WEBINAR REPORT

The Department of Economics in association with NSS units organized a Webinar on eve of World Population Day on 11th July 2022 with the theme of '**A World of 8 Billion: Towards a Resilient Future for All — Harnessing Opportunities and Ensuring Rights and Choices for All**', as the human population is set to hit eight billion this year, announced by UNDP.

Webinar through Zoom Meet Link:

The main aim behind celebrating this day is **to make people aware of the increasing global population** which is really very alarming. It was on 11 July 1987 that the world population touched the mark of five billion and since then this day has been celebrated to spread awareness. Hence, The World Population Day is celebrated on **July 11** every year.

OBJECTIVES OF THE PROGRAMME:

1. As an initiative to spread awareness about the importance of population issue across the globe.
2. To understand the effect of over-population on environment and development.

Overpopulation is a major cause of most of the world's problems. Whether it is a question of Food shortage, Lack of drinking water, Energy shortages, Unemployment, Over utilization of natural resources and Environmental degradation. Every country in the world is affected by it or will be.

Partly thanks to the import of goods from abroad, any particular country is able to maintain its own welfare. But this cannot go on in an unlimited way. In fact, the number of inhabitants is rising in every country. The world population is threatening to rise in the next few decades to 8 or 10 billion. There is a good chance that more and more countries will need their own products themselves.

The Webinar on Awareness about increasing global population and its effect on employment and development was inaugurated by inaugural speech of the principal M. Praveena principal (FAC) and a message by IQAC Coordinator A. Vishweshwar Sharma at 1 pm.

The Convener of the webinar Dr. A. Venkatesham introduced the profile of the Resource Person Dr. Shyamu Ganta, Asst. Professor of Economics, Kakatiya Govt. Degree College, Hanamkonda, Warangal, Telangana to the participants.

Dr. Ganta Shyamu started his key note points on the given topic and discussed various issues related to Demographic features of India and world, causes for rapid increase of population, consequences and measures taken by the governments since 1952 and how the increasing population growth was controlled and stabilized.

Teachers and student participants interacted with the resource person on population issues and made this webinar big success. The programme concluded by proposing vote of thanks at the end of the webinar by Annapurna, Asst. Professor.
