11. madiha
12. nazia

Clean & Green Program

23/08/2017

The members of Eco-club and the students of B.Z.C{II& III} group Initiated the clean & Green Programs in the college Campus. The main aim of program was to make the College Campus Clean & Keep it healthy. Unnecessary weeds had been removed and the soil is lined up with proper water to make it healthy for plantation...

2018-2019

Eco Club Hazards of Plastic bag.

The members of eco club and the students of B.ZC II year participated enthusiastically in the removal of plastic bags polythene cover from the college campus. They enlighten the other students about the hazards of Polythene bags. As plastic highly affects the soil fertility. Plastic carry bags are manufactured using organic, inorganic additives like Colorants and pigments. These colorants are carcinogenic and cause contamination of food.

Eco Club

29/08/2018

Plantation of Rose twigs

Plantation of eco club and the BZC students initiated the plantation of rose twigs in front of botany department. different types of rose plants have planted. Majority of science stream BZC and Bt.B.C students donated the rose plants for the plantations. Staff of college also contributed some plants. The total front area of botany department in filled with the department varieties of roses.

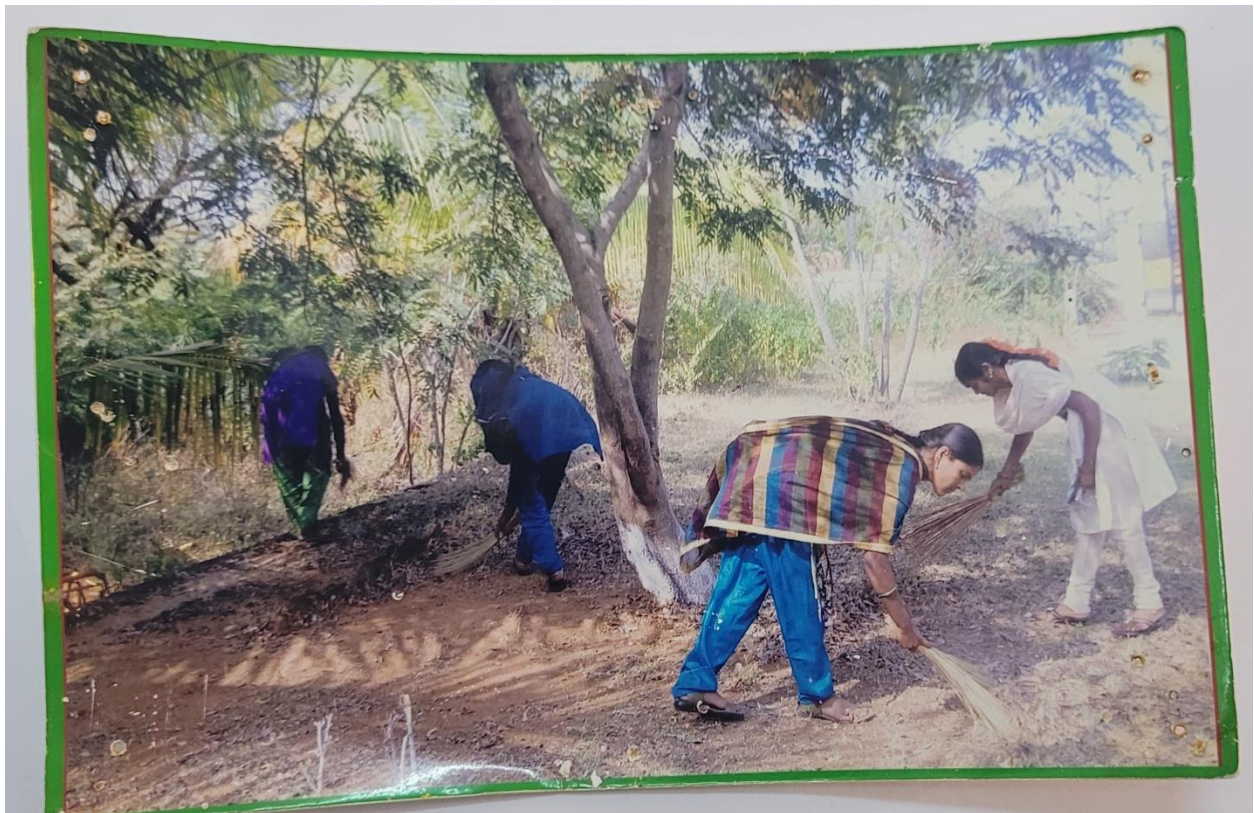

2019-2020

Clean and Green

30/07/2019

The members of eco club and the students of BZC and Bt.B.C actively participated to clean the college campus. As in the starting of the academic year there is more weeds and waste material and garbage which have to be dump outside to keep the college campus clean. All the students took the task to clean the campus and successfully completed the work.

Parthenium free campus and green

The members of eco club and the students of BZC initiated the task to make the parthenium free campus. They removed all weeds and the parthenium from the college campus and burned all collected parthenium plants outside of the college. As parthenium is very dangerous and it can cause respiration problems.

GOVERNMENT DEGREE COLLEGE, SIDDIPET (AUTONOMOUS)

ECO CLUB ACTIVITIES 2020-21

Clean and Green Activity and Plantation

The Department of Botany & Eco Club jointly conducted Clean & Green activity along with plantation of saplings in the college premises on 10.02.2021. All the faculty members of Botany Department, NSS program officers, Eco Club members and non-teaching staff actively participated in this program. Due to the pandemic, only a few students of BSC BZC II Yr local and native students hailing from Siddipet town participated in the program.

The main aim of this program is to enhance the soil fertility and maintain the soil for the Plantation. For this purpose, students first cleaned the front area of Botany Department and plowed the selected area. Then the Plantation of different plant species took place.

The Head Department of Botany Mr M. Shyam sundar, staff of Botany Department Dr A Shailaja, Dr K Rani and Meraj Fatima guided the students during the entire program.
