication skills to express their views in writing and speaking with help of grammar.

Department of Sanskrit

S.No.	Paper Title	CO	Course Outcomes
1	SEM-I &II SANSKRIT SAARASWATI SUSHMA	CO1	The course helps develop writing skills and communication skills, and depth knowledge of Sanskrit literature research and analytical ability into the Indian culture, traditions, evolution and history.
		CO2	Self–confidence, good reading skills, new language learning ability, Sanskrit-also improves command over Hindi and Urdu skills, as these languages. (and several other languages are derived from Sanskrit.
		CO3	The students can pursue B.Ed. and PG courses with Sanskrit as main subject.

2	SEM-III & IV SANSKRIT SAARASWATI SUSHMA	CO1	Sanskrit is the language of the Vedas hence it needs interpretation for the transfer of ancient–texts hence Sanskrit graduates particularly critical to history-based organizations.
		CO2	Courts and publicity houses often hire Sanskrit graduates for the purpose of translation.
		CO3	Channels like Sanskrit Vishvam hires Sanskrit speakers.
		CO4	To learn to keep our keep Indian cultures & tradition.
3	SEM-V & VI SANSKRIT SAARASWATI SUSHMA	CO1	The student can get an opportunity as content writers /editors/proof readers in print & Electronic media.
		CO2	Students of Sanskrit can also mould their career path to become language and literature experts either though higher studies or research related jobs.
		CO3	Course can help the students go for civil services through UPSC examinations or into research media, publication, writing and publishing jobs.

Department of English

S.No.	Paper Title	CO	Course Outcomes
1	**GENERAL ENGLISH COURSE**	CO1	Be aware of correct usage of English grammar in writing and speaking.
	English for Advancement **Semester I&II** This course includes well-crafted stories and compelling characters. each unit includes sections on listening, reading, writing, grammar,	CO2	Help improve their speaking ability in English both in terms of fluency and comprehensibility
		CO3	Increase their reading speed and comprehension of academic articles.
		CO4	Improve their reading fluency skills through extensive reading.

	vocabulary and soft skills. **English for Excellence-** **Semester III&IV** This course adopts the learner-centric approach to improve Students' interpretative skills and to help them learn and communicate fluently. **English for Careers** **Semester V&VI** The course is designed to improve the English communication skills of undergraduate students.	CO5	Strengthen their ability to write academic papers, essays and summaries using the process approach. Students will attain and enhance competence in the four modes of literacy: writing, speaking, reading and listening.
		CO6	Develop their ability as critical readers and writers.
		CO7	Produce a short research paper using the drafting process.
		CO8	Achieve these outcomes through the development of the following skills: focused reading skills work and exams; discussions of longer articles; and summary writing including the drafting process.

Department of Botany

S.No.	Paper Title	CO	Course Outcomes
1	SEM-I MICROBIAL DIVERSITY OF LOWER PLANTS	CO1	The students will develop understanding about the diversity, identification, classification and economic importance of lower plants.
		CO2	To understand life cycles of different algal species.
		CO3	To know the evolution of sporophytes in bryophytes.
		CO4	To understand the stelar evolution and seed formation habit in pteridophytes.
2	SEM-II GYMNOSPERMS, TAXONOMY OF ANGIOSPERMS AND ECOLOGY	CO1	The course focuses on morphology, anatomy, reproduction and evolution in Bryophytes, Pteridophytes and Gymnosperms and Understand the significance of Palaeobotany and its applications.
		CO2	The students develop the basic understanding of important characteristics, anatomy, reproduction and evolution along with economic importance of these two groups.
		CO3	To gain proficiency in the use of keys and identification manuals to identify any unknown plants to species level.
		CO4	To gain knowledge about life cycles of gymnosperm plants.

3	SEM-III PLANT ANATOMY AND EMBRYOLOGY	CO1	Understand the scope & importance of Anatomy Embryology and Palynology.
		CO2	Know various tissue systems and understand the normal and anomalous secondary growth in plants and their causes.
		CO3	Understand structure and development in microsporangium and megasporangium and process of microsporogenesis and megasporogenesis and male and female gametophytes
		CO4	Know Polllinationation, fertilization, endosperm and embryogeny
4	SEM-IV CELL BIOLOGY AND PLANT PHYSIOLOGY	CO1	Students will be able to understand the various physiological life processes in plants.
		CO2	They will also gain about the various uptake and transport mechanisms in plants and are able to coordinate the various processes.
		CO3	They understand the role of various hormones and enzyme kinetics.
		CO4	To relate photosynthesis with the formation of primary and secondary metabolites.
5	SEM-V BIODIVERSITY & CONSERVATION	CO1	Students will gain knowledge about important approaches and practices in biodiversity conservation and management
		CO2	The students will understand the concept, types, development and functions of various ecosystems and their communication and about various environmental factors governing these ecosystems
		CO3	To understand the importance of Climatic factors like light, temperature, in related to growth of plant.
		CO4	To know how to conserve the threatened plants in environment.
6	SEM-VI TISSUE CULTURE & BIOTECHNOLOGY	CO1	Student will understand the basic properties of plant cell and with apply their basic knowledge of PTC in various fields for conservation, medicine, product development etc.
		CO2	Students will learn about Concepts, tools and techniques related to in vitro propagation of plants.
		CO3	To know different methods used for genetic transformation of plants, use of *Agrobacterium* as a vector for plant transformation, components of a binary vector system.
		CO4	To understand Various case studies related to basic and applied research in plant sciences using transgenic technology.

Department of Zoology

S.No.	Paper Title	CO	Course Outcomes
1	SEM-I ANIMAL DIVERSITY-INVERTEBRATES	CO1	To acquire the knowledge of microscopic living organisms, General characters & classification of the animals, and the comparison, origin and evolution of cell and acellular.
		CO2	To the knowledge acquire about the invertebrates Diseases (viral, bacterial fungal helminths protozoal).
		CO3	To the know cells and spicules coral, and coral reef formation bio-indicators vectors regeneration and symmetry.
		CO4	To acquire the knowledge of Economic importance of invertebrates.
2	SEM-II ANIMAL DIVERSITY-VERTEBRATES	CO1	To acquire the knowledge of General characters & classification of the animals, and the comparison origin and evolution vertebrates.
		CO2	To know the General characters &classification of vertebrates.
		CO3	To gain knowledge about Digestive, Respiratory, Circulatory Nervous& Reproductive system of vertebrates.
		CO4	To acquire the knowledge of Economic importance of vertebrates.
3	SEM-III ANIMALPHYSIOLOGY AND ANIMAL BEHAVIOUR	CO1	To know the Homeostasis and Osmoregulation Hormone regulation of blood glucose levels in human being.
		CO2	To gain knowledge about Digestive, Respiratory, Circulatory Nervous& Reproductive system of vertebrates.
		CO3	To know the Endocrine system, glands-Structure Secretions and functions.
		CO4	To know the Animal behavior Learning & memory biological rhythms.
4	SEM-IV CELL BIOLOGY, GENETICS & DEVELOPEMNTAL BIOLOGY	CO1	To gain knowledge regarding of the unit of life that is cell, cell structure types, cell functions, various organelles of the cell and their function's structure.
		CO2	To gain knowledge about DNA, RNA –types structure &functions which is very useful at molecular level of genes in various aspects of life quality of genetical characters and forensic method of the living organisms.
		CO3	To Acquire the knowledge about Genetical aspects.
		CO4	To acquire the knowledge of the development

			of male and female (oogenesis and spermatogenesis) reproductive organs embryo the fertilization methods to develop with new genetically combinations leading to new varieties.
5	SEM-V IMMUNOLOGY AND ANIMAL BIOTECHNOLOGY	CO1	To know about immune system-types structure, function & Antigen-antibody reactions.
		CO2	To know about Cloning, cloning methods, vectors.
		CO3	To know the Vaccines-types and their reactions.
		CO4	To know about Recombinant DNA technology, stem cells types and their applications.
6	SEM-VI ECOLOGY, ZOOGEOGRAPHY & EVOLUTION	CO1	The students will learn about Ecosystem structure and its functions.
		CO2	To learn concepts of spices, Population dynamics and Growth curves.
		CO3	To know about Zoogeographical regions.
		CO4	To learn about theories of evolution.

Department of Chemistry

S. No.	Paper Title	CO	Course Outcomes
1	Semester – I **Paper - I**	CO1	Describe the synthesis & list the various types of B, C, Si & N compounds.
		CO2	Interpret the diagonal relationship of s block elements & understand physical &chemical reaction of Aliphatic & Alicyclic hydrocarbon
		CO3	Based on bond polarization acidity & basicity & stability of reactive intermediate of different hydrocarbs can be determined
		CO4	By considering principles of solubility product & common ion effect cation can be discriminated by anions in a salt mixture
		CO5	Have an idea of critical & vandarwaals constant. By taking the criteria of wave function particle in a 1D box can be explained
		CO6	Predict the bond order & magnetic behavior for various molecules on the basis of MOED. In a given, mathematical data, accuracy, precision & error can be explained

2	Semester – II **Paper -II**	CO1	Acquire Knowledge about various preparation and chemical reactivity of aromaticcompounds, halogen compounds and alkyl benzene
		CO2	Able to understand the physical and chemical properties of oxides
		CO3	The study of colligative properties helps to determine molecular masses of solutes, Nernst distribution law used to determine association & dissociation of solute in solvent, by using Bragg's equation various crystal structure can be determined & by qualitative analysis one can determine the weight of chemical substances
		CO4	Band theory is useful to differentiate between conductors, insulators &semiconductors. Have an idea about material science
		CO5	By kinetic study one can judge the order of reaction of halogen compound & by taking criteria of optical activity one can express the stereochemistry of SN1 &SN2
3	Semester – III **Paper -III**	CO1	Defines the properties of f-block elements and non-aqueous solvents
		CO2	Differentiate the symmetry elements, operations in molecules, lanthanides and actinides
		CO3	Explore the methods of preparation and properties of alcohols, ethers and carbonyl compounds and current applications
		CO4	Design the Phase equilibria of one component and two component system, compound with congruent and incongruent melting point.
		CO5	Demonstrate the methods of preparations and properties, of colloids, analyze adsorption isotherms and its industrial applications to reduce pollution and compute the surface area of adsorbent
		CO6	Know the synthetic techniques of Nano structured materials, its current applications.
		CO7	Classify stereoisomers based on symmetry criteria and energy criteria
		CO8	Interpret Rand S configuration, D/L Nomenclature and E/ Z Configuration

4	Semester – IV **Paper -IV**	CO1	Describe the postulates and limitations of Werner's theory, Sidgwick's and VBT theory.
		CO2	Acquire knowledge on the IUPAC Nomenclature and solve the EAN of coordinationcompounds.
		CO3	Categorise the Organometallic compounds of Li Mg Al abd Metal carbonyls. Discuss itsapplications
		CO4	Have an idea on all named reactions and mechanisms of carboxylic acids and nitrohydrocompounds and focus on its industrial applications
		CO5	Acquire knowledge on Hittorf's method, Kohlrausch law, Arrhenius theory, Ostwald dilution law, Debye Huckle Onsager equation and predicts its applications.
		CO6	Accomplish the Nernst equation, EMF of a cell, Single electrode potential, Standard hydrogen electrode, electrochemical series
5	Semester – V **Paper - V**	CO1	Understand the theories of coordination compounds and stability of metal complexes.
		CO2	List and judge the applications of coordination compounds in various fields
		CO3	Know about the clusters with the examples of Borane and carborane.
		CO4	Compare the property and reactivity of different class of amines and design the synthesis pathway of different organic compounds using amines
		CO5	Classify heterocyclic compounds and compare their aromatic character amd reactivity
		CO6	Develop concept on reaction kinetics with special reference to factors influencing the rate and evaluate the merits of different theories of reaction rate.
5	Semester – V **Paper - V**	CO7	Know about electromagnetic radiation and understand the interaction of electromagneticradiation with molecules - various types of molecular spectra.
		CO8	Learn to analyze the consequences of light absorption with reference to various photo physical processes and photochemical reactions with normal and abnormal quantum yield
6		CO1	Understand the concept of

	Paper - VI		Inorganic reaction mechanism with respect to octahedral and tetrahedral complexes.
		CO2	Know about the Biological significance of essential elements and toxicity of heavy metals.
		CO3	Acquire knowledge about carbohydrate chemistry with reference to definition, classification and evaluation of structure from reactions.
		CO4	Acquire knowledge about chemistry of amino acids – essential amino acids, Biological importance. Learn to relate the peptide bond formation for the synthesis of protein
		CO5	Have an extensive knowledge on Thermodynamics with reference to different Thermodynamic functions, processes, work of expansion and laws of Thermodynamics
		CO6	Understand the applications of Thermodynamics in basic sciences for deriving equations, in engineering science for calculating efficiency of machine and evaluation of spontaneity of process. Learn to derive the equation of spontaneity, Gibb's equation and Maxwell's relations
		CO7	Understand the principle of Nuclear Magnetic Resonance, concept of chemical shift and splitting of signals – spin –spin coupling. Implement the concept in analyzing the NMR spectrum for identification of organic compounds

Department of Microbiology

S.No.	Paper Title	CO	Course Outcomes
1	SEMESTER – I INTRODUCTORY MICROBIOLOGY	CO1	Awareness about basics of microbiology.
		CO2	Introduction to different techniques.
		CO3	Realization of scope of microbiology
		CO4	Mechanism to handle microscope
		CO5	Making a contamination free laboratory.
		CO6	Getting the idea about control of Microorganisms
		CO7	Brief ideas about staining techniques

2	SEMESTER – II CYTOLOGY, PHYSIOLOGY AND BIOCHEMISTRY	CO1	Studying the cell fundamentals, physiology of cell and metabolic process.
		CO2	Understanding the depth of molecular microbiology.
		CO3	Developing awareness for understanding of ongoing issues.
		CO4	Ability to apply the knowledge in Genetics, Genetic engineering & Biochemistry
		CO5	Acceptance of the challenges in genetic.
3	SEMESTER – III INTRODUCTION OF MEDICAL MICROBIOLOGY &BASICS OF IMMUNOLOGY	CO1	Studying basic knowledge of pathogens, diseases and their control.
		CO2	Knowledge about different techniques used for microorganisms' isolation is inculcated among students.
		CO3	Instrumental knowledge and their use along with awareness to equipment's is studied.
		CO4	Knowledge of the underlying principle of immunology and its application in solving problems in biology systems.
		CO5	Dealing with clinical and emerging areas in immunology such as immune mechanisms that protect against pathogens and the implication for vaccine development and global health.
4	SEMESTER – IV MOLECULAR BIOLOGY AND MICROBIAL GENETICS	CO1	Knowledge of microbial techniques.
		CO2	Knowledge of bacterial genome replication.
		CO3	Knowledge of creating and recombinant bacteria.
		CO4	Idea to Design the genetically modified organisms.
		CO5	Knowledge of microbial techniques.
5	SEMESTER – V FOOD AND INDUSTRIAL MICROBIOLOGY	CO1	Educating concepts and techniques currently used in the area of Industrial Microbiology.
		CO2	Getting known with industrial methodology
		CO3	Understanding classification of industrial products and their use.
		CO4	Brief idea about statistical analysis of data
		CO5	Getting knowledge related to foodstuffs and contamination of food products.
6	SEMESTER – VI ENVIRONMENTAL MICROBIOLOGY	CO1	Knowledge of environmental factors and pollution issues.
		CO2	Awareness and understanding air microbiology.
		CO3	Recognize the polluted water and treatment using proper methods.
		CO4	Awareness for hygienic practices.
		CO5	Knowledge of environmental factors and pollution issues.

Department of Biotechnology

S.No.	Paper Title	CO	Course Outcomes
1	Semester – I Cell Biology and Genetics	CO1	The basic unit of the organism.
		CO2	To differentiate the organisms by its cell structure.
		CO3	To know Components of the Cell and their

			division.
		CO4	To explain the arrangement of Genes and their interaction.
		CO5	To describe the influence of environment on gene expression.
		CO6	To understand extra nuclear inheritance, linkage & crossing over.
2	Semester – II BIOLOGICAL CHEMISTRY & MICROBIOLOGY	CO1	Explain the definition, Classification, Biological function and interactions of Biomolecules.
		CO2	To analyze and understand the basic concepts of chemical reactions that occurs in living systems.
		CO3	Understanding the importance of High energy compounds, ETC, Synthesis of ATP.
		CO4	Acquire knowledge related to the role of TCA Cycle in central carbon metabolism, importance of Anaplerotic reactions.
		CO5	To isolate microbes from provided samples and perform bacterial cultures in different media.
			Get trained in routine microbiological practices such as sterilization, media preparation, maintenance of microbial cultures, staining etc…
3	Semester – III Molecular Biology & r DNA Technology	CO1	Explain the concepts of DNA replication, DNA damage and repair, and gene expression in eukaryotic and prokaryotic organisms.
		CO2	To understand the steps involved in recombinant DNA technology.
		CO3	Explain the basic principles and, the tools and techniques of Genetic engineering
		CO4	Describe the applications of genetic engineering in various fields.
4	Semester - IV Biostatistics, computer s & bioinformatics	CO1	Knowledge of microbial techniques.
		CO2	Knowledge of bacterial genome replication.
		CO3	Knowledge of creating and recombinant bacteria.
		CO4	Idea to Design the genetically modified organisms.
		CO5	Knowledge of microbial techniques.
5	Semester – V Plant Biotechnology	CO1	Establish different types of plant cultures.
		CO2	Apply the technical skills learnt to establish nurseries for horticultural and agricultural crops.
		CO3	To describe meristem culture and clonal propagation of plants on a commercial scale.
6	Semester – VI Environmental Biotechnology	CO1	Apply the concepts of Biotechnology in Environmental Management.
		CO2	Concept of pollution management.
		CO3	Bioremediation, icrobial Bioremediation.
		CO4	Concept of climate change, Greenhouse gases & Global warming.
		CO5	Conservation of Biodiversity

Department of Mathematics

Year/Semester	Course	CO	Course Outcomes
I/I	Differential and integral calculus	CO1	This course is aimed at exposing the students to some basic notions in differential calculus.
		CO2	By the time students complete the course they realize wide ranging applications of the subject.
I/II	Differential Equations	CO1	The main aim of this course is to introduce the students to the techniques of solving differential equations and to train to apply their skills in solving some of the problems of engineering and science.
		CO2	After learning the course, the students will be equipped with the various tools to solve few types differential equations that arise in several branches of science.
II/I	Real Analysis	CO1	The course is aimed at exposing the students to the foundations of analysis which will be useful in understanding various physical phenomena.
		CO2	After the completion of the course students will be in a position to appreciate beauty and applicability of the course.
II/II	Algebra	CO1	The course is aimed at exposing the students to learn some basic algebraic structures like groups, rings etc.
		CO2	On successful completion of the course students will be able to recognize algebraic structures that arise in matrix algebra, linear algebra and will be able to apply the skills learnt in understanding various such subjects.
III/I	Linear Algebra	CO1	The students are exposed to various concepts like vector spaces, basis, dimension, eigen values etc.

		CO2	After completion of this course students appreciate its interdisciplinary nature.
III/II	Analytical solid geometry	CO1	Students learn to describe some of the surfaces by using analytical geometry.
		CO2	Students understand the beautiful interplay between algebra and geometry.

Department Of Physics

Course Code	Name of the course	CO	Course Outcomes
PHY1	Mechanics	CO1	Students can understand concepts of Vector Analysis, Applications of Mathematical tools in understanding the concepts of Mechanics (gradient of scalar field, divergence and curl of vector fields) Analyze line, surface and volume integrals With this knowledge, students can understand Gauss Divergence theorem, Stokes theorem and Green's theorem, and apply these theorems in relevant situations.
		CO2	Understand the concept of variable mass system and working of multi stage Rockets, collisions in 2d and 3d. Impact parameter and concept of scattering cross section. Understand the analogy between translational and rotational dynamics, and application of both motions simultaneously in analysing rolling with sliding. Euler's equations
		CO3	Understand the concepts of Central forces. Derive Kepler's law and apply to describe the motion of planets and satellite in circular orbit, through the study of law of Gravitation

		CO4	Understand the concept of Relativity, frames of reference, null result of Michelson – Morley Experiment, Lorentz transformations and its consequences, mass energy equivalence. Appreciate the nuances of Special Theory of Relativity (STR)
PHY2	**Thermal Physics**	**CO1**	Know the fundamentals of the kinetic theory of gases, Maxwell-Boltzmann distribution law, Applications of kinetic theory of gases (Transport phenomenon)
		CO2	Understand the basic concepts, laws and applications of thermodynamics. Learn the concept of entropy and the associated theorems, and the thermodynamic potentials, Maxwell's equations and their applications
		CO3	Understand the concepts of Low temperature Physics, understand the concepts of Quantum theory Radiation. Learn about the black body radiations, Stefan- Boltzmann's law, Rayleigh-Jean's law and Planck's law and their significances
		CO4	Understand the concepts of Statistical Mechanics. Learn classical and quantum statistical distributions, viz., the Maxwll- Boltzman, Bose-Einstein and the Fermi-Dirac statistics, and its applications
PHY3	**Electromagnetic Theory**	**CO1**	Understand the concepts of electric flux and Gauss law and its applications. Understand the energy in an electric field, calculation of potential from electric field for a spherical charge distribution
		CO2	Analyse electric field and potential due to magnetic shell and Understand Biot Savart's law and apply it to long straight wire, loop and solenoid. Understand construction and working of Ballistic galvanometer.
		CO3	Understand Faraday's laws and Lenz's law of electromagnetic induction. Review the basic laws of electricity and magnetism, leading to Maxwell's equations and application in electromagnetic waves

		CO4	Understand the concepts of varying and alternating currents, and Resonant circuits. Understand Network theorems
PHY4	**Waves and Optics**	**CO1**	Understand the nature of transverse vibrations of a stretched string and Longitudinal vibrations in bars. Transportation of energy across a boundary in bars and strings
		CO2	Understanding the principle of superposition, Interference and its applications. Newton's rings and its uses. Construction and working of Michelson interferometer
		CO3	Acquire the knowledge of Diffraction and its applications. Able to differentiate Fresnel and Fraunhofer differentiation. Understand the concepts of Phase reversal and zone plate
		CO4	Understanding the difference between polarized and un polarized light, how to get a polarized light and the types of polarized light. Optical Activity and analysis of Laurent's half shade polarimeter.
PHY5(A)	**Paper-V:(A) Modern Physics DSE-1**	**CO1**	Understand the evolution of the Atomic Models, Spectra of different elements. The effect of Electric and Magnetic field on the spectra. Types of Molecular Spectra and the experimental and theoretical understanding of Raman Effect, and experimental arrangement of Raman effect and its applications
		CO2	Understanding the postulates of Quantum Mechanics and limitations of classical Physics. Understanding the deBroglie hypothesis, Heisenbergs Uncertainty Principle with an experiment and an example. Solution of Schrodinger's time dependant and independent wave equations and its applications.
		CO3	Understanding the nucleus and the properties of the nucleus, the models associated with it. Different types of Nuclear Reactions. Analyze the theories behind alpha and beta decays. Different detectors used to detect alpha , beta and gamma radiations
		CO4	Basic understanding of the Crystal Structure and

			experimental study of the crystal structures. Understanding of X-ray diffraction and bonding in crystals.
PHY6(A)	**Paper-VI:(A) Electronics DSE-1**	**CO1**	Understand the band theory of solids, different kinds of diodes and its characteristics, different kinds of rectifiers. Zener diode as voltage regulator
		CO2	Understand the construction of Bipolar junction transistors. Analyse different current components in transistors. Amplifier-frequency response. Concept of feedback and Oscillators
		CO3	Understand the construction and Characteristics of Special devices (Photo diode, Shockley diode, Solar cell, opto coplers, FET, UJT and SCR
		CO4	Understand the concepts of different number systems and numeric conversions from one number system to other number systems. Understand the construction and working of Logic gates and its applications, de Morgan's theorems

Department of Computer Science

S.No.	Paper Title	CO	Course Outcomes
1	Semester -I Programming in C	CO1	Know the fundamentals of computers.
		CO2	Understand applying logical skills for problem solving.
		CO3	Learn C programming language concepts.
		CO4	Apply C programming language concepts for problem solving
		CO5	Gain knowledge in using memory management techniques in c programming
		CO6	Develop modular programming using functions
2	Semester – II Programming in C++	CO1	Know the differences between procedural language and object-oriented languages.
		CO2	Gain knowledge of Object-Oriented Paradigm for problem solving.
		CO3	Will be able to gain practical knowledge of OOP concepts using C++.
		CO4	Apply reusability concepts like inheritance, polymorphism in application development.
		CO5	Use generic programming concepts.
		CO6	Develop modular programming using classes.
3	Semester – III Data Structures and Algorithms	CO1	Implement the basics of data structures in handling real world applications.
		CO2	Represent data using linear data structures such as queues, circular queues, dequeue, priority, queue, and using non-linear data structures such as trees and graphs.
		CO3	Represent and retrieve the data in the form of various non-linear data structures like trees and graphs.
		CO4	Search for data with the help of various searching techniques.
4	Semester – IV Database Management System	CO1	State the importance of DBMS and compare DBMS with traditional file processing.
		CO2	Analyze and design the database that includes E-R model and normalization techniques.
		CO3	Describe query evaluation and query optimization technique.
		CO4	Categorize database recovery techniques and security issues.
5	Semester – V	CO1	Implement OOP concepts using java.

	Object Oriented Programming with Java	CO2	Utilize reusability concepts like inheritance, polymorphism, exception handling.
		CO3	Interface sand packages in application development.
		CO4	Design effective GUI applications.
6	Semester – VI Web technologies	CO1	Design a static web page using HTML Tags, CSS properties, java scripts.
		CO2	Design and develop a dynamic web page using JDBC, XML schema, servlets.
		CO3	Design and develop a web page to access data from the databases using JSP concepts.
		CO4	Design and demonstrate on secured web page with PHP scripting, MySQL.

Department of Statistics

Year/ Semester	Course	CO	Course Outcomes
I/I	DESCRIPTIVE STATISTICS	CO1	Students will acquire knowledge of Statistics and its scope and importance in various areas such as Medical, Engineering, Agricultural and Social Sciences etc.
		CO2	Information about various Statistical organisations in India and their functions for societal developments, central tendency and dispersion etc.
		CO3	Knowledge of various types of data, their organisation and evaluation of summary measures such as measures of central tendency and dispersion etc.
		CO4	Knowledge of other types of data reflecting quality characteristics including concepts of independence and association between two attributes.
I/II	PROBABILITY THEORY AND DISTRIBUTIONS	CO1	Students will acquire ability to distinguish between random and non-random experiments.
		CO2	Knowledge to conceptualise the probabilities of events including frequentist and axiomatic approach. Simultaneously, they will learn the notion of conditional

			probability including the concept of Bayes' Theorem.
		CO3	Knowledge related to concept of discrete and continuous random variables and their probability distributions including expectation and moments.
		CO4	Knowledge of important discrete and continuous distributions such as Binomial, Poisson, Geometric, Negative Binomial and Hyper-geometric, normal, uniform, exponential, beta and gamma distributions.
II/I	STATISTICAL INFERENCE	CO1	The students will acquire Concept of law large numbers and their uses.
		CO2	Concept of central limit theorem and its uses in statistics
		CO3	Concept of random sample from a distribution, sampling distribution of a statistic, standard error of important estimates such as mean and proportions.
		CO4	Knowledge about important inferential aspects such as point estimation, test of hypotheses and associated concepts.
II/II	SAMPLING TECHNIQUES AND DESIGNS OF EXPERIMENTS	CO1	The students shall get basic knowledge of complete enumeration and sample, sampling frame, sampling distribution, sampling and non-sampling errors, principal steps in sample surveys, limitations of sampling etc.
		CO2	Introduced to various statistical sampling schemes such as simple, stratified and systematic sampling.
		CO3	An idea of conducting the sample surveys and selecting appropriate sampling techniques.
		CO4	Knowledge about comparing various sampling techniques.
III/I	TIME SERIES ANALYSIS	CO1	After completion of this course, the students will know about time series data, its applications to various fields and components of time series.
		CO2	Fitting and plotting of various growth curves such as modified exponential, Gompertz and logistic curve.
		CO3	Fitting of trend by Moving Average method
		CO4	Measurement of Seasonal Indices by Ratio-to-Trend, Ratio-to-Moving Average and Link Relative methods.
III/II	VITAL STATISTICS	CO1	After going through this course, the students will have an idea of income distributions and their fitting in real life

			situations.
		CO2	Commonly used measures of demography pertaining to its three basic aspects, viz. the fertility, mortality and migration.
		CO3	Various data collection methods enabling them to have a better insight in policy making, planning and systematic implementation.
		CO4	Construction and implication of life tables.

Data Science

S.No.	Paper Title	CO	Course Outcomes
1	Semester – I Fundamentals of Computers	CO1	Know the fundamentals of computers
		CO2	Understand applying logical skills for problem solving
		CO3	Learn C programming language concepts
		CO4	Apply C programming language concepts for problem solving
		CO5	Gain knowledge in using memory management techniques in C programming
		CO6	Develop modular programming using functions
2	Semester – II Python Programming	CO1	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations
		CO2	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
		CO3	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.
		CO4	Apply reusability concepts like inheritance, polymorphism in application development.
3	Semester – III	CO1	Understand and apply fundamental principles, concepts and methods in critical areas of science and multidisciplinary fields

	Data Engineering with Python	CO2	Demonstrate problem-solving, analytical and logical skills to provide solutions for scientific requirements.
		CO3	Develop critical thinking with scientific temper
		CO4	Communicate the subject effectively
		CO5	Understand the importance and judicious use of technology for the sustainable growth of humanity in synergy with nature.
		CO6	Understand professional, ethical, and social responsibilities.
4	Semester - IV **Machine Learning**	CO1	Develop an appreciation for what is involved in Learning models from data
		CO2	Understand a wide variety of learning algorithms
		CO3	Understand how to evaluate models generated from data
		CO4	Apply the algorithms to a real problem, optimize the models learned and report on the expected accuracy that can be achieved by applying the models
5	Semester – V Natural Language Processing	CO1	The ability to formulate mathematical models and problem-solving skills through programming techniques for addressing real-life problems using appropriate knowledge representation, problem-solving, and learning methods.
		CO2	Become familiar with the insights of Artificial Intelligence and Machine Learning towards problem solving, inference, perception, knowledge representation, and
		CO3	Ability to bring out the capabilities for research and development in contemporary issues and to exhibit the outcomes as technical report.
6	Semester – VI Big data	CO1	Understand Big Data and its analytics in the real world
		CO2	Analyze the Big Data framework like Hadoop and NOSQL to efficiently store and process Big Data to generate analytics
		CO3	Design of Algorithms to solve Data Intensive Problems using Map Reduce Paradigm
		CO4	Design and Implementation of Big Data Analytics using pig and spark to solve data intensive problems and to generate analytics
