REPORT

The workshop "Cyber Crimes: Issues and Challenges" Enlightens the participants on how the cyber crimes are usually committed and what are the precautions to be followed while using the technology. Everybody has to update ourselves with the changing technology otherwise we will be outdated. But every updation or advancement has both pros and cons but the thing is if used positively gives good results, if used negatively gives adverse results. All the information passed through Social Media may not be true. Social Media must be used only where ever necessary. Excessive usage of anything has harmful effects. All the students must learn advance technology and use it only for the self development and for the development of nation. Only those Apps which are necessary are to be downloaded and used. Avoid down loading unnecessary Apps. Many Changes take place in technology. These are to be observed by the users while using the Apps. A Power Point presentation is given on how the crimes are committed through online.

=>Any computer related offence or misuse or abuses of computer such as hacking, manipulation, of electronic information, breach of confidentiality etc, are called "cyber crimes".

Like other offence they are punishable under the Indian penal code.

=>Normally computer crimes are in three ways.

1. The computer as a target - attacking the computer of others.

Ex: spreading viruses

2. The Computer as a weapon - using a computer to commit - "Traditional Crime".

Ex: Illegal Gambling

3. The Computer as an accessory - using computer as a "fancy feeling cabinet".

Ex: Store illegal or store information illegal

PRINCIPAL

=>**Cyber crime usually includes** – “unauthorized access of the computers, data bidding, and virus/worms attacks. Thefts of computer system, hacking, denial of attacks, Trojan attacks, internet time theft, web jacking, email bombing, salami attacks, physically damaging computer system.

(Source: Legal Service India.com)

=>section 65 to section 78 of the information technology Act deal with the penalties for cyber crimes.

=>The Information technology Act came into being with effect from 17th October, 2000.

The Act aims to regulate the use of computer, computer systems and computer networks.
